An investigation of air solubility in Jet A fuel at high pressures
[NASA-CR-154170] p0344 N81-21211
Wing spillage tests using antimisting fuel
[AD-A096326] p0344 N81-21215
Investigation of air solubility in jet A fuel at high pressures
[NASA-CR-3422] p0378 N81-22130
Effect of hydroprocessing severity on characteristics of jet fuel from OSCO 2 and Paraho distillates
[NASA-TP-1760] p0436 N81-24283
The 1H and 13C fourier transform NMR characterization of jet fuels derived from alternate energy sources
[AD-A098305] p0437 N81-24284
Aviation turbine fuels 1980
[DOE/BETC/PPS-81/2] p0445 N81-25255
Behavior of fuels at low temperatures
[AD-A100332] p0542 N81-28276
Fuel microemulsions for jet engine smoke reduction
[AD-A100489] p0542 N81-28277
Application of General Technology Applications, Incorporated (GTA) blending process to antimisting fuel additives
[AD-A100692] p0551 N81-29247
Hydrocarbon type analysis of jet fuels by H-1 and C-13 NMR
[DOE/LETC/RI-81/1] p0551 N81-29260
Ultrasonic dispersion of particulate high density fuels
[AD-A102771] p0630 N81-32290

Axial flow compressors. Citations from the NTIS data base
[PB80-808603] p0031 N81-10441
Alternatives for jet engine control
p0080 N81-12103
USAF Aircraft Engine emission goals, a critical review
[AD-A090282] p0087 N81-12651
Shear layer instability noise produced by various jet nozzle configurations
[PNR-90018] p0088 N81-12825
Are management problems in the acquisition of aircraft gas turbine engines being corrected
[AD-A090520] p0088 N81-12928
An evaluation of wind tunnel test techniques for aircraft nozzle afterbody testing at transonic Mach numbers
[AD-A091775] p0126 N81-13931
Prediction of sound radiated from different practical jet engine inlets
[NASA-CR-163824] p0137 N81-14789
Validation of a two dimensional primitive variable computer code for flow fields in jet engine test cells
[AD-A092138] p0196 N81-16060
Composite containment systems for jet engine fan blades
[NASA-TM-81675] p0220 N81-17480
Validation of a two-dimensional primitive variable computer code for flow fields in jet engine test cells
[AD-A094615] p0254 N81-18067
On the influence of steady state temperature and pressure distortion on the flow characteristics in an installed multistage jet engine compressor --- heated intake air
[PNR-90022] p0275 N81-19126
Issues of commonality. Volume 2: Issue analysis
[AD-A095418] p0331 N81-20046
Issues of commonality. Volume 1: Executive summary
[AD-A095417] p0331 N81-20047
The optimum design of by-pass engines with jet mixing
[PNR-90017] p0335 N81-20081
Electromagnetic scattering by open circular waveguides --- modeling jet engine inlets
[AD-A095554] p0336 N81-20345
Fuel/engine/airframe trade off study
[AD-A097391] p0388 N81-23073
Investigations of free-jet test requirements and techniques with emphasis on the adaptable jet stretcher
[AD-A098710] p0439 N81-25044
JT9D performance deterioration results from a simulated aerodynamic load test
[NASA-TM-82640] p0443 N81-25082
Selected results from combustion research at the Lewis Research Center
[NASA-TM-82627] p0443 N81-25083
Contribution to the study of nonstationary signals emitted by moving jet engines: Application to spectral analysis and imaging. Part 2
p0447 N81-26013
Prediction of sound radiation from different practical jet engine inlets
[NASA-CR-164620] p0500 N81-27886
From the civil component program 'IPAS': Fundamentals of engine simulation, using turbopowered simulator (TPS) technology in wind tunnel tests
[BMFT-FB-W-80-030] p0541 N81-28111
CF 6 engine diagnostics
p0597 N81-31197
CF6 high pressure compressor and turbine clearance evaluations
p0598 N81-31198
JT9D jet engine diagnostics program
p0598 N81-31199
Development of an analytical technique for the optimization of jet engine and duct acoustic liners
[NASA-CR-164872] p0639 N81-33205

JET EXHAUST
On screeching jets exhausting from an axisymmetric supersonic nozzle
p0008 A81-11616
Vector and scalar characteristics of opposing jets discharging normally into a cross-stream
p0110 A81-17997
Solutions for slightly over- or under-expanded hot supersonic jets exhausting into cold subsonic mainstreams
[AIAA PAPER 81-0257] p0163 A81-20705
Aircraft NO/x/ emissions and stratospheric ozone reductions - Another look
[AIAA PAPER 81-0306] p0164 A81-20741
Test facility for the measurement of infrared radiation from jet engine exhaust systems
p0462 A81-39503
Runway and deck temperatures in vertical takeoff/landing operations
[AIAA PAPER 81-1623] p0525 A81-43132
Noise shielding by a hot subsonic jet
[AIAA PAPER 81-2018] p0624 A81-49731
An improved prediction method for noise generated by conventional profile coaxial jets
[AIAA PAPER 81-1991] p0624 A81-49743
Trace chemical analysis methodology
[AD-A090762] p0083 N81-12191
Impact of aircraft emissions on air quality in the vicinity of airports. Volume 2: An updated model assessment of aircraft generated air pollution at LAX, JFK and ORD
[AD-A091005] p0096 N81-13545
Organic compounds in the exhaust of a J85-5 turbine engine
[AD-A091712] p0130 N81-13966
Effects of sidewall geometry on the installed performance of nonaxisymmetric convergent-divergent exhaust nozzles
[NASA-TP-1771] p0165 N81-15976
Impact of aircraft emissions on air quality in the vicinity of airports. Volume 1: Recent airport measurement programs, data analyses, and submodel development
[AD-A089962] p0201 N81-16628
Advanced technology for controlling pollutant emissions from supersonic cruise aircraft
p0246 N81-18004
Flap survey test of a combined surface blowing model: Flow measurements at static flow conditions
[NASA-CR-152124] p0423 N81-24023
Axisymmetric & non-axisymmetric exhaust jet induced-effects on a V/STOL vehicle design. Part 1: Data presentation --- conducted in Ames 11-foot transonic tunnel
[NASA-CR-166146] p0441 N81-25064

JET FLAMES
U JET FLOW

JET FLAPS
Flight test of the 747-JT9D for airframe and jet-flap interaction noise
[AIAA PAPER 81-2037] p0620 A81-48629
Analytical study of STOL Aircraft in ground effect. Part 1: Nonplanar, nonlinear wing/jet lifting surface method
[NASA-CR-152087-PT-1] p0271 N81-19096
A study of a VTOL thrusting ejector in low speed flight, volume 1
[NASA-CR-166137-VOL-1] p0337 N81-21017

A study of a VTOL thrusting ejector in low speed flight, volume 2
[NASA-CR-166137-VOL-2] p0337 N81-21018
JET FLIGHT
U JET AIRCRAFT
JET FLOW
NT AIR JETS
NT PERIPHERAL JET FLOW
NT SUPERSONIC JET FLOW
Instantaneous velocity measurements in a periodically pulsed plane turbulent jet
p0066 A81-15895
Numerical calculation of jet-induced ground effect in VTOL
[AIAA PAPER 81-0015] p0157 A81-20539
Experiments on the linear and non-linear evolution of the double helical instability in jets
[AIAA PAPER 81-0415] p0168 A81-20818
Perspectives on jet noise
[AIAA PAPER 81-0428] p0168 A81-20829
Drag reduction - Jet breakup correlation with kerosene-based additives
p0225 A81-23923
A computer simulation of turbulent jet flow
p0230 A81-24424
The effect of jet non-uniformity on the lift of an augmentor wing
p0298 A81-29144
Roll length of an annular underexpanded jet formed by a sonic nozzle with cylindrical rod on its axis
p0309 A81-29867
Prediction of flyover jet noise spectra
[AIAA PAPER 81-2025] p0618 A81-48610
Noise radiated from inverted velocity profile jets under simulated flight
[AIAA PAPER 81-2026] p0623 A81-49729
Effect of a semi-annular thermal acoustic shield on jet exhaust noise
[NASA-TM-81615] p0044 N81-11770
Static source locations for four nozzles mounted on a J-85 engine
[NASA-CR-152401] p0143 N81-14998
Jet wing interaction to give improved combat performance
p0188 N81-16007
Jet wing interference for an overwing engine configuration
p0188 N81-16008
Method for predicting the jet-induced aerodynamics of V/STOL configurations in transition
[AD-A097356] p0385 N81-23043
Fountain-jet turbulence
[AD-A098098] p0423 N81-24028
An engineering method for estimating the induced lift on V/STOL aircraft hovering in and out of ground effect
[AD-A098509] p0441 N81-25069
Evaluation of Ting's method for the calculation of the lift distribution on a wing in propulsive jets
[NLR-TR-80078-U] p0594 N81-31157
JET FUELS
U JET ENGINE FUELS
JET IMPINGEMENT
An experimental investigation of jet screech by air jet impingement on solid boundaries
p0005 A81-11302
Numerical calculation of jet-induced ground effect in VTOL
[AIAA PAPER 81-0015] p0157 A81-20539
Heat transfer from a row of impinging jets to concave cylindrical surfaces
p0231 A81-24924
Streamwise flow and heat transfer distributions for jet array impingement with crossflow
[ASME PAPER 81-GT-77] p0313 A81-29985
Interaction of a gas jet from a jet engine with the destroyed surface of a multiphase disperse medium
p0319 A81-30152
Wind-tunnel tests of engine-equipped models - Comparison of two jet wash simulation methods
[ONERA, TP NO. 1981-42] p0460 A81-39245
Vertical momentum of the fountain produced by multijet vertical impingement on a flat ground plane
p0529 A81-43396
Investigation of impingement region and wall jets formed by the interaction of high aspect ratio lift jets and a ground plane
[NASA-CR-152174] p0261 N81-19017
Simulation of aeroheating or aerocooling Air Force stores by arrays of impinging jets
[AD-A095464] p0330 N81-20034
JET LIFT
Vertical momentum of the fountain produced by multijet vertical impingement on a flat ground plane
p0529 A81-43396
JET MIXING FLOW
Solutions for slightly over- or under-expanded hot supersonic jets exhausting into cold subsonic mainstreams
[AIAA PAPER 81-0257] p0163 A81-20705
Non-isoenergetic turbulent jet mixing in a constant area duct --- in turbofan engines
[AIAA PAPER 81-0347] p0165 A81-20768
Partially confined multiple jet mixing
p0234 A81-25513
Cooperative investigation of the noise producing region of an axisymmetric jet
[AD-A089692] p0045 N81-11774
Turbulence modeling for application to V/STOL propulsion induced effects: Two dimensional formulation
[AD-A090331] p0072 N81-12026
The optimum design of by-pass engines with jet mixing
[PNR-90017] p0335 N81-20081
JET NOISE
U JET AIRCRAFT NOISE
JET NOZZLES
On screeching jets exhausting from an axisymmetric supersonic nozzle
p0008 A81-11616
Effect of a semi-annular thermal acoustic shield on jet exhaust noise
p0178 A81-22532
The method for calculating the fuel concentration field in the downstream positions of the pressure jet atomizer in the high temperature gas-stream
p0224 A81-23731
Noise characteristics of two parallel jets with unequal flow
[AIAA PAPER 80-0168] p0354 A81-31601
Jet-diffuser ejector - Attached nozzle design
[NASA-CR-152361] p0278 N81-19412
JET PILOTS
U AIRCRAFT PILOTS
JET PROPULSION
Quiet propulsive-lift technology ready for civil and military applications
p0359 A81-32521
Simulating study of the interaction between the propulsion and flight control systems of a subsonic lift fan VTOL
[NASA-TM-81239] p0036 N81-11083
Evaluation of Levinsky's method for the calculation of the lift distribution on a wing in propulsive jets
[NLR-TR-77104-U] p0073 N81-12033
Advanced subsonic transport propulsion
[NASA-TM-82696] p0597 N81-31195
JET STREAMS (METEOROLOGY)
CAT altitude avoidance system
[NASA-CASE-NPO-15351-1] p0202 N81-16677
JET THRUST
Experimental development of an advanced circulation control wing system for Navy STOL aircraft
[AIAA PAPER 81-0151] p0161 A81-20632
Jet noise suppression for low bypass engines - Have we reached a dead end
p0291 A81-29063
Experimental investigation of oscillating subsonic jets
p0360 A81-32777
Prediction of swirling reacting flow in ramjet combustors
[AIAA PAPER 81-1485] p0506 A81-40903
Flight evaluation of a simplified gross thrust calculation technique using an F100 turbofan engine in an F-15 airplane
[NASA-TP-1782] p0143 N81-15000
Comparison of three thrust calculation methods using in-flight thrust data
[NASA-TM-81360] p0581 N81-30111

JET VANES
Boron aluminum blades and vanes
[AIAA PAPER 81-1359] p0502 A81-40840
JETAVATORS
U GUIDE VANES
JETTISON SYSTEMS
Microprocessor control of lamps MK III /Seahawk/ helicopter sonobuoy launcher system
[AHS 80-20] p0474 A81-40150
Ergonometric study of ejection through a breakable canopy
p0205 N81-17011
Explosively activated egress area
[NASA-CASE-LAR-12624-1] p0546 N81-29107
AH-1 lightweight airborne launcher jettison evaluation
[AD-A101461] p0582 N81-30119
JETTISONING
Fuel jettisoning by U.S. Air Force aircraft. Volume 1: Summary and analysis
[AD-A089010] p0032 N81-10580
Fuel jettisoning by U.S. Air Force aircraft. Volume 2: Fuel dump listings
[AD-A089076] p0032 N81-10581
JF 101 AIRCRAFT
U F-101 AIRCRAFT
JINDIVIK TARGET AIRCRAFT
Transonic wind tunnel measurements of tailplane and elevator effectiveness of the Jindivik 203B target aircraft
[AD-A098180] p0424 N81-24031
JITTER
U VIBRATION
JOINING
Classification of links of assembly units with respect to the character of their connections, and calculation of the accuracy of their execution --- in airframe construction
p0319 A81-30168
JOINTS (JUNCTIONS)
NT METAL JOINTS
NT RIVETED JOINTS
Non-destructive testing of adhesive-bonded joints
p0153 A81-20162
The joints of aeronautical carbon resin composite structural elements
p0238 A81-26242
Bolt bearing strengths of graphite/epoxy laminates
[AIAA 81-0544] p0301 A81-29396
A fatigue study and an investigation on mechanically fastened joints for the development of a flap
p0481 A81-40581
Elastomers used in aeronautics industry
[SNIAS-801-551-105] p0031 N81-10168
Sealing joints and cracks, thin resurfacing, and locating voids under concrete slabs
[PB80-215635] p0132 N81-14182
Design, fabrication and test of graphite/polyimide composite joints and attachments for advanced aerospace vehicles
[NASA-CR-159112] p0194 N81-16042
Scarf joints in unidirectional carbon fiber reinforced plastics --- tests of repairs made using adhesives
[BU-258] p0336 N81-20193
Thirty years experience with primary adhesive bonded structures --- aircraft construction
[FOK-BO-1240] p0541 N81-28189
Nondestructive testing of adhesive bonded joints
[FOK-BO-1241] p0542 N81-28190
Operational experience with adhesive bonded structures --- aircraft structures
[FOK-BO-1235] p0582 N81-30124
JOURNAL BEARINGS
An analytical method to calculate misalignment in the journal bearing of a planetary gear system
p0004 A81-10839
An experimental and theoretical investigation of pressures in four-lobe bearings
p0004 A81-10840
On the steady state and dynamic performance characteristics of floating ring bearings
[ASME PAPER 80-C2/LUB-17] p0117 A81-18671
Dynamic characteristics of a high-speed rotor with radial and axial foil-bearing supports
[ASME PAPER 80-C2/LUB-35] p0117 A81-18683
Nonlinear analysis of squeeze film dampers applied to gas turbine helicopter engines
[AD-A091905] p0196 N81-16062
JOURNALS (SHAFTS)
U SHAFTS (MACHINE ELEMENTS)
JP-4 JET FUEL
Fuel/engine/airframe trade off study
[AD-A097391] p0388 N81-23073
JP-5 JET FUEL
Acceptability of shale derived fuel for Navy aircraft propulsion systems
[AIAA PAPER 81-1424] p0503 A81-40868
Two-stage combustion for reducing pollutant emissions from gas turbine combustors
[NASA-CR-163877] p0196 N81-16056
Effect of refining variables on the properties and composition of JP-5
[AD-A093842] p0219 N81-17281
JP-8 JET FUEL
Fuel/engine/airframe trade off study
[AD-A097391] p0388 N81-23073

K

KALMAN FILTERS
Some implementation considerations for numerically stable flight filters
p0156 A81-20485
The reconstruction/refiltering approach to Kalman filter evaluation --- in long-range aircraft avionics
p0326 A81-30339
Implementation of target orientation angles in improved Kalman filter based short range radar tracking
p0326 A81-30340
Dynamic errors of the Kalman filtering of trajectory parameters --- for radar tracking of aircraft maneuvers
p0366 A81-33687
Optimal processing of GPS signals
p0512 A81-41761
DEKFIS user's guide: Discrete Extended Kalman Filter/Smoother program for aircraft and rotorcraft data consistency
[NASA-CR-159081] p0379 N81-22722
The reconstruction of flight paths from AIDS data with the aid of modern filtering methods --- kalman filters
p0383 N81-23021
A Kalman filter approach to navigation on the NAE Convair 580 aeromagnetics research aircraft
[AD-A100836] p0547 N81-29116
KARMAN VORTEX STREET
An example of the transonic flow past a body with a discontinuity in the contour curvature
p0019 A81-12367
KC-130 AIRCRAFT

LEADING EDGE SWEEP
Effect of sweep and aspect ratio on the longitudinal aerodynamics of a spanloader wing in and out of ground effect --- wind tunnel tests
[NASA-TM-80199] p0627 N81-32119

LEADING EDGE THRUST
Supersonic wings with significant leading-edge thrust at cruise
p0244 N81-17990

LEADING EDGES
NT SHARP LEADING EDGES
Optimizing the fixed leading edge shape of a transonic wing to suit the landing high-lift requirements
p0011 A81-11644
Simplified vortex models for slender lifting surfaces with leading edge separation
p0016 A81-11777
Numerical prediction of vortex cores of the leading and trailing edges of delta wings
p0059 A81-14475
Numerical lifting line theory applied to drooped leading-edge wings below and above stall
p0066 A81-15881
On a linear theory of a supersonic flow past a delta wing with subsonic leading edges
p0149 A81-19872
Icing tunnel tests of a glycol-exuding porous leading edge ice protection system on a general aviation airfoil
[AIAA PAPER 81-0405] p0168 A81-20837
Role of laminar separation bubbles in airfoil leading-edge stalls
p0354 A81-31613
Leading-edge separation from a thick, conical, slender wing at small angles of incidence
p0355 A81-31687
Applications of dynamic stability parameters to problems in aircraft dynamics
p0410 A81-35552
Calculation of supersonic flow around a wing with constant curvature of its leading edges
p0413 A81-35916
Transonic swept wings studied by the lifting-line theory
p0509 A81-41090
The influence of leading-edge thrust on twisted and cambered wing design for supersonic cruise
[AIAA PAPER 81-1656] p0526 A81-43146
Investigations of vortex formation on wings with cropped leading edges
[DGLR PAPER 81-046] p0610 A81-47601
Experimental study of supersonic viscous leeside flow over a slender delta wing
[NASA-TM-81248] p0133 N81-14265
Leading-edge deflection optimization for a highly swept arrow wing configuration
[NASA-TP-1777] p0139 N81-14974
An investigation of a swept wing-body configuration with drooped leading edge at low and transonic speeds
p0189 N81-16012
Natural laminar flow flight experiment --- Langley 8-Foot Transonic Pressure Tunnel
p0260 N81-19010
Study of the vortex conditions of wings with large sweepback by extrapolation of the Jones method
[NASA-TM-75863] p0262 N81-19026
Leading-edge separation from a slender rolling wing-body combination --- vortex sheet model
[RAE-TR-80039] p0330 N81-20040
On the role of laminar separation bubbles in airfoil leading edge stalls
[NLR-MP-80010-U] p0339 N81-21042
Design and experimental results for a natural-laminar-flow airfoil for general aviation applications
[NASA-TP-1861] p0423 N81-24022
Aerodynamic investigation of C-141 leading edge modifications for cruise drag reduction, test 2
[AD-A099662] p0492 N81-27051

Investigation of aerodynamic stall alleviation on a swept planform wing using leading edge modifications
[AD-A101239] p0548 N81-29122
MM&T: Low cost production/installation of urethane leading edge guards on rotor blades
[AD-A101603] p0582 N81-30117

LEAKAGE
Rotor-tip leakage. I - Basic methodology
[ASME PAPER 81-GT-71] p0313 A81-29980
Rotor-tip leakage. II - Design optimization through viscous analysis and experiment
[ASME PAPER 81-GT-72] p0313 A81-29981

LEAR JET AIRCRAFT
Lear fan propulsion system
[SAE PAPER 800609] p0062 A81-15332
Aircraft accident report: Champion Home Builders company, Gates Learjet 25D, N999HG, Sanford, North Carolina, September 8, 1977
[NTSB-AAR-79-15] p0074 N81-12046

LEARNING
NT TRANSFER OF TRAINING

LEAST SQUARES METHOD
Output predictive algorithmic control - Precision tracking with application to terrain following
p0564 A81-45573
An analytical technique for approximating unsteady aerodynamics in the time domain
[NASA-TP-1738] p0043 N81-11422

LED (DIODES)
U LIGHT EMITTING DIODES

LEGENDRE CODE
U COMPUTER PROGRAMMING

LENGTH
A method for determining landing runway length for a STOL aircraft
p0264 N81-19041

LENSES
NT FRESNEL LENSES
Optical infinity lens development for flight simulator visual displays
p0212 N81-17071

LETTERS (SYMBOLS)

Application of fracture mechanics to US Air Force aircraft structural integrity requirements
[AAAF-NT-79-25] p0086 N81-12463
Combustor liner durability analysis
[NASA-CR-165250] p0213 N81-17079
Derivation and correlation of accelerated mission endurance testing
p0431 N81-24088
An introduction to NASA's turbine engine hot section technology (HOST) project
p0599 N81-31206

LIFE CYCLE COSTS
ECS integration for fuel efficient/low life cycle cost design --- Environmental Control Systems in aircraft
p0015 A81-11676
Standardization in military system architecture
p0050 A81-13168
Development of specifications from measured environments
p0067 A81-16119
The engineering basis for the application of life cycle cost or supportability criteria to gas turbine engines
p0298 A81-29119
Engine maintenance cost calculation method
[ASME PAPER 81-GT-34] p0312 A81-29948
Life cycle cost before, during and after the design of aircraft propulsion systems
[ASME PAPER 81-GT-111] p0315 A81-30016
Implementing Aircraft Structural Life Management to reduce structural cost of ownership
[SAWE PAPER 1331] p0352 A81-31376
The Modular Life Cycle Cost Model for advanced aircraft systems - An overview
[SAWE PAPER 1351] p0353 A81-31386
Component research for future propulsion systems
p0454 A81-38050
Design of rotorcraft powerplants - Use of life cycle costing as an aid to design optimisation
p0469 A81-40109
An integrated transportation and operations comparison of space and ground based OTV's
[AIAA PAPER 81-1456] p0505 A81-40882
Advanced technology engine studies /ATES/ - A status report
[AIAA PAPER 81-1502] p0516 A81-42205
Avionics Availability Study
[AIAA PAPER 81-1619] p0525 A81-43129
Investigation of influences on the definition of engine usage for future systems
[AIAA PAPER 81-1652] p0533 A81-43938
Maintenance and repair of advanced composite structure
p0558 A81-44302
Nonhoneycomb composite skin stabilization - A solution to high costs of maintenance
p0559 A81-44396
Aircraft turbine engine monitoring experience. An overview and lessons learned from selected case studies
[AD-A089752] p0036 N81-11042
Design to Cost and Life Cycle Cost
[AGARD-CP-289] p0045 N81-11902
Life Cycle Cost Analysis (LCCA) in military aircraft procurement
p0045 N81-11903
US Army design-to-cost experience
p0045 N81-11905
A review and assessment of system cost reduction activities
p0045 N81-11906
Design to life cycle cost research
p0045 N81-11907
Evolution of techniques for LCC analysis
p0045 N81-11909
The Hornet program: A design to life cycle cost case study
p0046 N81-11910
Design to cost and the F-16 multirole fighter
p0046 N81-11911
Organizing a design-to-cost program
p0046 N81-11914
Some engineering aspects of life cycle costing
p0047 N81-11918
Balanced design: Minimum cost solution
p0047 N81-11919
Design to cost and systems, LCC
p0047 N81-11920
Impact of maintainability of life cycle costs

LIFT
NT INTERFERENCE LIFT
NT JET LIFT
NT ZERO LIFT
Numerical lifting line theory applied to drooped leading-edge wings below and above stall
p0066 A81-15881
Lift effect on transonic wind-tunnel blockage
p0066 A81-15883
Angle of attack - Its measurement and usage. I
p0149 A81-19799
Experimental development of an advanced circulation control wing system for Navy STOL aircraft
[AIAA PAPER 81-0151] p0161 A81-20632
An approximate analytical method for vortex-lift and centre of pressure on the slender wing
p0223 A81-23726
On the unsteady wake-induced lift on a slotted airfoil. II - The influence of displacement thickness fluctuations
p0229 A81-24237
Wing flapping with minimum energy
p0283 A81-27889
The effect of jet non-uniformity on the lift of an augmentor wing
p0298 A81-29144
Wing-body carryover at supersonic speeds with finite afterbodies
p0354 A81-31622
Quiet propulsive-lift technology ready for civil and military applications
p0359 A81-32521
A comparison of propulsion systems for V/STOL supersonic combat aircraft
[SAE PAPER 801141] p0398 A81-34171
Spanwise lift distribution of forward-and aft-swept wings in comparison to the optimum distribution form
p0453 A81-38017
Aerodynamic features of designed strake-wing configurations
[AIAA PAPER 81-1214] p0454 A81-38088
Quasi-hybrid airships
[AIAA 81-1333] p0456 A81-38538
The calculation of lift and drag characteristics of subsonic wings with winglets
p0480 A81-40442
Airfoils for light transport aircraft
[SAE PAPER 810576] p0519 A81-42740
Summary of high-lift and control surface research on NASA general aviation airfoils
[SAE PAPER 810629] p0524 A81-42781
The use of direct lift control of an aircraft in a guided landing run
p0624 A81-43928
Experimental and theoretical aerodynamic characteristics of two hypersonic cruise aircraft concepts at Mach numbers of 2.96, 3.96, and 4.63
[NASA-TP-1767] p0072 N81-12021
Evaluation of Lewinsky's method for the calculation of the lift distribution on a wing in propulsive jets
[NLR-TR-77100-U] p0073 N81-12033
Unsteady pressure distributions on airfoils in cascade
[AD-A091173] p0090 N81-13033
The high lift characteristics in the case of the v-wing concept
[NASA-TM-75872] p0253 N81-18061
Basic research in wake vortex alleviation using a variable twist wing
p0267 N81-19058
An asymptotic unsteady lifting-line theory with energetics and optimum motion of thrust-producing lifting surfaces
[NASA-CR-165679] p0385 N81-23035
Design and experimental results for a natural-laminar-flow airfoil for general aviation applications
[NASA-TP-1861] p0423 N81-24022
Comparison of selected lift and sideslip characteristics of the Ayres Thrush S2R-800, winglets off and winglets on, to full-scale wind-tunnel data
[NASA-CR-165710] p0423 N81-24026
An engineering method for estimating the induced lift on V/STOL aircraft hovering in and out of ground effect
[AD-A098509] p0441 N81-25069
Prediction of transonic flutter for a supercritical wing by modified strip analysis and comparison with experiment
[NASA-TM-83126] p0445 N81-25432
Preliminary design of a tip-jet-driven heavy lift helicopter incorporating circulation control
[AD-A099192] p0486 N81-26120
Evaluation of Ting's method for the calculation of the lift distribution on a wing in propulsive jets
[NLR-TR-80078-U] p0594 N81-31157
LIFT AUGMENTATION
Circulation Control Wing /CCW/ flight tests
p0122 A81-19469
An analytical solution of lift loss for a round planform with a central lifting jet
[AIAA PAPER 81-0011] p0157 A81-20535
Some recent applications of high-lift computational methods at Boeing
[AIAA PAPER 81-1657] p0534 A81-43940
Lift-enhancing surfaces on several advanced V/STOL fighter/attack aircraft concepts
[AIAA PAPER 81-1675] p0534 A81-43946
Downwash calculation at close range behind a trapezoidal wing in supersonic flow
[FFA-TN-AU-1661] p0125 N81-13925
Feasibility study for C-141B reduction of wing loads by uprigging the ailerons
[AD-A094634] p0272 N81-19105
High lift technology
p0593 N81-31147
Evaluation of pressure and thermal data from a wind tunnel test of a large-scale, powered, STOL fighter model
[NASA-CR-166170] p0635 N81-33162
LIFT COEFFICIENTS
U AERODYNAMIC COEFFICIENTS

LIFT DEVICES
High lift research and its application to aircraft design
p0011 A81-11642
Leading edge high lift devices for agricultural aircraft
[SAE PAPER 810608] p0522 A81-42765
Design, analyses, and model tests of an aeroelastically tailored lifting surface
[AIAA PAPER 81-1673] p0566 A81-45974
A higher-order trapezoidal vector vortex panel for subsonic flow
[AD-A094775] p0263 N81-19032
A study of high-altitude manned research aircraft employing strut-braced wings of high-aspect-ratio
[NASA-CR-159262] p0333 N81-20067

A design of multi-element aerofoils for high lift
[NAL-TR-631] p0337 N81-21012
An asymptotic unsteady lifting-line theory with
energetics and optimum motion of
thrust-producing lifting surfaces
[NASA-CR-165679] p0385 N81-23035
Experimental and theoretical study of three
interacting, closely-spaced, sharp-edged 60 deg
delta wings at low speeds
[NASA-CR-3460] p0635 N81-33160

LIFT DISTRIBUTION
U FORCE DISTRIBUTION
U LIFT

LIFT DRAG RATIO
Calculation of the lift dependent drag polar of
cambered fighter plane configurations with
deflected maneuver flaps in the subsonic region
by means of a modified procedure according to
Lamar
[DGLR PAPER 80-109] p0120 A81-19395
The optimal lift-drag ratio of a civil aircraft
[AAAF PAPER NT 80-35] p0369 A81-33923
Jet wing interaction to give improved combat
performance
p0188 N81-16007
A study of wing body blending for an advanced
supersonic transport
p0244 N81-17987
Analytic development of improved supersonic cruise
aircraft based on wind tunnel data
p0244 N81-17989
Preliminary wind-tunnel investigation of the
effects of engine nacelles on a transport
configuration with high lift drag ratios to a
Mach number of 1.00
[NASA-TM-82312] p0272 N81-19099

LIFT FANS
A design analysis technique for evaluating size
and weight of V/STOL lift fans
[SAWE PAPER 1386] p0354 A81-31402

LIFT FORCES
U LIFT

LIFTING BODIES
Simplified vortex models for slender lifting
surfaces with leading edge separation
p0016 A81-11777
A nonlinear, discrete-vortex-perturbation method
for unsteady lifting-surface problems with edge
separations
p0058 A81-14394
A lifting surface theory for the sound generated
by the interaction of velocity disturbances with
a leaned vane stator
[AIAA PAPER 81-0091] p0160 A81-20595
An analysis of gap effects on wing-elevon
aerodynamic characteristics
[AIAA PAPER 81-0364] p0166 A81-20783
Lifting surface theory and the numerical method of
wings with small angles of sideslip at subsonic
and supersonic speeds
p0224 A81-23851
On the inter-relationship of the basic parameters
and characteristics of various flight vehicles
p0236 A81-25694
On some methods of supersonic unsteady lifting
surface analysis
[AIAA 81-0644] p0307 A81-29497
A hybrid state vector approach to aeroelastic
analysis with application to composite lifting
surfaces
[AIAA 81-0626] p0308 A81-29512
A theoretical treatment of lifting surface theory
of an elliptic wing
p0347 A81-30653
The effects of warhead-induced damage on the
aeroelastic characteristics of lifting surfaces.
Volume 1: Aeroelastic effects
[AD-A091674] p0129 N81-13955
The effects of warhead-induced damage on the
aeroelastic characteristics of lifting surfaces.
Volume 2: Aerodynamic effects
[AD-A093063] p0209 N81-17048

LIFTING ROTORS
NT BEARINGLESS ROTORS
Computer simulation of unsteady flow past lifting
rotors of coaxial configuration
p0230 A81-24389
Recent progress in performance prediction of high
advance ratio circulation controlled rotors
p0468 A81-40100
Computerized three-dimensional aerodynamic design
of a lifting rotor blade
[AHS 80-2] p0473 A81-40137
Wind-tunnel test of an articulated helicopter
rotor model with several tip shapes

Development of maintenance METRICS to forecast
resource demands of weapon systems (parameter
polarization), revision A
[AD-A097692] p0392 N81-23325
Operational and support costs of the Navy's F/A-18
can be substantially reduced
[PB81-160814] p0487 N81-26125
A study of the factors affecting productivity at
the Naval Air Rework Facilities
[AD-A103783] p0631 N81-33134
A prescriptive model for resource allocation at
the intermediate level engine facility
[AD-A103785] p0632 N81-33135
Development of maintenance metrics to forecast
resource demands of weapon systems
[AD-A104089] p0632 N81-33136

LONG RANGE NAVIGATION
U LORAN

LONG TERM EFFECTS
Effects of commercial aircraft operating
environment on composite materials
p0182 A81-22681
Environmental exposure effects on composite
materials for commercial aircraft
[NASA-CR-165649] p0198 N81-16139

LONGITUDINAL CONTROL
A stability augmentation system which covers the
complete flight envelope for a F-4c aircraft
without gain scheduling
p0009 A81-11622
Piloting techniques on the backside - Flight path
angle control
p0171 A81-21673
Analysis of aircraft longitudinal handling qualities
[AIAA 81-1771] p0554 A81-44092
Longitudinal equivalent systems analysis of Navy
tactical aircraft
[AIAA 81-1775] p0554 A81-44094
Modern control synthesis applied to the
longitudinal decoupled motion of an aircraft
[AIAA 81-1839] p0555 A81-44123
Closed-loop criteria for assessing
longitudinal-axis handling qualities of
transports in final approach
[AIAA 81-1773] p0556 A81-44133
A unifying framework for longitudinal flying
qualities criteria
[AIAA PAPER 81-1889] p0561 A81-44580
Inverse problems of guided-flight dynamics -
Longitudinal motion
p0577 A81-46749
Landing flying qualities evaluation criteria for
augmented aircraft
[NASA-CR-163097] p0130 N81-13969
Application of vector performance optimization to
a robust control loop design for a fighter
aircraft
[DFVLR-FB-80-14] p0130 N81-13970
System identification of the longitudinal motion
of the DFVLR HFB 320 research aircraft with
particular consideration of control surface
effectiveness
[DFVLR-MITT-79-16] p0130 N81-13971
Pitch attitude stabilization system utilizing
engine pressure ratio feedback signals
[NASA-CASE-LAR-12562-1] p0490 N81-26152
Determination of low-speed longitudinal
maneuvering criteria for transport aircraft with
advanced flight control systems
[NLR-TR-79127-U] p0498 N81-27118
Subsonic pitch-up alleviation on a 74 deg delta wing
[NASA-CR-165749] p0584 N81-30137
Simulator evaluation of the effects of reduced
spoiler and thrust authority on a decoupled
longitudinal control system during landings in
wind shear
[NASA-TM-83188] p0639 N81-33211

LONGITUDINAL STABILITY
Longitudinal motion of low-flying vehicles in
nonlinear flowfields
p0009 A81-11626
Longitudinal instability in braked landing gear
[ASME PAPER 80-WA/DSC-12] p0170 A81-21083
Dynamics of longitudinal motion of a
variable-sweepback aeroplane with a deformable
control system
p0231 A81-24722
Aircraft stability at high incidence
p0282 A81-27878
A hybrid composite horizontal stabilizer for the
XH-2/CCR Flight Demonstrator Aircraft
[AHS 80-35] p0476 A81-40164
A vortex-lattice method for calculating
longitudinal dynamic stability derivatives of
oscillating delta wings
[AIAA PAPER 81-1876] p0561 A81-44570
Application of reduced natural longitudinal
stability in the Airbus program
[DGLR PAPER 81-062] p0610 A81-47609
Aerodynamics, aeroelasticity, and stability of
hang gliders. Experimental results --- Ames 7-
by 10-ft wind tunnel tests
[NASA-TM-81269] p0423 N81-24025

LORAN
NT LORAN C
Omega - An economic Loran A replacement
p0113 A81-18077
Recommended short-term ATC improvements for
helicopters. Volume 3: Operational description
of experimental LORAN-C flight following (LOFF)
in the Houston area
[AD-A089385] p0024 N81-10030
Proposed ATC system for the Gulf of Mexico:
Helicopter operations development program
[AD-A089430] p0025 N81-10036
Preliminary test plans of ATC concepts for longer
term improvement helicopter development program
[AD-A089407] p0025 N81-10037
DMAHTC's support to National Ocean Survey
LORAN-C-charting
[AD-A093748] p0206 N81-17027
Production of LORAN-C reliability diagrams at the
Defense Mapping Agency
[AD-A093749] p0206 N81-17028

LORAN C
Flight test investigation of LORAN-C for civil
aviation applications
p0512 A81-41762
Evaluation of LORAN-C for non-precision approach
applications
p0512 A81-41763
Evaluation of Loran-C for enroute navigation and
non-precision approach within the state of Vermont
p0516 A81-42433
Flight test investigation of LORAN-C for en route
navigation in the Gulf of Mexico
[AD-A091637] p0128 N81-13945
DC-to-DC power supply for light aircraft flight
testing
[NASA-CR-163650] p0141 N81-14989
Evaluation of the performance of the Remote Area
Precision Positioning System (RAPPS)
[AD-A094169] p0250 N81-18036
Use of Loran-C for general aviation aircraft
navigation
p0371 N81-22002
An analysis of the adaptability of Loran-C to air
navigation
p0371 N81-22003
Results of a Loran-C flight test using an absolute
data reference --- vhf omnirange navigation
system and discrete address beacon system
p0371 N81-22006
Microcomputer processing for Loran-C
p0371 N81-22007

LOUDNESS
Community reaction to impulse noise: Initial Army
survey
[AD-A101674] p0588 N81-30659

LOW ALLOY STEELS
U HIGH STRENGTH STEELS

LOW ALTITUDE
Low level, adverse attitude escape using a
vertical seeking ejection seat
p0176 A81-22094
A new approach to low speed-low height testing and
flight manual data presentation
p0471 A81-40119

Impact of low altitude coverage requirements on air-ground communications
[AD-A101642] p0586 N81-30338

LOW ASPECT RATIO

High-lift investigations on some small aspect ratio wings
p0011 A81-11643

Coriolis effect on the vibration of flat rotating low aspect ratio cantilever plates
p0348 A81-30914

LOW ASPECT RATIO WINGS

NT DELTA WINGS

NT TRAPEZOIDAL WINGS

Determination of the vorticity of a small-aspect-ratio wing in hypersonic flow
p0054 A81-13544

On the theory of a wing with small aspect ratio in a hypersonic flow
p0309 A81-29860

Determination of the vorticity on a wing of small aspect ratio in a hypersonic stream
p0411 A81-35668

Analytical estimation on nonlinear longitudinal characteristics of wings with small and moderate aspect ratio by the vortex lattice method in incompressible flow
[ESA-TT-585] p0022 N81-10018

The high lift characteristics in the case of the v-wing concept
[NASA-TM-75872] p0253 N81-18061

LOW COST

ECS integration for fuel efficient/low life cycle cost design --- Environmental Control Systems in aircraft
p0015 A81-11676

Low cost technology for expendable RPV applications
p0049 A81-12795

Commuter turboprop propulsion technology
[SAE PAPER 801243] p0406 A81-34239

Low cost start-up for rigid-pressure airship
[AIAA 81-1337] p0457 A81-38541

Design concepts for low-cost composite turbofan engine frame
[NASA-CR-165217] p0376 N81-22053

LOW FREQUENCIES

NT VERY LOW FREQUENCIES

Low-frequency radio navigation for the Army's Mobile Automated Field Instrumentation System /MAFIS/
p0517 A81-42437

Low-frequency radio navigation system
[NASA-CASE-NPO-15264-1] p0373 N81-22036

LOW FREQUENCY BANDS

NT VERY LOW FREQUENCIES

A Kalman filter approach to navigation on the NAE Convair 580 aeromagnetics research aircraft
[AD-A100836] p0547 N81-29116

LOW LEVEL TURBULENCE

Wind shear effects on aircraft - Low-level shear and clear-air turbulence as accident causes
p0067 A81-16136

Microbursts as an aviation wind shear hazard
[AIAA PAPER 81-0386] p0167 A81-20798

Effect of contraction on screen-generated turbulence
p0284 A81-27900

Wind shear detection - Automatic alerting system for airport applications
p0412 A81-35771

LOW PRESSURE

NT HIGH ALTITUDE PRESSURE

Noise generation mechanism of low pressure propeller fans
[AIAA PAPER 81-0090] p0160 A81-20594

LOW SPEED

Air augmentation of rockets for low speed application
p0292 A81-29068

Stability and flutter analysis of turbine blades at low speed
p0612 A81-47959

A computer program for the design and analysis of low-speed airfoils, supplement
[NASA-TM-81862] p0125 N81-13921

A study of a VTOL thrusting ejector in low speed flight, volume 1
[NASA-CR-166137-VOL-1] p0337 N81-21017

A study of a VTOL thrusting ejector in low speed flight, volume 2
[NASA-CR-166137-VOL-2] p0337 N81-21018

Determination of low-speed longitudinal manoeuvering criteria for transport aircraft with advanced flight control systems
[DLR-FB-79127-U] p0498 N81-27118

LOW SPEED STABILITY

A method of helicopter low airspeed estimation based on measurement of control parameters
[MBB-UD-276-79-O] p0018 A81-12094

Concerning Khristianovich's transformation of a subsonic flow past an airfoil into a low-speed flow
p0349 A81-31045

Flight investigations of a helicopter low airspeed estimation system based on measurement of control parameters
p0470 A81-40111

An empirical prediction method for helicopter performance in low speed level flight and in vertical and forward flight climbs
p0471 A81-40118

A new approach to low speed-low height testing and flight manual data presentation
p0471 A81-40119

Flight tests and statistical data analysis for flying qualities investigations
p0471 A81-46121

Equivalent system analysis of translation rate command systems for hover and low speed flight
[AIAA PAPER 81-1858] p0560 A81-44557

Results of a low-speed wind tunnel test of the MDC 2.2M supersonic cruise aircraft configuration
p0243 N81-17983

Simulator investigation of arrow-wing low-speed handling qualities
p0244 N81-17993

Flight investigations of a helicopter low airspeed estimation system based on measurement of control parameters --- hingeless rotor helicopters
[MBB-UD-306/80-OE] p0584 N81-30139

LOW SPEED WIND TUNNELS

NT SUBSONIC WIND TUNNELS

Low-speed airfoil section research at Delft University of Technology
p0010 A81-11636

High-lift investigations on some small aspect ratio wings
p0011 A81-11643

Roll and spin measurements in the low speed wind tunnel at Braunschweig
p0065 A81-15704

Flow visualization through the use of the smoke-wire technique
[AIAA PAPER 81-0412] p0168 A81-20816

Low-speed wind tunnels with deformable walls
p0299 A81-29304

Evaluation of the influence of local disturbances of flow past trailing and leading flaps from wind tunnel data on a rectangular wing section
p0299 A81-29307

Subcritical flutter and oscillatory pressure testing of a full-scale 727 inboard aileron in a low-speed wind-tunnel
[AIAA 81-0656] p0308 A81-29508

Wind tunnel test results of a new leading edge flap design for highly swept wings, a vortex flap
p0243 N81-17986

LOW TEMPERATURE

Behavior of fuels at low temperatures
[AD-A100332] p0542 N81-28276

LOW THRUST PROPULSION

Hydrogen fueled catalytic combustion for low thrust expendable turbojet engine
[AIAA PAPER 81-1715] p0527 A81-43165

LOW TURBULENCE

Experimental investigation into the reaction of a boundary layer to external periodic disturbances
p0309 A81-29866

LOW VELOCITY

U LOW SPEED

LOW VISIBILITY

A head-up display for low-visibility approach and landing
[AIAA PAPER 81-0130] p0161 A81-20623

Landings according to CAT II
p0230 A81-24523

Low-visibility visual simulation with real fog
[AIAA 81-0982] p0415 A81-36569

Helicopter external load acquisition technology investigation

[AD-A094672] p0272 N81-19106

LOW WEIGHT
Effect of the discharge circuit parameters on the weight, dimensions, and energy characteristics of the power supply source --- aircraft equipment p0288 A81-28574

LOW WING AIRCRAFT
Equilibrium spinning of a typical single-engine low-wing light aircraft p0354 A81-31598
A geometrical study of the steady-state spin for a typical low-wing general aviation aircraft p0454 A81-38023

A simple model of the threshold voltage of short and narrow channel MOSFETs p0051 A81-13285

Nonstationary method for the direct statistical modeling of rarefied-gas flows p0069 A81-16454

Economics of technological change - A joint model for the aircraft and airline industries p0169 A81-21010

Analytical methods for store separation flight test p0177 A81-22344

Stochastic modeling of an aircraft traversing a runway using time series analysis p0183 A81-23368

Numerical simulation of gross structure of turbulent plane mixing layer by discrete-vortex model p0228 A81-24078

Parametric analysis of multipurpose airplanes based on utilization effectiveness criteria p0236 A81-25691

A mathematical computer simulation of stationary and nonstationary flow of an ideal incompressible fluid around solid profiles and arrays p0237 A81-26045

Improved particle trajectory calculations through turbomachinery affected by coal ash particles [ASME PAPER 81-GT-53] p0312 A81-29965

Supersonic stall flutter of high-speed fans [ASME PAPER 81-GT-184] p0317 A81-30078

A generalized mathematical model to estimate gas turbine starting characteristics [ASME PAPER 81-GT-202] p0318 A81-30092

Mathematical model of the linear unsteady aerodynamics of the entire aircraft p0349 A81-31039

Application of an aerodynamic configuration modeling technique to the design and analysis of X-Wing aircraft configurations p0356 A81-32013

Loss model for off-design performance analysis of radial turbines with pivoting-vane, variable-area stators [SAE PAPER 801135] p0397 A81-34166

Stability of nonuniform rotor blades in hover using a mixed formulation p0467 A81-40088

ASW helicopter/sonar dynamics mathematical model p0470 A81-40115

A study of the effect of aft fuselage shape on helicopter drag p0470 A81-40116

Modeling of ramjet combustors using simple reactor theory [AIAA PAPER 81-1429] p0515 A81-42196

Adaptive multivariable model following --- for aircraft control p0564 A81-45540

Spin - Angles and inertial moments p0567 A81-46023

The use of parametric cost estimating relationships as they pertain to aircraft airframes: A new perspective [AD-A089525] p0027 N81-10060

Disk residual life studies. Part 2: TF30 10th-stage compressor disk (INCOLOY 901) [AD-A089524] p0029 N81-10074

A method of performance prediction for centrifugal compressors. Part 1: Analysis. Part 2: Comparison with experiment [ARC-R/M-3843] p0031 N81-10436

Predictability of moisture absorption in graphite/epoxy sandwich panels p0039 N81-11131

Transducer installation for the Sea King MK 50 mathematical model validation flight tests [AD-A089924] p0043 N81-11365

An analytical technique for approximating unsteady aerodynamics in the time domain [NASA-TP-1738] p0043 N81-11422

Turbulence modeling for application to V/STOL propulsion induced effects: Two dimensional formulation [AD-A090331] p0072 N81-12026

Multivariable identification using centralized fixed modes p0079 N81-12091

Mixing and combustion in high speed air flows [AD-A090536] p0083 N81-12192

The implications of alternative aviation fuels on airbase air quality [AD-A090283] p0087 N81-12652

Transonic rotor noise - theoretical and experimental comparisons [AD-A090806] p0088 N81-12824

The response of turbine engine rotors to interference rubs [AD-A090408] p0093 N81-13060

A contribution to stabilization of flight vehicle parachute systems [DFVLR-MITT-80-05] p0126 N81-13926

Service life determination for the UH-60-A (UTTAS) helicopter elastomeric bearings [AD-A091756] p0134 N81-14324

An analytic model of subsonic flow around an airflow with a spoiler p0138 N81-14966

Application of transonic potential calculations to aircraft and wind tunnel configurations p0186 N81-15992

Sample data effects of high-pass filters [NASA-TP-1797] p0193 N81-16040

Propulsion system mathematical model for a lift/cruise fan V/STOL aircraft [NASA-TM-81663] p0195 N81-16055

Validation of a two dimensional primitive variable computer code for flow fields in jet engine test cells [AD-A092138] p0196 N81-16060

Demonstration of a method for determining critical store configurations for wing store flutter [AD-A092257] p0197 N81-16066

Evaluation of bird load models for dynamic analysis of aircraft transparencies [AD-A092909] p0204 N81-16995

Air traffic control simulation models. Citations from the NTIS data base [PB81-800104] p0207 N81-17037

A method for the prediction of wing response to nonstationary buffet loads [AD-A093037] p0208 N81-17043

Modeling, acquisition and processing during large displacements --- associated with experiments in flight mechanics [AAAF-NT-80-16] p0210 N81-17056

Analysis and modeling of information handling tasks in supervisory control of advanced aircraft
[AD-A092906] p0211 N81-17061
Turbine modeling technique to generate off-design performance data for both single and multistage axial-flow turbines
[NASA-CR-165244] p0213 N81-17078
Combustor liner durability analysis
[NASA-CR-165250] p0213 N81-17079
Active controls for flutter suppression and gust alleviation in supersonic aircraft --- YF-17 flutter model
[NASA-CR-163934] p0216 N81-17097
Continued development and correlation of analytically based weight estimation codes for wings and fuselages
[NASA-CR-152331] p0251 N81-18044
Research in multirate estimation and control
[AD-A094070] p0253 N81-18062
Analytical prediction of the interior noise for cylindrical models of aircraft fuselages for prescribed exterior noise fields. Phase 1: Development and validation of preliminary analytical models
[NASA-CR-159363] p0258 N81-18799
Math model study, runway 16R instrument landing system localizer at Seattle-Tacoma Airport, Washington
[AD-A095076] p0270 N81-19085
Development of advanced techniques for rotorcraft state estimation and parameter identification
[NASA-CR-159297] p0271 N81-19098
Leading-edge separation from a slender rolling wing-body combination --- vortex sheet model
[RAE-TR-80039] p0330 N81-20040
Optimum maneuvers of supersonic aircraft, volumes 1 and 2
p0332 N81-20060
Extended frequency turbofan model
[NASA-CR-165261] p0335 N81-20078
Sea King mathematical model validation trials. Flight data channel calibration
[AD-A096587] p0374 N81-22043
The development of a theoretical and experimental model for the study of active suppression of wing flutter
p0376 N81-22058
SCI model structure determination program (OSR) user's guide --- optimal subset regression
[NASA-CR-159084] p0380 N81-22725
An evaluation of a simplified near field noise model for supersonic helical tip speed propellers
[NASA-TM-81727] p0380 N81-22836
MLS: Airplane system modeling
[NASA-CR-165700] p0386 N81-23059
An airport community noise-impact assessment model
[NASA-TM-80198] p0393 N81-23713
Continued research on selected parameters to minimize community annoyance from airplane noise
[NASA-CR-164299] p0438 N81-24602
Semi-actuator disk theory for compressor choke flutter
[NASA-CR-3426] p0442 N81-25075
A mathematical model for Vertical Attitude Takeoff and Landing (VATOL) aircraft simulation. Volume 1: Model description application
[NASA-CR-166129-VOL-1] p0538 N81-28084
A mathematical model for Vertical Attitude Takeoff and Landing (VATOL) aircraft simulation. Volume 2: Model equations and base aircraft data
[NASA-CR-166129-VOL-2] p0538 N81-28085
A mathematical model for Vertical Attitude Takeoff and Landing (VATOL) aircraft simulation. Volume 3: User's manual for VATOL simulation program
[NASA-CR-166129-VOL-3] p0538 N81-28086
Optimization of strategic airlift in flight refueling
[AD-A101137] p0539 N81-28090
An investigation of the linear and angular vibration environments of trials aircraft
p0545 N81-29087
Investigation of high-angle-of-attack maneuver-limiting factors. Part 3: Appendices, aerodynamic models
[AD-A101648] p0581 N81-30115
The effect of boundary layer growth on the stability of compressible flows
p0587 N81-30389
Computer modeling of internal combustion engines: Combustion and related processes
[NTS/79/3] p0587 N81-30454
Aerodynamic mathematical modeling - basic concepts
p0590 N81-31106
A model-following technique for insensitive aircraft control systems
p0600 N81-31223
Sting interference effects on the static dynamic and base pressure measurements of the standard dynamics model aircraft at Mach numbers 0.3 through 1.3
[AD-A102612] p0627 N81-32124
Simplified off-design performance model of a day turbofan engine cycle
[NASA-TM-83204] p0639 N81-33206

MATHEMATICAL PROGRAMMING
NT DYNAMIC PROGRAMMING
NT LINEAR PROGRAMMING
NT NONLINEAR PROGRAMMING
Discrete-continuous variable structural synthesis using dual methods

NAVIER-STOKES EQUATION
Numerical study of a scramjet engine flow field
[AIAA PAPER 81-0186] p0162 A81-20659
Numerical study on viscous shear flow past a circular cylinder
p0228 A81-24077
On the solution of Navier Stokes equations of the flow in turbomachines
p0296 A81-29099
A PANSONIC Navier-Stokes solver --- for two dimensional flow about arbitrary airfoil sections
[AIAA PAPER 81-1195] p0454 A81-38077
Time dependent Navier-Stokes solution of a turbulent gas jet ejected from a rectangular orifice into a high-subsonic crossflow
p0138 N81-14864
An approximate factorization solution of the Navier-Stokes equations for transonic flow using body-fitted coordinates with application to NACA 64A010 airfoils
p0249 N81-18624
Analysis of turbulent flow about an isolated airfoil using a time dependent Navier-Stokes procedure
p0385 N81-23053

Gyrostabilizers for inertial control systems --- Russian book
p0017 A81-12024
Air-traffic police steer a new approach
p0061 A81-15167
International Air Transportation Conference, New Orleans, La., April 30-May 3, 1979, Proceedings. Volumes 1 & 2
p0110 A81-18051
Omega - An economic Loran A replacement
p0113 A81-18077
Map-type displays --- for air navigation
p0121 A81-19443
Improved secondary radar antennas for flight safety installations
p0151 A81-20083
New techniques and development trends in the system architecture of EDP systems for radar data processing and airspace control
p0153 A81-20103
Pulsed Doppler radar detects weather hazards to aviation
[AIAA PAPER 81-0235] p0163 A81-20691
New navigation systems for helicopters
p0177 A81-22167
The ANK - A four dimensional navigation/flight management system for today
p0180 A81-22615
New technology for the NDB system and its reliability. II --- omnidirectional radio beacons
p0230 A81-24524
Aircraft radar equipment and its operation --- Russian book
p0289 A81-26759
Information requirements for airborne electronic terrain maps
p0325 A81-30334
Some design and procedural aspects of in-flight collision avoidance
[AIAA PAPER 81-0805] p0368 A81-33885
Integration of navigational information in aircraft
p0407 A81-34336
SINTAC and its position-finding performance
p0409 A81-35021
The optical-fiber interferometer gyroscope for aviation navigation
p0451 A81-37650
The DME-aided Azimuth System - DAS
p0452 A81-37653
Subsystem status monitor --- for military helicopters
[AHS 80-17] p0474 A81-40148
Summary of interface testing of the digital AN/ASN-123 tactical navigation avionic system in the SH-3H helicopter
[AHS 80-18] p0474 A81-40149
Evaluation of LORAN-C for non-precision approach applications
p0512 A81-41763
Helicopter navigation in the 80's
p0516 A81-42432
CAINS II - An application of standard laser gyro inertial and computer technology for existing naval carrier aircraft
p0516 A81-42434
Low-frequency radio navigation for the Army's Mobile Automated Field Instrumentation System /MAFIS/
p0517 A81-42437
Doppler aided low accuracy strapdown inertial navigation system
[AIAA 81-1798] p0555 A81-44101
Automated celestial position determination
p0557 A81-44324
Trends in the future development of air traffic control systems
p0566 A81-45764
Errors of phase VLF-navigation systems under conditions of auroral disturbances
p0607 A81-47533
A fail-operational duplex sensor concept for flight control systems on the basis of analytical redundancy
[DGLR PAPER 81-066] p0610 A81-47616
Ten years activity in the area of flight control for helicopters at night and in bad weather
[DGLR PAPER 81-064] p0611 A81-47620
LR-80 flight test report --- attitude and heading reference system
[AD-A090284] p0075 N81-12058
Development of a computer program data base of a navigation aid environment for simulated IFR flight and landing studies
[NASA-TM-80064] p0129 N81-13959
A preliminary human factors flight assessment of a Marconi automatic map
[AD-A092585] p0193 N81-16036
DMAHTC's support to National Ocean Survey LORAN-C-charting
[AD-A093748] p0206 N81-17027
Hydrographic applications of the global positioning system
[AD-A093750] p0206 N81-17029
MIT Annotated Bibliography
p0371 N81-22001
Use of Loran-C for general aviation aircraft navigation
p0371 N81-22002
An analysis of the adaptability of Loran-C to air navigation
p0371 N81-22003
Investigation of air transportation technology at Ohio University, 1980 --- general aviation aircraft and navigation aids
p0371 N81-22005
Low-frequency radio navigation system
[NASA-CASE-NPO-15264-1] p0373 N81-22036
Navaids calibration evaluation with a computer-controlled avionics data acquisition system
p0383 N81-23020
Functional testing airborne navigation equipment
[AD-A097115] p0387 N81-23062
Definition of a system concept study for future air traffic guidance
[BMFT-FB-W-80-008] p0425 N81-24046
Navstar GPS receiver for satellite applications
p0485 N81-26111
A method for evaluating radio navigation systems for the terminal maneuvering area --- approach control
[DFVLR-MITT-81-02] p0538 N81-28080
Microwave system for real time space position measurement
p0545 N81-29089

Radio navigation for aircraft: Handbook ---
Russian book
p0116 A81-18599
Position-determination accuracies of navigation
methods
p0233 A81-25374
The behavior of quartz oscillators in the presence
of accelerations --- in missile and aircraft
time-frequency navigation systems
[ONERA, TP NO. 1981-31] p0351 A81-31285
Aircraft equipment /2nd revised and enlarged
edition/ --- Russian book
p0355 A81-31823
Navigation errors encountered using
weather-mapping radar for helicopter IFR
guidance to oil rigs
[AHS 80-16] p0474 A81-40147
Night flight of helicopters
p0510 A81-41335
Aircraft radio systems --- Book
p0513 A81-41871
Preliminary test plans of ATC concepts for longer
term improvement helicopter development program
[AD-A089407] p0025 N81-10037
Functional testing airborne navigation equipment
[AD-A097115] p0387 N81-23062
Tactical navigation system testing
p0544 N81-29066
Flight testing and instrumentation of aircraft
navigation systems
p0544 N81-29067
Alignment of a navigation and attack system for
the alpha jet aircraft
p0544 N81-29070
NAVIGATION SATELLITES
NT NAVSTAR SATELLITES
NT TRANSIT SATELLITES
The use of satellite systems for communication
p0051 A81-13310
Satellites to aid flight safety
[IAF PAPER 80-IAA-17] p0115 A81-18410
Hydrographic applications of the global
positioning system
[AD-A093750] p0206 N81-17029
NAVIGATORS
A microprocessor based land navigator
p0360 A81-32833
NAVSTAR SATELLITES
The use of satellite systems for communication
p0051 A81-13310
Geometric dilution of precision in Global
Positioning System navigation
p0115 A81-18100
Characteristics of NAVSTAR user stations
p0121 A81-19425
Civil aviation applications of Navstar/GPS through
differential techniques
p0177 A81-22374
GPS Navstar, the universal positioning system of
the future
p0349 A81-30975
Perspectives on the civil utilization of the
Navstar/GPS
p0409 A81-35023
Status report - Global Positioning System
p0511 A81-41752
Optimal processing of GPS signals
p0512 A81-41761
Navstar field test results
p0484 N81-26100
Rapid alignment of aircraft strapdown inertial
navigation systems using Navstar Global
Positioning System (GPS)
p0485 N81-26107
Navstar GPS receiver for satellite applications
p0485 N81-26111
NAVY
US Navy service experience with advanced composites
--- in aircraft composite structures
p0041 N81-11149
Naval aircraft operating and support
cost-estimating model: FY78 revision
[AD-A090044] p0071 N81-12013
NAVAIR Avionics Master Plan
[AD-A097522] p0389 N81-23082
A study of the factors affecting productivity at
the Naval Air Rework Facilities
[AD-A103783] p0631 N81-33124
NC-130 AIRCRAFT
U C-130 AIRCRAFT
NEAR FIELDS
Lightning near fields generated by return stroke
current
p0056 A81-14257
An acoustic source modelling technique to predict
the near sound field of axisymmetric turbulent
jets
[AIAA PAPER 81-2022] p0618 A81-48606
An evaluation of a simplified near field noise
model for supersonic helical tip speed propellers
[NASA-TM-81727] p0380 N81-22836
NEAR WAKES
Mean-flow and turbulence measurements in the
vicinity of the trailing edge of an NACA (63 sub
1)-012 airfoil
[NASA-TP-1845] p0392 N81-23410
NEGATIVE FEEDBACK
NT SENSORY FEEDBACK
NERVOUS SYSTEM
Neurotraumatological aspects in ejected pilots
p0205 N81-17012
NETS
Titanium net shapes by a new technology. I - F-18A
parts evaluation
p0511 A81-41649
NETWORK ANALYSIS
The S3 transition --- flight control logic circuit
analysis
p0240 A81-26617
Theoretical study of network design methodologies
for the aerial relay system --- energy
consumption and air traffic control
[NASA-CR-159365] p0249 N81-18033
NETWORK CONTROL
Contention information transfer systems analysis
p0322 A81-30274
NETWORK SYNTHESIS
Design of guidance and control digital autopilots
p0183 A81-22973
Analysis and synthesis of the digital attitude
control system of the aerospace vehicle
p0224 A81-23837
ISSYS: An integrated synergistic Synthesis System
[NASA-CR-159221] p0543 N81-28783
NEUMANN PROBLEM
New approach to the solution of large, full matrix
equations --- Neumann problem for inviscid
incompressible flow past airfoils
p0171 A81-21552
NEUROLOGY
Neurotraumatological aspects in ejected pilots
p0205 N81-17012
NEUROSCIENCE
U NEUROLOGY
NEWTON-BUSEMANN LAW
Unsteady Newton-Busemann flow theory. I - Airfoils
p0234 A81-25512
NEWTON-RAPHSON METHOD
Helicopter trim by periodic shooting with
Newton-Raphson iteration
p0573 A81-46621
A comparison of Newton-like methods for the
transonic small disturbance equation
[AD-A090270] p0033 N81-11017
NICKEL ALLOYS
NT RENE 77
Low cycle fatigue of Rene 77 at elevated
temperatures
p0289 A81-28989
Directionally solidified Soviet superalloy - ZHS6-K
p0532 A81-43770
Creep properties of single-crystal nickel-based
superalloys. II - Creep at medium temperature
/760 C/
p0567 A81-46345
Low-cost directionally-solidified turbine blades,
volume 2 --- TFE731-3 turbofan engine
[NASA-CR-159562] p0078 N81-12080
The stress behavior of three advanced nickel base
superalloys during high temperature low cycle
fatigue
[AD-A091694] p0131 N81-14061

NASA's activities in the conservation of strategic aerospace materials
[NASA-TM-81617] p0550 N81-29205
NICKEL CADMIUM BATTERIES
A new airborne nickel cadmium battery concept
p0235 A81-25618
NIGHT FLIGHTS (AIRCRAFT)
The flying hologram - Latest in head-up display systems
p0123 A81-19500
French Army testing of Forward Looking Infra-Red System /FLIR/ on helicopters /November 1976-June 1977/
p0464 A81-39680
Helicopter cockpit design for night goggle compatibility
p0472 A81-40128
Night flight of helicopters
p0510 A81-41335
CH-53 Helicopter Night Vision System simulation experiments
p0573 A81-46617
Ten years activity in the area of flight control for helicopters at night and in bad weather
[DGLR PAPER 81-064] p0611 A81-47620
Helicopter electro-optical system display requirements. 1. The effects of CRT display size, system gamma function, and terrain type on pilots required display luminance
[AD-A089755] p0035 N81-11035
Survivability study of a FLIR equipment fighter on a night penetration of a Soviet army
[AD-A101186] p0547 N81-29120
Flight evaluation of the STOL flare and landing during night operations
[NASA-TM-81312] p0629 N81-32151
NIGHT VISION
Development of an aviator's night vision imaging system /ANVIS/
p0463 A81-39573
Helicopter cockpit design for night goggle compatibility
p0472 A81-40128
CH-53 Helicopter Night Vision System simulation experiments
p0573 A81-46617
Helicopter electro-optical system display requirements. 1. The effects of CRT display size, system gamma function, and terrain type on pilots required display luminance
[AD-A089755] p0035 N81-11035
Operational problems associated with head-up displays during instrument flight
[AD-A092992] p0210 N81-17058
NITRIDES
NT SILICON NITRIDES
NITROGEN
A system for model access in tunnels with an unbreathable test medium
p0015 A81-11672
NITROGEN COMPOUNDS
NT NITROGEN OXIDES
NT SILICON NITRIDES
NITROGEN OXIDES
Variable geometry, lean, premixed, prevaporized fuel combustor conceptual design study
[ASME PAPER 80-GT-16] p0019 A81-12609
Aircraft NO/x/ emissions and stratospheric ozone reductions - Another look
[AIAA PAPER 81-0306] p0164 A81-20741
The influence of premixed combustion flame stabilizer geometry on flame stability and emissions
[ASME PAPER 81-GT-26] p0311 A81-29942
Development of a low NO/x/ lean premixed annular combustor
[ASME PAPER 81-GT-40] p0312 A81-29954
Low NO/x/ and fuel flexible gas turbine combustors
[ASME PAPER 81-GT-99] p0315 A81-30006
The application of UV spectroscopy to the quantitative analysis of nitrogen oxide
p0089 N81-13008
Exhaust emission survey of an F100 afterburning turbofan engine at simulated altitude flight conditions
[NASA-TM-81656] p0342 N81-21078

NT SONIC BOOMS
The Dalembertometer
[ISL-CO-220/79] p0133 N81-14292
Validation of helicopter noise prediction techniques
[NASA-CR-165715] p0447 N81-25766
NOISE ATTENUATION
U NOISE REDUCTION
NOISE ELIMINATION
U NOISE REDUCTION
NOISE GENERATORS
Experiments on effective source locations and velocity dependence of the broad band noise from a rotating rod
p0016 A81-11724
Status of knowledge of sonic booms
p0017 A81-11822
The status of rotor noise technology
p0019 A81-12737
Noise generation mechanism of low pressure propeller fans
[AIAA PAPER 81-0090] p0160 A81-20594
A lifting surface theory for the sound generated by the interaction of velocity disturbances with a leaned vane stator
[AIAA PAPER 81-0091] p0160 A81-20595
Perspectives on jet noise
[AIAA PAPER 81-0428] p0168 A81-20829
Core noise measurements from a small, general aviation turbofan engine
p0178 A81-22531
The role of the helical jet mode in aerodynamic noise generation
[AIAA PAPER 81-1963] p0618 A81-48607
Flight test of the 747-JT9D for airframe and jet-flap interaction noise
[AIAA PAPER 81-2037] p0620 A81-48629
Cooperative investigation of the noise producing region of an axisymmetric jet
[AD-A089692] p0045 N81-11774
NOISE HAZARDS
U HAZARDS
U NOISE (SOUND)
NOISE INTENSITY
Community response to noise from a general aviation airport
p0017 A81-11821
Helicopter internal noise - An overview
p0150 A81-20055
Fuel consumption aspects of some noise abatement procedures
p0154 A81-20350
Comparison of predicted engine core noise with proposed FAA helicopter noise certification requirements
p0454 A81-30062
Airport noise. Citations from the NTIS data base
[PB80-813231] p0088 N81-12667
NOISE MEASUREMENT
Experimental investigations on shock-associated noise
p0107 A81-17739
The spectral analysis of nonstationary random processes - Applications to aircraft overflight-type noises --- French thesis
p0174 A81-21922
Installation effects on propeller noise
[AIAA PAPER 80-0993] p0352 A81-31369
Noise characteristics of two parallel jets with unequal flow
[AIAA PAPER 80-0168] p0354 A81-31401
Improvement of the imaging of moving acoustic sources by the knowledge of their motion
[CNERA, TP NO. 1981-17] p0359 A81-32358
Contribution to the study of non stationary signals emitted by moving jet engine - Application to special analysis and imaging. I.
p0365 A81-33240
Acoustic performance evaluation of an advanced UH-1 helicopter main rotor system
[AHS PAPER 81-58] p0370 A81-33952

In-flight jet engine noise measurement system
p0410 A81-35553
The influence of helicopter operating conditions on rotor noise characteristics and measurement repeatability
p0460 A81-40095
Aircraft noise identification system - Application for inflight position detector
p0570 A81-46376
Acoustic and turbulence measurements of a tone-excited jet with and without flight simulation
[AIAA PAPER 81-2007] p0621 A81-48640
A novel airborne technique for free-field measurements of aircraft noise above the flight path with application to noise-shielding studies
[AIAA PAPER 81-2028] p0621 A81-48647
Flight effects on supersonic convergent-divergent nozzle jet noise
[AIAA PAPER 81-2027] p0623 A81-49728
Noise radiated from inverted velocity profile jets under simulated flight
[AIAA PAPER 81-2026] p0623 A81-49729
Core noise measurements from a small, general aviation turbofan engine
[NASA-TM-81610] p0084 N81-11769
A comparison of the three methods used to obtain acoustic measurements for the NASA Flight Effects Program
[NASA-TM-81906] p0088 N81-12822
Spectral analysis of nonstationary random processes. Application to noise of flyover type
[ESA-TT-639] p0088 N81-12826
Noise levels and data correction analysis for seven general aviation propeller aircraft
[AD-A091292] p0096 N81-13717
Correction procedures for aircraft noise data. Volume 3: Filter effects
[AD-A091016] p0096 N81-13719
Correction procedures for aircraft noise data. Volume 5: Propeller aircraft noise
[AD-A091017] p0096 N81-13720
The measurement of aero gas turbine noise
[PNR-90032] p0138 N81-14795
The need for airport noise monitoring systems. Their uses, and value in promoting civil aviation
[AD-A092240] p0201 N81-16627
Transport jet aircraft noise abatement in foreign countries: Growth, structure, impact. Volume 1: Europe, July 1980
[NASA-CR-152356] p0220 N81-17623
Transport jet aircraft noise abatement in foreign countries: Growth, structure, impact. Volume 2: Pacific basin, August 1980
[NASA-CR-152357-VOL-2] p0220 N81-17624
NOISECHECK procedures for measuring noise exposure from aircraft operations
[AD-A093948] p0221 N81-17849
The role of coherent structures in the generation of noise for subsonic jets
[NASA-CR-164214] p0380 N81-22833
An evaluation of a simplified near field noise model for supersonic helical tip speed propellers
[NASA-TM-81727] p0380 N81-22836
Diagnostic experiments on supersonic jet noise
[NASA-CR-168348] p0430 N81-24856
NOISEMAP: The USAF'S computer program for predicting noise exposure around an airport
[AD-A094264] p0446 N81-25578
Additional noise data on the SR-3 propeller
[NASA-TM-81736] p0447 N81-25767
YC-15 interior noise measurements. Technical discussion
[AD-A098788] p0492 N81-26847
YC-14 interior noise measurements program
[NASA-CR-164523] p0492 N81-26849
Incidences from modifications of the computational methods of the psophic index
[NASA-TM-76577] p0542 N81-28608
Helicopter noise exposure level data: Variations with test target. Indicated airspeed, distance, main rotor RPM and takeoff power
[AD-A100691] p0552 N81-29661
Flight test of a pure-tone acoustic source --- aircraft noise
[NASA-TP-1898] p0641 N81-33945
Helicopter noise analysis: Round-robin test
[AD-A103724] p0641 N81-33948

NOISE POLLUTION
Community response to noise from a general aviation airport
p0017 A81-11821
Model for airport noise exposure on a national basis - 1960 to 2000
p0568 A81-46363
Airbase induced community noise - Facilitating the military/civil interface
p0569 A81-46368
Aircraft noise and land use compatibility tradeoff analyses
p0569 A81-46370
A program to support the full utilisation of data from existing social surveys of environmental noise
p0570 A81-46374
Survey population response to airplane noise, part 1
[NASA-TM-75790] p0031 N81-10576
Annoyance from light aircraft investigation carried out around four airports near Paris
[NASA-TM-75823] p0032 N81-10577
Airport noise. Citations from the NTIS data base
[PB80-813231] p0088 N81-12667
Maneuvering aircraft: Noise pollution and control. Citations from the NTIS data base
[PB80-815566] p0135 N81-14525
The effect of airplane noise on the inhabitants of areas near Okecie Airport in Warsaw
[NASA-TM-75879] p0379 N81-22593
An airport community noise-impact assessment model
[NASA-TM-80198] p0393 N81-23713
Continued research on selected parameters to minimize community annoyance from airplane noise
[NASA-CR-164299] p0438 N81-24602
Aviation noise overload in the immediate proximity of the Warsaw-Okecie airport
[NASA-TM-75892] p0500 N81-27883
Incidences from modifications of the computational methods of the psophic index
[NASA-TM-76577] p0542 N81-28608
Evaluation of the disturbance caused by aircraft noise by opinion surveys
[NASA-TM-76579] p0542 N81-28610
Community reaction to impulse noise: Initial Army survey
[AD-A101674] p0588 N81-30659
Minimum noise impact aircraft trajectories
[NASA-CR-164719] p0594 N81-31159

NOISE PREDICTION (AIRCRAFT)
Some thoughts on the effects of flight on jet noise as observed in actual flight and in wind tunnels
p0016 A81-11723
The status of rotor noise technology
p0019 A81-12737
Simple method for prediction of aircraft noise contours
p0050 A81-13217
Experiments on the validity of ground effect predictions for static noise testing of propeller aircraft
p0054 A81-13811
Numerical prediction of bypass engine jet noise
[AIAA PAPER 80-1006] p0057 A81-14300
The effects of noise on laminar flow control drag reduction systems
p0058 A81-14390
Development and application of an analytical method for predicting helicopter transmission noise
p0150 A81-20062
Acoustic radiation from honeycomb sandwich plates
p0151 A81-20070
A lifting surface theory for the sound generated by the interaction of velocity disturbances with a leaned vane stator
[AIAA PAPER 81-0091] p0160 A81-20595
Experiments on the linear and non-linear evolution of the double helical instability in jets
[AIAA PAPER 81-0415] p0168 A81-20818
Empirical method for the prediction of business executive jet cabin noise levels
p0224 A81-23844
An experimental study of transmission, reflection and scattering of sound in a free jet flight simulation facility and comparison with theory
p0289 A81-28943

Transonic rotor noise - Theoretical and experimental comparisons
p0364 A81-33049

Trailing-edge airframe noise source studies on aircraft wings
[AIAA PAPER 80-0976] p0411 A81-35634

Comparison of predicted engine core noise with proposed FAA helicopter noise certification requirements
p0454 A81-38062

Trailing edge noise from hovering rotors
[AHS 80-60] p0479 A81-40184

A study of the economic impact of noise limits on new design and current production helicopters
[AHS 80-64] p0479 A81-40187

General aviation propeller noise reduction - Penalties and potential
[SAE PAPER 810585] p0520 A81-42746

Helicopter noise - Is technology the answer
[SAE PAPER 810591] p0520 A81-42750

A prediction procedure for propeller aircraft flyover noise based on empirical data
[SAE PAPER 810604] p0521 A81-42761

Integrated noise model - The Federal Aviation Administration's computer program for predicting noise exposure around an airport
p0568 A81-46354

Remaining problems in the prediction, measurement, evaluation, and control of aircraft noise
p0568 A81-46356

Airport noise contour predictions - Improving their accuracy
p0569 A81-46367

Helicopter manufacturers economic impact assessment of FAA proposed helicopter certification noise rules /NPRM 79-13/
p0576 A81-46647

Prediction of helicopter rotor noise from measured blade surface pressure
p0577 A81-46649

The influence of the airspeed on jet turbulence and the consequences for the jet noise
[DGLR PAPER 81-021] p0609 A81-47595

Trailing edge noise prediction from measured surface pressures
p0616 A81-48395

Ray-theory predictions of the sound radiated from realistic engine intakes
[AIAA PAPER 81-1982] p0618 A81-48602

An acoustic source modelling technique to predict the near sound field of axisymmetric turbulent jets
[AIAA PAPER 81-2022] p0618 A81-48606

The role of the helical jet mode in aerodynamic noise generation
[AIAA PAPER 81-1563] p0618 A81-48607

Prediction of flyover jet noise spectra
[AIAA PAPER 81-2025] p0618 A81-48610

Laboratory study of efficient add-on treatments for interior noise control in light aircraft
[AIAA PAPER 81-1969] p0619 A81-48618

Prediction of jet exhaust noise on airframe surfaces during flight
[AIAA PAPER 81-2035] p0619 A81-48626

Comparison of predicted engine core noise with current and proposed aircraft noise certification requirements
[AIAA PAPER 81-2053] p0620 A81-48635

Ground effects on aircraft noise for a wide-body commercial airplane
[AIAA PAPER 81-1588] p0620 A81-48638

Prediction method for aeroacoustic loads on under the wing blown flaps
[AIAA PAPER 81-2038] p0621 A81-48644

High bypass ratio engine noise component separation by coherence technique
[AIAA PAPER 81-2054] p0621 A81-48653

An iterative finite element-integral technique for predicting sound radiation from turbofan inlets
[AIAA PAPER 81-1981] p0624 A81-49736

An improved prediction method for noise generated by conventional profile coaxial jets
[AIAA PAPER 81-1991] p0624 A81-49743

Weapon bay cavity noise environments, data correlation and prediction for the B-1 aircraft
[AD-A089770] p0045 N81-11778

Prediction of sound radiated from different practical jet engine inlets
[NASA-CR-163824] p0137 N81-14789

Fluid-dynamic and aeroacoustic investigations of shrouded jets --- noise prediction (aircraft)
p0256 N81-18314

Analytical prediction of the interior noise for cylindrical models of aircraft fuselages for prescribed exterior noise fields. Phase 1: Development and validation of preliminary analytical models
[NASA-CR-159363] p0258 N81-18799

Sources, control, and effects of noise from aircraft propellers and rotors --- noise prediction (aircraft
p0269 N81-19073

NASA progress in aircraft noise prediction
p0269 N81-19074

Handbook of aircraft noise metrics
[NASA-CR-3406] p0345 N81-21871

Subjective field study of response to impulsive helicopter noise
[NASA-TP-1833] p0345 N81-21873

Sources, control, and effects of noise from aircraft propellers and rotors
[NASA-TM-81971] p0345 N81-21904

The relationship between noise and annoyance around Orly
[NASA-TM-76573] p0379 N81-22594

Airframe noise of a small model transport aircraft and scaling effects --- Boeing 747
[NASA-TP-1858] p0380 N81-22832

Comparison of predicted engine core noise with proposed FAA helicopter noise certification requirements
[NASA-TM-81739] p0381 N81-22839

Diagnostic experiments on supersonic jet noise
[NASA-CR-164348] p0438 N81-24856

NOISEMAP: The USAF'S computer program for predicting noise exposure around an airport
[AD-A094264] p0446 N81-25578

Engine isolation for structural-borne interior noise reduction in a general aviation aircraft
[NASA-CR-3427] p0446 N81-25766

Static tests of excess ground attenuation at Wallops Flight Center
[NASA-CR-3435] p0491 N81-26846

Prediction of sound radiation from different practical jet engine inlets
[NASA-CR-164620] p0500 N81-27886

User's manual for a computer program to calculate discrete frequency noise of conventional and advanced propellers
[NASA-TM-83135] p0631 N81-32966

Computer program to predict aircraft noise levels
[NASA-TP-1913] p0641 N81-33947

NOISE PROPAGATION

Gear unit noise and transmission errors --- helicopter system
p0150 A81-20060

Sandwich structures with high transmission loss
p0151 A81-20069

A general mapping procedure for variable area duct acoustics
[AIAA PAPER 81-0094] p0160 A81-20597

Ray-theory predictions of the sound radiated from realistic engine intakes
[AIAA PAPER 81-1982] p0618 A81-48602

Experiments on the nonlinear characteristics of noise propagation from low and moderate Reynolds number supersonic jets
[AIAA PAPER 81-2041] p0618 A81-48613

Engine noise source breakdown - Theory, simulation and results
[AIAA PAPER 81-2040] p0619 A81-48620

Assessment of ground effects on the propagation of aircraft noise: The T-38A flight experiment
[NASA-TP-1747] p0137 N81-14788

Noise and noise abatement in fans and blowers: A review
[DFVLR-FB-80-16] p0138 N81-14796

Static source locations for four nozzles mounted on a J-85 engine
[NASA-CR-152401] p0143 N81-14958

A study of the effect of terrain on helicopter noise propagation by acoustical modeling
[AD-A097626] p0394 N81-23868

Diagnostic experiments on supersonic jet noise
[NASA-CR-164348] p0438 N81-24856

Flight test of a pure-tone acoustic source --- aircraft noise
[NASA-TP-1898] p0641 N81-33963

NOISE REDUCTION
Acoustic structures --- titanium brazing method for producing honeycomb structures for jet engine noise reduction
p0001 A81-10272
Noise control design problems on air cushion vehicles and surface effect ships
p0017 A81-11818
Experiments on the validity of ground effect predictions for static noise testing of propeller aircraft
p0054 A81-13811
Application of the equivalent surface source method to the acoustics of duct systems with non-uniform wall impedance
p0055 A81-13824
Airline flight departure procedures - Choosing between noise abatement, minimum fuel consumption and minimum cost
p0101 A81-17044
A study of multiple jets

Wright, Director, Powerplant Engineering, Douglas Aircraft Company, accompanied by Doctor H. C. Schjelderup, Chief Technology Engineer, Materials and Process Engineering, and F. E. Duskin, Senior Design Engineer, Interiors Engineering, Douglas Aircraft Company
p0127 N81-13937
Fireworthiness of transport aircraft interior systems
p0267 N81-19061
Study of materials performance model for aircraft interiors
[NASA-CR-152378] p0333 N81-20063
Testing of aircraft passenger seat cushion materials. Full scale, test description and results, volume 1
[NASA-CR-160995-VOL-1] p0440 N81-25051

NONHOLONOMIC EQUATIONS
Self-oscillations of a self-aligned landing gear strut in the case of classical nonholonomic rolling constraints
p0563 A81-45315

NONISOTROPIC PLATES
U ANISOTROPIC PLATES

NONLINEAR EQUATIONS
Calculation of the nonlinear aerodynamic characteristics of finite-span wing
p0063 A81-15388
An analytical study of nonlinear stabilization during ballistic descent
p0237 A81-26028
Linear/nonlinear behavior in unsteady transonic aerodynamics
[AIAA 81-0643] p0306 A81-29496
Non-linear oscillator models in bluff body aeroelasticity
p0348 A81-30786
Calculation of the nonlinear aerodynamic characteristics of a wing of finite span
p0417 A81-36738
Pseudosteady-state analysis of nonlinear aircraft maneuvers
[NASA-TP-1758] p0094 N81-13065
A mathematical model for Vertical Attitude Takeoff and Landing (VATOL) aircraft simulation. Volume 1: Model description application
[NASA-CR-166129-VOL-1] p0538 N81-28084
A mathematical model for Vertical Attitude Takeoff and Landing (VATOL) aircraft simulation. Volume 2: Model equations and base aircraft data
[NASA-CR-166129-VOL-2] p0538 N81-28085
A mathematical model for Vertical Attitude Takeoff and Landing (VATOL) aircraft simulation. Volume 3: User's manual for VATOL simulation program
[NASA-CR-166129-VOL-3] p0538 N81-28086

NONLINEAR FILTERS
Nonlinear estimation of generalized vector shot processes
p0529 A81-43583

NONLINEAR PROGRAMMING
Optimum design of axial flow gas turbine stage. I - Formulation and analysis of optimization problem. II - Solution of the optimization problem and numerical results
p0019 A81-12608
Use of optimization in helicopter vibration control by structural modification
p0241 A81-26945
Sensitivity of optimum solutions to problem parameters --- in aircraft design
[AIAA 81-0548] p0301 A81-29399
The controlled growth method - A tool for structural optimization
[AIAA 81-0549] p0301 A81-29400
Finite-difference gradients versus error-quadrature gradients in the solution of parameterized optimal control problems
p0421 A81-37568
Use of constrained optimization in the conceptual design of a medium-range subsonic transport
[NASA-TP-1762] p0193 N81-16039
A method for obtaining reduced-order control laws for high-order systems using optimization techniques
[NASA-TP-1876] p0589 N81-30851

NONLINEAR SYSTEMS
Forced vibrations of a nonlinear system excited by a centrifugal oscillator with a sloping engine characteristic
p0002 A81-10439
Nonlinear incremental analysis up to failure of aeronautical structures
p0068 A81-16307
On the use of complex form of the Strouhal number in the study of nonlinear aeroelasticity
p0231 A81-24723
Stability of aircraft motion in critical cases
[AIAA PAPER 81-1885] p0561 A81-44577
General describing function method for systems with many nonlinearities, with application to aircraft performance
p0564 A81-45508
Self-oscillations of a wheel on a self-aligning landing gear strut with a nonlinear damper
A81-46847
A technique for the implementation of nonlinear models as real-time digital simulations --- with application to aircraft turbine engine design
p0615 A81-48333
Analytical estimation on nonlinear longitudinal characteristics of wings with small and moderate aspect ratio by the vortex lattice method in incompressible flow
[ESA-TT-585] p0022 N81-10018
Application of the INA design method to a nonlinear turbofan engine --- multivariable Nyquist array method
[NASA-CR-163855] p0143 N81-15001
Nonlinear rotor dynamics analysis --- computerized simulation
p0257 N81-18405
NLSCIDNT user's guide maximum likehood parameter identification computer program with nonlinear rotorcraft model
[NASA-CR-159083] p0380 N81-22724
INDES User's guide multistep input design with nonlinear rotorcraft modeling
[NASA-CR-159085] p0380 N81-22726
A nonlinear propulsion system simulation tehnique for piloted simulators
[NASA-TM-82600] p0390 N81-23085

NONLINEARITY
Study of the characteristics of a base-vented wing in nonlinear theory
[AAAF PAPER NT 80-40] p0369 A81-33927
Estimation of wing nonlinear aerodynamic characteristics at supersonic speeds
[NASA-TP-1718] p0021 N81-10004
Effects of nonlinearities on wing store flutter
[MBB-FE-17/S/PUB/27] p0131 N81-13974
Development of a nonlinear vortex method --- steady and unsteady aerodynamic loads of highly sweptback wings
[NASA-CR-164351] p0423 N81-24024
Flap-lag-torsional dynamic modelling of rotor blades in hover and in forward flight, including the effect of cubic nonlinearities
[NASA-CR-166194] p0486 N81-26116
Investigation of low level aircraft nonavionic nonlinear interference
[AD-A098784] p0491 N81-26300

NONREFLECTION
U ENERGY ABSORPTION

NONRIGIDITY
U FLEXIBILITY

NONSTABILIZED OSCILLATION
The problems with the interface system of the visual simulator as a cause of Pilot Induced Oscillations (PIO's) in flight simulators
[MBB-UA-528-80-OE] p0276 N81-19100

NONSYNCHRONIZATION
A technique for recovering nonsynchronized data from a digital flight data recorder
p0328 N81-20020

NONUNIFORM FLOW
Aerodamping of turbine blade vibrations under conditions of flow separation by an inhomogeneous stream
p0060 A81-14[illegible]
The linear instability due to the compressible crossflow on a swept wing
p0170 A81-21168

Calculation of circular flow inhomogeneities downstream of the turbine wheel
p0281 A81-27372
The effect of jet non-uniformity on the lift of an augmentor wing
p0298 A81-29144
Damping of turbomachine blade variations by subsonic flow
p0612 A81-47957
Factors influencing the predicted performance of advanced propeller designs
[NASA-TM-82676] p0492 N81-27042
NONVISCOUS FLOW
U INVISCID FLOW
NORMAL DENSITY FUNCTIONS
A correlated random numbers generator and its use to estimate false alarm rates of airplane sensor failure detection algorithms
p0154 A81-20848
NORMAL DISTRIBUTIONS
U NORMAL DENSITY FUNCTIONS
NORMAL FORCE DISTRIBUTION
U FORCE DISTRIBUTION
NORTH AMERICAN AIRCRAFT

NOZZLE DESIGN
Analysis and design of a ceramic nozzle insert for the Langley 8-foot high temperature structures tunnel
p0060 A81-14996
One-dimensional considerations concerning the stability behavior of inlet diffusers for supersonic aircraft --- German thesis
p0107 A81-17548
The sweep finite element method for calculating the flow field and performance of supersonic ejector nozzles
p0291 A81-29061
Development and validation of computational flow analysis for design of inlets and nozzles
p0298 A81-29117
Numerical simulation for the design of a supersonic cruise nozzle with a fluid noise shield
[AIAA PAPER 81-1218] p0458 A81-39006
Advanced nozzle integration for supersonic strike fighter application
[AIAA PAPER 81-1441] p0504 A81-40875
Subsonic/supersonic nonvectored aeropropulsive characteristics of nonaxisymmetric nozzles installed on an F-18 model
[AIAA PAPER 81-1445] p0504 A81-40876
Development of exhaust nozzle internal performance prediction techniques for advanced aircraft applications
[AIAA PAPER 81-1496] p0506 A81-40908
An overview of ejector theory
[AIAA PAPER 81-1678] p0536 A81-43947
Graphite/polyimide augmentor and nozzle components --- of advanced military gas turbine engines
[AIAA PAPER 81-1356] p0625 A81-49976
Investigation of convergent-divergent nozzles applicable to reduced-power supersonic cruise aircraft
[NASA-TP-1766] p0139 N81-14972
Effects of sidewall geometry on the installed performance of nonaxisymmetric convergent-divergent exhaust nozzles
[NASA-TP-1771] p0185 N81-15976
QCGAT mixer compound exhaust system design and static big model test report
[NASA-CR-135386] p0274 N81-19119
Design of an exhaust mixer nozzle for the Avco-Lycoming Quiet Clean General Aviation Turbofan (QCGAT)
[NASA-CR-159426] p0274 N81-19120
Jet-diffuser ejector - Attached nozzle design
[NASA-CR-152361] p0278 N81-19812
Aeroacoustics of a porous plug jet noise suppressor
[NASA-CR-164549] p0500 N81-27884
NOZZLE EFFICIENCY
Gas dynamic characteristics of the nozzle diaphragms of partial supersonic turbines
p0281 A81-27376
Effectiveness of a gas curtain in Laval nozzles under nonrated flow conditions
p0417 A81-36737
Static test of a fan-powered chin nozzle for V/STOL applications
[NASA-CR-165361] p0546 N81-29093
NOZZLE FLOW
Investigation of lateral forces and moments in the case of asymmetric gas flows in nozzles
p0004 A81-10913
An experimental investigation of jet screech by air jet impingement on solid boundaries
p0005 A81-11302
Calibration of the high speed wind tunnel TVE 150 in the supersonic range
p0016 A81-11770
Attainability of an attached flow in a nozzle with heavily curved walls
p0036 A81-13540
Interferometric study of the initial stage of supersonic jets of gases with various specific-heat ratios from conical nozzles
p0068 A81-16231
Effects of axisymmetric sonic nozzle geometry on Mach disk characteristics
p0110 A81-18022
A study of multiple jets
p0110 A81-18024
Effect of facility variation on the acoustic characteristics of three single stream nozzles
p0178 A81-22594
Transonic flows of a multireacting gas mixture through a Laval nozzle
p0225 A81-23909
Numerical computation of transonic potential flow through nozzles
p0233 A81-25353
Partially confined multiple jet mixing
p0234 A81-25513
Gas dynamic characteristics of the nozzle diaphragms of partial supersonic turbines
p0281 A81-27376
Numerical solution of the direct one-dimensional problem of a critical flow in nozzles
p0288 A81-28876
Development and validation of computational flow analysis for design of inlets and nozzles
p0298 A81-29117
Numerical simulation for the design of a supersonic cruise nozzle with a fluid noise shield
[AIAA PAPER 81-1218] p0458 A81-39006
Analysis of steady, two-dimensional, chemically reacting nonequilibrium flow by an unsteady, asymptotically consistent technique --- for performance prediction of ramjet propulsion system
[AIAA PAPER 81-1432] p0504 A81-40869
An overview of ejector theory
[AIAA PAPER 81-1678] p0536 A81-43947
Some ejector characteristics
[AIAA PAPER 81-1679] p0536 A81-43948
Comparison of computational and experimental jet effects
[AIAA PAPER 81-1892] p0626 A81-49979
Adiabatic gas flow. Citations from the NTIS data base
[PB80-808544] p0026 N81-10066

Jet wing interference for an overwing engine configuration
p0188 N81-16008
Exhaust emission characteristics and variability for maintained General Electric CF6-50 turbofan engines
[AD-A092291] p0196 N81-16064
Rig investigation of a two stage single shaft low cost turbine
p0432 N81-24099
The criticality of engine exhaust simulations on VSTOL model-measured ground effects
p0486 N81-26115
Application of computer generated color graphic techniques to the processing and display of three dimensional fluid dynamic data
[NASA-TM-82658] p0552 N81-29782

NOZZLE GEOMETRY
Effects of axisymmetric sonic nozzle geometry on Mach disk characteristics
p0110 A81-18022
Suppression of jet noise peak by velocity profile reshaping
p0458 A81-39039
Subsonic/supersonic nonvectored aeropropulsive characteristics of nonaxisymmetric nozzles installed on an F-18 model
[AIAA PAPER 81-1445] p0504 A81-40878
Some ejector characteristics
[AIAA PAPER 81-1679] p0534 A81-43948
Effect of excitation on coaxial jet noise as observed by an elliptic mirror
[AIAA PAPER 81-2044] p0621 A81-48651
Cooperative investigation of the noise producing region of an axisymmetric jet
[AD-A089692] p0045 N81-11774

Flight experiments with a slender cone at angle of attack [AIAA PAPER 81-0337] p0165 A81-20761
A mathematical computer simulation of stationary and nonstationary flow of an ideal incompressible fluid around solid profiles and arrays p0237 A81-26288
Transonic wing design using potential-flow codes - Successes and failures [SAE PAPER 810565] p0510 A81-42730
Numerical simulation of hydrodynamic ram --- for aircraft fuel tanks p0615 A81-48381
An analytic model of subsonic flow around an airfoil with a spoiler p0138 N81-14986
Three dimensional internal flows in turbomachinery, volume 1 [AD-A092737] p0197 N81-16068
EDRAFT-A graphics code for VTOL aircraft ground footprint visualization [AD-A093311] p0208 N81-17042
Cascade design through an inverse method p0448 N81-26022
End wall flows in rotors and stators of a single stage compressor [NASA-CR-164635] p0540 N81-28087
Application of computer generated color graphic techniques to the processing and display of three dimensional fluid dynamic data [NASA-TM-82650] p0552 N81-29782
Evaluation of Ting's method for the calculation of the lift distribution on a wing in propulsive jets [NLR-TR-80078-U] p0594 N81-31157
NUMERICAL INTEGRATION
Wing analysis by the plate analogy using an integral-difference method p0233 A81-25680
Integral methods for solving thermal conductivity problems and their application to evaluating heat exchange in certain gas-turbine elements p0283 A81-28128
Analysis of turbulent boundary layer on cascade and rotor blades of turbomachinery p0286 A81-29156
An implicit finite volume method for elliptical flow computation --- numerical integration, aerothermodynamics p0255 N81-18246
NUMERICAL STABILITY
Some implementation considerations for numerically stable flight filters p0136 A81-20085
NYQUIST DIAGRAMS
Multivariable nyquist array method with application to turbofan engine control p0060 N81-12101
Application of the MNA design method to a nonlinear turbofan engine --- multivariable Nyquist array method [NASA-CR-163855] p0143 N81-15001
O
OBLIQUE SHOCK WAVES
An experimental investigation of the interaction between a glancing shock wave and a turbulent boundary layer p0012 A81-11649
OBLIQUE WINGS
Lifting-line theory of oblique wings - Application

of the Galerkin method to the lifting-line equation
p0149 A81-19873

AD-1 oblique wing aircraft program
[SAE PAPER 801180] p0400 A81-34193

OBSERVABILITY (SYSTEMS)

An aircraft landing system employing observers
p0562 A81-44699

Estimation of kinetic quantities of flight mechanics with a nonlinear observer
[DGLR PAPER 81-067] p0608 A81-47562

OBSERVATION

NT EARTH OBSERVATIONS (FROM SPACE)

NT SATELLITE OBSERVATION

NT VISUAL OBSERVATION

OBSERVATION AIRCRAFT

NT MIRAGE AIRCRAFT

NT MIRAGE 3 AIRCRAFT

NT RF-4 AIRCRAFT

OCEAN SURFACE

Seasat altimeter height calibration --- related to sea surface heights near bermuda
[NASA-TM-82040] p0279 N81-19526

OCEANOGRAPHY

Compact and highly sensitive fluorescence lidar for oceanographic measurements
p0623 A81-49378

OCEANS

NT ATLANTIC OCEAN

OFF-ON CONTROL

Bounds for the additional cost of near-optimal controls
p0170 A81-21075

OFFSHORE PLATFORMS

Analysis of helicopter operations and the use of MLS in the offshore environment
p0512 A81-41764

OFT 1

U SPACE TRANSPORTATION SYSTEM 1 FLIGHT

OGEE WINGS

U VARIABLE SWEEP WINGS

OGIVES

Experimental study of the influence of supports on the aerodynamic loads on an ogive cylinder at high angles of attack
[AIAA PAPER 81-0007] p0156 A81-20531

Basic studies of body vortices at high angles of attack and supersonic speeds
[AD-A102241] p0594 N81-31154

OIL ADDITIVES

Composition of sludge formed in B-3V oil
p0103 A81-17373

OIL EXPLORATION

Navigation errors encountered using weather-mapping radar for helicopter IFR guidance to oil rigs
[AHS 80-16] p0474 A81-40147

OILS

NT CRUDE OIL

NT FUEL OILS

NT LUBRICATING OILS

NT SHALE OIL

Methodology for determining sampling intervals
[AD-A092591] p0202 N81-16825

OMEGA NAVIGATION SYSTEM

Omega - An economic Loran A replacement
p0113 A81-18077

Omega station 10.2 kHz signal coverage prediction diagrams
p0512 A81-41760

An integrated Omega/satellite radio navigation system
p0566 A81-45767

Proposed ATC system for the Gulf of Mexico: Helicopter operations development program
[AD-A089430] p0025 N81-10036

Omega signal coverage prediction diagrams for 10.2 kHz. Volume 1: Technical approach
[AD-A092741] p0192 N81-16030

Omega signal coverage prediction diagrams for 10.2 kHz. Volume 2: Individual station diagrams
[AD-A092742] p0192 N81-16031

Omega signal coverage prediction diagrams for 10.2 kHz. Volume 4: Bearing angle tables
[AD-A092744] p0192 N81-16032

Omega transmitter outages, January to December 1979
[AD-A093425] p0207 N81-17035

Investigation of air transportation technology at Princeton University, 1980
p0371 N81-22008

OMNIDIRECTIONAL ANTENNAS

Diversity techniques for omnidirectional telemetry coverage of the HiMAT research vehicle
[NASA-TP-1830] p0334 N81-20074

OMNIDIRECTIONAL RADIO RANGES

New technology for the NDB system and its reliability. II --- omnidirectional radio beacons
p0230 A81-24524

New technology for the NDB system and its reliability. III --- omnidirectional radio beacon
p0231 A81-24525

OMNIRANGE NAVIGATION

U VHF OMNIRANGE NAVIGATION

ONBOARD COMPUTERS

U AIRBORNE/SPACEBORNE COMPUTERS

ONBOARD DATA PROCESSING

Application of singular perturbation theory to onboard aircraft trajectory optimization --- for commercial jet transport aircraft
[AIAA PAPER 81-0019] p0158 A81-20543

New airborne weather radar systems
[AIAA PAPER 81-0237] p0163 A81-20692

Considerations concerning an 'information busbar' for distributing on-board measurement and control information
p0233 A81-25375

Engine performance monitoring systems expansion on Alitalia aircraft
p0290 A81-29054

Charge-coupled device /CCD/ camera/memory optimization for expendable autonomous vehicles
p0357 A81-32491

Airborne ground velocity determination by digital processing of electro-optical line sensor signals
p0358 A81-3249

Airborne electronic displays
p0364 A81-32999

Practical solutions to the aircraft minimum fuel, fixed-range, fixed time-of-arrival trajectory optimization problem
p0563 A81-45515

Precision DME for microwave landing system
p0578 A81-47129

Relationships for a flight performance computer
p0382 N81-23014

Structural Integrity recording System (SIRS) for U.S. Army AH-1S helicopters
[AD-A098236] p0427 N81-2406

Characteristics of a digital filter for a precision DME system in microwave landing systems
[FUB-43-1980] p0628 N81-3213

ONBOARD EQUIPMENT

NT AIRBORNE EQUIPMENT

NT AIRBORNE/SPACEBORNE COMPUTERS

NT AIRCRAFT EQUIPMENT

NT FLYING EJECTION SEATS

NT LIGHT AIRBORNE MULTIPURPOSE SYSTEM

NT SPACECRAFT ELECTRONIC EQUIPMENT

NT TERCOM

Design of disturbance-rejection controllers for linear multivariable discrete-time systems using entire eigenstructure assignment --- onboard digital flight system of F-4 aircraft
p0155 A81-204

The 'light-weight' system - A novel concept for on-board weight and balance measurement using fiber optics
[SAWE PAPER 1336] p0352 A81-318

Helicopter cockpit design for night goggle compatibility
p0472 A81-401

Onboard procedure for the measurement of wind shear gradients
[DGLR PAPER 81-060] p0610 A81-476

Head up displays. Citations from the International Aerospace Abstracts data base
[NASA-CR-163656] p0026 N81-1

Fuel jettisoning by U.S. Air Force aircraft. Volume 2: Fuel dump listings
[AD-A089076] p0032 N81-1

Survey of Workshops on Meteorological and Environmental Inputs to Aviation Systems
p0135 N81-1

Winds and wind shear in-situ sensors
p0136 N81-1

Collision avoidance systems. Citations from the NTIS data base
[PB80-815020] p0193 N81-16038
Seat pack for fighter aircraft operating on the NATO Northern Flank
p0205 N81-17010
General Aviation Avionics Statistics
[AD-A095148] p0273 N81-19114
An analysis of the adaptability of Loran-C to air navigation
p0371 N81-22003
The P/POD project: Programmable/Pilot Oriented Display --- general aviation aircraft
p0371 N81-22004
Investigation of air transportation technology at Ohio University, 1980 --- general aviation aircraft and navigation aids
p0371 N81-22005
Requirements, technology and configuration evaluation for Crash Survivable Flight Data Recording (CSFDR) system
[AD-A097863] p0427 N81-24059
A method for measuring take-off and landing performance of aircraft, using an inertial sensing system
p0545 N81-29088
Microwave system for real time space position measurement
p0545 N81-29089
Crash survivable flight data recording system study
[AD-A101503] p0583 N81-30127
ONE DIMENSIONAL FLOW
Computational design of large-scale blast simulators
[AIAA PAPER 81-0159] p0162 A81-20639
A one-dimensional analysis and performance prediction of subsonic radial turbines
p0228 A81-24086
OPERATING COSTS
Engine maintenance cost calculation method
[ASME PAPER 81-GT-34] p0312 A81-29948
The turboprop aircraft role in the 1980s
[AIAA PAPER 81-1730] p0528 A81-43169
Can advanced technology improve future commuter aircraft
[AIAA PAPER 81-1729] p0536 A81-43959
Concorde with the airlines --- operating costs and performance
p0247 N81-18013
GASP- General Aviation Synthesis Program. Volume 7: Economics. Part 1: Theoretical development
[NASA-CR-152303-VOL-7-PT-1] p0271 N81-19094
Engine life development --- operating costs and propulsion system performance
p0430 N81-24081
NAS automation equipment operating cost estimates, FY 1978 - 1979
[AD-A102023] p0595 N81-31182
Application of advanced technologies to derivatives of current small transport aircraft
[NASA-CR-166197] p0637 N81-33190
OPERATIONAL HAZARDS
Exploratory study of hazard mitigation and research in the air transport system
[AD-A089204] p0033 N81-11021
OPERATIONAL PROBLEMS
The evolution of operational systems --- approach to National Airspace System automation
p0084 A81-15699
Problems of flight mechanics involved in all-weather helicopter operation
p0108 A81-17467
Operational responses to aft empty C.G. --- Center of Gravity location in Boeing 727-200 aircraft
[SAWE PAPER 1338] p0352 A81-31370
The 1980 Aircraft Safety and Operating Problems, part 1
[NASA-CP-2170-PT-1] p0264 N81-19035
Studies of some unconventional systems for solving various landing problems --- air cushion landing system
p0268 N81-19067
Uses of AIDS data in airlines engine maintenance
p0328 N81-20016
Operational problems experienced by single pilots in instrument meteorological conditions
[NASA-CR-166236] p0581 N81-30106
Operational experience with adhesive bonded structures --- aircraft structures
[FOK-RO-1235] p0582 N81-30124
OPERATIONS RESEARCH
NT LINEAR PROGRAMMING
NT MATHEMATICAL PROGRAMMING
NT NONLINEAR PROGRAMMING
Recommended short-term ATC improvements for helicopters. Volume 1: Summary of short term improvements
[AD-A089521] p0025 N81-10091
An analysis of Air Force management of Turbine Engine Monitoring Systems (TEMS)
[AD-A089365] p0028 N81-10070
Annual report to the NASA Administrator by the Aerospace Safety Advisory Panel on the space shuttle program. Part 2: Summary of information developed in the panel's fact-finding activities
[NASA-TM-82252] p0198 N81-16114
NASA's aeronautics program: Systems technology and experimental program
[NASA-CR-164642] p0562 N81-25034
OPERATOR PERFORMANCE
Air traffic control using a microwave landing system
p0053 A81-13421
Application of signal detection theory to decision making in supervisory control - The effect of the operator's experience
p0351 A81-31280
New terminal radar approach control in tower cab concept for Love Field, Dallas, Texas
[AD-A089996] p0034 N81-11025
The results of AFAMRL Remotely Piloted Vehicle (RPV) simulation studies 7 and 8
[AD-A100551] p0539 N81-28086
OPERATORS (PERSONNEL)
NT AIRCRAFT PILOTS
OPTICAL ABSORPTION
U ELECTROMAGNETIC ABSORPTION
U LIGHT TRANSMISSION
OPTICAL COMMUNICATION
An airborne integrated communications network utilizing fiber optics
p0173 A81-21080
LPI, short-range communications between aircraft in rendezvous --- Low Probability of Intercept
p0177 A81-22403
Full authority digital electronic control turbofan engine demonstration
p0498 N81-27192
OPTICAL CORRECTION PROCEDURE
Tri-bar reading correction for oblique imagery
p0178 A81-22409
OPTICAL COUPLING
Evolution of an optical control system for aircraft hydraulics
[SAE PAPER 801195] p0402 A81-34305

OPTICAL SLANT RANGE
Remote sensing methods for the determination of slant range visibility
[ESA-TT-627] p0086 N81-12536

OPTICAL TRACKING
Precision correlation tracking via optimal weighting functions
p0154 A81-20450

OPTIMAL CONTROL
NT TIME OPTIMAL CONTROL
Improved flight control performance and failure tolerance using modern control techniques
p0008 A81-11619
Aircraft performance optimization by forced singular perturbation
p0014 A81-11667
Model-following system with assignable error dynamics and its application to aircraft
p0116 A81-18577
Frequency-shaped cost functionals - Extension of linear-quadratic-Gaussian design methods
p0116 A81-18578
Precision correlation tracking via optimal weighting functions
p0154 A81-20450
Classical and modern control design of a speed-hold system for a STOL airplane
[AIAA PAPER 81-0017] p0157 A81-20541
Application of singular perturbation theory to onboard aircraft trajectory optimization --- for commercial jet transport aircraft
[AIAA PAPER 81-0019] p0158 A81-20543
Robustness properties of a new multirate digital control system
[AIAA PAPER 81-0022] p0158 A81-20545
Bounds for the additional cost of near-optimal controls
p0170 A81-21075
Piloting techniques on the backside - Flight path angle control
p0171 A81-21673
A vehicle attitude control system forming the error signal by way of the optimal rotation axis
p0224 A81-23732
Analytic design of regulators with limitations
p0235 A81-25608
Trajectory generation techniques for multivariable control of aircraft turbine engines
p0240 A81-26609
Control design for reduction of aerodynamic tail forces using quadratic synthesis
p0240 A81-26610
Suboptimal constant output feedback and its application to modern flight control system design
p0288 A81-28740
Sensitivity reduction in aircraft control systems by double Perfect Model Following
p0299 A81-29205
Control settings for a trimmed, stalled rotor by an automatic feedback system
[AIAA 81-0617] p0305 A81-29478
Evaluation of the effect of actuator time lag on the minimum control power of a VTOL aircraft
p0319 A81-30160
Cybernetic airborne fire control - Issues and potential
p0326 A81-30347
Energy modeling for aviation fuel efficiency
[AIAA PAPER 81-0789] p0368 A81-33883
The problem of the minimum-time turn of a maneuverable aircraft velocity vector to a specified course angle
p0413 A81-36472
Finite-difference gradients versus error-quadrature gradients in the solution of parameterized optimal control problems
p0421 A81-37568
Pole placement with output feedback
p0458 A81-38899
Helicopter gust alleviation - An optimal sampled-data approach
[AHS 80-31] p0476 A81-40161
Flight control strategies for performance computers
p0512 A81-41759
LQG controls for highly maneuverable aircraft --- Linear quadratic Gaussian
[AIAA PAPER 81-1709] p0527 A81-43163
Effects of displacement and rate saturation on the control of statically unstable aircraft
[AIAA 81-1752] p0554 A81-44082
A mode decomposition control logic for system performance enhancement
[AIAA 81-1753] p0554 A81-44083
Analysis of aircraft longitudinal handling qualities
[AIAA 81-1771] p0554 A81-44092
An analytical pilot rating method for highly elastic aircraft
[AIAA 81-1772] p0554 A81-44093
Boost-glide range-optimal guidance
[AIAA 81-1781] p0554 A81-44096
Multiobjective insensitive design of airplane control systems with uncertain parameters
[AIAA 81-1818] p0555 A81-441
Optimal multirate flight control design
p0563 A81-455
Optimization theory applied to higher harmonic control of circulation controlled rotors
p0571 A81-466
A piloted simulation of the backup control system engagement for the YAH-64

p0576 A81-46646
Application of optimal control and estimation to autopilot and autothrottle systems
p0615 A81-48371
Model following control of gas turbine engines
p0624 A81-49900
Realization of a method of extremal targeting in a problem of aircraft landing control
p0625 A81-49943
Multivariable closed-loop analysis and flight control synthesis for air-to-air tracking
[AD-A090050] p0037 N81-11046
Performance seeking controls
p0079 N81-12092
Road map to adaptive optimal control --- jet engine control
p0079 N81-12098
Practical optimal flight control system design for helicopter aircraft. Volume 2: Software user's guide
[NASA-CR-152306] p0081 N81-12110
Research in multirate estimation and control
[AD-A094070] p0253 N81-18062
Pilot-optimal multivariable control synthesis by output feedback
[NASA-CR-163112] p0540 N81-28102
A structural load alleviation control system for a large transport aircraft
[TT-8002] p0541 N81-28106
OPTIMIZATION
NT FLIGHT OPTIMIZATION

NT TIME OPTIMAL CONTROL
NT TRAJECTORY OPTIMIZATION
Design of airfoils in incompressible viscous flows by numerical optimization
p0001 A81-10096
Some experiences with numerical optimisation in aircraft specification and preliminary design studies
p0007 A81-11609
Structural optimization of advanced aircraft structures
p0013 A81-11651
Optimal flight vehicle design and linear vector spaces
p0014 A81-11668
Optimum design of axial flow gas turbine stage. I - Formulation and analysis of optimization problem. II - Solution of the optimization problem and numerical results
p0019 A81-12600
Discrete-continuous variable structural synthesis using dual methods
p0066 A81-15094
Optimal design of frames with substructuring
p0068 A81-16276
Some aspects of optimizing the aerodynamics of turbine stages
p0119 A81-19325
New ways in antenna technology for optimal adjustment of the background clutter
p0151 A81-20084
Conforming element with out-element nodes
p0225 A81-23855
Modification of wing sections to optimize transonic performance
p0226 A81-24011
Some optimization problems of internal aerodynamics
p0237 A81-26120
Use of optimization in helicopter vibration control by structural modification
p0241 A81-26945
Sensitivity of optimum solutions to problem parameters --- in aircraft design
[AIAA 81-0548] p0301 A81-29399
The controlled growth method - A tool for structural optimization
[AIAA 81-0549] p0301 A81-29400
Optimality criterion techniques applied to frames having nonlinear cross-sectional properties
[AIAA 81-0552] p0301 A81-29402
Shape optimization of plate and shell structures
[AIAA 81-0553] p0302 A81-29403
The stretched C-14 - Cost effective application of structural technology
[AIAA 81-0514] p0302 A81-29427
Optimization of finishing conditions --- metal cutting
p0319 A81-30163
Airborne method to minimize fuel with fixed time-of-arrival constraints
p0351 A81-31287
Increasing the strength properties of sheet parts by explosive forming of them with optimization of the production parameters
p0365 A81-33174
Global optimization of a glider
[AAAF PAPER NT 80-36] p0368 A81-33937
Spanwise lift distribution of forward-and aft-swept wings in comparison to the optimum distribution form
p0453 A81-38017
On making things the best - Aeronautical uses of optimization /Wright Bros. lecture/
[AIAA PAPER 81-1738] p0528 A81-43175
Pareto-optimal multi-objective design of airplane control systems
p0563 A81-45518
Choice of optimal parameters of a gyrovertical on the basis of a standard program
p0622 A81-48744
Aeroelastic optimization with multiple constraints
[AD-A090775] p0085 N81-12851
Optimized pitch controller for load alleviation on wind turbines
[FFA-TN-HU-2189-PT-1] p0087 N81-12634
Computational aerodynamic design tools and techniques used at fighter development
[MBB-FE-122/S/PUB/13] p0128 N81-13950
Fundamentals of conceptual design optimization of subsonic transport aircraft
[VTH-LR-292] p0128 N81-13951
Economic evaluation of flying-qualities design criteria for a transport configured with relaxed static stability
[NASA-TP-1760] p0130 N81-13960
Application of vector performance optimization to a robust control loop design for a fighter aircraft
[DFVLR-FB-80-14] p0130 N81-13970
Dual methods and approximation concepts in structural synthesis
[NASA-CR-3226] p0134 N81-14347
Use of constrained optimization in the conceptual design of a medium-range subsonic transport
[NASA-TP-1762] p0193 N81-16039
Multicyclic controllable twist rotor data analysis
[NASA-CR-152251] p0249 N81-18028
The optimum design of by-pass engines with jet mixing
[PNR-90017] p0335 N81-20081
An analysis of opportunistic maintenance policy for the F100PW100 aircraft engine
[AD-A097548] p0384 N81-23025
A cost function for an airframe production program
[AD-A097540] p0394 N81-23967
A slot allocation model for high-density airports
[AD-A098097] p0438 N81-24846
Optimization of strategic airlift in flight refueling
[AD-A101137] p0539 N81-28090
ISSYS: An integrated synergistic Synthesis System
[NASA-CR-159221] p0543 N81-28783
Conceptual/preliminary design study of subsonic v/stol and stovl aircraft derivatives of the S-3A
[NASA-TM-81310] p0547 N81-29118
Structural optimization of advanced aircraft structures --- computerized design
[MBB-S/PUB/32] p0582 N81-30122
A method for obtaining reduced-order control laws for high-order systems using optimization techniques
[NASA-TP-1876] p0589 N81-30851
Development of an analytical technique for the optimization of jet engine and duct acoustic liners
[NASA-CR-164072] p0639 N81-33205
OPTIMUM CONTROL
U OPTIMAL CONTROL
ORBIT TRANSFER VEHICLES
An integrated transportation and operations comparison of space and ground based OTV's
[AIAA PAPER 81-1456] p0505 A81-40882
ORBITAL FLIGHT TEST 1 (SHUTTLE)
U SPACE TRANSPORTATION SYSTEM 1 FLIGHT
ORBITS
NT EQUATORIAL ORBITS

NT SATELLITE ORBITS
ORGANIC COMPOUNDS
NT FLUOROCARBONS
Organic compounds in the exhaust of a J85-5 turbine engine
[AD-A091712] p0130 N81-13966
Thermodynamics of organic compounds
[AD-A093087] p0222 N81-17936
ORGANIC MATERIALS
The quality of nonmetallic materials
p0238 A81-26244

ORIFICE FLOW
Semi-empirical analysis of liquid fuel distribution downstream of a plain orifice injector under cross-stream air flow
[AIAA PAPER 81-1467] p0505 A81-40887
ORIFICES
Subsonic tests of an all-flush-pressure-orifice air data system
[NASA-TP-1871] p0489 N81-26144
ORION AIRCRAFT
U P-3 AIRCRAFT
ORNITHOPTER AIRCRAFT
U RESEARCH AIRCRAFT
OROGRAPHY
Experimental investigation of orographic waves and vertical motions in the Krasnovodsk airport area
p0121 A81-19441

ORTHOGONALITY
Orthogonal multiblade coordinates
p0453 A81-38021

OSCILLATING FLOW
Viscous-inviscid interaction on oscillating airfoils in subsonic flow
[AIAA PAPER 81-0051] p0159 A81-20567
A computerized study of wave characteristics in a time dependent compressible flow
[AIAA PAPER 81-0410] p0169 A81-20838
Self-excited oscillations of supersonic flow in a sudden enlargement of a duct
p0228 A81-24081

Drag reduction of an oscillating flat plate with an interface film
p0239 A81-26504

Curved-flow, rolling-flow, and oscillatory pure-yawing wind-tunnel test methods for determination of dynamic stability derivatives
p0241 A81-26933
Laminar boundary layer on an oscillating wedge
p0309 A81-29864

Non-linear oscillator models in bluff body aeroelasticity
p0348 A81-30786

Unsteady aerodynamics of an aerofoil at high angle of incidence performing various linear oscillations in a uniform stream
p0357 A81-32017

Experimental investigation of oscillating subsonic jets
p0360 A81-32777

Three-dimensional oscillatory piecewise continuous-kernel function method. I - Basic problems. II - Geometrically continuous wings. III - Wings with geometrical discontinuities
p0411 A81-35631

Measurement of derivatives for an oscillating airfoil with flap
p0411 A81-35635

Wind tunnel determination of dynamic cross-coupling derivatives - A new approach
p0413 A81-35927

Numerical experiments on unsteady flows through vibrating cascades
p0613 A81-47961

A panel method to determine loads on oscillating airfoils in transonic flow with embedded shock waves
[NLR-MP-80005-U] p0330 N81-20039
Oscillatory flows from shock induced separations on biconvex aerofoils of varying thickness in ventilated wind tunnels
p0386 N81-23056

OSCILLATIONS
NT HARMONIC OSCILLATION
NT NONSTABILIZED OSCILLATION
NT PRESSURE OSCILLATIONS
NT SELF OSCILLATION
NT TRANSIENT OSCILLATIONS
NT WING OSCILLATIONS

An introduction to dynamic derivatives (3) methods of oscillating models in pitch and yaw in a 530 by 810 millimetre transonic wind tunnel
[ARL/AERO-NOTE-390] p0021 N81-10007
On the use of active higher harmonic blade pitch control for helicopter vibration reduction
[AD-A090398] p0076 N81-12074
Dynamics of a helicopter-slung load system
p0092 N81-13051

Simulator study of conventional general aviation instrument displays in path-following tasks with emphasis on pilot-induced oscillations
[NASA-TP-1776] p0142 N81-14997
OSCILLATORS
NT CATHODE RAY TUBES
NT CRYSTAL OSCILLATORS

NT OZONE
The effect of oxygen concentration distribution on altitude relighting performance of a turbo-jet engine combustor
p0295 A81-25089

OXYGEN COMPOUNDS
Effect of oxygen-containing additives on the antiwear properties of fuels for gas-turbine aircraft engines
p0517 A81-42558

OXYGEN MASKS
The influence of beards on the efficiency of aviators' oxygen masks
p0176 A81-22100

OXYGEN SUPPLY EQUIPMENT
NT OXYGEN MASKS
Effect of oxygen addition of low pressure ignition performance of aero gas turbine engine at simulated altitude facility
[AIAA PAPER 81-1471] p0505 A81-40891
OXYGEN SYSTEMS
U OXYGEN SUPPLY EQUIPMENT
OZONE
Aircraft NO/x/ emissions and stratospheric ozone reductions - Another look
[AIAA PAPER 81-0306] p0164 A81-20781
Ozone contamination in aircraft cabins: Results from GASP data and analyses
[NASA-TM-81671] p0191 N81-16021
OZONOMETRY
Ozone contamination in aircraft cabins - Results from GASP data and analyses
[AIAA PAPER 81-0305] p0164 A81-20780
Tabulations of ambient ozone data obtained by GASP airliners, March 1975 to December 1977
[NASA-TM-81528] p0096 N81-13860

Analysis of atmospheric ozone levels at commercial airplane cruise altitudes in winter and spring, 1976 - 1977 --- Global Atmospheric Sampling Program
[NASA-TP-1807] p0345 N81-21685
OZONOSPHERE
The aircraft in the stratosphere --- effects on ozone layer equilibrium
p0002 A81-10499

P

P-3 AIRCRAFT
P-3 Orion fuel-saving modification wind tunnel study
[AD-A091906] p0194 N81-16044
P-531 HELICOPTER
Fly-by-wire versus dual mechanical controls for the Advanced Scout Helicopter: Quantitative comparison
[AD-A096089] p0343 N81-21085
Crashworthiness design parameter sensitivity analysis
[AD-A096550] p0374 N81-22041
PACIFIC ISLANDS
Transport jet aircraft noise abatement in foreign countries: Growth, structure, impact. Volume 2: Pacific basin, August 1980
[NASA-CR-152357-VOL-2] p0220 N81-17624
PACKAGING
NT ELECTRONIC PACKAGING
Evaluation/redesign of the F-105 pitch rate gyro pack
[AD-A092109] p0194 N81-16048
PACKING DENSITY
High-density avionic power supply
p0005 A81-11157
PADE APPROXIMATION
An analytical technique for approximating unsteady aerodynamics in the time domain
[NASA-TP-1738] p0043 N81-11422
PAINTS
Technology for rustproofing aircraft and helicopters --- Russian book
p0529 A81-43520
Development of a water displacing, touch-up paint
[AD-A097125] p0392 N81-23288
PACER LINK: An environmental corrosion severity classification system, part 1
[AD-A100496] p0539 N81-28089
PANEL FLUTTER
Response of stiffened sandwich panels
[AIAA 81-0557] p0303 A81-29455
Effect of post buckling on the fatigue of composite structures
p0418 A81-37127
PANEL METHOD (FLUID DYNAMICS)
Numerical optimization of circulation control airfoils
[AIAA PAPER 81-0016] p0157 A81-20540
An optimal-surface-transpiration subsonic panel-method for iterative design of complex aircraft configurations
[AIAA PAPER 81-1254] p0458 A81-39012
Solution of plane cascade flow using improved surface singularity methods --- application of panel method to internal aerodynamics
[NASA-TM-81589] p0140 N81-14979
The influence of the compressibility in simulating the conduct of exterior loads of a carrier
[MBB-FE-122/S/PUB/17] p0220 N81-17483
A higher order panel method for linearized supersonic flow
[NASA-CR-3062] p0262 N81-19022
A panel method to determine loads on oscillating airfoils in transonic flow with embedded shock waves
[NLR-MP-80005-U] p0330 N81-20039
Computation of pressure distribution on the DFVLR wing-body model by the panel method
[DFVLR-FB-80-02] p0372 N81-22029
PANELS
NT WING PANELS
Design and fabrication of stabilized organic matrix composites
p0005 A81-11338
Crack propagation in panels of pressurized fuselages upon simultaneous action of cyclic loading by pressurization and high-frequency vibrations
p0054 A81-13612
Acoustic fatigue strength of fiber-reinforced plastic panels
p0169 A81-20873
Sonic fatigue design techniques for graphite-epoxy stiffened-skin panels
[AIAA 81-0633] p0305 A81-29480
Transient vibrations of elastic panels due to the impact of shock waves
p0616 A81-48385
Fabrication and physical testing of graphite composite panels utilizing woven graphite fabric with current and advanced state-of-the-art resin systems
[NASA-CR-152292] p0218 N81-17175
Development of assembly techniques for fire resistant aircraft interior panels
[NASA-CR-152119] p0254 N81-18097
Design and fabrication of a stringer stiffened discrete-tube actively cooled panel for a hypersonic aircraft
[NASA-CR-3403] p0279 N81-19484
Behavior of continuous filament advanced composite isogrid structure
p0377 N81-22095
PANT PROGRAM
Correlation of artificially induced boundary-layer transition data at hypersonic speeds
p0285 A81-27911
PARABOLIC BODIES
A comparison of Newton-like methods for the transonic small disturbance equation
[AD-A090270] p0033 N81-11017
PARABOLIC DIFFERENTIAL EQUATIONS
Hyperbolic/parabolic development for the GIM-STAR code --- flow fields in supersonic inlets
[NASA-CR-3369] p0201 N81-16416
PARABOLIC REFLECTORS
Apparatus for and method of compensating dynamic unbalance
[NASA-CASE-GSC-12550-1] p0378 N81-22358
Parabolic Dish Solar Thermal Power Annual Program Review Proceedings
[NASA-CR-164696] p0587 N81-30525
First phase testing of solar thermal engine at United Stirling
p0588 N81-30530
Non-heat pipe receiver/p-40 Stirling engine
p0588 N81-30531
PARABOLOIDS
U PARABOLIC BODIES
PARACHUTE DESCENT
Subsonic parachute design, performance, and similarity laws /scale effects/ - A review of the Institute's activities during the last years
p0060 A81-14799
Preliminary consideration of parameter identification analysis from parachute aerodynamic flight test data
p0067 A81-16020
Effects of drive slots on parachute performance
p0453 A81-38020
PARACHUTE FABRICS
System for refurbishing and processing parachutes
[NASA-CASE-KSC-11042-1] p0138 N81-14967
PARACHUTES
NT DRAG CHUTES
NT RECOVERY PARACHUTES
The measurement of pressure distribution around a parachute canopy
p0067 A81-16019
The design, testing, certification and production of an emergency parachute for use in light aircraft
[AIAA PAPER 81-0413] p0168 A81-20817
Development of the first ram air emergency parachute for personnel applications
p0174 A81-22078
Some experimental study on parachute dynamics by utilizing a deceleration system simulator
p0481 A81-40871
System for refurbishing and processing parachutes
[NASA-CASE-KSC-11042-1] p0138 N81-14967
PARACHUTING
U PARACHUTE DESCENT
PARAGLIDERS
NT FLEXIBLE WINGS
PARALLEL FLOW
NT PIPE FLOW

NT THREE DIMENSIONAL FLOW
Noise characteristics of two parallel jets with unequal flow
[AIAA PAPER 80-0168] p0354 A81-31601
PARALLEL PLATES
Modification in drag of turbulent boundary layers resulting from manipulation of large-scale structures
[NASA-CR-3444] p0507 N81-30392
PARALLEL PROCESSING (COMPUTERS)
Dispersed flight control computer systems
p0321 A81-30250
The array processor - A real-time simulator
p0614 A81-48328
An approach to real-time simulation using parallel processing
[NASA-TM-81731] p0345 N81-21803
PARALLEL STRIP LINES
U MICROSTRIP TRANSMISSION LINES
PARAMETER IDENTIFICATION
Preliminary consideration of parameter identification analysis from parachute aerodynamic flight test data
p0067 A81-16020
Parameter identification and discriminant analysis for jet engine mechanical state diagnosis
p0156 A81-20474
Aircraft lateral parameter estimation from flight data with unsteady aerodynamic modelling
[AIAA PAPER 81-0221] p0162 A81-20684
Flight investigations of a helicopter low airspeed estimation system based on measurement of control parameters
p0470 A81-40111
Parameter identification of a hingeless rotor helicopter in flight conditions with increased instability
p0471 A81-40123
Data analysis for aircraft parameter estimates
[AIAA PAPER 81-1664] p0560 A81-44561
An aircraft landing system employing observers
p0562 A81-44699
Real-time estimation in advanced turbofan engines
p0564 A81-45553
Simulating study of the interaction between the propulsion and flight control systems of a subsonic lift fan VTOL
[NASA-TM-81239] p0036 N81-11043
Multivariable identification using centralized fixed modes
p0079 N81-12091
Theoretical investigation of the influence of spoiler dynamics on the handling qualities of an aircraft with direct lift control
[DFVLR-FB-80-07] p0131 N81-13975
Federal Radionavigation Plan. Volume 3: Radionavigation system characteristics
[AD-A093776] p0207 N81-17032
Modeling, acquisition and processing during large displacements --- associated with experiments in flight mechanics
[AAAF-NT-80-16] p0210 N81-17056
Development of advanced techniques for rotorcraft state estimation and parameter identification
[NASA-CR-159297] p0271 N81-19098
Flight test evaluation of predicted light aircraft drag, performance, and stability
[NASA-CR-159062] p0494 N81-27078
Parameter identification of a hingeless rotor helicopter in flight conditions with increased instability
[MBB-UD-307/80-OE] p0584 N81-30140
Determination of aircraft dynamic stability and control parameters from flight testing
p0591 N81-31115
Estimation of dynamic stability parameters from drop model flight tests
p0591 N81-31116
Analytical determination of dynamic stability parameters
p0592 N81-31117
Aeroelasticity, including dynamic effects of separated flow --- launch vehicle response
p0592 N81-31118
Control derivatives
p0592 N81-31119
Sensitivity of aircraft motion to cross coupling and acceleration derivatives
p0592 N81-31120
Some applications of aerodynamic formulations to problems in aircraft dynamics
p0592 N81-31121
Applications of dynamic stability parameters to problems in aircraft dynamics
p0592 N81-31122
Design of optimal inputs for the identification of characteristics of aircraft flights --- parameter identification control theory
p0631 N81-33131
System identification for controlled aircraft --- maximum likelihood estimates, parameter identification
p0631 N81-33132
PARAMETERIZATION
NT PARAMETER IDENTIFICATION
Application of the parameter space method to aerospace vehicle digital control system design
p0359 A81-32642
A nonlinear propulsion system simulation technique for piloted simulators
p0454 A81-38064
Parametric synthesis of an automatic system for flight-vehicle stabilization
p0625 A81-49940
Economic evaluation of flying-qualities design criteria for a transport configured with relaxed static stability
[NASA-TP-1760] p0130 N81-13968
PARTIAL DIFFERENTIAL EQUATIONS
NT PARABOLIC DIFFERENTIAL EQUATIONS
The calculation of quasi-three-dimensional frictionless compressible flow in axial turbomachines --- partial differential equations
[PNR-90047] p0275 N81-19127
PARTIAL PRESSURE
Conditioned pressure spectra and coherence measurements in the core of a turbofan engine
[NASA-TM-82688] p0589 N81-30907
PARTICLE DENSITY (CONCENTRATION)
Gravimetric investigation of the particle number density distribution function in the high speed cascade wind tunnel for laser anemometry measurements

A case study in aircraft design: The de Havilland family of STOL commuter aircraft --- Book p0101 A81-16717
Non-destructive pavement evaluation p0111 A81-18062
The rigidity and performance of a simple spiral bevel helicopter gearbox [ASME PAPER 80-C2/DET-103] p0117 A81-18654
Prediction methods for fatigue crack growth in aircraft material p0118 A81-18777
Application of aerodynamic jump prediction theory to supersonic, high fineness ratio, cruciform finned bodies [AIAA PAPER 81-0222] p0162 A81-20605
An analytical approach to airfoil icing [AIAA PAPER 81-0403] p0167 A81-20810
Semi-empirical correlations for gas turbine emissions, ignition, and flame stabilization p0171 A81-21505
Escape systems testing on the Holloman high speed test track p0175 A81-22088
SAFEST computer simulation of ejection seat performance p0175 A81-22089
An approximate analytical method for vortex-lift and centre of pressure on the slender wing p0223 A81-23726
A one-dimensional analysis and performance prediction of subsonic radial turbines p0228 A81-24086
Current and future concepts in FMEA --- Failure Modes and Effects Analysis p0229 A81-24283
Design requirements of agricultural aircraft p0282 A81-27880
The sweep finite element method for calculating the flow field and performance of supersonic ejector nozzles p0291 A81-29061
Performance analysis of primary and secondary systems of a rocket ramjet engine burning fuel-rich metallized propellants p0292 A81-29068
Discrete hole film cooling of turbine blades p0293 A81-29073
Model for axial compressors operating with water ingestion p0297 A81-29111
Evaluation of methods for prediction and prevention of wing/store flutter [AIAA 81-0606] p0304 A81-29469
Prediction of transonic flutter for a supercritical wing by modified strip analysis and comparison with experiment [AIAA 81-0609] p0304 A81-29471
Efficiency prediction for axial-flow turbines operating with nonconventional fluids [ASME PAPER 81-GT-15] p0310 A81-29937
Further studies of the influence of thermal effects on the predicted acceleration of gas turbines [ASME PAPER 81-GT-21] p0311 A81-29938
Cooling air flow characteristics in gas turbine components

[ASME PAPER 81-GT-76] p0313 A81-29984
Supersonic stall flutter of high-speed fans
[ASME PAPER 81-GT-184] p0317 A81-30078
A generalized mathematical model to estimate gas turbine starting characteristics
[ASME PAPER 81-GT-202] p0318 A81-30092
Program Navigate - A simulation computer program to verify CAS navigation capability --- Offensive Avionics System
p0322 A81-30289
Integrated displays and controls design factors for the 1990's transport aircraft
p0325 A81-30338
Acoustic performance evaluation of an advanced UH-1 helicopter main rotor system
[AHS PAPER 81-58] p0370 A81-33952
Loss model for off-design performance analysis of radial turbines with pivoting-vane, variable-area stators
[SAE PAPER 801135] p0397 A81-34166
SINTAC and its position-finding performance
p0409 A81-35021
Numerical solution of a supersonic ejector pump
p0413 A81-35939
Predictive steering control of dirigibles using the switching curve approach
[AIAA 81-1327] p0456 A81-38535
A survey of heating and turbulent boundary layer characteristics of several hypersonic research aircraft configurations
[AIAA PAPER 81-1145] p0459 A81-39134
A theoretical and experimental study of combustion chambers with recirculation
[ONERA, TP NO. 1981-39] p0460 A81-39242
Aircraft penetration under cloud cover
p0463 A81-39640
Experimental and analytical studies of a model helicopter rotor in hover
p0465 A81-39898
Recent progress in performance prediction of high advance ratio circulation controlled rotors
p0468 A81-40100
ASW helicopter/sonar dynamics mathematical model
p0470 A81-40115
Aerodynamic design of engine air intakes for improved performance
p0470 A81-40117
An empirical prediction method for helicopter performance in low speed level flight and in vertical and forward flight climbs
p0471 A81-40118
On the use of approximate models in helicopter flight mechanics
p0471 A81-40122
Interpretation of ramjet combustor test data
[AIAA PAPER 81-1433] p0504 A81-40870
Firebrand ramjet propulsion system development
[AIAA PAPER 81-1486] p0506 A81-40904
Development of exhaust nozzle internal performance prediction techniques for advanced aircraft applications
[AIAA PAPER 81-1490] p0506 A81-40908
Critical considerations in the design of supersonic combustion ramjet /scramjet/ engines
[AIAA PAPER 80-1284] p0511 A81-41748
Engine life methodologies for conceptual design
[AIAA PAPER 81-1398] p0515 A81-42188
Factors influencing the predicted performance of advanced propeller designs
[AIAA PAPER 81-1564] p0516 A81-42210
Comparison of model testing with computer simulations of an air landing system
[AIAA PAPER 81-1663] p0534 A81-43942
A model-following technique for insensitive aircraft control systems
[AIAA PAPER 81-1867] p0560 A81-44563
A vortex-lattice method for calculating longitudinal dynamic stability derivatives of oscillating delta wings
[AIAA PAPER 81-1876] p0561 A81-44570
General describing function method for systems with many nonlinearities, with application to aircraft performance
p0564 A81-45588
The predictability of turbine vane convection heat transfer
[AIAA PAPER 81-1435] p0566 A81-45892
Prediction of range and endurance of jet aircraft at constant altitude
p0611 A81-47725
Operational characteristics comparison /ACV and SES/
[AIAA PAPER 81-2064] p0616 A81-48001
Performance prediction for light airplanes
p0622 A81-48374
A method of performance prediction for centrifugal compressors. Part 1: Analysis. Part 2: Comparison with experiment
[ARC-R/M-3843] p0031 N81-10836
Definitive generic study for the effect of high lift airfoils on wind turbine effectiveness, executive summary
[SERI/TR-98003-2] p0043 N81-11492
Engine diagnostics program: CF6-50 engine performance deterioration
[NASA-CR-159867] p0078 N81-12085
Mixing and combustion in high speed air flows
[AD-A090536] p0083 N81-12192
Prediction and evaluation of thrust augmenting ejector performance at the conceptual design stage
[AD-A093953] p0216 N81-17094
Recent progress toward predicting aircraft ground handling performance
p0268 N81-19068
Evaluation of emergency-locator-transmitter performance in real and simulated crash tests
p0268 N81-19070
Method for computation of structural failure probability for an aircraft
[AD-A098294] p0426 N81-24050
JT9D performance deterioration results from a simulated aerodynamic load test
[NASA-TM-82640] p0443 N81-25082
Factors influencing the predicted performance of advanced propeller designs
[NASA-TM-82676] p0492 N81-27042
The supersonic fan engine: An advanced concept in supersonic cruise propulsion
[NASA-TM-82657] p0496 N81-27094
Statistics of some atmospheric turbulence records relevant to aircraft response calculations
[NASA-CR-3464] p0637 N81-33191
PERFORMANCE TESTS
Comparative performance of two centrifugal fan impellers differing in blade section
p0001 A81-10162
Airfield pavement demonstration-validation study
p0003 A81-10718
Model tests for an active rotor isolation system
[MBB-278-79-0] p0018 A81-12095
United States Army helicopter icing qualification 1980
[AIAA PAPER 81-0406] p0167 A81-20812
The design, testing, certification and production of an emergency parachute for use in light aircraft
[AIAA PAPER 81-0413] p0168 A81-20817
The necessity of 'testing-in' hardware reliability
p0229 A81-24277
Helicopter-ship qualification testing
p0232 A81-24941
Film cooling performance of liner cooling devices
p0293 A81-29075
Application of scaling in afterburner test and development
[ASME PAPER 81-GT-194] p0317 A81-30086
Helicopter rotor blade effects on mast-mounted sensor images
p0350 A81-31114
Design, fabrication, calibration, application, and testing of advanced aircraft weighing systems
[SAWE PAPER 1383] p0353 A81-31399
Quarter-scale testing of an advanced rotor system for the UH-1 helicopter
p0395 A81-34121
Supersonic aircraft test experience - Test techniques and data analysis methods
p0419 A81-37299
Fundamental investigation on jet engine ignition of fuel sprays and its application
p0420 A81-37341
KS-127A long range oblique reconnaissance camera for RF-4 aircraft
p0462 A81-39419
The requirements for and evolution of a test rig for exhaust gas recirculation studies of V/STOL aircraft
p0469 A81-40106

Summary of interface testing of the digital
AN/ASN-123 tactical navigation avionic system in
the SH-3H helicopter
[AHS 80-18] p0474 A81-40149
Results of a simulator investigation of control
system and display variations for an attack
helicopter mission
[AHS 80-28] p0475 A81-40158
NASA/FAA flight-test investigation of helicopter
microwave landing system approaches
[AHS 80-55] p0478 A81-40180
An experimental study on air intake performance
for a rocket/ramjet engine

U PRESSURE SENSORS
PRESSURE PULSES
Influence of boundary-layer suction on the emission spectrum on a thin plate performing oscillations under the action of pressure pulsations --- in aircraft noise reduction
p0054 A81-13573
Influence of boundary-layer suction on the spectrum of radiation from a thin plate vibrating under the action of pressure fluctuations --- in aircraft noise reduction
p0238 A81-26137
PRESSURE RATIO
Test results from an analytically designed axial compressor stage of 1.65:1 pressure ratio
[SAE PAPER 800629] p0063 A81-15344
Fuel character effects on current, high pressure ratio, can-type turbine combustion systems
[AD-A089182] p0029 N81-10073
PRESSURE REDUCTION
Losses of total pressure during mixing of flows in a step diffuser
p0242 A81-26991
The M.45SD-02 variable pitch geared fan engine demonstrator test and evaluation experience
p0283 A81-27897
Application of model laws when determining the heat transfer coefficients by experiments on cooled turbine blades
p0089 N81-12998
Flame tube and ballistic evaluation of Explosafe aluminum foil for aircraft fuel tank explosion protection --- suppressing combustion overpressure
[AD-A093542] p0208 N81-17046
Thermal and flow analysis of a convection air-cooled ceramic coated porous metal concept for turbine vanes
[NASA-TM-81749] p0376 N81-22056
Experimental development of an advanced circulation control wing system for Navy STOL aircraft
[AD-A101309] p0581 N81-30116
PRESSURE REGULATORS
Cabin pressure control systems for general aviation aircraft
[SAE PAPER 800606] p0061 A81-15329
PRESSURE SENSORS
Miniature pressure probe for measuring the surface-shear-stress vector in turbulent flow
p0233 A81-25354
System to measure the pressure distribution on fan aerofoil surfaces during flutter conditions
[PNR-90013] p0072 N81-12029
Comparison of flight load measurements obtained from calibrated strain gages and pressure transducers
[AD-A093758] p0208 N81-17044
Study of an experimental probe for the measurement of the acoustic pressure inside an air flow
[ESA-TT-633] p0344 N81-21340
PRESSURE TRANSDUCERS
U PRESSURE SENSORS
PRESSURE VESSELS
The use of acoustic emission for detecting and evaluating of fatigue cracks severity during static and cyclic loading of structure elements
p0153 A81-20214
PRESSURE WAVES
U ELASTIC WAVES
PRESSURE WELDING
NT DIFFUSION WELDING
PRESSURIZED CABINS
Cabin pressure control systems for general aviation aircraft
[SAE PAPER 800606] p0061 A81-15329
The use of bonded crack-stoppers in pressure cabins
p0233 A81-25378
PRESSURIZING
Crack propagation in panels of pressurized fuselages upon simultaneous action of cyclic loading by pressurization and high-frequency vibrations
p0054 A81-13612
PRESTON TUBES
U PITOT TUBES
U SPEED INDICATORS
PRESTRAINING
U PRESTRESSING
PRESTRESSING
Prestressed concrete airfield pavements
p0112 A81-18063
Instability of short stiffened and composite cylindrical shells acting under pure bending moments considering prebuckling displacements
[AIAA 81-0571] p0302 A81-29405
PRETREATMENT
NT PRESTRESSING
PRETWISTING
U PRESTRESSING
U TWISTING
PREVAPORIZATION
A model for the analysis of premixing-prevaporizing fuel-air mixing passages
[AIAA PAPER 81-0345] p0165 A81-20767
Ignition of lean fuel-air mixtures in a premixing-prevaporizing duct at temperatures up to 1000 K
[NASA-TM-81645] p0095 N81-13465
PREVENTION
NT ACCIDENT PREVENTION
NT CORROSION PREVENTION

PROBABILITY
U PROBABILITY THEORY
PROBABILITY DENSITY FUNCTIONS
NT NORMAL DENSITY FUNCTIONS
PROBABILITY DISTRIBUTION FUNCTIONS
A correlated random numbers generator and its use to estimate false alarm rates of airplane sensor failure detection algorithms
p0453 A81-37822
PROBABILITY THEORY
The evaluation of aircraft collision probabilities at intersecting air routes
p0174 A81-21967
Mathematical aspects of the probabilistic evaluations of structural safety and NDI capabilities
p0181 A81-22635
Is it safe - The safety assessment of aircraft systems. III - The use of probability methods
p0290 A81-29029
A practical probabilistic method for evaluating the fail-safeness of structures that may fail due to fatigue
p0612 A81-47868
Computer graphics applications
[PB81-215246] p0637 N81-33108
PROBLEM SOLVING
NT ASYMPTOTIC METHODS
NT ITERATIVE SOLUTION
PROCEDURES
NT FINITE ELEMENT METHOD
NT FINITE VOLUME METHOD
NT OPTICAL CORRECTION PROCEDURE
NT PANEL METHOD (FLUID DYNAMICS)
A unified approach to the mass balancing of rotating flexible shafts
p0095 N81-13355

Functional testing airborne radars
[AD-A097562] p0392 N81-23358
PROCEEDINGS
AFSC Standarization Conference, 1553, 1589, 1750, 1760, Ada. Volume 1: Proceedings
[AD-A100575] p0539 N81-28092
AFSC Standarization Conference, 1553, 1589, 1750, 1760, Ada. Volume 2: Proceedings standards
[AD-A100577] p0539 N81-28093
PROCESS CONTROL (INDUSTRY)
New developments of data processing in computer-controlled manufacturing systems /DNC, FMS/
p0149 A81-19845
A new approach to thick-film resistors
p0232 A81-24968
Development and fabrication of refractory silicon carbide bodies, especially for gas turbine engines --- by hot pressing
[BMFT-FB-T-79-137] p0275 N81-19128
PROCESSORS (COMPUTERS)
U CENTRAL PROCESSING UNITS
PROCUREMENT
NT GOVERNMENT PROCUREMENT
Preliminary design study of advanced composite blade and hub and nonmechanical control system for the tilt-rotor aircraft. Volume 2: Project planning data
[NASA-CR-152336-2] p0387 N81-23065
PROCUREMENT MANAGEMENT
Air Force Integration Support Facilities - Their total utility
p0320 A81-30240
Aircraft/avionics environmental integration program
p0570 A81-46480
Design to cost and systems, LCC
p0047 N81-11920
PROCUREMENT POLICY
Soviet practice in designing and procuring military aircraft
p0567 A81-46340
Boeing Commercial Airplane Company engine procurement practices
p0429 N81-24076
PRODUCT DEVELOPMENT
The Grumman Aerospace and Gulfstream American Gulfstream III case study in aircraft design --- Book
p0101 A81-16720
The design-to-cost of aircraft
p0119 A81-19344
Feederjet for the 'eighties
p0410 A81-35024
Development, production, calculation and testing of a carbon/Kevlar fibre reinforced flap
p0481 A81-40585
Development of an integrated fault tolerant engine control
[AIAA PAPER 81-1365] p0502 A81-40845
A strategy for developing the next generation fighter/attack aircraft engine
[AIAA PAPER 81-1478] p0505 A81-40898
The PW100 commuter powerplant
[AIAA PAPER 81-1731] p0528 A81-43170
The new generation of turboshaft and turboprop engines
p0560 A81-44473
Low cost airborne microwave landing system receiver, task 3
[NASA-CR-152409] p0075 N81-12054
Development of high-temperature turbine subsystem technology to a technology readiness status, phase 2
[FR-1806-72] p0134 N81-14332
Development of gas turbine components, using silicon nitride --- forming techniques
[BMFT-FB-T-79-152] p0275 N81-19129
SRDS Technical Program document. Fiscal year 1981. Research and Development approved projects
[AD-A096293] p0339 N81-21050
Development of a water displacing, touch-up paint
[AD-A097125] p0392 N81-23288
Helicopter gearbox testing
p0488 N81-26137
Manufacturing development of DC-10 advanced rudder
[NASA-CR-159060] p0494 N81-27077
Development of high strength silicon carbide materials for gas turbine applications
[BMFT-FB-T-80-025] p0497 N81-27102
PRODUCTION COSTS
Aircraft engine programs employing cost objectives
p0119 A81-19346
Producibility engineering at ASD
p0326 A81-30341
Utilization in industry of ICAM 'Manufacturing Cost/Design Guide' /MC/DG/ for metallic structures
p0558 A81-44374
PRODUCTION ENGINEERING
NT PRODUCTION PLANNING
Reduction of energy consumption in the vibrational shot peening of axial compressor vanes
p0005 A81-11321
Design to cost and new technologies
p0120 A81-19347
Isothermal rolling of aircraft parts - Versatile process saves costly materials
p0227 A81-24047
Optimization of finishing conditions --- metal cutting
p0319 A81-30163
Producibility engineering at ASD
p0326 A81-30341
Integrated CAD/CAM for the 1980s
[SAE PAPER 801170] p0400 A81-34185
CAD - The designers' new tool --- in aircraft production
[AIAA PAPER 81-0850] p0407 A81-34352
Integrated flexible sheet-metal components - Manufacturing center
p0449 A81-37633
Computer-aided design and manufacture in aircraft production /CAD/CAM/
p0451 A81-37647
Advanced production methods for the Dornier 228
p0457 A81-38802
Flight-vehicle production technology --- Russian book
p0564 A81-45603
Design of production processes for flight-vehicle engines --- Russian book
p0623 A81-49475
US Army design-to-cost experience
p0045 N81-11905
Environmental burn-in effectiveness
[AD-A093307] p0211 N81-17060
PRODUCTION MANAGEMENT
Producibility engineering at ASD
p0326 A81-30341
Quality in design --- and production of aircraft
[SNIAS-802-111-108] p0427 N81-24054
PRODUCTION METHODS
U PRODUCTION ENGINEERING
PRODUCTION PLANNING
Computer-aided process planning system for aircraft engine rotating parts
p0149 A81-19836
New developments of data processing in computer-controlled manufacturing systems /DNC, FMS/
p0149 A81-19845
A review and assessment of system cost reduction activities
p0045 N81-11906
Design to life cycle cost research
p0045 N81-11907
Organizing a design-to-cost program
p0046 N81-11914
PRODUCTIVITY
Producibility engineering at ASD
p0326 A81-30341
A study of the factors affecting productivity at the Naval Air Rework Facilities
[AD-A103783] p0631 N81-33134
PRODUCTS
NT ASPHALT

PROP-FAN TECHNOLOGY
Low and high speed propellers for general aviation - Performance potential and recent wind tunnel test results
p0521 A81-42758
Advanced turboprop cargo aircraft systems study
[AIAA PAPER 81-1684] p0526 A81-43156
Wright Field turboprop study
[AIAA PAPER 81-1685] p0526 A81-43157
Turboprop engine propulsion for the 1990's
[AIAA PAPER 81-1648] p0533 A81-43935

PROPAGATION (EXTENSION)
NT CRACK PROPAGATION
NT FLAME PROPAGATION

PROPAGATION VELOCITY
Crack propagation in lugs
p0180 A81-22629
Investigation of the influence of active particles on the basic combustion characteristics in turbulent flow
p0242 A81-26986

PROPELLANT ADDITIVES
Fire-proof fuel
p0480 A81-40458
Effect of oxygen-containing additives on the antiwear properties of fuels for gas-turbine aircraft engines
p0517 A81-42558
Application of General Technology Applications, Incorporated (GTA) blending process to antimisting fuel additives
[AD-A100692] p0551 N81-29247

PROPELLANT COMBUSTION
NT SOLID PROPELLANT COMBUSTION
A study of air breathing rockets - Subsonic mode combustion
[IAF PAPER 80-F-270] p0115 A81-18371
Preliminary experimental study of combustion in the solid rocket-ramjet
p0292 A81-29067

PROPELLANT DECOMPOSITION
Degradation and characterization of antimisting kerosene /AMK/
[AIAA PAPER 81-1423] p0503 A81-40867

PROPELLANT EXPLOSIONS
Testimony of Elwood T. Driver, Vice Chairman, National Transportation Safety Board, accompanied by Gerrit J. Walhout, Chief, Human Factors Division, and Matthew M. McCormick, Senior Air Safety Investigator, Human Factors Division
p0126 N81-13934

PROPELLANT GRAINS
Light transmission measurements in solid fuel ramjet combustors
p0284 A81-27910

PROPELLANT PROPERTIES
Degradation and characterization of antimisting kerosene /AMK/
[AIAA PAPER 81-1423] p0503 A81-40867

PROPELLANTS

PROPELLER BLADES
Helicopter blade reliability
p0287 A81-28474
Propellers for economic flight at high speeds
[AAAF PAPER NT 80-34] p0369 A81-33936
The NASA high-speed turboprop program
[SAE PAPER 801120] p0396 A81-34156
Multi service applications for advancing blade concept aircraft
[SAE PAPER 801226] p0405 A81-34229
Propfan progress
p0480 A81-40459
Impact of advanced propeller technology on aircraft/mission characteristics of several general aviation aircraft
[SAE PAPER 810584] p0520 A81-42745
General aviation propeller noise reduction - Penalties and potential
[SAE PAPER 810585] p0520 A81-42746
The effect of proplets and bi-blades on the performance and noise of propellers
[SAE PAPER 810600] p0521 A81-42757
Investigation of performance, noise and detectability characteristics of small-scale remotely piloted vehicle /RPV/ propellers
[AIAA PAPER 81-2005] p0624 A81-49732
The high-speed airfoil program
p0185 N81-15970
The high-speed propeller program
p0185 N81-15972
Low and high speed propellers for general aviation: Performance potential and recent wind tunnel test results
[NASA-TM-81745] p0338 N81-21028
An evaluation of a simplified near field noise model for supersonic helical tip speed propellers

[NASA-TM-81727] p0380 N81-22836
The theoretical performance of high efficiency propellers
p0537 N81-28049
Design of a slot height distribution for increased hover control power on a circulation control rotor
[AD-A103535] p0637 N81-33194

PROPELLER DRIVE
NT HELICOPTER PROPELLER DRIVE
Experiments on the validity of ground effect predictions for static noise testing of propeller aircraft
p0054 A81-13811
Attenuation of propeller related vibration and noise
[AIAA 81-0521] p0303 A81-29442
Propeller performance and design as influenced by the installation
[SAE PAPER 810602] p0521 A81-42759
Investigation of a flight test method for the measurement of propeller thrust
[SAE PAPER 810603] p0521 A81-42760
Correction procedures for aircraft noise data. Volume 5: Propeller aircraft noise
[AD-A091017] p0096 N81-13720

PROPELLER EFFICIENCY
Aerodynamic design of a ducted propeller - Optimization of efficiency
p0102 A81-17146
Calculation of propeller efficiency for an ideal propeller
p0121 A81-19444
Propellers for economic flight at high speeds
[AAAF PAPER NT 80-34] p0369 A81-33936
The NASA high-speed turboprop program
[SAE PAPER 801120] p0396 A81-34156
Design, construction and testing of an improved aircraft propeller
p0449 A81-37635
Propellers for economic flight at high speeds
p0464 A81-39698
Impact of advanced propeller technology on aircraft/mission characteristics of several general aviation aircraft
[SAE PAPER 810584] p0520 A81-42745
The effect of proplets and bi-blades on the performance and noise of propellers
[SAE PAPER 810600] p0521 A81-42757
Propeller performance and design as influenced by the installation
[SAE PAPER 810602] p0521 A81-42759
Electronic control system for a modern turboprop engine
[SAE PAPER 810620] p0523 A81-42775
Factors influencing the predicted performance of advanced propeller designs
[NASA-TM-82676] p0492 N81-27042
The theoretical performance of high efficiency propellers
p0537 N81-28049

PROPELLER FANS
The relevance of the Flex-Hub Prop-Fan for fuel-efficient airliners
p0006 A81-11605
Noise generation mechanism of low pressure propeller fans
[AIAA PAPER 81-0090] p0160 A81-20594
Propellers for economic flight at high speeds
p0464 A81-39698
Propfan progress
p0480 A81-40459
Propulsion system installation design for high-speed prop-fans
[AIAA PAPER 81-1649] p0526 A81-43144
Advanced turboprop installation aerodynamics
p0260 N81-19013

PROPELLER SLIPSTREAMS
Installation effects on propeller noise
[AIAA PAPER 80-0993] p0352 A81-31369
Assessment of propeller influence on lateral-directional stability of multiengine aircraft
p0411 A81-35632
An application of wake survey rakes to the experimental determination of thrust for a propeller driven aircraft
[NASA-CR-163920] p0186 N81-15986
An application of wake survey rakes to the experimental determination of thrust for a propeller driven aircraft
[NASA-CR-163967] p0251 N81-18046

PROPELLERS

Data base for the prediction of airframe/propulsion system interference effects
[NASA-CR-152316] p0251 N81-18045

GASP- General Aviation Synthesis Program. Volume 4: Propulsion. Part 1: Theoretical development
[NASA-CR-152303-VOL-4-PT-1] p0271 N81-19091

Application of ion implantation for the improvement of localized corrosion resistance of M50 steel bearings
[AD-A097230] p0393 N81-23466

Comparison of NASA and contractor results from aeroacoustic tests of QCSEE OTW engine
[NASA-TM-81761] p0443 N81-25079

Microcomputer Applications in Power and Propulsion Systems
[AGARD-LS-113] p0497 N81-27103

The packaging of electronic engine control units and related subcomponents
p0497 N81-27105

Small turbine engine augmentor. Phase 1: Preliminary design studies of afterburner and duct-burner configurations
[AD-A101595] p0583 N81-30131

PROPULSION SYSTEM PERFORMANCE

A survey on airbreathing propulsion education
p0063 A81-15375

Specialists' Meeting on Helicopter Propulsion Systems, Williamsburg, Va., November 6-8, 1979, Technical Papers
p0104 A81-17501

Helicopter propulsion system development and qualification
p0105 A81-17511

A survey of propulsion systems' malfunctions/failures resulting in helicopter mishaps
p0105 A81-17513

The future of aeronautical propulsion
p0290 A81-29052

Effectiveness of turbine engine diagnostic systems
p0290 A81-29053

Performance analysis of primary and secondary systems of a rocket ramjet engine burning fuel-rich metallized propellants
p0292 A81-29066

Preliminary experimental study of combustion in the solid rocket-ramjet
p0292 A81-29067

Air augmentation of rockets for low speed application
p0292 A81-29068

A new breed of an air breathing engine
p0292 A81-29070

Gas turbine engineering: Applications, cycles and characteristics --- Book
p0309 A81-29680

Life cycle cost before, during and after the design of aircraft propulsion systems
[ASME PAPER 81-GT-111] p0315 A81-30016

New correlations of the two-dimensional turbine cascade aerodynamic performance
[ASME PAPER 81-GT-128] p0316 A81-30032

Effect of time-dependent flight loads on turbofan engine performance deterioration
[ASME PAPER 81-GT-203] p0318 A81-30093

Improvement of the energy efficiency of helicopters
[AAAF PAPER NT 80-33] p0369 A81-33933

Improved components for engine fuel savings
[SAE PAPER 801116] p0395 A81-34152

JT8D performance improvement to offset rising fuel costs
[SAE PAPER 801117] p0395 A81-34153

Performance deterioration of commercial high-bypass ratio turbofan engines
[SAE PAPER 801118] p0396 A81-34154

A review of the installation, performance and economic aspects of a high altitude facility for small gas turbines
[SAE PAPER 801121] p0396 A81-34157

An alternative approach to engine rating structures using monitoring systems
[SAE PAPER 801225] p0405 A81-34228

Multi service applications for advancing blade concept aircraft
[SAE PAPER 801226] p0405 A81-34229

Development requirements for integrated aircraft power systems
[SAE PAPER 801149] p0406 A81-34241

Component research for future propulsion systems
p0454 A81-38058

A nonlinear propulsion system simulation technique for piloted simulators
p0454 A81-38064

V/STOL combat aircraft progress from the powerplant viewpoint
p0469 A81-40105

Design and development of the Model 412 helicopter
[AHS 80-56] p0478 A81-40181

V/STOL technology requirements for future fighter aircraft
[AIAA PAPER 81-1360] p0502 A81-40841

Effect of a part-span variable inlet guide vane on the performance of a high-bypass turbofan engine
[AIAA PAPER 81-1362] p0502 A81-40842

Fuel character effects on the TF41 engine combustion system
[AIAA PAPER 81-1391] p0503 A81-40858

Selected results from combustion research at the Lewis Research Center
[AIAA PAPER 81-1392] p0503 A81-40859

Analysis of steady, two-dimensional, chemically reacting nonequilibrium flow by an unsteady, asymptotically consistent technique --- for performance prediction of ramjet propulsion system
[AIAA PAPER 81-1432] p0504 A81-40869

Subsonic/supersonic nonvectored aeropropulsive characteristics of nonaxisymmetric nozzles installed on an F-18 model
[AIAA PAPER 81-1445] p0504 A81-40870

External burning propulsion analysis
[AIAA PAPER 81-1477] p0505 A81-40897

Firebrand ramjet propulsion system development
[AIAA PAPER 81-1486] p0506 A81-40904

JT9D performance deterioration results from a simulated aerodynamic load test

[AIAA PAPER 81-1588] p0507 A81-40963
Performance analysis of a family of planar pulse generators
[AIAA PAPER 81-1590] p0507 A81-40965
NASA VCE test bed engine aerodynamic performance characteristics and test results
[AIAA PAPER 81-1594] p0508 A81-40969
Advanced supersonic transport propulsion and configuration technology improvements
[AIAA PAPER 81-1595] p0508 A81-40970
Turbine bypass engine - A new supersonic cruise propulsion concept

[AD-A091282] p0095 N81-13251
Detection of military aircraft in an Air Traffic Control Radar Beacon System (ATCRBS) environment
[AD-A093427] p0207 N81-17036
Discrete Address Beacon System (DABS) receiver and Air Traffic Control Radar Beacon System (ATCRBS) and DABS processor subsystem tests
[AD-A094124] p0250 N81-18037
Active Beacon Collision Avoidance System (BCAS) functional overview
[AD-A094177] p0250 N81-18040
Minimum operational performance standards for airborne radar approach and beacon systems for helicopters
[RTCA/DO-172] p0336 N81-20322
Discrete Address Beacon System (DABS) computer performance/test and evaluation
[AD-A099326] p0484 N81-26088
Radar Beacon Transponder (RBX) functional description
[AD-A100665] p0547 N81-29112
Radar Beacon Transponder (RBX) installation and siting criteria
[AD-A100666] p0547 N81-29113

RADAR CLUTTER MAPS
New ways in antenna technology for optimal adjustment of the background clutter
p0151 A81-20084
Evaluation of false alarm information with the ELRA
p0152 A81-20100

RADAR CROSS SECTIONS
Inflight aircraft vibration modes and their effect on aircraft radar cross section
p0352 A81-31370
Detection of target multiplicity using monopulse quadrature angle
p0360 A81-32696
An original method for the analysis of the power diffraction pattern of a radar target for shape recognition purposes
p0607 A81-47143
Electromagnetic scattering by open circular waveguides --- modeling jet engine inlets
[AD-A095554] p0336 N81-20345

RADAR DATA
The state of development and design of target data processing of the ELRA system
p0152 A81-20089
New techniques and development trends in the system architecture of EDP systems for radar data processing and airspace control
p0153 A81-20103
Ground moving target radar signal simulation
p0323 A81-30304

RADAR DETECTION
Radar target detection and map-matching algorithm studies
p0005 A81-11158
Time-compressed displays for target detection
p0064 A81-15686
Adaptive control for electronic countermeasures
p0155 A81-20470
Mini-RPV radar test program
p0180 A81-22619

Advanced techniques for airborne target screener
p0320 A81-30238
Detection of target multiplicity using monopulse quadrature angle
p0360 A81-32696

RAMAN SPECTRA
Laser-Raman/Rayleigh flow diagnostic techniques applied to subsonic flow
[AD-A091695] p0133 N81-14275

RAMJET ENGINES
NT SUPERSONIC COMBUSTION RAMJET ENGINES
Comparison of systems of power generation during emergencies /aboard aircraft/
p0177 A81-22203
Light transmission measurements in solid fuel ramjet combustors
p0264 A81-27910
Flowfield studies of dump combustors
p0292 A81-29064
Performance analysis of primary and secondary systems of a rocket ramjet engine burning fuel-rich metallised propellants
p0292 A81-29066
Preliminary experimental study of combustion in the solid rocket-ramjet
p0292 A81-29067
Sudden expansion injection for ram-rockets
p0293 A81-29071

Analysis of steady, two-dimensional, chemically
reacting nonequilibrium flow by an unsteady,
asymptotically consistent technique --- for
performance prediction of ramjet propulsion system
[AIAA PAPER 81-1432] p0504 A81-40669
Interpretation of ramjet combustor test data
[AIAA PAPER 81-1433] p0504 A81-40870
Prediction of swirling reacting flow in ramjet
combustors
[AIAA PAPER 81-1485] p0506 A81-40903
Firebrand ramjet propulsion system development
[AIAA PAPER 81-1486] p0506 A81-40904
An experimental study on air intake performance
for a rocket/ramjet engine
[AIAA PAPER 81-1488] p0506 A81-40906
Modeling of ramjet combustors using simple reactor
theory
[AIAA PAPER 81-1429] p0515 A81-42196
Effects of advances in propulsion technology on
missile effectiveness --- solid fuel ramjets
[AD-A090645] p0081 N81-12106
Mixing and combustion in high speed air flows
[AD-A090536] p0083 N81-12192
High-speed cowlings, air inlets and outlets, and
internal-flow systems
p0185 N81-15973
The 17th JANNAF combustion meeting, volume 1
[NASA-TM-82238] p0200 N81-16253
An investigation of the reacting and non-reacting
flow characteristics of solid ramjets
[AD-A094567] p0253 N81-18059
Aerodynamic characteristics of a hypersonic cruise
aircraft concept with wing-mounted propulsion
systems at Mach numbers of 2.96, 3.96 and 4.63
--- Langley unitary plan wind tunnel tests
[NASA-TM-81937] p0329 N81-20025
Multiple-scale turbulence modeling of boundary
layer flows for scramjet applications
[NASA-CR-3433] p0392 N81-23411
An investigation of the combustion behavior of
solid fuel ramjets
[AD-A098481] p0445 N81-25240
Combustion in high speed air flows
[AD-A102336] p0602 N81-31320
RAMJET MISSILES
An approach to ramjet trajectory simulation test
p0292 A81-29065
O.N.E.R.A. ramjet test facilities
p0365 A81-33285
Firebrand ramjet propulsion system development
[AIAA PAPER 81-1486] p0506 A81-40904
RAMP FUNCTIONS
Results of oscillatory pitch and ramp tests on the
NACA 0012 blade section
[ARA-MEMO-220] p0690 N81-13024
RANDOM ACCESS MEMORY
New storage medium - Greater safety. II - Testing,
fabrication, implementation --- MNOS block
oriented random access memory (BCRAM) circuits
p0227 A81-24044
RANDOM LOADS
NT GUST LOADS
Active gust- and maneuver load control concepts,
taking into account, as example, the Airbus
A300. I - Design of a controller in the temporal
domain for the alleviation of gust loads and the
control of the effectiveness for stochastic gusts
[DGLR PAPER 81-065A] p0600 A81-47552
RANDOM NOISE
Robust autoregressive models for predicting
aircraft motion from noisy data
p0155 A81-20473
The spectral analysis of nonstationary random
processes - Applications to aircraft
overflight-type noises --- French thesis
p0174 A81-21922
Accuracy of noise-modulated radio altimeter
p0359 A81-32694
Contribution to the study of non stationary
signals emitted by moving jet engine -
Application to special analysis and imaging. I.
p0365 A81-33288
Contribution to the study of non-stationary
signals emitted by moving jet engines -
Application to spectral analysis and imaging. II
p0366 A81-33294
Contribution to the study of nonstationary signals
emitted by moving jet engines: Application to
special analysis and imaging. Part 1
p0447 N81-260
RANDOM NUMBERS
A correlated random numbers generator and its use
to estimate false alarm rates of airplane sensor
failure detection algorithms
p0154 A81-20
A correlated random numbers generator and its use
to estimate false alarm rates of airplane sensor
failure detection algorithms
p0453 A81-370
RANDOM PROCESSES

REAL TIME OPERATION
A case study - Real time simulation and structured design
p0172 A81-21721
A flight test real-time CW-CG computing system
p0361 A81-32860
Real-time microprocessor technology applied to automatic braking systems
[SAE PAPER 801194] p0402 A81-34208
A nonlinear propulsion system simulation technique for piloted simulators
p0454 A81-38064
The Bundeswehr Drone Program - Where are we today
p0458 A81-38806
Real time analysis for helicopter flight testing
p0470 A81-40112
An active control system for helicopter vibration reduction by higher harmonic pitch
[AHS 80-71] p0479 A81-40189
Real-time fluoroscopic imaging system for honeycomb bond structures
p0529 A81-43563
Real-time estimation in advanced turbofan engines
p0564 A81-45553
The array processor - A real-time simulator
p0614 A81-48328
Function generation techniques --- in real time hybrid simulations
p0614 A81-48329
A technique for the implementation of nonlinear models as real-time digital simulations --- with application to aircraft turbine engine design
p0615 A81-48333
Development considerations for real-time aircraft/avionic distributed computer control systems
p0616 A81-48376
ATARS implementation tradeoff
[AD-A089977] p0034 N81-11026
Experimental analysis of IMEP in a rotary combustion engine
[NASA-TM-81662] p0195 N81-16054
Possible online uses of AIDS data in future ATC systems
p0328 N81-20010
An approach to real-time simulation using parallel processing
[NASA-TM-81731] p0345 N81-21003
A study of real-time computer graphic display technology for aeronautical applications
[NASA-CR-164221] p0380 N81-22727
Tests of large compressors at CE Pr
p0432 N81-24096
Programmable multipurpose flight test instrumentation system

Information requirements for airborne electronic terrain maps p0325 A81-38330

REMOTE CONTROL
NT RADIO CONTROL

REMOTE SENSING
Design and preliminary tests of an IR-airborne LLWS remote sensing system --- Low Level Wind Shear
[AIAA PAPER 81-0239] p0163 A81-20694
Tri-bar reading correction for oblique imagery
p0178 A81-22495
Compact and highly sensitive fluorescence lidar for oceanographic measurements
p0623 A81-49378
Aeronautics and Space Report of the President, 1979 activities
p0089 N81-12956

REMOTE SENSORS
Sensor Systems for the 80's Conference, Colorado Springs, Colo., December 2-4, 1980, Technical Papers
p0052 A81-13351
An airborne sensor for the avoidance of clear air turbulence
[AIAA PAPER 81-0297] p0164 A81-20735
Mini-RPV radar test program
p0180 A81-22619
Helicopter rotor blade effects on mast-mounted sensor images
p0350 A81-31114
Charge-coupled device /CCD/ camera/memory optimization for expendable autonomous vehicles
p0357 A81-32491
Airborne ground velocity determination by digital processing of electro-optical line sensor signals
p0358 A81-32496
Autonomous target handoff from an airborne sensor to a missile seeker
p0358 A81-32498
Advanced target tracking by dynamic scene analysis
p0358 A81-32499
Moving target identification /MTI/ algorithm for passive sensors
p0358 A81-32502
Big 'R', little 'c', integrated data annotation and sensor control for long range oblique photography /LOROP/ --- increased reliability and reduced complexity
p0462 A81-39435
Integrated sensor control system for RF-5E demonstrator
p0462 A81-39438
Winds and wind shear in-situ sensors
p0136 N81-14563

REMOTELY PILOTED VEHICLES
Low cost technology for expendable RPV applications
p0049 A81-12795
A concept for dynamic control of RPV information system parameters
p0049 A81-12796
History and prospects for mini-RPVs and drones
p0049 A81-12797
Aerial surveying of small areas from a small remotely controlled drone
p0107 A81-17525
Development and demonstration of an automatic control and recovery system for remotely piloted vehicles
p0156 A81-20476
Qualification of HiMAT flight systems
p0179 A81-22603
Mini-RPV radar test program
p0180 A81-22619
Flight test results of an active flutter suppression system installed on a remotely piloted research vehicle
[AIAA 81-0655] p0308 A81-29507
An extremely lightweight fuselage-integrated phased array for airborne applications
p0348 A81-30779
A high performance TV camera for use in target acquisition and laser designator systems
p0350 A81-31115
Forward-looking infrared /FLIR/ sensor for autonomous vehicles
p0357 A81-32490
Technology growth in mini-RPV systems
[AIAA PAPER 81-0936] p0363 A81-32937
HiMAT systems development results and projections
[SAE PAPER 801175] p0400 A81-34138
LQG controls for highly maneuverable aircraft --- Linear quadratic Gaussian
[AIAA PAPER 81-1709] p0527 A81-43163
Materials and processes for a small remotely piloted vehicle
p0532 A81-43463
Use of atmospheric electric fields for vertical stabilization and terrain avoidance
[AIAA 81-1840] p0556 A81-44126
Survivors on the RPV front
p0577 A81-48725
Investigation of performance, noise and detectability characteristics of small-scale remotely piloted vehicle /RPV/ propellers
[AIAA PAPER 81-2005] p0624 A81-49732
Closed loop control systems: Aircraft. Citations from the NTIS data base

RISK
ORLA - An assessment of risks --- Optimum Repair Level Analysis
p0229 A81-24257
Assessment of the impact of advanced air-transport technology
p0247 N81-18015
Risk to the public from carbon fibers released in civil aircraft accidents
[NASA-SP-448] p0254 N81-18096
Carbon/graphite composite material study
[AR-3] p0585 N81-30188
Carbon/graphite composite material study, appendix A and appendix B
p0585 N81-30194

RIVETED JOINTS
Measures for increasing the service life of riveted, aircraft-relevant joints
[DGLR PAPER 81-052] p0609 A81-47564
Application of fracture mechanics to built-up structures --- aircraft handbooks
[NLR-MP-79044-U] p0086 N81-12875

RIVETING
The possibility of single-impact riveting of flat-top countersunk-head rivets --- for aircraft structures

p0319 A81-30164
Automatic riveting installation for spherical
aircraft parts
p0450 A81-37641
ROBUSTNESS (MATHEMATICS)
Robust autoregressive models for predicting
aircraft motion from noisy data
p0155 A81-20473
Robustness properties of a new multirate digital
control system
[AIAA PAPER 81-0022] p0158 A81-20545
Application of vector performance optimization to
a robust control loop design for a fighter
aircraft
[DFVLR-FB-80-14] p0130 N81-13970
ROCKET BOOSTERS
U BOOSTER ROCKET ENGINES
ROCKET CHAMBERS
U THRUST CHAMBERS
ROCKET ENGINE CASES
Kevlar - Thermophysical properties
[AIAA PAPER 81-1104] p0459 A81-39104
ROCKET ENGINE DESIGN
Performance analysis of primary and secondary
systems of a rocket ramjet engine burning
fuel-rich metallized propellants
p0292 A81-29066
Preliminary experimental study of combustion in
the solid rocket-ramjet
p0292 A81-29067
Air augmentation of rockets for low speed
application
p0292 A81-29068
ROCKET ENGINES
NT BOOSTER ROCKET ENGINES
NT LIQUID PROPELLANT ROCKET ENGINES
NT SOLID PROPELLANT ROCKET ENGINES
A study of air breathing rockets - Subsonic mode
combustion
[IAF PAPER 80-P-270] p0115 A81-18371
An experimental study on air intake performance
for a rocket/ramjet engine
[AIAA PAPER 81-1488] p0506 A81-40906
Design of production processes for flight-vehicle
engines --- Russian book
p0623 A81-49475
Investigation of plume induced separation on a
full-size missile at supersonic velocities
[AD-A094742] p0277 N81-19212
Velocity tolerance of escape systems
[AD-A096881] p0373 N81-22035
Free-jet testing of powerplants for aircraft and
missiles
p0431 N81-24089
ROCKET EXHAUST
An approach to ramjet trajectory simulation test
p0292 A81-29065
Microcomputer system for controlling an infrared
scanning camera --- with application to rocket
plume radiation measurement
p0453 A81-37749
ROCKET FLIGHT
Helicopter airflow and wake characteristics for
low speed and hovering flight from rocket
interference investigations
p0572 A81-46608
ROCKET LAUNCHERS
AH-1 lightweight airborne launcher jettison
evaluation
[AD-A101461] p0582 N81-30119
ROCKET MOTOR CASES
U ROCKET ENGINE CASES
ROCKET PROPELLANTS

NT SLURRY PROPELLANTS
NT SOLID ROCKET PROPELLANTS
ROCKET TEST FACILITIES
O.N.E.R.A. ramjet test facilities
p0365 A81-33285
ROCKET THRUST
Velocity tolerance of escape systems
[AD-A096881] p0373 N81-22035
RODS
Geometrically nonlinear theory for calculating
thin rods of a wing profile
p0625 A81-49935
Strength calculation of thin-wall rods of
significant taper
p0625 A81-49937
ROGALLO WINGS
U FLEXIBLE WINGS
U FOLDING STRUCTURES
ROLL
Roll and spin measurements in the low speed wind
tunnel at Braunschweig
p0065 A81-15704
The effect of aerodynamic coupling on the dynamics
of aircraft in fast rolling motion
p0104 A81-17471
Roll stabilization of flight vehicles by means of
rollerons
p0290 A81-29016
Kinematic properties of the helicopter in
coordinated turns
[NASA-TP-1773] p0374 N81-22039
ROLL CONTROL
U LATERAL CONTROL
ROLL FORMING
Computer-aided roll pass design in rolling of
airfoil shapes
p0065 A81-15796
Isothermal rolling of aircraft parts - Versatile
process saves costly materials
p0227 A81-24047
Titanium forging - Stamping /stamp, screw-press/,
circular rolling and isothermal forging
p0416 A81-36657
Metalspinning, shear- and flowforming
p0551 N81-29281
Cold-forming of internal threads
p0551 N81-29294
ROLLER BEARINGS
Calculated and experimental data for a 118-mm bore
roller bearing to 3 million DN
[ASME PAPER 80-C2/LUB-14] p0117 A81-18668
Performance of computer-optimized tapered-roller
bearings to 2.4 million DN
[ASME PAPER 80-C2/LUB-18] p0117 A81-18672
Lubrication of rolling element bearings
p0118 A81-18738
Bearing wear detection using radioactive iron-55
tagging
[ASLE PREPRINT 81-AM-6A-3] p0367 A81-33868
Advanced transmission components investigation
program: Bearing and seal development
[AD-A090675] p0076 N81-12075
Application of ion implantation for the
improvement of localized corrosion resistance of
M50 steel bearings
[AD-A097230] p0393 N81-23466
ROLLING CONTACT LOADS
Performance of aircraft pneumatic tyres in soft soil
p0226 A81-24000
Self-oscillations of a self-aligned landing gear
strut in the case of classical nonholonomic
rolling constraints
p0563 A81-45315
ROLLING MOMENTS
Stability of aircraft motion in critical cases
[AIAA PAPER 81-1885] p0561 A81-44577
A piloted simulator investigation of static
stability and stability/control augmentation
effects on helicopter handling qualities for
instrument approach
[NASA-TM-81188] p0029 N81-10077
Leading-edge separation from a slender rolling
wing-body combination --- vortex sheet model
[RAE-TR-80039] p0330 N81-20040
The prediction of normal force and rolling moment
coefficients for a spinning wing
[NASA-CR-165680] p0333 N81-20068
Static and yawed-rolling mechanical properties of
two type 7 aircraft tires
[NASA-TP-1863] p0437 N81-24471
Application of vortex lattice methods to calculate
Lv (rolling moment due to sideslip)
[PB81-166167] p0487 N81-26123
ROLLUP SOLAR ARRAYS
U SOLAR ARRAYS
ROOFS
All composite helicopter airframe roof structure
[AHS 80-47] p0477 A81-40174
ROOTS OF EQUATIONS
Exact solutions of the equations of motion of a
gyro horizon compass

p0290 A81-29001
ROTARY DRIVES
U MECHANICAL DRIVES
ROTARY GYROSCOPES
An exact solution of the problem of the motion of a gyroscope in a Cardan suspension
p0019 A81-12704
ROTARY STABILITY
NT GYROSCOPIC STABILITY
Finite element analysis of natural and forced flexural vibrations of rotor systems
p0017 A81-11956
An experimental investigation of the rotating stall, surge, and wake behind the rotor for a single stage axial compressor
p0109 A81-17826
Dynamic characteristics of a high-speed rotor with radial and axial foil-bearing supports
[ASME PAPER 80-C2/LUB-35] p0117 A81-18683
A vehicle attitude control system forming the error signal by way of the optimal rotation axis
p0224 A81-23732
The digital simulation of stability for multi-stage axial compressor
p0225 A81-23856
The influence of gyroscopic forces on the dynamic behavior of rotating blades
p0295 A81-29098
Equilibrium spinning of a typical single-engine low-wing light aircraft
p0354 A81-31598
Rotary balance data for a single engine general aviation design having a high aspect-ratio canard for an angle-of-attack range of 30 deg to 90 deg
[NASA-CR-3170] p0090 N81-13022
Apparatus for and method of compensating dynamic unbalance
[NASA-CASE-GSC-12550-1] p0378 N81-22358

[AIAA PAPER 81-0090] p0160 A81-20594
Forced vortices near a wall
[AIAA PAPER 81-0256] p0163 A81-20708
Computer simulation of unsteady flow past lifting rotors of coaxial configuration
p0230 A81-24389
Calculation of shells in aircraft turbine engines
p0285 A81-28078
Experimental verification of unsteady aerodynamic models of supersonic unstalled flutter
p0295 A81-29098
The effect of the atmospheric turbulence on the rotor blade flap-leading motion stability in hovering
[AIAA 81-0610] p0304 A81-29472
Feasibility of a rotor flight-dynamics model with first-order cyclic inflow and multiblade modes

[AIAA 81-0611] p0304 A81-29473
New correlations of the two-dimensional turbine cascade aerodynamic performance
[ASME PAPER 81-GT-128] p0316 A81-30032
Use of multiblade sensors for on-line rotor tip-path plane estimation
p0356 A81-32010
Comparison of calculated and measured helicopter rotor lateral flapping angles
p0357 A81-32018
A Galerkin type finite element method for rotary-wing aeroelasticity in hover and forward flight
p0364 A81-33050
Pressure distribution computation on a non-lifting symmetrical helicopter blade in forward flight
p0365 A81-33291
Prop-Fan technical progress leading to technology readiness
[AIAA PAPER 81-0810] p0367 A81-33878
Finite element analysis of self-excited vibrations of helicopter rotor blades
p0395 A81-34120
Quarter-scale testing of an advanced rotor system for the UH-1 helicopter
p0395 A81-34121
Co-axial rotor aerodynamics in hover
p0465 A81-39899
Gust response of rotary wing aircraft and its alleviation
p0465 A81-39900
A review of some topics of UK research on helicopters
p0466 A81-40080
Rotor blade aeroelastic stability and response in forward flight
p0467 A81-40089
Experimental and analytical studies of a model helicopter rotor in hover
p0468 A81-40097
Aerodynamic study of a hovering rotor
p0466 A81-40098
Aerodynamic design of the Aerospatiale SA 365 N Dauphin 2 helicopter
p0468 A81-40099
Recent progress in performance prediction of high advance ratio circulation controlled rotors
p0468 A81-40100
An integrated performance and air data system for helicopters
p0470 A81-40110
Identification of a linear model of rotor-fuselage dynamics from nonlinear simulation data
p0472 A81-40125
Optimal higher harmonic blade pitch control for minimum vibration of a hinged rotor
p0473 A81-40134
Computerized three-dimensional aerodynamic design of a lifting rotor blade
[AHS 80-2] p0473 A81-40137
Hover performance methodology at Bell Helicopter Textron
[AHS 80-3] p0473 A81-40138
Wind tunnel evaluation of aeroelastically conformable rotors
[AHS 80-23] p0475 A81-40153
An experimental investigation of the effects of aeroelastic couplings on aeromechanical stability of a hingeless rotor helicopter
[AHS 80-25] p0475 A81-40155
Aerodynamic characteristics of an advanced technology propeller for commuter aircraft
[AIAA PAPER 81-1565] p0507 A81-40948
Change of static pressure on the rotating blades of an axial-flow compressor during surging
p0509 A81-41039
Helicopter theory --- Book
p0513 A81-41823
Wind tunnel tests of sailwings for Darrieus rotors
p0518 A81-42678
Pressure fluctuations on the surface of a small passenger aircraft. I - Periodic disturbances caused by the rotation of the propeller
p0561 A81-44615
The calculation of transonic blade tip flow at helicopter rotors
[DGLR PAPER 81-025] p0608 A81-47554
Stability and flutter analysis of turbine blades at low speed
p0612 A81-47959
Experimental and analytical studies of a model helicopter rotor in hover
[AD-A089780] p0035 N81-11033
The effects of solidity, interblade phase angle and reduced frequency on the time-variant aerodynamic response of a compressor stator
[AD-A090546] p0081 N81-12108
Results of oscillatory pitch and ramp tests on the NACA 0012 blade section
[ARA-MEMO-220] p0090 N81-13024
Rotor model for verification of computation methods
[ISD-262] p0145 N81-15467
A flight investigation of performance and loads for a helicopter with NC-SC2 main-rotor blade sections
[NASA-TM-81898] p0186 N81-15982
Some wake-related operational limitations of rotorcraft
[NASA-TM-81920] p0186 N81-15985
Mean rotor wake characteristics of an aerodynamically loaded 0.5 m diameter fan
[NASA-TM-81657] p0195 N81-16053
Multicyclic controllable twist rotor data analysis
[NASA-CR-152251] p0249 N81-18028
Some dynamic properties of rigid two-bladed fully gimballed tip-jet helicopter rotor with circulation control
[AD-A094031] p0252 N81-18054
Nonlinear rotor dynamics analysis --- computerized simulation
p0257 N81-18405
Total main rotor isolation system analysis
[NASA-CR-165666] p0329 N81-20027
Fluid mechanics mechanisms in the stall process of helicopters
[NASA-TM-81956] p0338 N81-21027
Wind tunnel tests of large- and small-scale rotor hubs and pylons
[AD-A098510] p0439 N81-25043
Total main rotor isolation system analysis
[NASA-CR-165667] p0494 N81-27076
Blade loss transient dynamics analysis, volume 1. Task 1: Survey and perspective --- aircraft gas turbine engines
[NASA-CR-165373-VOL-1] p0496 N81-27089
Blade loss transient dynamics analysis, volume 2. Task 2: Theoretical and analytical development. Task 3: Experimental verification
[NASA-CR-165373-VOL-2] p0496 N81-27090
Aerodynamic and aeroelastic research on tipvane turbines
[VTH-LR-302] p0540 N81-28100
Alleviation of helicopter fuselage-induced rotor unsteady loads through deterministic variation of the individual blade pitch
[NASA-CR-166234] p0549 N81-29134
Determination of aerodynamically adequate fillet geometry in turbocompressor blade rows
[AD-A102170] p0600 N81-31219
Two-dimensional dynamic stall as simulated in a varying freestream
[NASA-CR-164829] p0629 N81-32154

ROTOR BLADES
Helicopter flight characteristics improvement through swept-tip rotor blades
[MBB-UD-275-79-0] p0018 A81-12097
Rotating blades radio interference in a helicopter-borne CW Doppler radar
p0224 A81-23813
Dynamic stability of a rotor blade using finite element analysis
[AIAA 81-0615] p0309 A81-29513
Helicopter rotor blade effects on mast-mounted sensor images
p0350 A81-31114
Use of multiblade sensors for on-line rotor tip-path plane estimation
p0356 A81-32010
ABC development status and design considerations for several military applications --- Advancing Blade Concept for helicopter
[AHS 80-12] p0474 A81-40145
Acoustic emission as a NDE technique for determining composite rotor blade reliability
[AD-A090440] p0076 N81-12070

ROTOR BLADES (TURBOMACHINERY)
Comparative performance of two centrifugal fan impellers differing in blade section

p0001 A81-10162
Discrete frequency noise due to irregularity in blade row of axial fan rotor p0002 A81-10633
Structure and decay characteristics of turbulence in the near- and far-wake of a moderately loaded compressor rotor-blade [ASME PAPER 80-GT-95] p0109 A81-17954
Dynamic pressure response with stall on axial flow compressor rotor blades [AIAA PAPER 81-0069] p0159 A81-20578
Mean rotor wake characteristics of an aerodynamically loaded 0.5 m diameter fan [AIAA PAPER 81-0208] p0168 A81-20830
Stability of large horizontal-axis axisymmetric wind turbines p0178 A81-22526
Linearized analysis of the three-dimensional compressible flow through a rotating annular blade row p0234 A81-25446
Coupled bending-torsion vibrations of rotating blades of asymmetric aerofoil cross section with allowance for shear deflection and rotary inertia by use of the Reissner method p0289 A81-28942
Experimental verification of unsteady aerodynamic models of supersonic unstalled flutter p0295 A81-29094
Reduction of strut induced rotor blade vibration with the modified stator setting angles p0295 A81-29097
The influence of gyroscopic forces on the dynamic behavior of rotating blades p0295 A81-29098
Evaluation of blade element performance of compressor rotor blade cascades in transonic and low supersonic flow range p0296 A81-29102
Analysis of turbulent boundary layer on cascade and rotor blades of turbomachinery p0296 A81-29106
Resonance of forwards and backwards vibration mode of impeller with gyroscopic effect [AIAA 81-0524] p0303 A81-29445
The effect of the atmospheric turbulence on the rotor blade flap-leadlag motion stability in hovering [AIAA 81-0610] p0304 A81-29472
Feasibility of a rotor flight-dynamics model with first-order cyclic inflow and multiblade modes [AIAA 81-0611] p0304 A81-29473
The development of a substitute bird model [ASME PAPER 81-GT-23] p0311 A81-29939
Improved particle trajectory calculations through turbomachinery affected by coal ash particles [ASME PAPER 81-GT-53] p0312 A81-29965
Rotor-tip leakage. I - Basic methodology [ASME PAPER 81-GT-71] p0313 A81-29980
Rotor-tip leakage. II - Design optimization through viscous analysis and experiment [ASME PAPER 81-GT-72] p0313 A81-29981
Inverse or design calculations for non-potential flow in turbomachinery blade passages [ASME PAPER 81-GT-78] p0314 A81-29986
New features in the design of axial-flow compressors with tandem blades [ASME PAPER 81-GT-113] p0315 A81-30017
Fatigue strength of gas turbine engine rotor blades in connection with structural changes in service p0355 A81-31673
Study of the secondary flow in the downstream of a moving blade row in an axial flow fan p0355 A81-31767
Inlet distortion and blade vibration in turbomachines p0421 A81-37631
Investigation of the cooling of the turbine rotor blade of a gas-turbine power system p0465 A81-40020
Prevention of corrosion and fatigue failure of helicopter gas turbine compressors p0469 A81-40107
Computerized three-dimensional aerodynamic design of a lifting rotor blade [AHS 80-2] p0473 A81-40137
An experimental study of heat transfer on turbine rotor blades p0509 A81-41033
Effects of blade-vane ratio and rotor-stator spacing on fan noise with forward velocity [AIAA PAPER 81-2032] p0620 A81-46628
Preliminary airworthiness evaluation AH-1S helicopter with ogee tip shape rotor blades [AD-A089625] p0027 N81-10061
Fatigue and damage propagation in composite rotor blades p0041 N81-11145
An investigation of the dynamic stalling characteristics of rotating axial-flow compressor blades p0093 N81-13054
Gerry casing treatment [CUED/A-TURBO/TR-101] p0093 N81-13059
Rotor model for verification of computation methods [ISD-262] p0145 N81-15467
Multi-plane high speed balancing techniques and the use of a high specific stiffness Ti-Borsic material for vibration control [AD-A093122] p0215 N81-17092
Compressor blade monitoring system for a VA1310 (Allis Chalmers) Wind Tunnel Compressor [AD-A092920] p0217 N81-17103
Flap-lag-torsional dynamic modelling of rotor blades in hover and in forward flight, including the effect of cubic nonlinearities [NASA-CR-166194] p0486 N81-26116
Flap-lag-torsional dynamics of extensional and inextensional rotor blades in hover and in forward flight [NASA-CR-164475] p0486 N81-26117
End wall flows in rotors and stators of a single stage compressor [NASA-CR-164635] p0540 N81-28097
MM&T: Low cost production/installation of urethane leading edge guards on rotor blades [AD-A101603] p0582 N81-30117
Rotor wake characteristics relevant to rotor-stator interaction noise generation [NASA-TM-82703] p0583 N81-30130

SEPARATED FLOW
NT BOUNDARY LAYER SEPARATION
Simplified vortex models for slender lifting surfaces with leading edge separation
p0016 A81-11777
Local properties of three-dimensional separation lines --- in vortex layers
[DGLR PAPER 79-063] p0016 A81-11780
Calculation of separated viscous flows on wing profiles by a coupling approach
[ONERA, TP NO. 1980-122] p0017 A81-11920
Aerodamping of turbine blade vibrations under conditions of flow separation by an inhomogeneous stream
p0060 A81-14959
Separation of laminar boundary layer induced by aerodynamic interference
p0067 A81-15897
Experimental investigation of a right angle wing with partially separated flow with and without ground effects
[DGLR PAPER 80-111] p0120 A81-19397
Viscous-inviscid interaction on oscillating airfoils in subsonic flow
[AIAA PAPER 81-0051] p0159 A81-20567
Calculation of viscous, sonic flow over hemisphere-cylinder at 19 deg incidence - The capturing of nose vortices
[AIAA PAPER 81-0189] p0162 A81-20661
3-D viscous analysis of ducts and flow splitters
[AIAA PAPER 81-0277] p0163 A81-20720
Flight experiments with a slender cone at angle of attack
[AIAA PAPER 81-0337] p0165 A81-20761
A discrete vortex method for the non-steady separated flow over an airfoil
p0179 A81-22560
Numerical simulation of gross structure of turbulent plane mixing layer by discrete-vortex model
p0228 A81-24078
Numerical simulation of supersonic flow around solids of revolution with a leading detachment zone
p0231 A81-24757
A method for measuring the velocity field in a stalled flow
p0287 A81-28523
Flow separation in inlets at incidence angles
p0297 A81-29114
Leading-edge separation from a thick, conical, slender wing at small angles of incidence
p0355 A81-31687
Experimental study of the separation at the trailing edge of an axisymmetrical contoured after-body
p0365 A81-33281
The challenge of unsteady separating flows
p0411 A81-35647
The effect of the aspect ratio of delta wings on the structure of the near vortex wake
p0413 A81-36467
The calculation of separated flow at helicopter bodies
[DGLR PAPER 81-026] p0608 A81-47555
Investigations of vortex formation on wings with cropped leading edges
[DGLR PAPER 81-046] p0610 A81-47601
The prediction of the bursting of laminar separation bubbles in the design of two dimensional high-lift aerofoils
[RAE-TR-80060] p0073 N81-12038
Experimental study of supersonic viscous leeside flow over a slender delta wing
[NASA-TM-81248] p0133 N81-14265
An analytic model of subsonic flow around an airflow with a spoiler
p0138 N81-14966
An investigation of support-interference effects
[NAL-TR-622] p0141 N81-14984
Discussion of test results in the design of laminar airfoils for competition gliders
[NASA-TM-75402] p0186 N81-15984
Structures of flow separations over swept wings
p0255 N81-18246
Experimental study of the separation at the trailing edge of an axisymmetrical contoured after-body
p0255 N81-18257
Separation behavior of boundary layers on three-dimensional wings
[NASA-TM-75877] p0262 N81-19027
Investigation of plume induced separation on a full-size missile at supersonic velocities
[AD-A094742] p0277 N81-19212
Leading-edge separation from a slender rolling wing-body combination --- vortex sheet model
[RAE-TR-80039] p0330 N81-20040
Topology of three-dimensional separated flows
[NASA-TM-81294] p0385 N81-23037
Analysis of laminar and turbulent symmetric blunt trailing-edge flows
[AD-A098703] p0439 N81-25046
Aeroelasticity, including dynamic effects of separated flow --- launch vehicle response
p0592 N81-31118
Determination of aerodynamically adequate fillet geometry in turbocompressor blade rows
[AD-A102170] p0600 N81-31219
SEPARATORS
NT AIR FILTERS

SERVICE LIFE
Operational durability of airframe structures
p0014 A81-11662
Aging study of the Caravelle 38
p0061 A81-15119
Fuel economy and extension of the service life of aircraft gas turbine engines
p0065 A81-15719
Fatigue design criteria and fleet fatigue life survey at Aeronautica Macchi
p0180 A81-22624
Advanced ATC computer system
p0286 A81-28302
Statistical crack growth in durability and damage tolerant analyses
[AIAA 81-0492] p0300 A81-29382
Material shortages - Effect on the aircraft engine industry
[AIAA 81-0509] p0301 A81-29387
Impacts of broadened-specification fuels on aircraft turbine engine combustors
[ASME PAPER 81-GT-2] p0310 A81-29927
Numerical methods for studying the stress-strain state and service life of aircraft gas-turbine engine disks
p0351 A81-31258
Implementing Aircraft Structural Life Management to reduce structural cost of ownership
[SAWE PAPER 1331] p0352 A81-31376
Fatigue strength of gas turbine engine rotor blades in connection with structural changes in service
p0355 A81-31673
Orientation of measurement sensors for optimum end-of-life performance
p0360 A81-32697
Improved combustor durability - Segmented approach with advanced cooling techniques
[AIAA PAPER 81-1354] p0501 A81-40836
Recent developments in Naval aircraft jet engine usage
[AIAA PAPER 81-1366] p0502 A81-40846
Engine usage prediction for advanced fighter aircraft
[AIAA PAPER 81-1367] p0514 A81-42178
Engine duty cycle estimation for conceptual design aircraft
[AIAA PAPER 81-1368] p0514 A81-42179
Engine life methodologies for conceptual design
[AIAA PAPER 81-1398] p0515 A81-42188
The use of engine operating experience in the preliminary design of aircraft gas turbine combustion systems
[AIAA PAPER 81-1399] p0515 A81-42189
Methodology for engine/aircraft selection with life and utilization considerations
[AIAA PAPER 81-1401] p0515 A81-42190
A-7 composite outer wing service experience
p0530 A81-43617
Engine life and usage methodologies for conceptual design
[AIAA PAPER 81-1651] p0533 A81-43937

Investigation of influences on the definition of engine usage for future systems
[AIAA PAPER 81-1652] p0533 A81-43938
Measures for increasing the service life of riveted, aircraft-relevant joints
[DGLR PAPER 81-052] p0609 A81-47564
Service experience with GRC helicopter blades (BO-105)
p0041 N81-11146
US Navy service experience with advanced composites --- in aircraft composite structures
p0041 N81-11149
Service life determination for the UH-60-A (UTTAS) helicopter elastomeric bearings
[AD-A091756] p0134 N81-14324
Structure and lifetime attestation of TORNADO
[MBB-PUB-P-0001] p0251 N81-18048
Concept definition: Retirement for cause of F-100 rotor components
[AD-A095584] p0335 N81-20080
Review of Air Force's next generation trainer aircraft program Department of Defense
[AD-A096238] p0341 N81-21071
The 737 graphite composite flight spoiler flight service evaluation
[NASA-CR-159362] p0343 N81-21131
Service evaluation of aluminum-brazed titanium (ABTi) --- aircraft structures
[NASA-CR-3418] p0378 N81-22129
An analysis of opportunistic maintenance policy for the F100PW100 aircraft engine
[AD-A097548] p0384 N81-23025
Engine life development --- operating costs and propulsion system performance
p0430 N81-24081
Fatigue analysis of composite materials using the fail-safe concept
p0487 N81-26131
State of the art and statistical aspects of helicopter fatigue substantiation procedures
[NLR-MP-80025-U] p0496 N81-27087
Damage tolerance of a landing gear component after many takeoffs and landings --- nondestructive tests
[NLR-MP-79039-U] p0596 N81-31189

SERVICES
NT MEDICAL SERVICES
NT METEOROLOGICAL SERVICES

SERVOCONTROL
Aeroservoelasticity in the time domain --- for YF-16 aircraft
[AIAA 81-0635] p0306 A81-29489

SERVOMECHANISMS
Effect of mixed phosphate ester fluids on aircraft hydraulic servo valve erosion
[SAE PAPER 801100] p0512 A81-41776
Portable servoactuator test system
[AIAA PAPER 81-1620] p0525 A81-43130
A brief analysis and its experiment of the hydraulic-electric loading servosystem --- a force simulator
[NASA-TM-76458] p0276 N81-19132

SERVOSTABILITY CONTROL
U SERVOCONTROL

SH-3 HELICOPTER
Summary of interface testing of the digital AN/ASN-123 tactical navigation avionic system in the SH-3H helicopter
[AHS 80-18] p0474 A81-40149
R.A.N. Sea King cabin environment survey. Part 2: Measurement of temperature and humidty
[AD-A096329] p0341 N81-21065
An analysis of thermal balance in the cooled cabin of a Sea King Helicopter
[AD-A097199] p0389 N81-23077

SHADOWGRAPH PHOTOGRAPHY
NT SCHLIEREN PHOTOGRAPHY

SHAFTS (MACHINE ELEMENTS)
NT TURBOSHAFTS
Coupled torsional-flexural vibration of a shaft in a geared system of rotors. I
p0229 A81-24090
Device for lubricant flow measurement and conservation
p0288 A81-28743
Improved capabilities to detect incipient bearing failures
[AD-A091687] p0134 N81-14325
High bypass turbofan component development, modification 2
[AD-A093156] p0215 N81-17093
Full-scale aerodynamic characteristics of a propellar installed on a small twin-engine aircraft wing panel
[NASA-TM-81285] p0385 N81-23039

SHALE OIL
Acceptability of shale derived fuel for Navy aircraft propulsion systems
[AIAA PAPER 81-1424] p0503 A81-40068
Alternative energy sources for non-highway transportation, volume 1
[DOE/CS-05438/T1-VOL-1] p0044 N81-11513
Impact of changing fuel characteristics on supersonic cruise airplane
p0248 N81-18016
Effect of hydroprocessing severity on characteristics of jet fuel from OSCO 2 and Paraho distillates
[NASA-TP-1768] p0436 N81-24283
A Matrix Approach to Biological Investigation of Synthetic Fuels
[PB81-183477] p0586 N81-30313

SHANKS
U JOINTS (JUNCTIONS)

SHAPES
NT CONVEXITY
NT ELLIPTICITY
A procedure for designing forebodies with constraints on cross-section shape and axial area distribution
[NASA-TP-1881] p0483 N81-26078

SHARP LEADING EDGES
Calculation of flow past wings with supersonic sharp edges
p0418 A81-36944
Experimental and theoretical study of three interacting, closely-spaced, sharp-edged 60 deg delta wings at low speeds
[NASA-CR-3460] p0635 N81-33160

SHATTERING
U FRAGMENTATION

SHEAR FATIGUE
U SHEAR STRESS

SHEAR FLOW
Numerical study on viscous shear flow past a circular cylinder
p0228 A81-24077
An experimental investigation of separating flow on a convex surface
p0230 A81-24488
Turbulence modeling for application to V/STOL propulsion induced effects: Two dimensional formulation
[AD-A090331] p0072 N81-12026

SHEAR LAYERS
Dialogue on bridging some gaps in stability and transition research --- in external, internal and free-shear layer through-flow systems
p0115 A81-18105
Shear layer instability noise produced by various jet nozzle configurations
[FNR-90018] p0088 N81-12825
The velocity induced by the wake of a wind turbine in a shear layer, including ground effect
[FFA-TN-HU-2189-PT-3] p0141 N81-14985

SHEAR PROPERTIES
NT SHEAR STRENGTH
Alleviation of helicopter fuselage-induced rotor unsteady loads through deterministic variation of the individual blade pitch
[NASA-CR-166234] p0549 N81-29134

SHEAR STRENGTH
Stability and ultimate strength of carbon fiber reinforced plastic panels
p0481 A81-40521
Air Force Geophysics Laboratory aerodynamically tethered balloon, 45,000 cubic feet
[AD-A096758] p0372 N81-22023

SHEAR STRESS
NT TORSIONAL STRESS
Miniature pressure probe for measuring the surface-shear-stress vector in turbulent flow
p0233 A81-25354

A new method for torsion of shaft with variable diameter using non-orthogonal curvilinear coordinates and its application
[AIAA 81-0477] p0300 A81-29378
Developments in the analysis and repair of cracked and uncracked structures
p0354 A81-31561
Review of theoretical and experimental results on three dimensional turbulent wakes and boundary layers
[ONERA-NT-1980-4] p0126 N81-13930
SHEARING
Metalspinning, shear- and flowforming
p0551 N81-29281

SHEARING STRESS
U SHEAR STRESS
SHEET METAL
U METAL SHEETS
SHELL STABILITY
Finite element calculation of thin-wall reinforced shells of the fuselage type with account for physical nonlinearity and loss of stability of certain elements
p0235 A81-25679
Instability of short stiffened and composite cylindrical shells acting under pure bending moments considering prebuckling displacements
[AIAA 81-0571] p0302 A81-29405
Post-buckling and membrane structural capability of composite shell structures
p0482 A81-40602
SHELL THEORY
Calculation of shells in aircraft turbine engines
p0285 A81-28078
SHELLS (STRUCTURAL FORMS)
NT CYLINDRICAL SHELLS
NT DOMES (STRUCTURAL FORMS)
NT METAL SHELLS
NT RADOMES
NT REINFORCED SHELLS
NT SPHERICAL SHELLS
NT THIN WALLED SHELLS
Flutter of plates and shells in practice
p0282 A81-27611
Shape optimization of plate and shell structures
[AIAA 81-0553] p0302 A81-29403
Vibrations of turbine engine blades by shell analysis
p0257 N81-18404

SHIELDING
NT ELECTROMAGNETIC SHIELDING
NT HEAT SHIELDING
NT RADIATION SHIELDING
Shielding concepts for jet noise
[AIAA PAPER 81-2020] p0623 A81-49730
Noise shielding by a hot subsonic jet
[AIAA PAPER 81-2018] p0624 A81-49731
Superhard transparent coating optimization program
[AD-A091083] p0092 N81-13048
EMC, lightning and NEMP-protection-new requirements for approved specifications when using CFRP
p0199 N81-16152
SHIPS
NT AIRCRAFT CARRIERS
NT SURFACE EFFECT SHIPS
Sarsat - A rescue system for ships and aircraft
p0100 A81-16684
Alternative energy sources for non-highway transportation, appendices
[DOE/CS-05438/T1-VOL-3] p0044 N81-11500
Collision avoidance systems. Citations from the NTIS data base
[PB80-815020] p0193 N81-16038
SHOCK ABSORBERS
Landing gear shock absorber design criteria and the assessment of tire/wheel configurations
p0232 A81-24940
Dynamics and calculations for an aircraft landing gear pneumatic shock absorber system
p0417 A81-36718
SHOCK DIFFUSERS
U DIFFUSERS
U SHOCK WAVE ATTENUATION
SHOCK LOADS
NT BLAST LOADS
Measured pressure distributions and shock shapes on a Butler wing
[CUED/A-AERO/TR-9] p0090 N81-13026

A panel method to determine loads on oscillating airfoils in transonic flow with embedded shock waves
[NLR-MP-80005-U] p0330 N81-20039
SHOCK RESISTANCE
NT IMPACT RESISTANCE
Evaluation/redesign of the F-105 pitch rate gyro pack
[AD-A092109] p0194 N81-16046
SHOCK SIMULATORS
Evaluation of lightning-induced transients in aircraft using high-voltage shock excitation techniques
p0057 A81-14269
SHOCK TESTS
Development of high-temperature turbine subsystem technology to a technology readiness status, phase 2
[FE-1806-72] p0134 N81-14332
Test and evaluation of foam-in-place fuel tank container
[AD-A095747] p0334 N81-20073
SHOCK TUBES
Computational design of large-scale blast simulators
[AIAA PAPER 81-0159] p0162 A81-20639
Droplet breakup regimes and criteria for their existence
p0614 A81-48079
SHOCK WAVE ATTENUATION
Design of advanced technology transonic airfoils and wings
p0187 N81-16000
SHOCK WAVE GENERATORS
NT SHOCK TUBES
SHOCK WAVE INTERACTION
An experimental investigation of the interaction between a glancing shock wave and a turbulent boundary layer
p0012 A81-11649
Transient vibrations of elastic panels due to the impact of shock waves
p0616 A81-48385
Physical and numerical aspects of shock boundary layer interactions
p0256 N81-18324
Influence of free-stream Mach number on transonic shock-wave boundary-layer interaction
[NLR-MP-78013-U] p0256 N81-18325
SHOCK WAVE PROFILES
Calculation of plane transonic flows using the integral equation method and shock fitting
p0016 A81-11779
Measured pressure distributions and shock shapes on a simple delta wing
p0617 A81-48479
SHOCK WAVE PROPAGATION
Stationary displacement of a body by a shock wave
p0107 A81-17622
Experimental investigations on shock-associated noise
p0107 A81-17735
Comparison of experimental and computational shock structure in a transonic compressor rotor
[ASME PAPER 80-GT-81] p0109 A81-17953
The sonic boom from an aircraft flying along an arbitrary path in a stratified atmosphere in the presence of a three-component wind
p0123 A81-19636
Self-excited oscillations of supersonic flow in a sudden enlargement of a duct
p0228 A81-24081
A method for obtaining shockless transonic flows past two-dimensional airfoils whose profiles are partially modified from a given arbitrary profile
p0298 A81-29201
SHOCK WAVES
NT MACH CONES
NT OBLIQUE SHOCK WAVES
NT SONIC BOOMS
A cost-effective method for shock-free supercritical wing design
[AIAA PAPER 81-0383] p0166 A81-20796
New interpretations of shock-associated noise with and without screech
p0178 A81-22527
Plane transonic solution with shock by direct iteration
p0231 A81-24814

Semi-inverse method of computation in inviscid
transonic flows - Application to the design of
turbomachines blades profiles
[ASME PAPER 81-GT-206] p0318 A81-30096
Acoustic shock waves generated by a transonic
helicopter blade
[AHS 80-63] p0479 A81-40186
New interpretations of shock-associated noise with
and without screech
[NASA-TM-81590] p0032 N81-10807
Unsteady transonic small disturbance theory with
strong shock waves
[NASA-CR-166157] p0261 N81-19020
A panel method to determine loads on oscillating
airfoils in transonic flow with embedded shock
waves
[NLR-MP-80005-U] p0330 N81-20039
Oscillatory flows from shock induced separations
on biconvex aerofoils of varying thickness in
ventilated wind tunnels
p0386 N81-23056
Shock associated noise reduction from
inverted-velocity-profile coannular jets
[NASA-CR-3454] p0589 N81-30908
Analysis and design of supersonic aircraft based
on inviscid nonlinear Eulerian equations. Part
1: Rotational Euler solutions with explicit
shock fitting
[AD-A103434] p0637 N81-33192

Development and evaluation of automatic landing
control laws for power lift STOL aircraft
[NASA-CR-152399] p0253 N81-18060
Flight investigation of a four-dimensional
terminal area guidance system for STOL aircraft
[NASA-TM-81271] p0260 N81-19014
A method for determining landing runway length for
a STOL aircraft
p0264 N81-19041
Analytical study of STOL Aircraft in ground
effect. Part 1: Nonplanar, nonlinear wing/jet
lifting surface method
[NASA-CR-152087-PT-1] p0271 N81-19096
Analytical study of STOL Aircraft in ground
effect. Part 2: Nonplanar, nonlinear method
applicable to three dimensional jets of finite
thickness
[NASA-CR-152088-PT-2] p0271 N81-19097
Flight-test evaluation of STOL control and flight
director concepts in a powered-lift aircraft
flying curved decelerating approaches
[NASA-TP-1641] p0275 N81-19131
Application of variable structure system theory to
aircraft flight control --- AV-8A and the
Augmentor Wing Jet STOL Research Aircraft
[NASA-CR-164321] p0391 N81-23093
Design of a V/STOL propulsion system for a
large-scale fighter model
[NASA-CR-166162] p0442 N81-25074
YC-14 interior noise measurements program
[NASA-CR-164523] p0492 N81-26849
Conceptual/preliminary design study of subsonic
v/stol and stovl aircraft derivatives of the S-3A
[NASA-TM-81310] p0547 N81-29118
Experimental development of an advanced
circulation control wing system for Navy STOL
aircraft
[AD-A101309] p0581 N81-30116
Flight evaluation of the STOL flare and landing
during night operations
[NASA-TM-81312] p0629 N81-32151
V/STOL aircraft technology in Canada
p0634 N81-33152
Evaluation of pressure and thermal data from a
wind tunnel test of a large-scale, powered, STOL
fighter model
[NASA-CR-166170] p0635 N81-33162
A flight test evaluation of the Ball-Bartoe
jetwing propulsive lift concept
[AD-A103579] p0637 N81-33195

SHORT WAVE RADIATION
NT MICROWAVES
NT MILLIMETER WAVES

SHORT WAVE RADIO TRANSMISSION
Radio direction finding on high frequency short

duration signals
[AD-A092136] p0192 N81-16029

SHORTENING
U REDUCTION

SHOT PEENING
Reduction of energy consumption in the vibrational shot peening of axial compressor vanes
p0005 A81-11321
Investigation of shot peening as a forming process for aircraft wing skins
p0458 A81-39046

SHRINKAGE
Shrinkage-compensating cement for airport pavement. Phase 3: Fibrous concretes. Addendum
[AD-A092945] p0219 N81-17299

SHROUDED BODIES
U SHROUDS

SHROUDED PROPELLERS
Aerodynamic design of a ducted propeller - Optimization of efficiency
p0102 A81-17146
Aeroelastic and dynamic finite element analyses of a bladder shrouded disk
[NASA-CR-159728] p0278 N81-19479

SHROUDED TURBINES
An experimental evaluation of the performance deficit of an aircraft engine starter turbine
[SAE PAPER 801137] p0397 A81-34168
Abradable compressor and turbine seals, volume 2
[NASA-CR-159662] p0497 N81-27098

SHROUDS
Composite wall concept for high-temperature turbine shrouds - Heat transfer analysis
[SAE PAPER 801138] p0397 A81-34169

SHUNTS
U BYPASSES

SHUTTLE ORBITERS
U SPACE SHUTTLE ORBITERS

SIDE-LOOKING RADAR
NT RADAR IMAGERY
Experimental study of multiple paths by a bistatic method of synthetic aperture
p0412 A81-35891
Development of a ground signal processor for digital synthetic array radar data
[NASA-CR-161074] p0602 N81-31421

SIDELOBE REDUCTION
Increased target resolution and minor lobe reduction with active group antennas
p0152 A81-20090
Improvement of effective minor lobe behavior of radar antennas through signal processing
p0152 A81-20091
Side lobe suppression with digital signal processing
p0152 A81-20092

SIDESLIP
Lifting surface theory and the numerical method of wings with small angles of sideslip at subsonic and supersonic speeds
p0224 A81-23851
Stability characteristics of a forward swept wing aircraft at high angles of attack
[AIAA PAPER 81-1884] p0561 A81-44576
Influence of sideslip on the kinematics of the helicopter in steady coordinated turns
p0576 A81-46644
Kinematic properties of the helicopter in coordinated turns
[NASA-TP-1773] p0374 N81-22039
Comparison of selected lift and sideslip characteristics of the Ayres Thrush S2R-800, winglets off and winglets on, to full-scale wind-tunnel data
[NASA-CR-165710] p0423 N81-24026
Application of vortex lattice methods to calculate Lv (rolling moment due to sideslip)
[PB81-166167] p0487 N81-26123

SIDEWASH

U VISUAL PERCEPTION

SIGNAL ANALYSIS
Detection of moving objects --- Russian book
p0118 A81-18773
Ground moving target radar signal simulation
p0323 A81-30304
An original method for the analysis of the power diffraction pattern of a radar target for shape recognition purposes
p0607 A81-47143

SIGNAL DETECTION
SPASYN - An electromagnetic relative position and orientation tracking system
p0173 A81-21828
Application of signal detection theory to decision making in supervisory control - The effect of the operator's experience
p0351 A81-31288
Aircraft alerting systems standardization study
[AD-A090834] p0093 N81-13053

SIGNAL DETECTORS
Systems analysis of the installation, mounting, and activation of emergency locator transmitters in general aviation aircraft
[NASA-CR-160036] p0023 N81-10020

SIGNAL DISCRIMINATORS
U SIGNAL DETECTORS

SIGNAL DISTORTION
The intelligibility of speech presented over the telephones of the Mk 4 flying helmet --- earphones
[RAE-TR-FS-313] p0084 N81-12320

SIGNAL FADEOUT
U SIGNAL FADING

SIGNAL FADING
Antenna design and development for the microwave subsystem experiments for the terminal configured vehicle project
[NASA-CR-164220] p0378 N81-22282

SIGNAL GENERATORS
NT FUNCTION GENERATORS
Integrated control system for a gas turbine engine
[NASA-CASE-LEW-12594-2] p0274 N81-19116

SIGNAL PROCESSING
Signal processing for a six-component strain-gage wind tunnel balance
p0049 A81-12968
Improvement of effective minor lobe behavior of radar antennas through signal processing
p0152 A81-20091
Side lobe suppression with digital signal processing
p0152 A81-20092
Target detection and parameter estimation in surveillance radars using MTI-FFT processing
p0152 A81-20094
Coherent signal processing in frequency agile pulse radar units
p0152 A81-20097
Application of Doppler information to automatic target tracking
p0153 A81-20101
Some implementation considerations for numerically stable flight filters
p0156 A81-20485
New airborne weather radar systems
[AIAA PAPER 81-0237] p0163 A81-20692
SPASYN - An electromagnetic relative position and orientation tracking system
p0173 A81-21828
A digital technique for the analysis of the response of compressor/duct systems in unsteady flow
p0294 A81-29078
Synergistic benefits of fully integrating JTIDS and GPS --- Joint Tactical Information Distribution System and Global Positioning System
p0323 A81-30311
The RLU - An advanced remote terminal for avionic systems
p0327 A81-30358
AN/TPX-54 interrogator
p0350 A81-31131
Improvement of the imaging of moving acoustic sources by the knowledge of their motion
[ONERA, TP NO. 1981-17] p0359 A81-32534
Maximum likelihood elevation angle estimates of radar targets using subapertures
p0359 A81-32691
Contribution to the study of non-stationary signals emitted by moving jet engines - Application to spectral analysis and imaging. II
p0366 A81-33294
AIRCAT 500 ATC systems for Australia and Mexico
p0407 A81-34329
Parameter identification of a hingeless rotor helicopter in flight conditions with increased instability
p0471 A81-40123

Optimal processing of GPS signals
p0512 A81-41761
Nonlinear estimation of generalized vector shot
processes
p0529 A81-43583
Three edge-point estimation schemes for tracking
airborne targets
p0562 A81-44681
High bypass ratio engine noise component
separation by coherence technique
[AIAA PAPER 81-2054] p0621 A81-48653
Optimized computer systems for avionics applications
[AD-A089570] p0028 N81-10063
Active BCAS: Design and validation of the
surveillance subsystem
[AD-A095049] p0270 N81-19084
Microcomputer processing for Loran-C
p0371 N81-22007
A microcomputer-based signal data converter for
runway visual range measurements
[AD-A097568] p0386 N81-23060
Precision Positioning and Inertial Guidance
Sensors: Technology and Operational Aspects
[AGARD-CP-298] p0484 N81-26091
Development of a ground signal processor for
digital synthetic array radar data
[NASA-CR-161074] p0602 N81-31421
Design of optimal inputs for the identification of
characteristics of aircraft flights ---
parameter identification control theory
p0631 N81-33131

Solid-state power system use expands
p0122 A81-19491
A versatile miniature solid state television camera /CCD/
p0180 A81-22620
A solid-state airborne sensing system for remote sensing
p0183 A81-23034
AN/TPX-54 interrogator
p0350 A81-31131
New technology applied to an IFF diversity transponder
p0350 A81-31133
SOLID STATE LASERS
NT RUBY LASERS
SOLID SURFACES
Two methods for calculating the load on the surface of a slender body executing axisymmetric vibrations in a sonic gas flow
p0004 A81-10920
An experimental investigation of jet screech by air jet impingement on solid boundaries
p0005 A81-11302
SOLID SUSPENSIONS
Effects of solid particles suspended in fluid flow through an axial flow compressor stage
p0297 A81-29108
Prediction of particle paths for flow of a gas/solids suspension through a cascade of flat plates
p0256 N81-18352
SOLUBILITY
Investigation of air solubility in jet A fuel at high pressures
[NASA-CR-3422] p0378 N81-22130
SOLUTIONS
NT GAS MIXTURES
NT NUCLEAR EMULSIONS
SOLVENT EXTRACTION
High-solids coatings for exterior aircraft
p0169 A81-20861
SOLVENTS
Compatibility of aircraft operational fluids with a graphite/epoxy composite: Development of an exterior coating system and remover
[AD-A090049] p0039 N81-11120
SONAR
NT SONOBUOYS
MATASS/LAMPS MK III --- Moored Airship Towed Array Sonar System/Light Airborne Multipurpose System
[AIAA 81-1309] p0455 A81-38527
ASW helicopter/sonar dynamics mathematical model
p0470 A81-40115
SONDES
NT RADIOSONDES
SONIC BOOMS
Status of knowledge of sonic booms
p0017 A81-11822
The sonic boom from an aircraft flying along an arbitrary path in a stratified atmosphere in the presence of a three-component wind
p0123 A81-19636
Aircraft noise control in the 1980's
p0567 A81-46352
Transient vibrations of elastic panels due to the impact of shock waves
p0616 A81-48385
Charts for determining potential minimum sonic-boom overpressures for supersonic cruise aircraft
[NASA-TP-1820] p0337 N81-21016
SONIC FLOW
U TRANSONIC FLOW
SONIC NOZZLES
Effects of axisymmetric sonic nozzle geometry on Mach disk characteristics
p0110 A81-18022
Roll length of an annular underexpanded jet formed by a sonic nozzle with cylindrical rod on its axis
p0309 A81-29867
SONIC SPEED
U ACOUSTIC VELOCITY
SONOBUOYS
Microprocessor control of lamps MK III /Seahawk/ helicopter sonobuoy launcher system
[ABS 80-20] p0474 A81-40150
SOOT
An exploratory study of soot sample integrity and probe perturbation in a swirl-stabilized combustor
[ASME PAPER 81-GT-27] p0311 A81-29943
Correlation of soot formation in turbojet engines and in laboratory flames
[AD-A100525] p0540 N81-28099
SOUND
U ACOUSTICS
SOUND ABSORPTION
U SOUND TRANSMISSION
SOUND AMPLIFICATION
Sidetone-level considerations in aircraft communication systems
p0605 N81-31475
SOUND BARRIER
U ACOUSTIC VELOCITY
SOUND FIELDS
Experimental investigations on shock-associated noise
p0107 A81-17735
Investigation of transient processes in the perforated working section of a wind tunnel
p0237 A81-26122
Contribution to the study of non stationary signals emitted by moving jet engine - Application to special analysis and imaging. I.
p0365 A81-33288
Contribution to the study of non-stationary signals emitted by moving jet engines - Application to spectral analysis and imaging. II
p0366 A81-33294
An iterative finite element-integral technique for predicting sound radiation from turbofan inlets
[AIAA PAPER 81-1981] p0624 A81-49736
SOUND GENERATORS
Sound generation by vortex shedding from a profile within a channel
p0054 A81-13570
Aerodynamic sound generated by a slotted trailing edge
p0066 A81-15798
Sound sources in aerodynamics - Fact and fiction
[AIAA PAPER 81-0056] p0159 A81-20570
Generation of vortex noise in flow past a profile in a channel
p0238 A81-26134
Roll length of an annular underexpanded jet formed by a sonic nozzle with cylindrical rod on its axis
p0309 A81-29867
SOUND INTENSITY
NOISECHECK procedures for measuring noise exposure from aircraft operations
[AD-A093948] p0221 N81-17849
Effect of aircraft noise on the equilibrium of airport residents: Longitudinal study around Roissy, phase 3
[NASA-TM-75906] p0499 N81-27692

Computer program to predict aircraft noise levels
[NASA-TP-1913] p0641 N81-33947
SOUND MEASUREMENT
U ACOUSTIC MEASUREMENTS
SOUND PERCEPTION
U AUDITORY PERCEPTION
SOUND PRESSURE
On the unsteady wake-induced lift on a slotted airfoil. II - The influence of displacement thickness fluctuations
p0229 A81-24237
Discussion of the pressure-source aerosonic theory and of Doak's criticism
p0238 A81-26189
The influence of blade number ratio and blade row spacing on axial-flow compressor stator blade dynamic load and stage sound pressure level
[ASME PAPER 81-GT-165] p0317 A81-30064
Procedure for evaluation of engine isolators for reduced structure-borne interior noise transmission
[AIAA PAPER 81-1970] p0618 A81-48608
Prediction of jet exhaust noise on airframe surfaces during flight
[AIAA PAPER 81-2035] p0619 A81-48626
New interpretations of shock-associated noise with and without screech
[NASA-TM-81590] p0032 N81-10807
A comparison of the three methods used to obtain acoustic measurements for the NASA Flight Effects Program
[NASA-TM-81906] p0088 N81-12822
Analysis of pressure spectra measurements in a ducted combustion system
[NASA-TM-81583] p0146 N81-15768
Handbook of aircraft noise metrics
[NASA-CR-3406] p0345 N81-21871
Prediction of sound radiation from different practical jet engine inlets
[NASA-CR-164620] p0500 N81-27886
SOUND PROPAGATION
NT VOICE
Numerical techniques in linear duct acoustics - A status report
[ASME PAPER 80-WA/NC-2] p0170 A81-21120
Sound radiation from vortex systems
p0171 A81-21591
Acoustic shock waves generated by a transonic helicopter blade
[AHS 80-63] p0479 A81-40186
An iterative finite element-integral technique for predicting sound radiation from turbofan inlets
[AIAA PAPER 81-1981] p0624 A81-49736
Static tests of excess ground attenuation at Wallops Flight Center
[NASA-CR-3435] p0491 N81-26846
SOUND RANGING
Hyperbolic origins --- of radio position-fixing systems
p0612 A81-47842
Remote sensing methods for the determination of slant range visibility
[ESA-TT-627] p0086 N81-12536
SOUND TRANSDUCERS
NT ELECTROACOUSTIC TRANSDUCERS
NT MICROPHONES
SOUND TRANSMISSION
An experimental study of transmission, reflection and scattering of sound in a free jet flight simulation facility and comparison with theory
p0289 A81-28943
Summary of typical parameters that affect sound transmission through general aviation aircraft structures
[SAE PAPER 810562] p0518 A81-42728
Procedure for evaluation of engine isolators for reduced structure-borne interior noise transmission
[AIAA PAPER 81-1970] p0618 A81-48608
Analytical prediction of the interior noise for cylindrical models of aircraft fuselages for prescribed exterior noise fields. Phase 1: Development and validation of preliminary analytical models
[NASA-CR-159363] p0258 N81-18799
Effect of propagation distance on aircraft flyover sound duration
[AD-A099694] p0500 N81-27889
SOUND VELOCITY
U ACOUSTIC VELOCITY
SOUND WAVES
NT AERODYNAMIC NOISE

SPEED REGULATION
U SPEED CONTROL
SPEEDOMETERS
U SPEED INDICATORS

SPHERICAL COORDINATES
An analytical solution of the two star sight problem of celestial navigation
p0614 A81-40121
SPHERICAL SHELLS
Solution of nonautomodeled problems of boundary-layer theory taking into account nonstationary conjugate heat exchange and blowing
p0059 A81-14581
SPIN
NT METAL SPINNING
SPIN DYNAMICS
Roll and spin measurements in the low speed wind tunnel at Braunschweig
p0065 A81-15704
Concerning the motion of a piloted aircraft
p0299 A81-29312
The prediction of normal force and rolling moment coefficients for a spinning wing
[NASA-CR-165680] p0333 N81-20068
SPIN FORGING
U METAL SPINNING
SPIN REDUCTION
Applications of dynamic stability parameters to problems in aircraft dynamics
p0410 A81-35552
SPIN STABILIZATION
Thrust augmented spin recovery device
[NASA-CASE-LAR-11970-2] p0275 N81-19130
SPIN TESTS
A status report on NASA general aviation stall/spin flight testing
p0122 A81-19471
Equilibrium spinning of a typical single-engine low-wing light aircraft
p0354 A81-31590
TA-4J spin training through simulation
[AIAA 81-0965] p0414 A81-36556
Analytical techniques for the analysis of stall/spin flight test data
[SAE PAPER 810599] p0521 A81-42756
SPINNING (METALLURGY)
U METAL SPINNING
SPLINES
Cost benefits of nonmetallic spline couplings
[SAE PAPER 801101] p0513 A81-41777
Prevention of spline wear by soft metallic coatings --- aircraft engines
[AD-A091861] p0132 N81-14064
SPOILERS
The possibility of improving the lateral-directional characteristics of a twin-engine aircraft by spoilers in the case of sudden engine failure
p0049 A81-12967
Effects of design variables on spoiler control effectiveness, hinge moments, and wake turbulence
[AIAA PAPER 81-0072] p0159 A81-20581
A computational model for low speed flows past airfoils with spoilers
[AIAA PAPER 81-0253] p0163 A81-20702
S-3A composite spoilers service experience
p0529 A81-43615
Theoretical investigation of the influence of spoiler dynamics on the handling qualities of an aircraft with direct lift control
[DFVLR-FB-80-07] p0131 N81-13975
An analytic model of subsonic flow around an airflow with a spoiler
p0138 N81-14966
Wake vortex attenuation flight tests: A status report
p0267 N81-19057
The 737 graphite composite flight spoiler flight service evaluation
[NASA-CR-159362] p0343 N81-21131
An introduction to the aerodynamics of spoilers
[PB81-166183] p0487 N81-26122
Some qualitative experiments on the local flow about spoilers in unsteady motion at low speeds
[PB81-166159] p0487 N81-26124
Simulator evaluation of the effects of reduced spoiler and thrust authority on a decoupled longitudinal control system during landings in wind shear
[NASA-TM-83108] p0639 N81-33211
SPRAYED COATINGS
Coatings in the aero gas turbine
p0103 A81-17167
High-solids coatings for exterior aircraft
p0169 A81-20861
Aircraft surface coatings study: Energy efficient transport program --- sprayed and adhesive bonded coatings for drag reduction
[NASA-CR-158954] p0004 N81-12225
Automated Plasma Spray (APS) process feasibility study
[NASA-CR-165418] p0597 N81-31193
SPRAYED PROTECTIVE COATINGS

Pilot-optimal multivariable control synthesis by output feedback
[NASA-CR-163112] p0540 N81-28102
HADY-1, a FORTRAN program for the compressible stability analysis of three-dimensional boundary layers
p0586 N81-30388
The effect of boundary layer growth on the stability of compressible flows
p0587 N81-30389
STABILITY AUGMENTATION
A stability augmentation system which covers the complete flight envelope for a F-4c aircraft without gain scheduling
p0009 A81-11622
Precision flight path control in carrier landing approach - A case for integrated system design
[AIAA PAPER 81-1710] p0535 A81-43956
Effects of displacement and rate saturation on the control of statically unstable aircraft

[AIAA 81-1752] p0554 A81-44082
Economic evaluation of flying-qualities design criteria for a transport configured with relaxed static stability
[NASA-TP-1760] p0130 N81-13968
Velocity vector control system augmented with direct lift control
[NASA-CASE-LAR-12268-1] p0433 N81-24106

STABILITY DERIVATIVES
NT PITCHING MOMENTS
NT ROLLING MOMENTS
NT YAWING MOMENTS
A method for calculating the aerodynamic forces and moments on external stores of aircraft
p0226 A81-24006
Curved-flow, rolling-flow, and oscillatory pure-yawing wind-tunnel test methods for determination of dynamic stability derivatives
p0241 A81-26933
Analytical techniques for the analysis of stall/spin flight test data
[SAE PAPER 810599] p0521 A81-42756
Data analysis for aircraft parameter estimates
[AIAA PAPER 81-1864] p0560 A81-44561
A vortex-lattice method for calculating longitudinal dynamic stability derivatives of oscillating delta wings
[AIAA PAPER 81-1876] p0561 A81-44570
A unifying framework for longitudinal flying qualities criteria
[AIAA PAPER 81-1889] p0561 A81-44580
Theoretical analysis of an augmentor wing for a VTOL fighter
[NASA-CR-152254] p0261 N81-19016
An introduction to the aerodynamics of spoilers
[PB81-166183] p0487 N81-26122
Correlation of predicted and flight derived stability and control derivatives with particular application to tailless delta wing configurations --- application to the space shuttle orbiter
[NASA-TM-81361] p0490 N81-26154
Parameter identification of a hingeless rotor helicopter in flight conditions with increased instability
[MBB-UD-307/80-OE] p0584 N81-30140
Dynamic Stability Parameters --- conferences
[AGARD-LS-114] p0590 N81-31105
Review of techniques for determination of dynamic stability parameters in wind tunnels
p0590 N81-31108
Direct forced-oscillation techniques for the determination of stability derivatives in wind tunnels
p0590 N81-31109
Wind-tunnel measurement of aerodynamic derivatives using flexible-sting rigs
p0591 N81-31110
Curved-flow, rolling-flow, and oscillatory pure-yawing wind-tunnel test methods for determination of dynamic stability derivatives
p0591 N81-31112
Applications of half-model technique in dynamic stability testing
p0591 N81-31114
Determination of aircraft dynamic stability and control parameters from flight testing
p0591 N81-31115
Estimation of dynamic stability parameters from drop model flight tests
p0591 N81-31116
Analytical determination of dynamic stability parameters
p0592 N81-31117
Aeroelasticity, including dynamic effects of separated flow --- launch vehicle response
p0592 N81-31118
Control derivatives
p0592 N81-31119
Sensitivity of aircraft motion to cross coupling and acceleration derivatives
p0592 N81-31120
Applications of dynamic stability parameters to problems in aircraft dynamics
p0592 N81-31122
Sting interference effects on the static dynamic and base pressure measurements of the standard dynamics model aircraft at Mach numbers 0.3 through 1.3
[AD-A102612] p0627 N81-32124

STABILITY TESTS
NT FLIGHT STABILITY TESTS
NT WIND TUNNEL STABILITY TESTS
A new concept for dynamic stability testing --- for aircraft model in orbital path
[AIAA PAPER 81-0158] p0161 A81-20638
Experimental study of the stability of aircraft fuels at elevated temperatures
[NASA-CR-165165] p0084 N81-12255

STABILIZATION
NT SPIN STABILIZATION
Two-axis, fluidically controlled thrust vector control system for an ejection seat
[AD-A093888] p0204 N81-16996
Impact of high-alpha aerodynamics on dynamic stability parameters of aircraft and missiles
p0590 N81-31107

STABILIZED PLATFORMS
Gyrostabilizers for inertial control systems --- Russian book
p0017 A81-12028

STABILIZERS
The use of carbon-reinforced plastic in the construction of a deflector and a stabilizer
p0299 A81-29318

STABILIZERS (FLUID DYNAMICS)
NT HORIZONTAL TAIL SURFACES
Initial development for a flutter analysis of damaged T-38 horizontal stabilators using NASTRAN
[AIAA PAPER 81-0365] p0166 A81-20788
Development of large-area damage repair procedures for the F-14A horizontal stabilizer. Phase I - Repair development
p0559 A81-44395
Skin-stabilized horizontal stabilizer for the T-38 aircraft
p0559 A81-44398
The effects of warhead-induced damage on the aeroelastic characteristics of lifting surfaces. Volume 2: Aerodynamic effects
[AD-A093063] p0209 N81-17048
Investigation of an improved flutter speed prediction technique for damaged T-38 horizontal stabilators using NASTRAN
[AD-A094769] p0273 N81-19109

STACKING FAULTS
U CRYSTAL DEFECTS

STAGNATION POINT
Effect of rear stagnation point position and trailing edge bluntness on airfoil characteristics
p0170 A81-21013

STAGNATION PRESSURE
Description of recent changes in the Langley 6- by 28-inch transonic tunnel
[NASA-TM-81947] p0391 N81-23096

STAGNATION REGION
U STAGNATION POINT

STAMPING
Titanium forging - Stamping /stamp, screw-press/, circular rolling and isothermal forging
p0416 A81-36687

STANDARDIZATION
NT COMMONALITY (EQUIPMENT)
Standardization in military avionics systems architecture; Proceedings of the Seminar, Dayton, Ohio, November 28, 1979
p0050 A81-13167
Standardization in military system architecture
p0050 A81-13168
Avionic standardization from a designer's perspective
p0050 A81-13170
Avionic architectural standardization - Logistic support perspective
p0050 A81-13171
Promoting rational standardization --- for military avionics systems architecture
p0050 A81-13172
The present state of the MLS --- Microwave Landing System standardization
p0051 A81-13312
Standardisation - An alternative approach to ATC automation
p0177 A81-22193
History of SAE Committee S-7, Flight Deck and Handling Qualities Standards for Transport Category Aircraft
[SAE PAPER 801165] p0399 A81-34100

Development of standardised fatigue test load histories for helicopter rotors: Basic consideration and definition of Helix and Felix
p0489 N81-26141
AFSC Standarization Conference, 1553, 1589, 1750, 1760, Ada. Volume 1: Proceedings
[AD-A100575] p0539 N81-28092
AFSC Standarization Conference, 1553, 1589, 1750, 1760, Ada. Volume 2: Proceedings standards
[AD-A100577] p0539 N81-28093
Helicopter noise analysis: Round-robin test
[AD-A103724] p0641 N81-33948

STANDARDS
US Army working group on aircraft noise
p0150 A81-20053
Developing test profiles for multiple mission situations --- standards for military aircraft
p0570 A81-46483
Noncoherent C-band transponder standards
[AD-A091282] p0095 N81-13251
Limiting application of the concept 'damage tolerance' with regard to fighter aircraft
[AAAF-NT-79-32] p0210 N81-17054
Flight tests of IFR landing approach systems for helicopters
p0265 N81-19042
Minimum operational performance standards for airborne radar approach and beacon systems for helicopters
[RTCA/DO-172] p0336 N81-20322
Minimum operational performance standards for airborne weather and ground mapping pulsed radars
[RTCA/DO-173] p0336 N81-20323
Vibration test level criteria for aircraft equipment
[AD-A098675] p0442 N81-25070
Fatigue test program and test results
p0489 N81-26142
The background and bases for the proposed military standard on acoustical noise limits in helicopters
[AD-A099814] p0500 N81-27890
Minimum operational performance standards for Microwave Landing System (MLS) airborne receiving equipment
[RTCA/DO-177] p0595 N81-31180
The background and bases for the proposed military standard on acoustical noise limits in helicopters
p0604 N81-31459
Minimum operational performance standards for Microwave Landing System (MLS) airborne receiving equipment
[RTCA/DO-177] p0628 N81-32133

p0351 A81-31287

STATE EQUATIONS
U EQUATIONS OF STATE

STATE VECTORS
Synthesis of gyrostabilizer state evaluation system under unknown perturbations
p0299 A81-29311
A hybrid state vector approach to aeroelastic analysis with application to composite lifting surfaces
[AIAA 81-0626] p0308 A81-29512

STATIC ELECTRICITY
VHF-UHF precipitation-static interference effects on aircraft
p0056 A81-14258

STATIC FIRING
Static tests of the J97 powered, external augmenter V/STOL wind tunnel model
[NASA-CR-152403] p0337 N81-21010

STATIC LOADS
Mathematical aspects of the probabilistic evaluations of structural safety and NDI capabilities
p0181 A81-22635
Cast Aluminum Structures Technology (CAST). Technology transfer (phase 6)
[AD-A087492] p0030 N81-10152
Graphite-epoxy panel compression strength reduction due to local impact
p0080 N81-11139
Static deflection and eigenfrequency analysis of the Nibe wind turbine rotors. Theoretical background --- structural vibration
[RISO-M-2199] p0279 N81-19497
Structural flight loads simulation capability, volume 1
[AD-A096572] p0374 N81-22044
Structural flight loads simulation capability. Volume 2: Structural analysis computer program user's manual
[AD-A096594] p0375 N81-22045
Static and yawed-rolling mechanical properties of two type 7 aircraft tires
[NASA-TP-1863] p0437 N81-24471

STATIC PRESSURE
An experimental and theoretical investigation of pressures in four-lobe bearings
p0004 A81-10840
The static pressure in a vortex core
p0228 A81-24072
Analysis of total and static pressure fluctuations in an air intake at high incidence
[AAAF PAPER NT 80-61] p0370 A81-33950
Change of static pressure on the rotating blades of an axial-flow compressor during surging
p0509 A81-41039
Surface pressure measurements on a projectile shape at Mach 0.908
[AD-A098589] p0439 N81-25045
Aircraft sensor quality in SESAME 1979: Results of tower fly-bys and aircraft intercomparison
[PB81-176596] p0552 N81-29722
Development of an instrument for the accurate measurement of aircraft airspeed and altitude
[AD-A103421] p0638 N81-33204

STATIC STABILITY
NT SHELL STABILITY
NT STRUCTURAL STABILITY
Steady flow and static stability of airfoils in extreme ground effect
p0355 A81-31686
A piloted simulator investigation of static stability and stability/control augmentation effects on helicopter handling qualities for instrument approach
[AHS 80-30] p0476 A81-40160
A flight investigation of static stability, control augmentation, and flight director influences on helicopter IFR handling qualities
p0574 A81-46623
Exploratory subsonic investigation of vortex-flap concept on arrow wing configuration
p0243 N81-17985

STATIC TESTS
NT STATIC FIRING
Aerodynamic and acoustic behavior of a YF-12 inlet at static conditions
[AIAA PAPER 81-1597] p0508 A81-40972
Assessment of inflow control structure effectiveness and design system development
[AIAA PAPER 81-2048] p0620 A81-48637
Studies on proper simulation during static testing of forward speed effects on fan noise

p0266 N81-19049
STRAIGHT WINGS
U RECTANGULAR WINGS
STRAIN DISTRIBUTION
U STRESS CONCENTRATION
STRAIN ENERGY METHODS
Fatigue life evaluation of a helicopter main rotor hub
p0180 A81-22631
An application of the energy release rate concept to crack growth in attachment lugs
[AIAA 81-0491] p0302 A81-29420
STRAIN FATIGUE
U FATIGUE (MATERIALS)
STRAIN GAGE BALANCES
Signal processing for a six-component strain-gage wind tunnel balance
p0049 A81-12968
A comparison of methods for calibration and use of multi-component strain gauge wind tunnel balances
[AD-A090484] p0084 N81-12394
STRAIN GAGES
Aerodynamic blade excitation in turbocompressors
p0282 A81-27612
Development of the self-temperature compensated resistance strain gage used up to 700 C
[ASME PAPER 81-GT-118] p0316 A81-30022
Comparison of flight load measurements obtained from calibrated strain gages and pressure transducers
[AD-A093758] p0208 N81-17044
High temperature strain gage system for application to turbine engine components
[AD-A101713] p0583 N81-30132
STRAIN HARDENING
Thermoplastic strengthening of a gas-turbine engine disk lock joint - Determination of the residual stresses
p0365 A81-33169
Potential use of geotechnical fabric in airfield runway design --- reinforced soil systems
[AD-A092686] p0198 N81-16071
STRAIN SOFTENING
U PLASTIC DEFORMATION
STRAKES
Hinged strakes for enhanced maneuverability at high angles of attack
[AIAA PAPER 81-0357] p0165 A81-20776
Aerodynamic features of designed strake-wing configurations
[AIAA PAPER 81-1214] p0454 A81-38084
Flow measurements in the wake of a wing fitted with a leading-edge root extension (strake)
[RAE-TR-79120] p0022 N81-10015
STRAPDOWN INERTIAL GUIDANCE
Laser-gyro strapdown inertial navigation
p0225 A81-23860
Strapdown navigation comes of age
[SAE PAPER 801167] p0399 A81-34182
Doppler aided low accuracy strapdown inertial navigation system
[AIAA 81-1798] p0555 A81-44101
Gyrocompasses. Citations from the International Aerospace Abstracts data base
[NASA-CR-163675] p0028 N81-10065
Field evaluation of the LN80 land navigation system
[AD-A091885] p0193 N81-16035
A single gimbal/strapdown inertial navigation system for use on spin stabilized flight test vehicles
[SAND-80-2479C] p0193 N81-16037
Estimation and statistical averaging applied to redundant strapped down inertial sensors for navigation and flight control
[AD-A094465] p0276 N81-19133
Investigation of a strapdown attitude and heading reference system utilizing ring laser gyros
p0484 N81-26092
Rapid alignment of aircraft strapdown inertial navigation systems using Navstar Global Positioning System (GPS)
p0485 N81-26107
An investigation of the linear and angular vibration environments of trials aircraft

p0545 N81-29087

STRATA
NT SUBSTRATES
STRATIFICATION
NT ATMOSPHERIC STRATIFICATION
STRATOFORTRESS AIRCRAFT
U B-52 AIRCRAFT
STRATOSPHERE
The aircraft in the stratosphere --- effects on ozone layer equilibrium
p0002 A81-10499

Aircraft NO/x/ emissions and stratospheric ozone reductions - Another look
[AIAA PAPER 81-0306] p0164 A81-20741
STRATOTANKER AIRCRAFT
U C-135 AIRCRAFT
STREAMLINE FLOW

STRENGTH
Behavior of continuous filament advanced composite isogrid structure
p0377 N81-22095

STRENGTH OF MATERIALS
U MECHANICAL PROPERTIES
STRESS (PHYSIOLOGY)
NT ACCELERATION STRESSES (PHYSIOLOGY)
NT CENTRIFUGING STRESS
STRESS (PSYCHOLOGY)
An information-processing interpretation of air traffic control stress
p0053 A81-13416

STRESS ANALYSIS
A practical method for predicting flight-by-flight crack growth in fighter type aircraft for damage tolerance assessment
p0013 A81-11659

Structural analysis of fuselages with cutouts by finite element method
p0108 A81-17816

Conforming element with out-element nodes
p0225 A81-23855

Stress analysis of first turbine vane using a 3-dimensional model with non linear material behavior subjected to transient temperatures
[AIAA PAPER 81-1437] p0504 A81-40873
Matrix load analysis method for flexible aircraft structures
[PAPER 810610] p0522 A81-42766
Advanced transmission component development
p0575 A81-46634

Stress concentration in elements of aircraft structures --- Russian book
p0623 A81-49471

Buckling of sandwich panels subjected to axial compression, shear forces and lateral pressure. Part 2: Analysis
[SAAB-TN-AE-72-PT-2] p0086 N81-12465
The stress behavior of three advanced nickel base superalloys during high temperature low cycle fatigue
[AD-A091694] p0131 N81-14061
Structure and lifetime attestation of TORNADO
[MBB-PUB-P-0001] p0251 N81-18048
The Shock and Vibration Digest, volume 12, number 11
[AD-A092384] p0257 N81-18403
Stress analysis of aircraft modifications (C-141B Aircraft). Joint Airborne Communications Center/Command Post (JACC/CP) provisions
[AD-A095634] p0334 N81-20072
MEGA16 - Computer program for analysis and extrapolation of stress-rupture data
[NASA-TP-1809] p0393 N81-23486
STRESS CALCULATIONS
U STRESS ANALYSIS
STRESS CONCENTRATION
Photoelastic investigation of stress distribution around inclined cut-outs in gas-turbine components subjected to in-plane and bending loads
p0295 A81-29091

Investigations of vortex formation on wings with cropped leading edges
[DGLR PAPER 81-046] p0610 A81-47601
Stress concentration in elements of aircraft structures --- Russian book
p0623 A81-49471

The effect of the skewness of the skin panels on stresses in conical wings
p0625 A81-49930

STRESS CORROSION
NT STRESS CORROSION CRACKING
STRESS CORROSION CRACKING
On understanding environment-enhanced fatigue crack growth - A fundamental approach
p0003 A81-10749

Flight simulation environmental fatigue crack propagation in 2024-T3 and 7475-T761 aluminium
p0013 A81-11657

STRESS CYCLES
Individual jet engine stress load monitoring with the aid of the flight data recording system LEADS 200
p0328 N81-20013

STRESS DISTRIBUTION
U STRESS CONCENTRATION
STRESS INTENSITY FACTORS
Simple methods of determining stress intensity factors
p0289 A81-28984

An application of the energy release rate concept to crack growth in attachment lugs
[AIAA 81-0491] p0302 A81-29420
Experimental determination of the stress intensity factor for cracks with a curvilinear front in complex parts /gas turbine blades/
p0351 A81-31264

STRESS MEASUREMENT
Miniature pressure probe for measuring the surface-shear-stress vector in turbulent flow
p0233 A81-25354

Development of the self-temperature compensated resistance strain gage used up to 700 C
[ASME PAPER 81-GT-118] p0316 A81-30022
Measuring dynamic stresses on helicopter transmission gear teeth utilizing telemetry
p0361 A81-32859

Development of a noninterference compressor blade stress measurement system
p0361 A81-32874

Possibility of development of an electron-fractographic method for measuring stress level produced by fatigue fracture of the material
p0532 A81-43773

The design development and operation of gas turbine radio telemetry systems
[EIR-00733] p0077 N81-12082
Performance evaluation of a prototype noninterference technique for measurement of turbine engines compressor blade stress
[AD-A090566] p0094 N81-13061
Evaluation of bird load models for dynamic analysis of aircraft transparencies
[AD-A092909] p0204 N81-16995
STRESS RUPTURE STRENGTH
U CREEP RUPTURE STRENGTH
STRESS-STRAIN DISTRIBUTION
U STRESS CONCENTRATION
STRESS-STRAIN RELATIONSHIPS
Use of speckle-holographic interferometry to study the strain-strain state of a gas-turbine engine disk close to the blade root fixing
p0170 A81-21366

Prediction of structural fatigue response under aircraft loads from material stress-strain behavior
p0226 A81-24009

Finite element calculation of thin-wall reinforced shells of the fuselage type with account for physical nonlinearity and loss of stability of certain elements
p0235 A81-25679

Tensile stress/strain characterization of non-linear materials
p0348 A81-30915

Numerical methods for studying the stress-strain state and service life of aircraft gas-turbine engine disks
p0351 A81-31258

Stress analysis of first turbine vane using a 3-dimensional model with non linear material

behavior subjected to transient temperatures
[AIAA PAPER 81-1437] p0504 A81-40873
Geometrically nonlinear theory for calculating
thin rods of a wing profile
p0625 A81-49935
STRESS-STRAIN-TIME RELATIONS
Mechanisms of damage accumulation in
time-dependent cyclic deformation
[DOE/ER-10570/1] p0135 N81-14363

STRINGERS
Finite strip analysis of singly curved
skin-stringer structures
p0616 A81-48390
Application of fracture mechanics to built-up
structures --- aircraft handbooks
[NLR-MP-79044-U] p0086 N81-12475
Design and fabrication of a stringer stiffened
discrete-tube actively cooled panel for a
hypersonic aircraft
[NASA-CR-3403] p0279 N81-19484
STRIP TRANSMISSION LINES
NT MICROSTRIP TRANSMISSION LINES
Advanced microstrip antenna development. Volume
1: Technology studies for aircraft phased arrays
[AD-A103837] p0640 N81-33390
STROUHAL NUMBER
On the use of complex form of the Strouhal number
in the study of nonlinear aeroelasticity
p0231 A81-24723
STRUCTURAL ANALYSIS
NT DYNAMIC STRUCTURAL ANALYSIS
NT FLUTTER ANALYSIS
NT MATRIX METHODS
NT STRAIN ENERGY METHODS
Nonlinear incremental analysis up to failure of
aeronautical structures
p0068 A81-16307
An aeronautical structural analysis system for
static analysis /HAJIF-I/
p0224 A81-23728
Supermatrix method for multi-substructure analysis
p0225 A81-23854
Israel Annual Conference on Aviation and
Astronautics, 21st, Tel Aviv and Haifa, Israel,
February 28-March 1, 1979, Proceedings
p0226 A81-24003
B. M. Fraeijs de Veubeke memorial volume of
selected papers --- Book
p0232 A81-25174
Wing analysis by the plate analogy using an
integral-difference method
p0235 A81-25680
Application of hybrid schemes in analysis of
thin-wall structures by the displacement method
p0235 A81-25681
Structures, Structural Dynamics and Materials
Conference, 22nd, Atlanta, Ga., April 6-8, 1981,
Technical Papers. Part 1
p0300 A81-29377
Computation of wind tunnel model deflections ---
for transport type solid wing
[AIAA 81-0482] p0300 A81-29381
IPAD applications to the design, analysis, and/or
machining of aerospace structures --- Integrated
Program for Aerospace-vehicle Design
[AIAA 81-0512] p0301 A81-29388
Adhesive bonding of aircraft primary structures
[SAE PAPER 801209] p0404 A81-34217
The biparametric cycle count method and the
principle of simplification --- in determination
of aircraft structural fatigue life
p0419 A81-37337
Application of the Semi-Loof thin shell element to
the analysis of aircraft engine structures
p0518 A81-42704
Simulation of aircraft seat response to a crash
environment
[SAE PAPER 810612] p0522 A81-42768
Geometrically nonlinear theory for calculating
thin rods of a wing profile
p0625 A81-49935
Strength calculation of thin-wall rods of
significant taper
p0625 A81-49937
Design options study. Volume 4: Detailed
analyses supporting appendices --- advanced
civil military aircraft
[AD-A089539] p0027 N81-10059
The effect of thermal stresses on the integrity of
three built-up aircraft structures
[NASA-TM-81352] p0075 N81-12064
Aeroelastic optimization with multiple constraints
[AD-A090775] p0085 N81-12451
Experimental analysis and methods to determine the
dynamic behavior of propulsion shafting systems

p0189 N81-16010
Development and wind tunnel investigation of three supercritical airfoil profiles for transport aircraft
[NASA-TM-75840] p0249 N81-18030
Advanced aerodynamics and active controls. Selected NASA research
[NASA-CP-2172] p0259 N81-19001
Status and future plans of the Drones for Aerodynamic and Structural Testing (DAST) program --- Aeroelastic Research Wing (ARW)
p0259 N81-19003
Investigation of powered nacelles on a high aspect ratio NASA supercritical wing, phase 2 --- Langley 8 Foot Transonic Pressure Tunnel
p0260 N81-19008
The EET Horizontal Tails Investigation and the EET Lateral Controls Investigation --- Langley 8-Foot Transonic Pressure Tunnel
p0260 N81-19009
Natural laminar flow flight experiment --- Langley 8-Foot Transonic Pressure Tunnel
p0260 N81-19010
Advanced turboprop installation aerodynamics
p0260 N81-19013
Wind-tunnel investigation at Mach numbers from 0.25 to 1.01 of a transport configuration designed to cruise at near-sonic speeds --- conducted in langley 8-foot transonic pressure tunnel
[NASA-TM-X-2622] p0262 N81-19025
Experimental studies of scale effects on oscillating airfoils at transonic speeds
p0386 N81-23054
Civil component program Wing Section. New calculation methods for subsonic and transonic interference with planar and spatial flows
[BMFT-FB-W-80-022] p0424 N81-24034
Prediction of transonic flutter for a supercritical wing by modified strip analysis and comparison with experiment
[NASA-TM-83126] p0445 N81-25432
The supercritical profile of the supercritical wing
[NASA-TM-76605] p0494 N81-27075
Investigation of the circulation control wing/upper surface blowing high-lift system on a low aspect ratio semispan model
[AD-A103090] p0627 N81-32128
SUPERHIGH FREQUENCIES
NAVTOLAND microwave scanning beam tests at NCSC. Three landing guidance systems tested in a specular multipath environment
[AD-A099298] p0484 N81-26086
SUPERHYBRID MATERIALS
NT GRAPHITE-EPOXY COMPOSITE MATERIALS
Superhybrid composite blade impact studies
[ASME PAPER 81-GT-24] p0311 A81-29940
SUPERPLASTICITY
Concurrent superplastic forming/diffusion bonding of titanium airframe components
p0531 A81-43638
Superplastic formed and diffusion bonded titanium landing gear component feasibility study
[AD-A092788] p0200 N81-16213

NT SAAB 37 AIRCRAFT
NT SUPERSONIC COMMERCIAL AIR TRANSPORT
NT SUPERSONIC TRANSPORTS
NT T-38 AIRCRAFT
New concepts for design of fully-optimized configurations for future supersonic aircraft
p0007 A81-11606
Optimizing the fixed leading edge shape of a transonic wing to suit the landing high-lift requirements
p0011 A81-11640

Status of knowledge of sonic booms
p0017 A81-11822
Optimum selection of main parameters for the reverse design of a supersonic military aircraft
p0102 A81-17047
Transonic axisymmetric bodies with minimal wave drag
p0102 A81-17048
One-dimensional considerations concerning the stability behavior of inlet diffusers for supersonic aircraft --- German thesis
p0107 A81-17548
Sukhoi's pivotal interdictor
p0109 A81-17832
Industry proposes supersonic V/STOL
p0122 A81-19490
Supersonic V/STOL prospects brighten
p0288 A81-28599
Development of a low NO/x/ lean premixed annular combustor
[ASME PAPER 81-GT-40] p0312 A81-29954
Establishing cruise-engine cycle payoffs for a supersonic VSTOL aircraft
[ASME PAPER 81-GT-100] p0315 A81-30007
Transonic rotor noise - Theoretical and experimental comparisons
p0364 A81-33049
Propellers for economic flight at high speeds
[AAAF PAPER NT 80-34] p0369 A81-33936
A comparison of propulsion systems for V/STOL supersonic combat aircraft
[SAE PAPER 801141] p0398 A81-34171
Full Authority Digital Electronic Control turbofan engine demonstration
[SAE PAPER 801199] p0402 A81-34209
Integrated active controls impact on supersonic cruise vehicle structural design
[SAE PAPER 801210] p0404 A81-34218
Supersonic aircraft test experience - Test techniques and data analysis methods
p0419 A81-37299
Propellers for economic flight at high speeds
p0464 A81-39698
Multi-mission V/STOL with vectored thrust engines
[AIAA PAPER 81-1363] p0502 A81-40843
Advanced nozzle integration for supersonic strike fighter application
[AIAA PAPER 81-1441] p0504 A81-40875
The supersonic fan engine - An advanced concept in supersonic cruise propulsion
[AIAA PAPER 81-1599] p0508 A81-40973
Experimental and analytical development of an advanced supersonic fighter concept
[AIAA PAPER 81-1659] p0534 A81-43941
SR-71 impressive in high-speed regime
p0565 A81-45747
SR-71 imposes burden on maintenance units
p0565 A81-45748
Experimental and theoretical aerodynamic characteristics of two hypersonic cruise aircraft concepts at Mach numbers of 2.96, 3.96, and 4.63
[NASA-TP-1767] p0072 N81-12021
A simulator study for the development and evaluation of operating procedures on a supersonic cruise research transport to minimize airport-community noise
[NASA-TP-1742] p0073 N81-12043
A system for aerodynamic design and analysis of supersonic aircraft. Part 1: General description and theoretical development
[NASA-CR-3351] p0139 N81-14970
A system for aerodynamic design and analysis of supersonic aircraft. Part 3: Computer program description
[NASA-CR-3353] p0139 N81-14971
A system for aerodynamic design and analysis of supersonic aircraft. Part 4: Test cases
[NASA-CR-3354] p0185 N81-15977
Progress with variable cycle engines
p0245 N81-17997
A *family of supersonic airplanes:* Technical and economic feasibility
p0248 N81-18017
Supersonic cruise vehicle research/business jet
p0248 N81-18022
Optimum maneuvers of supersonic aircraft, volumes 1 and 2
p0332 N81-20060
Turbine bypass engine: A new supersonic cruise propulsion concept
[NASA-TM-82608] p0439 N81-26145
The supersonic fan engine: An advanced concept in supersonic cruise propulsion
[NASA-TM-82657] p0496 N81-27094
Multi-mission STOVL with vectored thrust engines
p0633 N81-33149
Wind tunnel testing of a windshield material or supersonic aircraft
[AD-A103383] p0635 N81-33163
Analysis and design of supersonic aircraft based on inviscid nonlinear Eulerian equations. Part 1: Rotational Euler solutions with explicit shock fitting
[AD-A103834] p0637 N81-33192

SUPERSONIC AIRFOILS
Rotor redesign for a highly loaded 1800 ft/sec tip speed fan, 2
[NASA-CR-159879] p0078 N81-12087
The high-speed airfoil program
p0185 N81-15970
The high-speed propeller program
p0185 N81-15972
Some aerodynamic interference effects that influence the transonic performance of combat aircraft
p0189 N81-16014
Design study for the inner wing of a transonic wing-body combination of aspect ratio 8
p0190 N81-16015
Civil component program Wing Section. The design of the transonic airfoil Va 2
[BMFT-FB-W-80-023] p0426 N81-24053

SUPERSONIC BOUNDARY LAYERS
The coordinate-deformation method in the problem of a supersonic gas flow over an airfoil --- delta wings
p0123 A81-19631
The influence of flow disturbances on the laminar-turbulent transition in a supersonic boundary layer
p0124 A81-19643
Wind-tunnel measurements and comparison with flight of the boundary layer and heat transfer on a hollow cylinder at Mach 3
[NASA-TP-1789] p0140 N81-14975

SUPERSONIC COMBUSTION
Multiple-scale turbulence modeling of boundary layer flows for scramjet applications
[NASA-CR-3433] p0392 N81-23011

SUPERSONIC COMBUSTION RAMJET ENGINES
A numerical study of candidate transverse fuel injector configurations in the Langley scramjet engine
p0003 A81-10709
Flameholding characteristics of a swept-strut H2 fuel-injector for scramjet applications
p0003 A81-10711
Numerical study of a scramjet engine flow field
[AIAA PAPER 81-0186] p0162 A81-20659
O.N.E.R.A. ramjet test facilities
p0365 A81-33285
Scramjet combustor wall boundary layer analysis
[AIAA PAPER 81-1434] p0504 A81-40871
A parametric study of staged fuel injector configurations for scramjet applications
[AIAA PAPER 81-1468] p0505 A81-40888
Critical considerations in the design of supersonic combustion ramjet /scramjet/ engines
[AIAA PAPER 80-1284] p0511 A81-41748
Operating characteristics of the Langley Mach 7 Scramjet Test Facility
[NASA-TM-81929] p0335 N81-20083

SUPERSONIC COMMERCIAL AIR TRANSPORT
A successful step toward an advanced supersonic transport engine - Acoustic and emission results from the Pratt and Whitney Aircraft Variable Cycle Engine Program
[AIAA PAPER 81-1593] p0508 A81-40968
Turbine bypass engine - A new supersonic cruise propulsion concept
[AIAA PAPER 81-1596] p0508 A81-4097
Design of a multivariable integrated control for a supersonic propulsion system --- variable stream control engine
p0079 N81-1
Structural concept trends for commercial supersonic cruise aircraft design

p0246 N81-18006
Opportunities for structural improvements for an advanced supersonic transport vehicle
p0246 N81-18007
Evaluation of high-temperature structural adhesives for extended service
p0247 N81-18010
Long-range airplane study: The consumer looks at SST travel
p0247 N81-18014
Transonic flutter study of a wind-tunnel model of an arrow-wing supersonic transport --- SCAT-15F model test in the Langley Transonic Dynamics Tunnel
[NASA-TM-81962] p0388 N81-23071

SUPERSONIC CRUISE AIRCRAFT RESEARCH
NASA presses fighter gains --- long-range supersonic cruise aircraft
p0002 A81-10575
The influence of leading-edge thrust on twisted and cambered wing design for supersonic cruise
[AIAA PAPER 81-1656] p0526 A81-43146
Progress in supersonic cruise technology
[AIAA PAPER 81-1687] p0535 A81-43950
Model aerodynamic test results for two variable cycle engine coannular exhaust systems at simulated takeoff and cruise conditions --- Lewis 8 by 6-foot supersonic wind tunnel tests
[NASA-CR-159818] p0093 N81-13057
Bibliography of Supersonic Cruise Research (SCR) program from 1977 to mid-1980
[NASA-RP-1063] p0139 N81-14973
A wind tunnel investigation of the aerodynamic characteristics of forward swept wings --- supersonic cruise aircraft research
p0189 N81-16011
Complex configuration analysis at transonic speeds
p0190 N81-16016
Active controls for flutter suppression and gust alleviation in supersonic aircraft --- YF-17 flutter model
[NASA-CR-163934] p0216 N81-17097
Supersonic Cruise Research 1979, part 1
[NASA-CP-2108-PT-1] p0243 N81-17981
Overview of the Langley subsonic research effort on SCR configuration
p0243 N81-17982
Results of a low-speed wind tunnel test of the MDC 2.2M supersonic cruise aircraft configuration
p0243 N81-17983
Exploratory subsonic investigation of vortex-flap concept on arrow wing configuration
p0243 N81-17985
Analytic development of improved supersonic cruise aircraft based on wind tunnel data
p0244 N81-17989
Flying qualities design criteria applicable to supersonic cruise aircraft
p0244 N81-17991
Development of SCR Aircraft takeoff and landing procedures for community noise abatement and their impact on flight safety
p0245 N81-17994
VCE test bed engine for supersonic cruise research
p0245 N81-17995
Effects on inlet technology on cruise speed selection
p0245 N81-17998
VCE early acoustic test results of General Electric's high-radius ratio coannular plug nozzle
p0245 N81-17999
Effects of nozzle design on the noise from supersonic jets
p0246 N81-18001
Status of noise technology for advanced supersonic cruise aircraft
p0246 N81-18002
Advanced technology for controlling pollutant emissions from supersonic cruise aircraft
p0246 N81-18004
Supersonic Cruise Research 1979, part 2 --- airframe structures and materials, systems integration, economic analysis
[NASA-CP-2108-PT-2] p0246 N81-18005
Supersonic cruise research aircraft structural studies: Methods and results
p0246 N81-18008
Overview of Boeing supersonic transport efforts, 1971 - 1979
p0247 N81-18016
Impact of changing fuel characteristics on supersonic cruise airplane
p0248 N81-18018
Charts for determining potential minimum sonic-boom overpressures for supersonic cruise aircraft
[NASA-TP-1820] p0337 N81-21016

SUPERSONIC DIFFUSERS
One-dimensional considerations concerning the stability behavior of inlet diffusers for supersonic aircraft --- German thesis
p0107 A81-17548
Some optimization problems of internal aerodynamics
p0237 A81-26120
Numerical solution of a supersonic ejector pump
p0413 A81-35939
Experiments with a supersonic multi-channel radial diffuser
[AD-A094192] p0257 N81-18374
Analysis of the performance of the drive system and diffuser of the Langley unitary plan wind tunnel
[NASA-TM-83160] p0635 N81-33150

SUPERSONIC DRAG
Procedures for optimal drag design of camber and flap deflection in supersonic regions with consideration to geometric limits
[DGLR PAPER 80-110] p0120 A81-19396
Experimental and theoretical aerodynamic characteristics of two hypersonic cruise aircraft concepts at Mach numbers of 2.96, 3.96, and 4.63
[NASA-TP-1767] p0072 N81-12021
Data base for the prediction of inlet external drag
p0190 N81-16018

SUPERSONIC FLIGHT
The emulsion chamber experiment on super-sonic Concorde /Echos/
p0019 A81-12076
Delta canard configuration at high angle of attack
p0154 A81-20351
Application of aerodynamic jump prediction theory to supersonic, high fineness ratio, cruciform finned bodies
[AIAA PAPER 81-0222] p0162 A81-20605
Contribution to the determination of the drag coefficient for air breathing flight vehicles on the basis of wind tunnel measurements
[DGLR PAPER 81-036] p0610 A81-47604
Flight effects on supersonic convergent-divergent nozzle jet noise
[AIAA PAPER 81-2027] p0623 A81-49728
Computational aerodynamic design tools and techniques used at fighter development
[MBB-FE-122/S/PUB/13] p0128 N81-13950
Prediction of supersonic store separation characteristics including fuselage and stores of noncircular cross section. Volume 2: Users manual for the computer program
[AD-A099391] p0494 N81-27080
Prediction of supersonic store separation characteristics including fuselage and stores of noncircular cross section. Volume 1: Theoretical methods and comparisons with experiment
[AD-A099330] p0495 N81-27081

SUPERSONIC FLOW
Investigation of lateral forces and moments in the case of asymmetric gas flows in nozzles
p0004 A81-10913
Review of numerical methods for the problem of the supersonic flow around bodies at angle of attack
p0011 A81-11639
Solution of nonautomodeled problems of boundary-layer theory taking into account nonstationary conjugate heat exchange and blowing
p0039 A81-14581
Thin-layer approximation for three-dimensional supersonic corner flows
p0047 A81-15300
Variational problems of gas dynamics
p0049 A81-16495
Characteristics of the velocity field near a wing-body combination located at an angle of attack to an oncoming supersonic flow
p0119 A81-19237
Plane vortex gas flows --- emphasizing supersonic case

p0123 A81-19634
On a linear theory of a supersonic flow past a delta wing with subsonic leading edges
p0149 A81-19872
A cost-effective method for shock-free supercritical wing design
[AIAA PAPER 81-0383] p0166 A81-20796
Calculation of supersonic gas flows about wings
p0170 A81-21201
Calculation of internal and external flow field and cowl pressure drag in the supersonic axisymmetric nose inlets
p0224 A81-23730
Lifting surface theory and the numerical method of wings with small angles of sideslip at subsonic and supersonic speeds
p0224 A81-23851
Slightly blunted cone in a supersonic flow at angle of attack
p0225 A81-23908
Self-excited oscillations of supersonic flow in a sudden enlargement of a duct
p0228 A81-24081
Numerical simulation of supersonic flow around solids of revolution with a leading detachment zone
p0231 A81-24757
Evaluation of blade element performance of compressor rotor blade cascades in transonic and low supersonic flow range
p0296 A81-29102
On some methods of supersonic unsteady lifting surface analysis
[AIAA 81-0644] p0307 A81-29497
An improved potential gradient method to calculate airloads on oscillating supersonic interfering surfaces
[AIAA 81-0646] p0307 A81-29499
Interaction of a gas jet from a jet engine with the destroyed surface of a multiphase disperse medium
p0319 A81-30152
Calculation of supersonic flow around a wing with constant curvature of its leading edges
p0413 A81-35916
Calculation of supersonic flow past interfering wings
p0413 A81-36455
Calculation of flow past wings with supersonic sharp edges
p0418 A81-36944
Accuracy and application of a second-order theory for three-dimensional supersonic and low hypersonic unsteady flows aroung a thin wing
p0419 A81-37335
A PANSONIC Navier-Stokes solver --- for two dimensional flow about arbitrary airfoil sections
[AIAA PAPER 81-1195] p0454 A81-38077
Measured pressure distributions and shock shapes on a simple delta wing
p0617 A81-48479
Analytical characteristics methods: Applications
[VKI-PREPRINT-1980-10] p0021 N81-10011
Measured pressure distributions and shock shapes on a Butler wing
[CUED/A-AERO/TR-9] p0090 N81-13026
Downwash calculation at close range behind a trapezoidal wing in supersonic flow
[FFA-TN-AU-1661] p0125 N81-13925
Transonic wind tunnel development (1940 - 1950)
p0185 N81-15971
A higher order panel method for linearized supersonic flow
[NASA-CR-3062] p0262 N81-19022
Investigation of plume induced separation on a full-size missile at supersonic velocities
[AD-A094742] p0277 N81-19212
Investigations of free-jet test requirements and techniques with emphasis on the adaptable jet stretcher
[AD-A098710] p0439 N81-25044
An aerodynamic analysis of deformed wings in subsonic and supersonic flow
[AD-A101675] p0580 N81-30091
Basic studies of body vortices at high angles of attack and supersonic speeds
[AD-A102241] p0594 N81-31154

SUPERSONIC FLOW INLETS
U SUPERSONIC INLETS

SUPERSONIC FLUTTER
Experimental verification of unsteady aerodynamic models of supersonic unstalled flutter
p0295 A81-29094
Supersonic stall flutter of high-speed fans
[ASME PAPER 81-GT-184] p0317 A81-30070
Experimental determination of unsteady blade element aerodynamics in cascades. Volume 2: Translation mode cascade
[NASA-CR-165166] p0140 N81-14976

SUPERSONIC INLETS
Experimental investigation of a high-aspect-ratio supersonic inlet
[AIAA PAPER 81-1397] p0515 A81-42107
Supersonic stall flutter of high speed fans --- in turbofan engines
[NASA-TM-81613] p0140 N81-14970
High-speed cowlings, air inlets and outlets, and internal-flow systems
p0185 N81-15973
Data base for the prediction of inlet external drag
p0190 N81-16010
Hyperbolic/parabolic development for the GIM-STAR code --- flow fields in supersonic inlets
[NASA-CR-3369] p0201 N81-16416
Top-mounted inlet system feasibility for transonic-supersonic fighter aircraft --- V/STOL aircraft
[NASA-TM-81292] p0428 N81-24066

SUPERSONIC JET FLOW
Interferometric study of the initial stage of supersonic jets of gases with various specific-heat ratios from conical nozzles
p0068 A81-16231
Solutions for slightly over- or under-expanded hot supersonic jets exhausting into cold subsonic mainstreams
[AIAA PAPER 81-0257] p0163 A81-20705
New interpretations of shock-associated noise with and without screech
p0178 A81-22527
Calculation of the boundary of a supersonic inviscid jet flowing into a submerged space or a supersonic wake
p0229 A81-24172
Experiments on the nonlinear characteristics of noise propagation from low and moderate Reynolds number supersonic jets
[AIAA PAPER 81-2041] p0618 A81-48613
Shock associated noise reduction from inverted-velocity-profile coannular jets
[NASA-CR-3454] p0589 N81-30980

SUPERSONIC NOZZLES
On screeching jets exhausting from an axisymmetric supersonic nozzle
p0008 A81-11616
Some optimization problems of internal aerodynamics
p0237 A81-26120
Characteristics of thermal energy separation in a gas ejector
p0281 A81-27371
The sweep finite element method for calculating the flow field and performance of supersonic ejector nozzles
p0291 A81-29061
Effectiveness of a gas curtain in Laval nozzles under nonrated flow conditions
p0417 A81-36737
Numerical simulation for the design of a supersonic cruise nozzle with a fluid noise shield
[AIAA PAPER 81-1216] p0458 A81-39006
Flight effects on supersonic convergent-divergent nozzle jet noise
[AIAA PAPER 81-2027] p0623 A81-49720
Effects of nozzle design on the noise from supersonic jets
p0246 N81-18001
Status of noise technology for advanced supersonic cruise aircraft
p0246 N81-18002

SUPERSONIC SPEEDS
Wing-alone aerodynamic characteristics at high angles of attack
[AIAA PAPER 81-0008] p0157 A81-20533
Wing-body carryover at supersonic speeds with finite afterbodies
p0354 A81-31622
Estimation of wing nonlinear aerodynamic characteristics at supersonic speeds

[NASA-TP-1718] p0031 N81-10004
Optimal bodies for minimum total drag at supersonic speeds
[AD-A091235] p0091 N81-13036
Effect of wing location and strakes on stability and control characteristics of a monoplanar circular missile with low-profile tail fins at supersonic speeds
[NASA-TM-81878] p0186 N81-15978
Prediction of nacelle aerodynamic interference effects at low supersonic Mach numbers
p0244 N81-17988
Supersonic wings with significant leading-edge thrust at cruise
p0244 N81-17990
An evaluation of a simplified near field noise model for supersonic helical tip speed propellers
[NASA-TM-81727] p0360 N81-22836
Development for new laboratories for future testing
p0433 N81-24105
Wing-alone aerodynamic characteristics for high angles of attack of supersonic speeds
[NASA-TP-1889] p0579 N81-30087
SUPERSONIC TRANSPORTS
NT CONCORDE AIRCRAFT
NT SUPERSONIC COMMERCIAL AIR TRANSPORT
The aircraft in the stratosphere --- effects on ozone layer equilibrium
p0002 A81-10499
Transonic flutter study of a wind-tunnel model of an arrow-wing supersonic transport
[AIAA 81-0654] p0308 A81-29506
Advanced supersonic transport propulsion and configuration technology improvements
[AIAA PAPER 81-1595] p0508 A81-40970
Motion-base simulator results of advanced supersonic transport handling qualities with active controls
[AIAA 81-1819] p0555 A81-44109
Optimization of takeoff flight paths with respect to FAR Part 36 noise using dynamic programming
p0589 A81-46371
Advanced supersonic transport fixed-base simulator evaluations at landing approach
p0244 N81-17992
Assessment of the impact of advanced air-transport technology
p0247 N81-18015
Technology development status at McDonnell Douglas
p0248 N81-18019
Supersonic market and economic analyses
p0248 N81-18020
The impact of materials technology and operational constraints on the economics of cruise speed selection
p0248 N81-18021
SUPERSONIC TURBINES
Gas dynamic characteristics of the nozzle diaphragms of partial supersonic turbines
p0281 A81-27374
Experimental investigation of a low hub-to-tip ratio single stage transonic fan
[ASME PAPER 81-GT-203] p0318 A81-30098
ATES activity and status at Detroit Diesel Allison --- Advanced Technology Engine Studies
[AIAA PAPER 81-1504] p0516 A81-42206
SUPERSONIC WAKES
Calculation of the boundary of a supersonic inviscid jet flowing into a submerged space or a supersonic wake
p0229 A81-24172
SUPERSONIC WIND TUNNELS
Calibration of the high speed wind tunnel TVM 150 in the supersonic range
p0016 A81-11778
The influence of flow disturbances on the laminar-turbulent transition in a supersonic boundary layer
p0124 A81-19643
Wall cooling and the laminar-turbulent boundary layer transition at supersonic flow velocities
p0124 A81-19644
Investigation of the starting process of a supersonic wind tunnel
p0220 A81-24080
A half-model free-oscillation rig for pitch-damping measurements in high speed wind tunnels
p0461 A81-39263
An experimental investigation of a large delta P settling chamber for a supersonic pilot quiet tunnel
[NASA-CR-3436] p0484 N81-26112
A rectangular rod-wall sound shield
[NASA-CASE-LAR-12083-1] [illegible]
Analysis of the performance of the drive system and diffuser of the Langley unitary plan wind tunnel
[NASA-TM-83160] p0635 N81-33138
SUPPORT INTERFERENCE
An investigation of support-interference effects
[NAL-TR-622] p0141 N81-16904
Support interference of wind tunnel models: A selective annotated bibliography
[NASA-TM-81909] p0335 N81-20084
Support interference

NT EMERGENCY LIFE SUSTAINING SYSTEMS
NT GROUND SUPPORT SYSTEMS
NT LIFE SUPPORT SYSTEMS
F-16 integrated logistics support: Still time to consider economical alternatives
[PB81-137473] p0389 N81-23879
SUPPORTS
NT PYLONS
Experimental study of the influence of supports on the aerodynamic loads on an ogive cylinder at high angles of attack
[AIAA PAPER 81-0007] p0158 A81-20531
Problem of rotor passing through critical speed with gyroscopic effect. III - Case of rotating shaft on flexible supports
p0228 [illegible]
Sting interference effects on the static dynamic and base pressure measurements of the standard dynamics model aircraft at Mach numbers 0.3 through 1.3
[AD-A102612] p0627 [illegible]
SUPPRESSORS
Active flutter suppression design and test - A joint U.S.-F.R.G. program
p0009 A81-11621
Advanced technology turboshaft IR suppression
p0106 A81-17579
General Electric infrared suppressors for the Black Hawk helicopter
p0106 A81-17580
SURFACE ACOUSTIC WAVE DEVICES
AN/TPX-54 interrogator
p0350 A81-31181
The behavior of quartz oscillators in the presence of accelerations --- in missile and aircraft time-frequency navigation systems
[ONERA, TP NO. 1981-31] p0351 [illegible]
SURFACE COOLING
Wall cooling and the laminar-turbulent boundary layer transition at supersonic flow velocities
p0124 A81-19644
Heat transfer from a row of impinging jets to concave cylindrical surfaces
p0221 [illegible]
Aerodynamic surface cooling for laminar flow control for hydrogen-fueled subsonic aircraft
[SAE PAPER 801155] [illegible]
SURFACE DEFECTS
Runway rehabilitation, Washington National Airport
p0112 [illegible]
SURFACE EFFECT SHIPS
Noise control design problems on air cushion vehicles and surface effect ships
p0017 A81-11810
Operational characteristics comparison /ACV and SES/
[AIAA PAPER 81-2064] [illegible]
SURFACE FINISHING
Surface analysis of bearing steels after solvent treatments. II - Lubricant-coated bearing surfaces
[ASLE PREPRINT 80-LC-8A-6] p0170 [illegible]
Compatibility of aircraft operational fluids with a graphite/epoxy composite: Development of an exterior coating system and remover
[AD-A090849] [illegible]
Aircraft surface coatings study: Energy efficient transport program --- sprayed and adhesive bonded coatings for drag reduction
[illegible]
Surface finishing
[NASA-CASE-MSC-12631-3] p0132 [illegible]

Evaluation of a pneumatic boot deicing system on a general aviation wing model
[NASA-TM-82363] p0441 N81-25065
Manual on the fatigue of structures. 2: Causes and prevention of damage. 7: Mechanical surface damage --- aircraft structures
[AGARD-MAN-10(ENG)] p0640 N81-33503
SURFACE GEOMETRY
Stochastic surfaces for flight simulator displays
p0324 A81-30330

SURFACE INTERACTIONS
U SURFACE REACTIONS
SURFACE NAVIGATION

SURGES
An experimental investigation of the rotating stall, surge, and wake behind the rotor for a single stage axial compressor
p0109 A81-17826
Turbo-compressors surge and surge control
[AIAA PAPER 81-0070] p0159 A81-20579
SURVEILLANCE
Analysis, design and simulation of line scan aerial surveillance systems
p0357 A81-32892

SURVEILLANCE RADAR
NT AIRBORNE SURVEILLANCE RADAR
Performance evaluation of an interrogation-reply scheduling technique for a discrete address beacon system --- of radar surveillance and aircraft communication in ATC
p0121 A81-19417
Side lobe suppression with digital signal processing
p0152 A81-20092
Target detection and parameter estimation in surveillance radars using MTI-FFT processing
p0152 A81-20094
A distributed airborne surveillance system
p0180 A81-22618
Mini-RPV radar test program
p0180 A81-22619
Multipath and interference effects in secondary surveillance radar systems
p0183 A81-23359
Discrete Address Beacon System
p0350 A81-31134
Adaptive features and measurement requirements for advanced surveillance radars
p0617 A81-4854
New terminal radar approach control in tower cab concept for Love Field, Dallas, Texas
[AD-A089996] p0034 N81-11025
Test and evaluation of the Airport Surveillance Radar (ASR)-8 wind shear detection system (phase 2), revision
[AD-A090111] p0042 N81-1129
Definition of the problems associated with air traffic control of closely spaced helicopter traffic performing decelerated instrument approaches
[AD-AC94073] p0251 N81-1004
SURVEYING
U SURVEYS
SURVEYS
Survey population response to airplane noise, part 1
[NASA-TM-75790] p0031 N81-105
General Aviation Activity and Avionics Survey
[AD-A097604] p0389 N81-2308
Nature of the annoyance and noise annoyance relation around airports
[NASA-TM-75873] p0542 N81-2860
Evaluation of the disturbance caused by aircraft noise by opinion surveys
[NASA-TM-76579] p0542 N81-2861
A compendium of aircraft cockpit vision surveys, 1950 through 1980, volume 1
[AD-A101473] p0580 N81-301
SURVIVAL
A study of factors affecting aircrew survivability following emergency escape over water
p0409 A81-34
Optimal nuclear radiation criteria for aeronautical systems
[AD-A101651] p0548 N81-281
SURVIVAL EQUIPMENT
Survival and Flight Equipment Association, Annual Symposium, 17th, Las Vegas, Nev., December 2-6, 1979, Proceedings
p0174 A8
Seat pack for fighter aircraft operating on the NATO Northern Flank
p0205 N81-17
The evolution of the helicopter seat pan mounted Personal Survival Pack (PSP)
p0205 N81-17
Aeronautical systems technology needs: Escape, rescue and survival and test facilities and test equipment

[AD-A097827] p0423 N81-24020
SUSPENDING (HANGING)
NT MAGNETIC SUSPENSION
SUSPENSION SYSTEMS (VEHICLES)
Heave instabilities of amphibious air cushion suspension systems
[UTIAS-246] p0144 N81-15156
SWEAT COOLING
Transpiration air cooled turbine blade - A technology for future generation aircraft and industrial gas turbine engines using coal or coal derived fuels
p0297 A81-29115
Comparative efficiency of penetrating steam and air cooling of gas turbine blades
p0509 A81-41003
SWEEP ANGLE
NT LEADING EDGE SWEEP
An investigation of drag associated with the upswept rear fuselage of a helicopter
[BU-257] p0330 N81-20043

T

T-37 AIRCRAFT
Engine requirements for the T-37 trainer aircraft - A simulation study and analysis
p0616 A81-48379

T-38 AIRCRAFT
Initial development for a flutter analysis of damaged T-38 horizontal stabilators using NASTRAN
[AIAA PAPER 81-0365] p0166 A81-20784
Skin-stabilized horizontal stabilizer for the T-38 aircraft
p0559 A81-44390
Investigation of an improved flutter speed prediction technique for damaged T-38 horizontal stabilators using NASTRAN
[AD-A094769] p0273 N81-19109
Alternate T-38 transparency development. Part 1: Initial analysis and design
[AD-A103261] p0638 N81-33196
Alternate T-38 transparency development. Part 2: Baseline birdstrike testing
[AD-A103262] p0638 N81-33197

T-56 ENGINE
Fuel efficiency improvements to the T56 turboprop engine
[SAE PAPER 801158] p0399 A81-34178

TABLES (DATA)
Annual review of aircraft accident data, U.S. General aviation calendar year 1978
[PB80-201916] p0024 N81-10028
Experimental aerodynamic characteristics of two V/STOL fighter/attack aircraft configurations at Mach numbers from 0.4 to 1.4
[NASA-TM-81234] p0140 N81-14981
Effect of sweep and aspect ratio on the longitudinal aerodynamics of a spanloader wing in and out of ground effect --- wind tunnel tests
[NASA-TM-80199] p0627 N81-32119

TABS (CONTROL SURFACES)
An experimental investigation of the effects of trailing-edge strips on the unsteady aerodynamic forces on tabs
[AD-A094989] p0263 N81-19028

TACAN
Integrated Flight and Weapon Control for improved tactical combat effectiveness
p0324 A81-30329
U.S. Navy/USAF development of Tactical Aircrew Combat Training System/Air Combat Maneuvering Instrumentation /TACTS/ACMI/
[SAE PAPER 801183] p0401 A81-34196
Energy maneuverability displays for air combat training
[SAE PAPER 801185] p0401 A81-34198
Analytic determination of interference thresholds for microwave landing system equipment and TACAN/DME equipment
[AD-A093448] p0206 N81-17025
Evaluation of the performance of the Remote Area Precision Positioning System (RAPPS)
[AD-A094169] p0250 N81-18036
The susceptibility of representative TACAN and DME equipments to a proposed, MLS L-band precision DME signal format
[AD-A096265] p0339 N81-21048

TACT PROGRAM
Boundary layer stability analysis of a natural laminar flow glove on the F-111 TACT airplane
p0238 A81-26503

TACTICAL AIR NAVIGATION

TERMINAL BALLISTICS
The effects of warhead-induced damage on the aeroelastic characteristics of lifting surfaces. Volume 1: Aeroelastic effects
[AD-A091674] p0129 N81-13955

TERMINAL CONFIGURED VEHICLE PROGRAM
Operation and evaluation of the Terminal Configured Vehicle Mission Simulator in an automated terminal area metering and spacing ATC environment
p0171 A81-21709
Critical analysis and modern approaches to integrated system aircraft
p0227 A81-24059
Flight test experience using advanced airborne equipment in a time-based metered traffic environment
[SAE PAPER 801207] p0403 A81-34215
Experiments using electronic display information
p0213 N81-17077
Test results of flight guidance for fuel conservative descents in a time-based metered air traffic environment --- terminal configured vehicle
p0264 N81-19036
A pilot's subjective analysis of a Cockpit Display of Traffic Information (CDTI) --- terminal configured vehicle
p0264 N81-19037
Guidance and control system research for improved terminal area operations --- terminal controlled vehicle
p0264 N81-19038
Operational considerations in utilization of microwave landing system approach and landing guidance --- terminal configured vehicle
p0264 N81-19039
A pilot training manual for the terminal configured vehicle electronic horizontal situation indicator
[NASA-TM-81959] p0330 N81-20044
Operational considerations in utilization of microwave landing system approach and landing guidance
[NASA-TM-81945] p0331 N81-20050
Antenna design and development for the microwave subsystem experiments for the terminal configured vehicle project
[NASA-CR-164220] p0378 N81-22282
A pilot training manual for the terminal configured vehicle electronic attitude director indicator
[NASA-CR-159195] p0434 N81-24111
A learning guide for the terminal configured vehicle electronic horizontal situation indicator
[NASA-TM-83128] p0484 N81-26083
Learning guide for the terminal configured vehicle advanced guidance and control system mode select panel
[NASA-CR-165751] p0580 N81-30098

TERMINAL FACILITIES
Atlanta's new central passenger terminal complex
p0003 A81-10719
The outfitting of regional airports in the future with radio assistance for approach and landing, with emphasis on landing site obstacles for general aviation
p0051 A81-13313
Human error in ATC system operations
p0052 A81-13414
Carrier system simplifies freight handling - A new technical concept for Lufthansa's Frankfurt facility
p0056 A81-14241
Airspace analysis in airport system planning
p0111 A81-18052
Helicopters - Help for the all weather terminal
p0112 A81-18065
Investment decision-making in international airports
p0113 A81-18079
Design of the new Tehran International Airport
p0114 A81-18084
The importance of 'Interim Standard Microwave Landing System' for small community airports
p0114 A81-18087
Saudi Arabia's new Gateway Airports
p0115 A81-18093
Wire communication systems and equipment at airports --- Russian book
p0289 A81-28745
An aircraft manufacturer's view of airport R&D needs
[AIAA PAPER 81-0793] p0368 A81-33887
Airports and earthquakes - An important subject often ignored
p0482 A81-40750
The 1980 Aircraft Safety and Operating Problems, part 2
[NASA-CP-2170-PT-2] p0267 N81-19056

TERMINAL GUIDANCE
Procedures to improve flight safety in wind shear conditions
p0014 A81-11666
Computer-aided methods for redesigning the stabilized pitch control system of a semi-active thermal homing missile
p0051 A81-13250
Realization of a method of extremal targeting in a problem of aircraft landing control
p0625 A81-49943
Flight termination receiver/decoders design, performance and certification
[AD-A089746] p0037 N81-11045
A mathematical model of the CH-53 helicopter
[NASA-TM-81238] p0075 N81-12065
Study of helicopter performance and terminal instrument procedures
[AD-A090052] p0092 N81-13046
Flight evaluation of the terminal guidance system
[NASA-CR-163859] p0142 N81-14991
Applicated techniques for the control of approach traffic
[DFVLR-MITT-79-20] p0142 N81-14992
Flight investigation of a four-dimensional terminal area guidance system for STOL aircraft
[NASA-TM-81271] p0260 N81-19018

TERNARY SYSTEMS (DIGITAL)
U DIGITAL SYSTEMS
TERRAIN
Information requirements for airborne electronic terrain maps p0325 A81-30334
Aerial collisions with relief features p0557 A81-44323
Real-time feasibility for generation of nonlinear textured terrain [AD-A095070] p0277 N81-19141
TERRAIN ANALYSIS
Single-parameter terrain classification for terrain following p0066 A81-15882
Autonomous navigation using passively sensed terrain images p0110 A81-17977
TERRAIN CONTOUR MATCHING NAVIGATION SYSTEM
U TERCOM
TERRAIN FOLLOWING AIRCRAFT
Sukhoi's pivotal interdictor p0109 A81-17832
A mobile computer-aided detection and tracking system for low-flying attack aircraft p0152 A81-20098
'Load snubbing' - A solution to the problem of terrain flying with external cargo [AHS 80-32] p0476 A81-40162
Use of atmospheric electric fields for vertical stabilization and terrain avoidance [AIAA 81-1848] p0556 A81-44126
Output predictive algorithmic control - Precision tracking with application to terrain following p0564 A81-45573
Output predictive algorithmic control - Precision tracking with application to terrain following p0567 A81-46280
Evolution of tactical and map displays for high performance aircraft p0212 N81-17072
A study of the effect of terrain on helicopter noise propagation by acoustical modeling [AD-A097626] p0394 N81-23864
TEST BEDS
U TEST EQUIPMENT
TEST CHAMBERS
NT ANECHOIC CHAMBERS
A comparison between electric field strengths similarly generated and measured in the open air, in a shielded enclosure and in a large aircraft hangar, over frequency range 10 to 110 MHz [RSRE-MEMO-3248] p0084 N81-12353
Comments on settling chamber design for quiet, blowdown wind tunnels [NASA-TM-81948] p0335 N81-20085
TEST EQUIPMENT
Multiple-component lightning high-current testing p0056 A81-14255
An apparatus for the simulation of an air intake at high angle of attack in a compressor test facility [ONERA, TP NO. 1981-35] p0460 A81-39238
Standard Avionics Testbeds [AIAA PAPER 81-1734] p0528 A81-43172
An equipment for testing and measuring a Helmet Mounted Sight and Display system with a coupled TV-camera in the flight simulator for research of the DFVLR [DFVLR-MITT-80-04] p0092 N81-13052
Equipment for testing and measuring a "helmet mounted sight and display" system with a coupled movable television camera in the flight-simulator for research of the DFVLR [DFVLR-MITT-80-04] p0129 N81-13960

p0170 A81-21197

Analysis of a symmetric transonic aerofoil with
the finite element method - A new upwinding
technique
p0183 A81-2298

On the unsteady wake-induced lift on a slotted
airfoil. II - The influence of displacement
thickness fluctuations
p0229 A81-24237

Influence of hinge line gap on aerodynamic forces
acting on a harmonically oscillating thin
profile in an incompressible flow. I, II
p0348 A81-3095

Steady flow and static stability of airfoils in
extreme ground effect
p0355 A81-3160

Oscillating airfoils in shock-free transonic flows
p0410 A81-3502

Isothermal forging of fan blades
[AIAA PAPER 81-1405] p0503 A81-4008
Evaluation of two-dimensional subsonic oscillatory
airforce coefficients and loading distributions
p0617 A81-4

THIN FILMS
The application of liquid crystals in experimental
aerodynamics
p0238 A81-2612

Sputtering and ion plating for aerospace
applications
[NASA-TM-81726] p0337 N81-20
THIN PLATES
Influence of boundary-layer suction on the
emission spectrum on a thin plate performing
oscillations under the action of pressure
pulsations --- in aircraft noise reduction
p0054 A81-1

Influence of boundary-layer suction on the
spectrum of radiation from a thin plate
vibrating under the action of pressure
fluctuations --- in aircraft noise reduction
p0238 A81-26

Stability and ultimate strength of carbon fiber
reinforced plastic panels
p0481 A81-4

THIN WALLED SHELLS
Finite element calculation of thin-wall reinfo
shells of the fuselage type with account fo
physical nonlinearity and loss of stability o
certain elements

p0235 A81-25679
Application of hybrid schemes in analysis of thin-wall structures by the displacement method
p0235 A81-25681
Application of the Semi-Loof thin shell element to the analysis of aircraft engine structures
p0518 A81-42704
Calculation of natural vibrations for thin-walled irregular reinforced shells of the helicopter fuselage type using the finite-element work method
p0614 A81-48097

THIN WALLS
Geometrically nonlinear theory for calculating thin rods of a wing profile
p0625 A81-49935
Strength calculation of thin-wall rods of significant taper
p0625 A81-49937

THIN WINGS
NT INFINITE SPAN WINGS
Flow past a slender profile in a channel with permeable walls
p0004 A81-10916
A finite-span wing in transonic flow
p0054 A81-13741
Calculation of the nonlinear aerodynamic characteristics of finite-span wing
p0063 A81-15388
Determination of the effect of transverse cutouts on the hydrodynamic characteristics of a finite-span wing in the case of steady and unsteady motion near a wall
p0119 A81-19335
On a linear theory of a supersonic flow past a delta wing with subscnic leading edges
p0149 A81-19872
Unsteady subsonic motion of a wing near a screen
p0225 A81-23889
The effect of the aspect ratio of delta wings on the structure of the near vortex wake
p0413 A81-36467
Calculation of the nonlinear aerodynamic characteristics of a wing of finite span
p0417 A81-36738
Accuracy and application of a second-order theory for three-dimensiccal supersonic and low hypersonic unsteady flows aroung a thin wing
p0419 A81-37335
Wing with finite span in a transonic flow
p0420 A81-37480
Calculation of the aerodynamic characteristics of a deformable wing, moving near a screen
p0625 A81-49948
Some particular configuration effects on a thin supercritical variable camber wing
p0188 N81-16005
Aerodynamic effects of nearly uniform slipstreams on thin wings in the transonic regime
[NASA-CR-152351]
p0249 N81-18027
Experimental investigation of the flow on the suction side of a thin Delta wing

Steady flow and static stability of airfoils in extreme ground effect
p0355 A81-31686
Experimental study of the separation at the trailing edge of an axisymmetrical contoured after-body
p0365 A81-33281
Trailing-edge airframe noise source studies on aircraft wings
[AIAA PAPER 80-0976] p0411 A81-35634
Trailing edge noise from hovering rotors
[AHS 80-60] p0479 A81-40184
Wind tunnel tests of sailwings for Darrieus rotors
p0518 A81-42678
EF-111A graphite/epoxy Horizontal Stabilizer Trailing Edge
p0557 A81-44342
Trailing edge noise prediction from measured surface pressures
p0616 A81-48395
Downwash calculation at close range behind a trapezoidal wing in supersonic flow
[FFA-TN-AU-1661] p0125 N81-13925
Jet wing interaction to give improved combat performance
p0188 N81-16007
Experimental study of the separation at the trailing edge of an axisymmetrical contoured after-body
p0255 N81-18257
An experimental investigation of the effects of trailing-edge strips on the unsteady aerodynamic forces on tabs
[AD-A094989] p0263 N81-19020
Investigation of an improved flutter speed prediction technique for damaged T-38 horizontal stabilators using NASTRAN
[AD-A094769] p0273 N81-19109
Mean-flow and turbulence measurements in the vicinity of the trailing edge of an NACA (63 sub 1)-012 airfoil
[NASA-TP-1845] p0392 N81-23410
Flap survey test of a combined surface blowing model: Flow measurements at static flow conditions
[NASA-CR-152124] p0423 N81-24023
Analysis of laminar and turbulent symmetric blunt trailing-edge flows
[AD-A098703] p0439 N81-25046
TRAILING-EDGE FLAPS
Experimental investigations on a harmonically swinging trail edge flap with a space
[DGLR PAPER 80-029] p0055 A81-13925
Aerodynamic sound generated by a slotted trailing edge
p0066 A81-15790
The determination of the induced drag on slim wings with high lift systems in the transonic region
[MBB-FE122] p0121 A81-19400
Evaluation of the influence of local disturbances of flow past trailing and leading flaps from wind tunnel data on a rectangular wing section
p0299 A81-29307
Development, production, calculation and testing of a carbon/Kevlar fibre reinforced flap
p0481 A81-40585
Contributions to the theory of side edge flap noise
[AIAA PAPER 81-2036] p0619 A81-48625
Boundary layer measurements on a two-dimensional wing with flap
[NLR-TR-79009-U] p0022 N81-10014
Results of a low-speed wind tunnel test of the MDC 2.2M supersonic cruise aircraft configuration
p0243 N81-17983
Propulsive lateral control nozzle
[NASA-CASE-LAR-12136-1] p0639 N81-33210

Comparison of experimental and computational shock structure in a transonic compressor rotor [ASME PAPER 80-GT-81] p0109 A81-17953
Analysis of the difficulties in high performance compressor data reduction [ONERA, TP NO. 1981-7] p0296 A81-29107
Measurements of aerodynamic damping in the MIT transonic rotor [NASA-CR-163988] p0274 N81-19122
TRANSONIC FLIGHT
Research on transonic wings at the National Aerospace Laboratory, Japan p0011 A81-11680
Qualitative calculations of transonic drag-rise characteristics using the equivalence rule p0058 A81-14393
Transonic axisymmetric bodies with minimal wave drag p0102 A81-17040
The determination of the induced drag on slim wings with high lift systems in the transonic region [MBB-FE122] p0121 A81-19400
Adaptive airfoils and wings for efficient transonic flight p0153 A81-20348
Delta canard configuration at high angle of attack p0154 A81-20351
An evaluation of wind tunnel test techniques for aircraft nozzle afterbody testing at transonic Mach numbers [AD-A091775] p0126 N81-13931
Transonic wing technology for transport aircraft p0188 N81-16002
Design and experimental verification of a transonic wing for a transonic aircraft p0188 N81-16003
Some particular configuration effects on a thin supercritical variable camber wing p0188 N81-16005
TRANSONIC FLOW
Asymmetric flow of subsonic and sonic jets over an infinite wedge p0004 A81-10911
Flow computation around multi-element airfoils in viscous transonic flow p0011 A81-11681
Calculation of plane transonic flows using the integral equation method and shock fitting p0016 A81-11779
An example of the transonic flow past a body with a discontinuity in the contour curvature p0019 A81-1[illegible]
Transonic flow past a wing profile in channels with permeable walls p0054 A81-1[illegible]
A finite-span wing in transonic flow p0054 A81-1[illegible]
Harmonically oscillating airfoil in transonic stream of air p0054 A81-1[illegible]

Study of a variable sweep wing in sub or transonic flow
[ONERA, TP NO. 1978-106] p0058 A81-14391

Design and analysis of slat systems in transonic flow
p0058 A81-14392

A simplified theory of oscillating aerofoils in transonic flow - Review and extension
p0060 A81-14945

Numerical solutions of transonic flows by parametric differentiation and integral equation techniques
p0067 A81-15896

The supercritical profile of the supercritical wing
p0107 A81-17522

Finite difference computation of the steady transonic potential flow around airplanes
p0107 A81-17802

An aerodynamic design method for transonic axial flow compressor stage
p0108 A81-17805

Numerical simulations of a segmented-plenum, perforated, adaptive-wall wind tunnel
[AIAA PAPER 81-0160] p0162 A81-20640

On the derivation of universal indicial functions --- for unsteady transonic flow
[AIAA PAPER 81-0328] p0165 A81-20753

Higher-accuracy finite-difference schemes for transonic airfoil flowfield calculations
[AIAA PAPER 81-0381] p0166 A81-20794

Numerical solution of transonic flow through a cascade with slender profiles
p0170 A81-21197

Analysis of a symmetric transonic aerofoil with the finite element method - A new upwinding technique
p0183 A81-22984

Transonic flow calculations over two-dimensional canard-wing systems
[AIAA PAPER 79-1565] p0183 A81-23367

Transonic flows of a multireacting gas mixture through a Laval nozzle
p0225 A81-23909

A contribution to the computation of transonic supersonic flows over blunt bodies
p0230 A81-24423

Plane transonic solution with shock by direct iteration
p0231 A81-24814

Numerical computation of transonic potential flow through nozzles
p0233 A81-25353

Recent developments in integral equation method in transonic flow
p0234 A81-25384

Some problems of modeling high-speed aerodynamics --- in wind tunnels and tubes
p0237 A81-26118

Transonic maneuver/cruise airfoil design employing active diffusion control
p0239 A81-26511

Evaluation of blade element performance of compressor rotor blade cascades in transonic and low supersonic flow range
p0296 A81-29102

The accuracy of mean-stream-line method in subsonic and transonic regions
p0296 A81-29105

A method for obtaining shockless transonic flows past two-dimensional airfoils whose profiles are partially modified from a given arbitrary profile
p0298 A81-29201

A diagonal form of an implicit approximate-factorization algorithm
p0300 A81-29363

Linear/nonlinear behavior in unsteady transonic aerodynamics
[AIAA 81-0643] p0306 A81-29496

Transonic flutter and gust-response tests and analyses of a wind-tunnel model of a torsion-free-wing fighter airplane
[AIAA 81-0650] p0307 A81-29503

Finite element methods for transonic blade-to-blade calculation in turbomachines
[ASME PAPER 81-GT-5] p0310 A81-29930

Semi-inverse method of computation in inviscid transonic flows - Application to the design of turbomachines blades profiles
[ASME PAPER 81-GT-206] p0318 A81-30096

Subsonic and transonic flow on a wing at different sweep angles. I
p0351 A81-31249

Subsonic and transonic flow on a wing at different sweep angles. II
p0351 A81-31250

Transonic viscous-inviscid interaction over airfoils for separated laminar or turbulent flows
p0354 A81-31612

Oscillating airfoils in shock-free transonic flows
p0410 A81-35026

The influence of surface roughness on boundary layer flow and separation at transonic speeds
p0413 A81-36468

Wing with finite span in a transonic flow
p0420 A81-37480

A PANSONIC Navier-Stokes solver --- for two dimensional flow about arbitrary airfoil sections
[AIAA PAPER 81-1195] p0454 A81-38077

Experimental-programme - Transonic wing-TST
p0457 A81-38804

Transonic swept wings studied by the lifting-line theory
p0509 A81-41090

Transonic wing design using potential-flow codes - Successes and failures
[SAE PAPER 810565] p0518 A81-42730

The calculation of transonic blade tip flow at helicopter rotors
[DGLR PAPER 81-025] p0608 A81-47554

Vortex bursting on slender delta wings in transonic flow and its influence on missile aerodynamic characteristics
[DGLR PAPER 81-047] p0611 A81-47622

Comparison of computational and experimental jet effects
[AIAA PAPER 81-1492] p0626 A81-49979

An investigation of scale effects on the transonic flow over swept wings. Part 2: Measurements on a model of a variable-sweep strike-fighter configuration
[ARC-R/M-3842-PT-2] p0021 N81-10010

A comprehensive evaluation and analysis of transonic flow calculations on three related wing-body configurations
[FFA-TN-AU-1418-PT-1] p0022 N81-10013

A comparison of Newton-like methods for the transonic small disturbance equation
[AD-A090270] p0033 N81-11017

Component-adaptive grid embedding
p0137 N81-14697

An investigation into grid patching techniques
p0137 N81-14708

Transonic wind tunnel tests on an oscillating wing with external store. Part 4: The wing with underwing: Store
[AD-A077370] p0139 N81-14969

Full potential solution of transonic quasi-3-D flow through a cascade using artificial compressability
[NASA-TM-81637] p0140 N81-14980

A method for obtaining shockless transonic flows past airfoils, partially modified from a given arbitrary airfoil
[NAL-TR-602T] p0141 N81-14983

Development of finite-volume methods for three-dimensional transonic flows
[AD-A090829] p0141 N81-14986

Application of transonic potential calculations to aircraft and wind tunnel configurations
p0186 N81-15992

Study of transonic flow fields about aircraft: Application to external stores
p0187 N81-15998

Design of advanced technology transonic airfoils and wings
p0187 N81-16000

Aerodynamic interaction between a close-coupled canard and a sweptback wing in transonic flow
p0189 N81-16013

Some aerodynamic interference effects that influence the transonic performance of combat aircraft
p0189 N81-16014

Supercritical flow past symmetrical airfoils
[AD-A093300] p0203 N81-16984

An approximate factorization solution of the Navier-Stokes equations for transonic flow using body-fitted coordinates with application to NACA

64A010 airfoils
p0249 N81-18024
Aerodynamic effects of nearly uniform slipstreams
on thin wings in the transonic regime
[NASA-CR-152351] p0249 N81-18027
Transonic flow studies
[NASA-CR-163965] p0249 N81-18029
Influence of free-stream Mach number on transonic
shock-wave boundary-layer interaction
[NLR-MP-78013-U] p0256 N81-18325
Predicted and experimental steady and unsteady
transonic flows about a biconvex airfoil
[NASA-TM-81262] p0258 N81-18742
Unsteady transonic small disturbance theory with
strong shock waves
[NASA-CR-166157] p0261 N81-19020
A panel method to determine loads on oscillating
airfoils in transonic flow with embedded shock
waves
[NLR-MP-80005-U] p0330 N81-20039
Technical evaluation report on the Fluid Dynamic
Panel Symposium on Subsonic/Transonic
Configuration/Aerodynamics
[AGARD-AR-146] p0392 N81-23431
Civil component program Wing Section. New
calculation methods for subsonic and transonic
interference with planar and spatial flows
[BMFT-FB-W-80-022] p0424 N81-24034
Preliminary calibration of the transonic test
section of the NIAST trisonic tunnel
[NIAST-80/19] p0435 N81-24116
Turbulent interactions on airfoils at transonic
speeds: Recent developments
p0483 N81-26047
Some applications of aerodynamic formulations to
problems in aircraft dynamics
p0592 N81-31121
Three-dimensional transonic flow analysis
[AD-A101944] p0593 N81-31153
On the spanwise uniformity of wind tunnel test
data of transonic airfoils
[NAL-TR-665] p0627 N81-32118
TRANSONIC FLUTTER
Prediction of transonic flutter for a
supercritical wing by modified strip analysis
and comparison with experiment
[AIAA 81-0609] p0304 A81-29471
A wind-tunnel study of the flutter characteristics
of a supercritical wing
p0308 A81-29504
Transonic flutter study of a wind-tunnel model of
an arrow-wing supersonic transport
[AIAA 81-0654] p0308 A81-29506
Transonic dip mechanism of flutter of a sweptback
wing. II
p0559 A81-44447
Numerical study of transonic flutter of a two
dimensional airfoil

Plasma arc improves PM process - Tungsten free Ti powder
p0227 A81-24045
TUNNEL RESISTORS
U RESISTORS
TURBINE BLADES
Turbine airfoil coating refurbishment
[AIME PAPER F79-10] p0059 A81-14770
Aerodamping of turbine blade vibrations under conditions of flow separation by an inhomogeneous stream
p0060 A81-14959
Variational principles and generalized variational principles for the hybrid aerodynamic problem of airfoil cascades on an arbitrary stream sheet of revolution
p0107 A81-17741
Turbine blade technology - Present and future
[ASME PAPER 80-C2/AERO-10] p0116 A81-18639
Features improved cooling - Turbine blade redesign boosts life
p0227 A81-24046
Heat transfer from a row of impinging jets to concave cylindrical surfaces
p0231 A81-24924
Determination of the thickness of blades of open wheels of radial-axial turbines
p0242 A81-26994
Aerodynamic study of flat turbine cascades with additional blades in blade passages
p0281 A81-27373
Aerodynamic blade excitation in turbocompressors
p0282 A81-27612

Increased fatigue resistance for blades of stationary gas-turbine engines by ultrasonic hardening with spherical particles
p0285 A81-28134

The possibilities of improving the efficiency of gas turbines
p0288 A81-28614

Discrete hole film cooling of turbine blades
p0293 A81-29073

Turbine blade cooling research at the von Karman Institute for Fluid Dynamics
p0293 A81-29076

High temperature metal matrix composites for gas turbines
p0295 A81-29090

Transpiration air cooled turbine blade - A technology for future generation aircraft and industrial gas turbine engines using coal or coal derived fuels
p0297 A81-29115

Turbine blade construction of multistage axial-flow compressors
p0309 A81-29850

Finite element methods for transonic blade-to-blade calculation in turbomachines
[ASME PAPER 81-GT-5] p0310 A81-29930

Sensitivity of turbine blade temperatures to tolerances of design variables
[ASME PAPER 81-GT-90] p0314 A81-29997

The present role of high speed cascade testing
[ASME PAPER 81-GT-95] p0314 A81-30002

Effect of temperature dependent mechanical properties on thermal stress in cooled turbine blades
[ASME PAPER 81-GT-105] p0315 A81-30010

Flow transition phenomena and heat transfer over the pressure surfaces of gas turbine blades
[ASME PAPER 81-GT-107] p0315 A81-30012

Fabrication of injection molded sintered alpha SiC turbine components
[ASME PAPER 81-GT-161] p0317 A81-30060

A time marching finite volume method for blade-to-blade flows using a body-fitted curvilinear mesh
p0347 A81-30717

Experimental determination of the stress intensity factor for cracks with a curvilinear front in complex parts /gas turbine blades/
p0351 A81-31264

Mechanical properties of aluminum coatings on heat-resistant steels
p0355 A81-31668

Inspection of turbine blades using computer aided laser technology
[SAE PAPER 801173] p0400 A81-34187

A periodic problem in viscoelasticity with variable coefficients
p0419 A81-37143

Computer calculation of the characteristics of a hybrid system for the cooling of gas turbine blades
p0459 A81-39217

Experimental determination of the circumferential drift of edge wakes of guide vanes in a turbine stage
p0466 A81-40022

Processing for an improved impact resistant composite blade --- for turbofan aircraft engines
[AIAA PAPER 81-1356] p0501 A81-40838

Comparative efficiency of penetrating steam and air cooling of gas turbine blades
p0509 A81-41003

An experimental study of heat transfer on turbine rotor blades
p0509 A81-41033

The effect of various factors on the vibration characteristics of composite blades of gas turbine engines
p0524 A81-42793

Projected power and specific fuel consumption development of the Rolls Royce Gem engine
p0575 A81-46637

Stability and flutter analysis of turbine blades at low speed
p0612 A81-47959

A process for protecting gas turbine blade cooling passages against degradation
p0622 A81-49209

Surface pyrometry in presence of radiation from other sources with application to turbine blade temperature measurement
[NASA-TP-1754] p0036 N81-11039

Performance of a steel spar wind turbine blade on the Mod-0 100 kW experimental wind turbine
[NASA-TM-81588] p0043 N81-11448

Definitive generic study for the effect of high lift airfoils on wind turbine effectiveness, executive summary
[SERI/TR-98003-2] p0043 N81-11492

Low-cost directionally-solidified turbine blades, volume 2 --- TFE731-3 turbofan engine
[NASA-CR-159562] p0078 N81-12088

Optimized pitch controller for load alleviation on wind turbines
[FFA-TN-HU-2189-PT-1] p0087 N81-12634

Application of model laws when determining the heat transfer coefficients by experiments on cooled turbine blades
p0089 N81-12998

Performance evaluation of a prototype noninterference technique for measurement of turbine engines compressor blade stress
[AD-A090566] p0094 N81-13061

Mean rotor wake characteristics of an aerodynamically loaded 0.5 m diameter fan
[NASA-TM-81657] p0195 N81-16053

JT8D-15/17 high pressure turbine root discharged blade performance improvement --- engine design
[NASA-CR-165220] p0214 N81-17080

The Shock and Vibration Digest, volume 12, number 11
[AD-A092384] p0257 N81-18403

Vibrations of turbine engine blades by shell analysis
p0257 N81-18404

Coupling of unsteady lift to acoustic duct modes in an axial flow fan
[AD-A095080] p0274 N81-19124

Design of turbine cascades with transitional profile boundary layers
p0278 N81-19456

Thermal and flow analysis of a convection air-cooled ceramic coated porous metal concept for turbine vanes
[NASA-TM-81749] p0376 N81-22056

Internal coating of air-cooled gas turbine blades
[NASA-CR-165337] p0429 N81-24068

Experimental verification of turboblading aeromechanics
.p0432 N81-24092

Fabrication process development of boron/aluminum fan blades for high bypass engines
[NASA-CR-165252] p0442 N81-25076

Blade loss transient dynamics analysis, volume 1. Task 1: Survey and perspective --- aircraft gas turbine engines
[NASA-CR-165373-VOL-1] p0496 N81-27089

Blade loss transient dynamics analysis, volume 2. Task 2: Theoretical and analytical development. Task 3: Experimental verification
[NASA-CR-165373-VOL-2] p0496 N81-27090

Blade loss transient dynamics analysis. Volume 3: User's manual for TETRA program
[NASA-CR-165373-VOL-3] p0496 N81-27091

Wingtip vortex turbine
[NASA-CASE-LAR-12544-1] p0496 N81-27096

Turbojet engine blade damping
[NASA-CR-165406] p0549 N81-29130

Development and design of a large wind-turbine blade --- fiber reinforced composites
[MBB-UD-301/80-OE] p0586 N81-30198

Automated Plasma Spray (APS) process feasibility study
[NASA-CR-165418] p0597 N81-31193

U TURBOCOMPRESSORS

TURBOCOMPRESSORS
Discrete frequency noise due to irregularity in blade row of axial fan rotor
p0002 A81-10633
Reduction of energy consumption in the vibrational shot peening of axial compressor vanes
p0005 A81-11321
Impact damage of aircraft gas turbine engines with axial compressors
p0005 A81-11324
Effect of surface roughness over the blade in compressor cascade
p0060 A81-14924
Test results from an analytically designed axial compressor stage of 1.65:1 pressure ratio
[SAE PAPER 800629] p0063 A81-15344
An aerodynamic design method for transonic axial flow compressor stage
p0108 A81-17805
A preliminary experimental investigation of the response of a turbojet engine to inlet pressure distortion
p0108 A81-17824
An experimental investigation of the rotating stall, surge, and wake behind the rotor for a single stage axial compressor
p0109 A81-17826
Inlet flow distortion in turbomachinery
[ASME PAPER 80-GT-20] p0109 A81-17952
Comparison of experimental and computational shock structure in a transonic compressor rotor
[ASME PAPER 80-GT-81] p0109 A81-17953
Structure and decay characteristics of turbulence in the near- and far-wake of a moderately loaded compressor rotor-blade
[ASME PAPER 80-GT-95] p0109 A81-17954
Dynamic pressure response with stall on axial flow compressor rotor blades
[AIAA PAPER 81-0069] p0159 A81-20578
Turbo-compressors surge and surge control
[AIAA PAPER 81-0070] p0159 A81-20579
Evaluation of compressor blade endurance limits by an accelerated method
p0177 A81-22182
The digital simulation of stability for multi-stage axial compressor
p0225 A81-23856
Aerodynamic blade excitation in turbocompressors
p0282 A81-27612
A digital technique for the analysis of the response of compressor/duct systems in unsteady flow
p0294 A81-29078
On the solution of Navier Stokes equations of the flow in turbomachines
p0296 A81-29099
The axial velocity density ratio and the axial velocity density distribution in axial flow compressors and cascades
p0296 A81-29101
Analysis of the difficulties in high performance compressor data reduction
[ONERA, TP NO. 1981-7] p0296 A81-29107
Effects of solid particles suspended in fluid flow through an axial flow compressor stage
p0297 A81-29108
Model for axial compressors operating with water ingestion
p0297 A81-29111
Gas turbine engineering: Applications, cycles and characteristics --- Book
p0309 A81-29680
Turbine blade construction of multistage axial-flow compressors
p0309 A81-29850
Stalling pressure rise capability of axial flow compressor stages
[ASME PAPER 81-GT-3] p0310 A81-29928
The effect of impeller tip design on the performance of a mixed flow turbocharger compressor
[ASME PAPER 81-GT-7] p0310 A81-29932
A simple model for compressor stall cell propagation
[ASME PAPER 81-GT-73] p0313 A81-29982
Inverse or design calculations for non-potential flow in turbomachinery blade passages
[ASME PAPER 81-GT-78] p0314 A81-29986
The present role of high speed cascade testing
[ASME PAPER 81-GT-95] p0314 A81-30002
New features in the design of axial-flow compressors with tandem blades
[ASME PAPER 81-GT-113] p0315 A81-30017
A model for dynamic loss response in axial-flow compressors
[ASME PAPER 81-GT-154] p0317 A81-30053
The influence of blade number ratio and blade row spacing on axial-flow compressor stator blade dynamic load and stage sound pressure level
[ASME PAPER 81-GT-165] p0317 A81-30064
Supersonic stall flutter of high-speed fans
[ASME PAPER 81-GT-184] p0317 A81-30078
Study of the secondary flow in the downstream of a moving blade row in an axial flow fan
p0355 A81-31767
Estimated service life of gas turbine engine compressor blades
p0417 A81-36680
New technologies for compressors of aviation engines
p0452 A81-37656
Prevention of corrosion and fatigue failure of helicopter gas turbine compressors
p0469 A81-40107
Performance analysis of a family of planar pulse generators
[AIAA PAPER 81-1590] p0507 A81-40965
Change of static pressure on the rotating blades of an axial-flow compressor during surging
p0509 A81-41039
Efficiency of cantilever compressor stator blades
p0509 A81-41041
Axial flow compressors. Citations from the Engineering Index data base
[PB80-808611] p0029 N81-10076
Axial flow compressors. Citations from the NTIS data base
[PB80-808603] p0031 N81-10441
Advanced industrial gas turbine techology readiness demonstration
[DOE/OR-05035/T1] p0085 N81-12426
Force and moment coefficients for high deflection cascades
[CUED/A-TURBO/TR-98] p0090 N81-13021
Gerry casing treatment
[CUED/A-TURBO/TR-101] p0093 N81-13059
Supersonic stall flutter of high speed fans --- in turbofan engines
[NASA-TM-81613] p0140 N81-14970
Aerodynamic stability analysis of NASA J85-13/planar pressure pulse generator installation
[NASA-CR-165141] p0143 N81-15004
TF34 engine compression system computer study --- simulation of flow stability
[NASA-CR-159889] p0143 N81-15005
Compressor configuration and design optimization for the high reliability gas turbine
[DOE/ET-15332/T1] p0145 N81-15414
Core compressor exit stage study. Volume 2: Data and performance report for the baseline configuration
[NASA-CR-159498] p0195 N81-16051
Compressor blade monitoring system for a VA1310 (Allis Chalmers) Wind Tunnel Compressor
[AD-A092920] p0217 N81-17103
On the influence of steady state temperature and pressure distortion on the flow characteristics in an installed multistage jet engine compressor

--- heated intake air
[PNR-90022] p0275 N81-19126
Nastran level 16 theoretical manual updates for aeroelastic analysis of bladed discs
[NASA-CR-159823] p0279 N81-19480
NASTRAN level 16 demonstration manual updates for aeroelastic analysis of bladed discs
[NASA-CR-159826] p0279 N81-19483
Some effects of compressor fouling on the behavior of a turbojet engine --- as evidenced by an engine monitoring system
p0328 N81-20015
The mechanical testing of compressors and turbines for aircraft gas turbine engines
p0433 N81-24100
Development tests of an engine with limited life --- Microturbo TRI 60
p0433 N81-24103
High temperature strain gage system for application to turbine engine components
[AD-A101713] p0583 N81-30132
Determination of aerodynamically adequate fillet geometry in turbocompressor blade rows
[AD-A102170] p0600 N81-31219
Prevention of corrosion and fatigue failure of helicopter gas turbine compressors

Analysis of Mach number 0.8 turboprop slipstream wing/nacelle interactions
[NASA-CR-166214] p0579 N81-
Design and analysis of a fuel-efficient single-engine, turboprop-powered, business airplane

[NASA-CR-165768] p0596 N81-31184

TURBOPROP ENGINES
NT T-56 ENGINE
Turbopropeller engine PZL-10S
p0103 A81-17324
Engine maintenance cost calculation method
[ASME PAPER 81-GT-34] p0312 A81-29948
The role of flight research vehicles in prop-fan technology development
[ASME PAPER 81-GT-216] p0318 A81-30104
Design considerations for future turboprop transports
[SAWE PAPER 1340] p0352 A81-31380
The NASA high-speed turboprop program
[SAE PAPER 801120] p0396 A81-34156
The GTCP331 Auxiliary Power Unit for the next generation commercial transports
[SAE PAPER 801147] p0398 A81-34176
Commuter turboprop propulsion technology
[SAE PAPER 801243] p0406 A81-34239
Optimization of aircraft propulsion
p0464 A81-39697
Investigation and improvement of an elbow-type gas outlet of a turboprop engine
p0509 A81-41048
Factors influencing the predicted performance of advanced propeller designs
[AIAA PAPER 81-1564] p0516 A81-42210
Low and high speed propellers for general aviation - Performance potential and recent wind tunnel test results
p0521 A81-42758
Electronic control system for a modern turboprop engine
[SAE PAPER 810620] p0523 A81-42775
Propulsion system installation design for high-speed prop-fans
[AIAA PAPER 81-1649] p0526 A81-43144
Wright Field turboprop study
[AIAA PAPER 81-1685] p0526 A81-43157
The PW100 commuter powerplant
[AIAA PAPER 81-1731] p0528 A81-43170
Turboprop engine propulsion for the 1990's
[AIAA PAPER 81-1648] p0533 A81-43935
The new generation of turboshaft and turboprop engines
p0560 A81-44473
Maritime patrol aircraft engine study. General Electric derivative engines. Volume 2: Appendix A. Performance data - GE27/T3 study a1 turboprop
[AD-A089336] p0028 N81-10068
Maritime patrol aircraft engine study. General Electric derivative engines. Volume 3: Appendix B. Performance data - TF34/T7 study A1 turboprop
[AD-A089279] p0028 N81-10069
Jet wing interference for an overwing engine configuration
p0186 N81-16008
Turboprop Cargo Aircraft Systems study, phase 1
[NASA-CR-159355] p0193 N81-16041
Rig investigation of a two stage single shaft low cost turbine
p0432 N81-24099
Noise abatement technology options for conventional turboprop airplanes
[AD-A101828] p0589 N81-30910
Design and analysis of a fuel-efficient single-engine, turboprop-powered, business airplane
[NASA-CR-165768] p0596 N81-31184

TURBOPUMPS
U TURBINE PUMPS

TURBOROTORS
U TURBINE WHEELS

TURBOSHAFTS
The impact of contingency ratings on advanced turboshaft engine design
p0108 A81-17502
Issues regarding Army turboshaft engines diagnostics and condition monitoring
p0105 A81-17514
Engine maintenance cost calculation method
[ASME PAPER 81-GT-34] p0312 A81-29948
T700 engine integral inlet separator - All weather operational protection
p0469 A81-40108
A new approach to turboshaft engine growth
[AHS 80-41] p0477 A81-40169
The new generation of turboshaft and turboprop engines
p0560 A81-44473
Multi-plane high speed balancing techniques and the use of a high specific stiffness Ti-Borsic material for vibration control
[AD-A093122] p0215 N81-17092

TURBULENCE
NT ATMOSPHERIC TURBULENCE
NT CLEAR AIR TURBULENCE
NT GUSTS
NT LOW LEVEL TURBULENCE
NT LOW TURBULENCE
Effects of axisymmetric contractions on turbulence of various scales
p0093 N81-13055
Time dependent Navier-Stokes solution of a turbulent gas jet ejected from a rectangular orifice into a high-subsonic crossflow
p0138 N81-14964
Application of linear quadratic control in reduction of aerodynamic forces on aircraft
p0332 N81-20061
Fountain-jet turbulence
[AD-A098098] p0423 N81-24028
An experimental investigation of a large delta P settling chamber for a supersonic pilot quiet tunnel
[NASA-CR-3436] p0434 N81-24112
Evaluation of turbulence reduction devices for the Langley 8-foot Transonic Pressure Tunnel
[NASA-TM-81792] p0434 N81-24118
Energy efficient engine, low-pressure turbine boundary layer program
[NASA-CR-165338] p0442 N81-25077

TURBULENCE EFFECTS
Wind shear effects on aircraft - Low-level shear and clear-air turbulence as accident causes
p0067 A81-16136
Analysis of the influence of atmospheric turbulence on alternating bending stress level in helicopter main rotor blades
p0236 A81-25690
Qualitative comparison of calculated turbulence responses with wind-tunnel measurements for a DC-10 derivative wing with an active control system
[AIAA 81-0567] p0306 A81-29494
Factors which influence the behavior of turbofan forced mixer nozzles
[AIAA PAPER 81-0274] p0359 A81-32549
The influence of the airspeed on jet turbulence and the consequences for the jet noise
[DGLR PAPER 81-021] p0609 A81-47595
Qualitative comparison of calculated turbulence responses with wind-tunnel measurements for a DC-10 derivative wing with an active control system
[NASA-TM-83144] p0491 N81-26096

TURBULENCE METERS
Acoustic and turbulence measurements of a tone-excited jet with and without flight simulation
[AIAA PAPER 81-2007] p0621 A81-48640
Considerations for the installation of honeycomb and screens to reduce wind-tunnel turbulence
[NASA-TM-81868] p0550 N81-29137

TURBULENT BOUNDARY LAYER
An experimental investigation of the interaction between a glancing shock wave and a turbulent boundary layer
p0012 A81-11609
Influence of free-stream turbulence intensity on heat transfer in the two-dimensional turbulent boundary layer of an accelerated compressible flow
p0110 A81-17990
The influence of flow disturbances on the laminar-turbulent transition in a supersonic boundary layer
p0124 A81-19863
Scale effects on turbulent boundary layer development and flow separation around V/STOL inlets at high incidence
[AIAA PAPER 81-0014] p0157 A81-20538
Numerical simulations of a segmented-plenum, perforated, adaptive-wall wind tunnel
[AIAA PAPER 81-0160] p0162 A81-20600

Three-dimensional turbulent boundary layer development and separation in V/STOL engine inlets at incidence with small-cross flow and curvature influences
[AIAA PAPER 81-0254] p0163 A81-20703

Three-dimensional wing boundary layer calculated with eight different methods
p0171 A81-21555

Fundamental studies on the control of turbulent boundary layers. I Theoretical and experimental analyses of velocity profiles and parameters with and without adverse pressure gradient, with uniform suction through a porous flat plate
p0228 A81-24079

An experimental investigation of separating flow on a convex surface
p0230 A81-24488

Electromagnetic precipitation and ducting of particles in turbulent boundary layers
p0239 A81-26506

Large-eddy breakup scheme for turbulent viscous drag reduction
p0239 A81-26507

Modification in drag of turbulent boundary layers resulting from manipulation of large-scale structures
p0239 A81-26508

Hybrid suction surface for turbulent boundary layer flow
p0240 A81-26513

Compliant surfaces - Introduction
p0240 A81-26515

Analysis of turbulent boundary layer on cascade and rotor blades of turbomachinery
p0296 A81-29106

The displacement-thickness theory of trailing edge noise
p0348 A81-30785

Role of laminar separation bubbles in airfoil leading-edge stalls
p0354 A81-31613

A survey of heating and turbulent boundary layer characteristics of several hypersonic research aircraft configurations
[AIAA PAPER 81-1145] p0459 A81-39134

Pressure fluctuations on the surface of a small passenger aircraft. II - The effect of the turbulent boundary layer
p0562 A81-44618

Supercritical airfoil technology program wake experiments and modeling for fore and aft loaded compressor cascades
[AD-A091378] p0091 N81-13034

Review of theoretical and experimental results on three dimensional turbulent wakes and boundary layers
[ONERA-NT-1980-4] p0126 N81-13930

Mean-flow and turbulence measurements in the vicinity of the trailing edge of an NACA (63 sub 1)-012 airfoil
[NASA-TP-1845] p0392 N81-23410

Turbulent interactions on airfoils at transonic speeds: Recent developments
p0483 N81-26047

Modification in drag of turbulent boundary layers resulting from manipulation of large-scale structures
[NASA-CR-3444] p0587 N81-30392

TURBULENT FLOW
NT CAVITATION FLOW
NT SUPERCAVITATING FLOW

Aerodynamic sound generated by a slotted trailing edge
p0066 A81-15798

Instantaneous velocity measurements in a periodically pulsed plane turbulent jet
p0066 A81-15895

Dialogue on bridging some gaps in stability and transition research --- in external, internal and free-shear layer through-flow systems
p0115 A81-18105

Plane vortex gas flows --- emphasizing supersonic case
p0123 A81-19634

Numerical investigation of a model of turbulent combustion of hydrocarbons
[AIAA PAPER 81-0039] p0158 A81-20559

The numerical solution of incompressible turbulent flow over airfoils
[AIAA PAPER 81-0047] p0158 A81-20563

Measurements of flow quality in the Ames 2 x 2ft transonic wind tunnel
[AIAA PAPER 81-0156] p0161 A81-20636

Numerical study of a scramjet engine flow field
[AIAA PAPER 81-0186] p0162 A81-20659

Eddy viscosity in accelerated and retarded cascade-wake flows
p0233 A81-25267

Miniature pressure probe for measuring the surface-shear-stress vector in turbulent flow
p0233 A81-25354

Some problems of modeling high-speed aerodynamics --- in wind tunnels and tubes
p0237 A81-26118

Drag characteristics of V-groove and transverse curvature riblets
p0239 A81-26510

Effects of Coriolis on the turbulent field inside centrifugal impellers
p0297 A81-29110

Transonic viscous-inviscid interaction over airfoils for separated laminar or turbulent flows
p0354 A81-31612

Analysis of total and static pressure fluctuations in an air intake at high incidence
[AAAF PAPER NT 80-61] p0370 A81-33950

Some applications of the turbulence amplifier to airborne systems
p0514 A81-42173

Turbulence modeling for application to V/STOL propulsion induced effects: Two dimensional formulation
[AD-A090331] p0072 N81-12026

Effects of axisymmetric contractions on turbulence of various scales
p0093 N81-13055

Effects of downstream distance on turbulence decay for the compressor research facility low conditioning system
[AD-A091543] p0133 N81-14276

Time dependent Navier-Stokes solution of a turbulent gas jet ejected from a rectangular orifice into a high-subsonic crossflow
p0138 N81-14964

Three-dimensional internal flows in turbomachinery, volume 2
[AD-A093130] p0215 N81-17090

La Recherche Aerospatiale, Bimonthly Bulletin no. 1980-2, March - April 1980
[ESA-TT-652] p0255 N81-182

Physical and numerical aspects of shock boundary layer interactions
p0256 N81-1832

Comments on settling chamber design for quiet, blowdown wind tunnels
[NASA-TM-81948] p0335 N81-200

Analysis of turbulent flow about an isolated airfoil using a time dependent Navier-Stokes procedure
p0385 N81-23053

Multiple-scale turbulence modeling of boundary layer flows for scramjet applications
[NASA-CR-3433] p0392 N81-238

Fountain-jet turbulence
[AD-A058098] p0423 N81-24

Analysis of laminar and turbulent symmetric blunt trailing-edge flows
[AD-A098703] p0439 N81-25

TURBULENT HEAT TRANSFER

Influence of free-stream turbulence intensity on heat transfer in the two-dimensional turbulent boundary layer of an accelerated compressible flow
p0110 A81-17

TURBULENT JETS

Non-isoenergetic turbulent jet mixing in a constant area duct --- in turbofan engines
[AIAA PAPER 81-0347] p0165 A81-20

A computer simulation of turbulent jet flow
p0230 A81-24

Partially confined multiple jet mixing
p0234 A81-255

Experimental investigation of oscillating subsonic jets
p0360 A81-32

Prediction of swirling reacting flow in ramjet combustors
[AIAA PAPER 81-1485] p0506 A81-

An acoustic source modelling technique to predict
the near sound field of axisymmetric turbulent
jets
[AIAA PAPER 81-2022] p0618 A81-48606
The role of the helical jet mode in aerodynamic
noise generation
[AIAA PAPER 81-1963] p0618 A81-48607
Application of optical methods to the study of jet
noise and turbulence
[ISL-CO-201/80] p0147 N81-15019
TURBULENT MIXING
Numerical simulation of gross structure of
turbulent plane mixing layer by discrete-vortex
model
p0228 A81-24078
Scramjet combustor wall boundary layer analysis
[AIAA PAPER 81-1434] p0504 A81-40871
Multiple-scale turbulence modeling of boundary
layer flows for scramjet applications
[NASA-CR-3433] p0392 N81-23411
TURBULENT WAKES
NT PROPELLER SLIPSTREAMS
NT SLIPSTREAMS
An experimental investigation of the rotating
stall, surge, and wake behind the rotor for a
single stage axial compressor
p0109 A81-17026
Structure and decay characteristics of turbulence
in the near- and far-wake of a moderately loaded
compressor rotor-blade
[ASME PAPER 80-GT-95] p0109 A81-17954
Effects of design variables on spoiler control
effectiveness, hinge moments, and wake turbulence
[AIAA PAPER 81-0072] p0159 A81-20581
Eddy viscosity in accelerated and retarded
cascade-wake flows
p0233 A81-25267
A numerical study of vortex shedding from one and
two circular cylinders
p0233 A81-25355
Supercritical airfoil technology program wake
experiments and modeling for fore and aft loaded
compressor cascades
[AD-A091378] p0091 N81-13034
Review of theoretical and experimental results on
three dimensional turbulent wakes and boundary
layers
[ONERA-NT-1980-4] p0126 N81-13930
The velocity induced by the wake of a wind turbine
in a shear layer, including ground effect
[FFA-TN-HU-2189-PT-3] p0141 N81-14985
Unsteady wakes downstream from a profile
oscillating in incidence --- aerodynamic flow
tests on helicopter rotor blade profiles
[AAAF-NT-80-10] p0204 N81-16989
The propeller tip vortex. A possible contributor
to aircraft cabin noise
[NASA-TM-81768] p0380 N81-22838
Rotor wake characteristics relevant to
rotor-stator interaction noise generation
[NASA-TM-82703] p0583 N81-30130
TURING MACHINES
The use of finite-state machines for describing
and validating flight control systems
p0322 A81-30265
TURNING FLIGHT
The problem of the minimum-time turn of a
maneuverable aircraft velocity vector to a
specified course angle
p0413 A81-36472
Time-constrained maximum-energy turns --- for
modern fighter aircraft
[AIAA PAPER 81-1886] p0561 A81-44578
Time-constrained maximum-energy turns
[AD-A094733] p0273 N81-19107
TURRET
Flow control for an airborne laser turret
[AIAA PAPER 81-1637] p0525 A81-43127
TVC (CONTROL)
U THRUST VECTOR CONTROL
TWISTED WINGS
How to improve the performance of transport
aircraft by variation of wing aspect-ratio and
twist /12th Daniel and Florence Guggenheim
International Memorial Lecture/
p0006 A81-11602
Analysis and application of compliant rotor
technology
p0467 A81-40086
The influence of leading-edge thrust on twisted
and cambered wing design for supersonic cruise
[AIAA PAPER 81-1656] p0526 A81-43144
The aerodynamic influences of rotor blade
airfoils, twist, taper and solidity on hover and
forward flight performance
p0572 A81-46607
Basic research in wake vortex alleviation using a
variable twist wing
p0267 N81-19854
TWISTING
Wind tunnel evaluation of aeroelastically
conformable rotors
[AHS 80-23] p0475 A81-40153
Choice of the optimal angular velocity of the
twist of a flight vehicle
p0625 A81-49946
A study of wing body blending for an advanced
supersonic transport
p0244 N81-17987
TWO DIMENSIONAL BODIES
A method for obtaining shockless transonic flows
past two-dimensional airfoils whose profiles are
partially modified from a given arbitrary profile
p0298 A81-29201
The prediction of the bursting of laminar
separation bubbles in the design of two
dimensional high-lift aerofoils
[RAE-TR-80060] p0073 N81-12030
Extended frequency turbofan model
[NASA-CR-165261] p0335 N81-20070
TWO DIMENSIONAL BOUNDARY LAYER
Influence of free-stream turbulence intensity on
heat transfer in the two-dimensional turbulent
boundary layer of an accelerated compressible flow
p0110 A81-17998
Development of a large-scale wind tunnel for the
simulation of turbomachinery airfoil boundary
layers
[ASME PAPER 81-GT-6] p0310 A81-29931
Boundary layer measurements on a two-dimensional
wing with flap
[NLR-TR-79009-U] p0022 N81-10014
TWO DIMENSIONAL FLOW
Calculation of plane transonic flows using the
integral equation method and shock fitting
p0016 A81-11779
Instantaneous velocity measurements in a
periodically pulsed plane turbulent jet
p0066 A81-15885
Plane vortex gas flows --- emphasizing supersonic
case
p0123 A81-19634
Numerical study of a scramjet engine flow field
[AIAA PAPER 81-0186] p0162 A81-20659
Transonic flow calculations over two-dimensional
canard-wing systems
[AIAA PAPER 79-1565] p0183 A81-23367
Numerical study on viscous shear flow past a
circular cylinder
p0228 A81-24077
Subsonic cascade flow analysis by a finite element
method
p0233 A81-25311
Numerical computation of compressible steady
cascade flows
p0296 A81-29100
The axial velocity density ratio and the axial
velocity density distribution in axial flow
compressors and cascades
p0296 A81-29101
The accuracy of mean-stream-line method in
subsonic and transonic regions
p0296 A81-29105
Flow separation in inlets at incidence angles
p0297 A81-29114
A diagonal form of an implicit
approximate-factorization algorithm
p0300 A81-29363
Streamwise flow and heat transfer distributions
for jet array impingement with crossflow
[ASME PAPER 81-GT-77] p0310 A81-29985
Adaptive-wall wind-tunnel development for
transonic testing
p0332 A81-31367
Measurement of derivatives for an oscillating
airfoil with flap
p0411 A81-35685

Modeling of 2D-nozzle plume for IR signature prediction under static conditions
[AIAA PAPER 81-1108] p0459 A81-39107

Analysis of steady, two-dimensional, chemically reacting nonequilibrium flow by an unsteady, asymptotically consistent technique --- for performance prediction of ramjet propulsion system
[AIAA PAPER 81-1432] p0504 A81-40869

Numerical experiments on unsteady flows through vibrating cascades
p0613 A81-47961

Analytical characteristics methods: Applications
[VKI-PREPRINT-1980-10] p0021 N81-10011

Turbulence modeling for application to V/STOL propulsion induced effects: Two dimensional formulation
[AD-A090331] p0072 N81-12026

An analytic model of subsonic flow around an airflow with a spoiler
p0138 N81-14966

An interactive computational aerodynamics analysis program
[AD-A094765] p0263 N81-19033

A design of multi-element aerofoils for high lift
[NAL-TR-631] p0337 N81-21012

Model and boundary aerodynamic data from high blockage two-dimensional airfoil tests in a shallow unstreamlined transonic flexible walled test section --- transonic self-streamlining wind tunnel
[NASA-CR-165685] p0343 N81-21087

TWO FLUID MODELS

A comparison of two droplet models for gas-turbine combustion chamber flows
p0294 A81-29086

TWO PHASE FLOW

Particle dynamics of inlet flow fields with swirling vanes
[AIAA PAPER 81-0001] p0156 A81-20526

Three-dimensional model of spray combustion in gas turbine combustors
[AIAA PAPER 81-0324] p0165 A81-20751

Effects of solid particles suspended in fluid flow through an axial flow compressor stage
p0297 A81-29108

Particulate flow in centrifugal compressors used in helicopters
p0297 A81-29109

Droplet breakup regimes and criteria for their existence
p0614 A81-48079

TWO STAGE TURBINES

Turbine blade construction of multistage axial-flow compressors
p0309 A81-29850

A nonlinear, discrete-vortex-perturbation method for unsteady lifting-surface problems with edge separations
p0058 A81-1

Testing stand for the measurement of nonsteady aerodynamic forces in the transonic wind tunnel at Goettingen
p0065 A81-15703
Instantaneous velocity measurements in a periodically pulsed plane turbulent jet
p0066 A81-15895
On the derivation of universal indicial functions --- for unsteady transonic flow
[AIAA PAPER 81-0328] p0165 A81-20753
A computerized study of wave characteristics in a time dependent compressible flow
[AIAA PAPER 81-0410] p0169 A81-20838
A discrete vortex method for the non-steady separated flow over an airfoil
p0179 A81-22568
Unsteady subsonic motion of a wing near a screen
p0225 A81-23889
On the unsteady wake-induced lift on a slotted airfoil. II - The influence of displacement thickness fluctuations
p0229 A81-24237
Computer simulation of unsteady flow past lifting rotors of coaxial configuration
p0230 A81-24389
The problem of the unsteady hypersonic flow past a plane profile
p0231 A81-24730
Transient three-dimensional flow along a porous plate
p0231 A81-24815
Unsteady Newton-Busemann flow theory. I - Airfoils
p0234 A81-25512
A mathematical computer simulation of stationary and nonstationary flow of an ideal incompressible fluid around solid profiles and arrays
p0237 A81-26045
A digital technique for the analysis of the response of compressor/duct systems in unsteady flow
p0294 A81-29078
Experimental verification of unsteady aerodynamic models of supersonic unstalled flutter
p0295 A81-29094
Linear/nonlinear behavior in unsteady transonic aerodynamics
[AIAA 81-0643] p0306 A81-29496
On some methods of supersonic unsteady lifting surface analysis
[AIAA 81-0644] p0307 A81-29497
A new frequency parameter for unsteady aerodynamics
[AIAA 81-0649] p0307 A81-29502
Inverse or design calculations for non-potential flow in turbomachinery blade passages
[ASME PAPER 81-GT-78] p0314 A81-29906
Unsteady aerodynamics of an aerofoil at high angle of incidence performing various linear oscillations in a uniform stream
p0357 A81-32017
Comparison of computed and measured unsteady pressure fields on a supercritical wing
[ONERA, TP NO. 1981-12] p0359 A81-32541
An experimental and theoretical investigation of a twin-entry radial flow turbine under non-steady flow conditions
[SAE PAPER 801136] p0397 A81-34167
The challenge of unsteady separating flows
p0411 A81-35647
Accuracy and application of a second-order theory for three-dimensional supersonic and low hypersonic unsteady flows around a thin wing
p0419 A81-37335
Application of unsteady airfoil theory to rotary wings
p0465 A81-39874
Performance analysis of a family of planar pulse generators
[AIAA PAPER 81-1590] p0507 A81-40965
Flow control for an airborne laser turret
[AIAA PAPER 81-1637] p0525 A81-43137
Numerical experiments on unsteady flows through vibrating cascades
p0613 A81-47961
On the numerical analysis of stall flutter in turbine cascade
p0613 A81-47963
Comparison of Unsteady Pressure Fields Computed and Measured on the ZKP model
[AGARD-R-688] p0033 N81-11018
Reverse flow, pre-rotation and unsteady inlet flow in centrifugal pumps
[VKI-PREPRINT-1979-15] p0085 N81-12433
Philosophy and results of steady and unsteady test techniques on a large scale transport aircraft model in the ONERA transonic tunnel S1 MA. Part 1: Philosophy and results of steady tests. Part 2: Interest of large models in unsteady aerodynamics
p0190 N81-16019
Unsteady wakes downstream from a profile oscillating in incidence --- aerodynamic flow tests on helicopter rotor blade profiles
[AAAF-NT-80-10] p0204 N81-16989
Transonic flow studies
[NASA-CR-163965] p0248 N81-18029
Predicted and experimental steady and unsteady transonic flows about a biconvex airfoil
[NASA-TM-81262] p0258 N81-18742
Unsteady transonic small disturbance theory with strong shock waves
[NASA-CR-166157] p0261 N81-19020
Unsteady airloads on a harmonically pitching wing with external store
[NLR-MP-80004-U] p0330 N81-20038
Unsteady pressure measurements during stall and buffeting --- wind tunnel tests
[ESA-TT-641] p0339 N81-21041
Semi-actuator disk theory for compressor choke flutter
[NASA-CR-3426] p0442 N81-25075
Overview: NASA/AF/Navy Symposium on Aeroelasticity of Turbine Engines
[NASA-CR-164419] p0444 N81-25089
Pressure distribution computation on a nonlifting symmetrical helicopter blade in forward flight
p0447 N81-26010
Flutter analysis fo two-dimensional and two-degree-of-freedom MBB A-3, CAST 7, an TF-8A supercritical airfoils in small-disturbance unsteady transonic flow
[AD-A100334] p0540 N81-28104
Report of the panel on aeroelasticity and unsteady aerodynamics
p0593 N81-31149

UNSTEADY STATE
The spectral analysis of nonstationary random processes - Applications to aircraft overflight-type noises --- French thesis
p0174 A81-21922

UNSWEPT WINGS

UPPER SURFACE BLOWING
Influence of jet location on the efficiency of spanwise blowing
p0154 A81-20352
Experimental development of an advanced circulation control wing system for Navy STOL aircraft
[AIAA PAPER 81-0151] p0161 A81-20632
Quiet propulsive-lift technology ready for civil and military applications
p0359 A81-32531
Reverse thrust performance of the QCSEE variable pitch turbofan engine
[SAE PAPER 801196] p0402 A81-34206
Comparison of NASA and contractor results from aeroacoustic tests of QCSEE OTW engine
[NASA-TM-81761] p0443 N81-25079
Investigation of the circulation control wing/upper surface blowing high-lift system on a low aspect ratio semispan model
[AD-A103090] p0627 N81-32128
A flight test evaluation of the Ball-Bartoe jetwing propulsive lift concept
[AD-A103579] p0637 N81-33195

UPPER SURFACE BLOWN FLAPS
A computer program to calculate the longitudinal aerodynamic characteristics of upper-surface-blown wing-flap configurations
[NASA-CR-3005] p0071 N81-12014
A theoretical investigation of ground effects on USB configurations
[NASA-CR-159085] p0262 N81-19021

UPWASH
VTOL in ground effect flows for closely spaced jets --- to predict pressure and upwash forces on aircraft structures
[NASA-CR-152321] p0271 N81-19095
Alleviation of helicopter fuselage-induced rotor unsteady loads through deterministic variation of the individual blade pitch
[NASA-CR-166234] p0549 N81-29134
URBAN PLANNING
Community participation in airport planning
p0112 A81-18067
URBAN RESEARCH
Unrepresentative temperatures at a first-order meteorological station Washington National Airport
p0622 A81-48847
Continued research on selected parameters to minimize community annoyance from airplane noise
[NASA-CR-164299] p0438 N81-24602
URBAN TRANSPORTATION
A new perspective in aviation systems planning
p0112 A81-18069
Gas turbine engines and transmissions for bus demonstration programs
[COO-4867-07] p0134 N81-14329
Published results of the program of university research. Transportation research results

An airspeed vector sensor for V/STOL aircraft
[AIAA 80-1938] p0052 A81-1
Determination if fiber-optic immunity is adequate for deployment in the V/STOL airframe --- to compensate nonmetallic material LF transparency
p0057 A81-1
Charting a course for V/STOL
p0068 A81-16
Industry proposes supersonic V/STOL
p0122 A81-19
An analytical solution of lift loss for a round planform with a central lifting jet
[AIAA PAPER 81-0011] p0157 A81-2

Scale effects on turbulent boundary layer development and flow separation around V/STOL inlets at high incidence
[AIAA PAPER 81-0014] p0157 A81-20536
Numerical optimization of circulation control airfoils
[AIAA PAPER 81-0016] p0157 A81-20540
Three-dimensional turbulent boundary layer development and separation in V/STOL engine inlets at incidence with small-cross flow and curvature influences
[AIAA PAPER 81-0254] p0163 A81-20703
Piloting techniques on the backside - Flight path angle control
p0171 A81-21673
The M.45SD-02 variable pitch geared fan engine demonstrator test and evaluation experience
p0283 A81-27897
Supersonic V/STOL prospects brighten
p0288 A81-28589
Aircraft thrust augmentors of ejector type --- Russian book
p0289 A81-28760
Technology pays off on the AV-8B
p0291 A81-29060
V/STOL advanced technolcgy rewards and risk --- aircraft design
[SAWE PAPER 1385] p0354 A81-31401
A design analysis technique for evaluating size and weight of V/STOL lift fans
[SAWE PAPER 1386] p0354 A81-31402
Future challenges in V/STOL flight propulsion control integration
[SAE PAPER 801140] p0397 A81-34170
A comparison of propulsion systems for V/STOL supersonic combat aircraft
[SAE PAPER 801141] p0398 A81-34171
Feasibility of forward-swept wing technology for V/STOL aircraft
[SAE PAPER 801176] p0400 A81-34189
Preliminary aerodynamic characteristics of several advanced VSTOL fighter/attack aircraft concepts
[SAE PAPER 801178] p0400 A81-34191
V/STOL capability by modifying CTOL aircraft
[SAE PAPER 801179] p0400 A81-34192
Evaluation of several control/display concepts for V/STOL shipboard landing
[SAE PAPER 801205] p0403 A81-34213
AV-8B operational features for rapid deployment
[SAE PAPER 801228] p0405 A81-34231
Aerodynamic characteristics of two VSTOL fighter configurations
[AIAA PAPER 81-1292] p0454 A81-38119
V/STOL combat aircraft progress from the powerplant viewpoint
p0469 A81-40105
The requirements for and evolution of a test rig for exhaust gas recirculation studies of V/STOL aircraft
p0469 A81-40106
The development of a twin-turbofan V/STOL aircraft
[AHS 80-8] p0473 A81-40141
V/STOL technology requirements for future fighter aircraft
[AIAA PAPER 81-1360] p0502 A81-40841
Multi-mission V/STOL with vectored thrust engines
[AIAA PAPER 81-1363] p0502 A81-40843
Development of an integrated fault tolerant engine control
[AIAA PAPER 81-1365] p0502 A81-40845
A compact installation for testing vectored-thrust engines
[AIAA PAPER 81-1592] p0508 A81-40967
Zero-length inlets for subsonic V/STOL aircraft
[AIAA PAPER 81-1396] p0515 A81-42186
Advanced technology engine studies /ATES/ - A status report
[AIAA PAPER 81-1502] p0516 A81-42205
ATES activity and status at Detroit Diesel Allison --- Advanced Technology Engine Studies
[AIAA PAPER 81-1504] p0516 A81-42206
Design concepts for minimizing hot-gas ingestion in V/STOL aircraft
[AIAA PAPER 81-1624] p0525 A81-43133
Vertical momentum of the fountain produced by multijet vertical impingement on a flat ground plane
p0529 A81-43396
Lift-enhancing surfaces on several advanced V/STOL fighter/attack aircraft concepts
[AIAA PAPER 81-1675] p0530 A81-43846
Numerical and classical analysis of V/STOL aircraft using selected propulsion systems
[AIAA PAPER 81-1676] p0563 A81-44898
Turbulence modeling for application to V/STOL propulsion induced effects: Two dimensional formulation
[AD-A090331] p0072 N81-12026
Experimental aerodynamic characteristics of two V/STOL fighter/attack aircraft configurations at Mach numbers from 0.4 to 1.4
[NASA-TM-81234] p0140 N81-14981
Propulsion system mathematical model for a lift/cruise fan V/STOL aircraft
[NASA-TM-81663] p0195 N81-16055
Historical overview of V/STOL aircraft technology
[NASA-TM-81280] p0272 N81-19100
Experimental investigations on the V/STOL tunnel at NASA/Langley Research Center
[NASA-CR-165655] p0329 N81-20028
Recent progress in V/STOL aircraft technology
[NASA-TM-81281] p0333 N81-20066
Static tests of the J97 powered, external augmenter V/STOL wind tunnel model
[NASA-CR-152403] p0337 N81-21010
Low-range airspeed sensors
[AD-A096359] p0342 N81-21076
V/STOLAND digital avionics system for XV-15 tilt rotor
[NASA-CR-152320] p0375 N81-22047
Analysis of wind tunnel test results for a 9.39-per cent scale model of a VSTOL fighter/attack aircraft. Volume 1: Study overview --- aerodynamic characteristics
[NASA-CR-152391-VOL-1] p0384 N81-23030
Analysis of wind tunnel test results for a 9.39-per cent scale model of a VSTOL fighter/attack aircraft. Volume 2: Evaluation of prediction methodologies
[NASA-CR-152391-VOL-2] p0384 N81-23031
Analysis of wind tunnel test results for a 9.39-per cent scale model of a VSTOL fighter/attack aircraft. Volume 3: Effects of configuration variations from baseline
[NASA-CR-152391-VOL-3] p0384 N81-23032
Analysis of wind tunnel test results for a 9.39-per cent scale model of a VSTOL fighter/attack aircraft. Volume 4: RALS R104 aerodynamic characteristics and comparisons with R205 configuration aerodynamic characteristics
[NASA-CR-152391-VOL-4] p0384 N81-23033
Method for predicting the jet-induced aerodynamics of V/STOL configurations in transition
[AD-A097356] p0385 N81-23043
Flap survey test of a combined surface blowing model: Flow measurements at static flow conditions
[NASA-CR-152124] p0423 N81-24023
A Jet-diffuser ejector for a V/STOL fighter

Passive control of wing/store flutter
[NASA-TM-81865] p0125 N81-13922
Multi-plane high speed balancing techniques and the use of a high specific stiffness Ti-Borsic material for vibration control
[AD-A093122] p0215 N81-17092
Design for active and passive flutter suppression and gust alleviation
p0253 N81-18063
The development of a theoretical and experimental model for the study of active suppression of wing flutter
p0376 N81-22058
Flight test results of an active flutter suppression system installed on a remotely piloted research vehicle
[NASA-TM-83132] p0486 N81-26118
Final design and fabrication of an active control system for flutter suppression on a supercritical aeroelastic research wing
[NASA-CR-165714] p0498 N81-27114
Wind-tunnel evaluation of NASA developed control laws for flutter suppression on a DC-10 derivative wing
[NASA-TM-83143] p0499 N81-27548
Turbojet engine blade damping
[NASA-CR-165406] p0549 N81-29130
Developement of antiresonance force isolators for helicopter vibration reduction
[MBB-UD-305/80-OE] p0582 N81-30123
Some experiences with active control of aeroelastic response
[NASA-TM-83179] p0587 N81-30469

VIBRATION EFFECTS
Crack propagation in panels of pressurized fuselages upon simultaneous action of cyclic loading by pressurization and high-frequency vibrations
p0054 A81-13612
Review of engine/airframe/drive train dynamic interface development problems
p0106 A81-17516
Engine-airframe transient compatibility - Analysis and test
p0106 A81-17517
Sandwich structures with high transmission loss
p0151 A81-20069
Development of a shadow mask type high-resolution color picture tube for cockpit display
p0183 A81-23095
Analysis of vibration related failures in aero turbo-shaft engines
p0291 A81-29057
Laminar boundary layer on an oscillating wedge
p0309 A81-29864
Inlet distortion and blade vibration in turbomachines
p0421 A81-37631
Investigation of the physical working environment for cabin attendants within Scandinavian Airlines System /SAS/ --- noise conditions and aircraft vibration
p0568 A81-46357
Determination of in-flight helicopter loads
p0573 A81-46618

VIBRATION ISOLATORS
Model tests for an active rotor isolation system
[MBB-278-79-0] p0018 A81-12095
Hingeless tailrotor in fiber composite construction and vibration-isolation systems /ARIS, ASIS/ for helicopters
[MBB-UD-311-80-0] p0119 A81-1930
Floor and fuel vibration isolation systems for the Boeing Vertol commercial Chinook
p0356 A81-3201
Helicopter vibration control - A survey
p0364 A81-3304
Development of antiresonance force isolators for helicopter vibration reduction
p0467 A81-4009
LIVE - Liquid inertia vibration eliminator
[AHS 80-22] p0475 A81-4015
Nonlinear dynamic characteristics of the rotor bifilar absorber
p0574 A81-466
Self-oscillations of a wheel on a self-aligning landing gear strut with a nonlinear damper
A81-46
Procedure for evaluation of engine isolators for reduced structure-borne interior noise transmission
[AIAA PAPER 81-1970] p0618 A81-4
Total main rotor isolation system analysis
[NASA-CR-165666] p0329 N81-20
Total main rotor isolation system analysis
[NASA-CR-165667] p0494 N81-2707
Developement of antiresonance force isolators for helicopter vibration reduction
[MBB-UD-305/80-OE] p0582 N81-301

VIBRATION MEASUREMENT
High frequency angular vibration measurements in vehicles
[AAS PAPER 81-024] p0361 A81-3
Performance evaluation of a prototype noninterference technique for measurement of turbine engines compressor blade stress
[AD-A090566] p0094 N81-13
Vibration test level criteria for aircraft equip
[AD-A098675] p0442 N81-2

VIBRATION MODE
A frequency-domain technique for aeroelastic
estimation p0156 A81-3

Coupled torsional-flexural vibration of a shaft in a geared system of rotors. I
p0229 A81-29090
Coupled bending-torsion vibrations of rotating blades of asymmetric aerofoil cross section with allowance for shear deflection and rotary inertia by use of the Reissner method
p0289 A81-28942
Resonance of forwards and backwards vibration mode of impeller with gyroscopic effect
[AIAA 81-[illegible]24]
p0303 A81-29445
Application of a Fourier analyzer to the analysis of shimmy test data
[AIAA 81-0533]
p0303 A81-29453
Feasibility of a rotor flight-dynamics model with first-order cyclic inflow and multiblade modes
[AIAA 81-0611]
p0304 A81-29473
Inflight aircraft vibration modes and their effect on aircraft radar cross section
p0352 A81-31370
A new method for modal identification
p0365 A81-33293
Concerning one self-similarity property in flutter analysis
p0413 A81-36464
Vibrations in technical equipment. Volume 3 - Oscillations of machines, structures, and their components --- Russian book
p0511 A81-41725
The effect of various factors on the vibration characteristics of composite blades of gas turbine engines
p0524 A81-42793
Damage recognition and localization by means of differential modal analysis
[DGLR PAPER 81-056]
p0610 A81-47603
Stability analysis of the twin mode model of coupled flexion-torsion vibrations in aeroengine fans
p0613 A81-47966
Finite strip analysis of singly curved skin-stringer structures
p0616 A81-48390

VIBRATION PROTECTION
U VIBRATION ISOLATORS

VIBRATION SIMULATORS
Forced vibrations of a nonlinear system excited by a centrifugal oscillator with a sloping engine characteristic
p0002 A81-10439

VIBRATION TESTING MACHINES
U VIBRATION SIMULATORS

VIBRATION TESTS
NT DAMPING TESTS
Recent developments in NDT techniques --- for airport pavement testing
p0113 A81-18078
Nondestructive dynamic testing
p0124 A81-19657
Aerodynamic blade excitation in turbocompressors
p0282 A81-27612
Your next ground vibration test doesn't have to cost a million dollars
[AIAA 81-0529]
p0303 A81-29450
Application of a Fourier analyzer to the analysis of shimmy test data
[AIAA 81-0533]
p0303 A81-29453
F-15 nose landing gear shimmy, taxi test and correlative analyses
[SAE PAPER 801239]
p0406 A81-34237
Investigations of helicopter structural dynamics and a comparison with ground vibration tests
p0467 A81-40087
Developing test profiles for multiple mission situations --- standards for military aircraft
p0570 A81-46403
The Hornet's operational mission environment
p0571 A81-46491
Determination of in-flight helicopter loads
p0573 A81-46610
Test and analyses of an active flutter suppression system on an FFDL model of YF17
p0082 N81-12118
Application of a flight test and data analysis technique to flutter of a drone aircraft
[NASA-TM-83136]
p0441 N81-25066
Applications of half-model technique in dynamic stability testing
p0591 N81-31118
Cruise missile engine program contract data requirements list sequence number 95. Qualification test report. Volume 39: Vibration and mission simulation testing on engine 626. XF-107-WR-400 cruise missile engine
[AD-A102257]
p0600 N81-31220
Aeroelastic instability stoppers for wind-tunnel models
[NASA-CASE-LAR-12458-1]
p0601 N81-31230

VIBRATIONAL STRESS
Investigation into the vibration of the starter gearbox of an aircraft turbine engine
p0291 A81-29059
Vibration test level criteria for aircraft equipment
[AD-A098675]
p0442 N81-25070

VIDEO COMMUNICATION
Antenna design and development for the microwave subsystem experiments for the terminal configured vehicle project
[NASA-CR-166220]
p0378 N81-22282

VIDEO DATA
Dynamic simulation of hybrid video compression --- of airborne reconnaissance systems
p0463 A81-39555

VIDEO EQUIPMENT
New visual displays for the next generation of civil aircraft
p0556 A81-44299
An airborne programmable digital to video converter interface and operation manual
[AD-A096422]
p0446 N81-25691

VIEWING
NT FIELD OF VIEW
How a pilot looks at altitude
p0265 N81-19047

VISCOELASTIC DAMPING
Response of stiffened sandwich panels
[AIAA 81-0557]
p0303 A81-29455

VISCOELASTIC FLOW
U VISCOELASTICITY

VISCOELASTICITY
A periodic problem in viscoelasticity with variable coefficients
p0419 A81-37143

VISCOSITY
NT EDDY VISCOSITY
Evaluation of multi-viscosity oils designed for aircraft reciprocating engines
[SAE PAPER 810572]
p0519 A81-42737
Time dependent Navier-Stokes solution of a turbulent gas jet ejected from a rectangular orifice into a high-subsonic crossflow
p0138 N81-14964

VISCOUS DAMPING
NT VISCOELASTIC DAMPING

VISCOUS DRAG
Drag characteristics of V-groove and transverse curvature riblets
p0239 A81-26510

VISCOUS FLOW
NT BOUNDARY LAYER FLOW
NT BOUNDARY LAYER SEPARATION
NT REATTACHED FLOW

NT SEPARATED FLOW
Design of airfoils in incompressible viscous flows by numerical optimization
p0001 A81-10096
Flow computation around multi-element airfoils in viscous transonic flow
p0011 A81-11601
Calculation of separated viscous flows on wing profiles by a coupling approach
[ONERA, TP NO. 1980-122]
p0017 A81-11920
A numerical simulation of hypersonic viscous flow over arbitrary geometries at angle of attack
[AIAA PAPER 81-0050]
p0158 A81-20566
Viscous-inviscid interaction on oscillating airfoils in subsonic flow
[AIAA PAPER 81-0051]
p0159 A81-20567
Calculation of viscous, sonic flow over hemisphere-cylinder at 19 deg incidence - The capturing of nose vortices
[AIAA PAPER 81-0189]
p0162 A81-20661
3-D viscous analysis of ducts and flow splitters
[AIAA PAPER 81-0277]
p0163 A81-20720
Numerical study on viscous shear flow past a circular cylinder
p0228 A81-24077

Some aerodynamic properties of cones in viscous supersonic flow
p0237 A81-26119
Viscous flow drag reduction; Symposium, Dallas, Tex., November 7, 8, 1979, Technical Papers
p0238 A81-26501
On the solution of Navier Stokes equations of the flow in turbomachines
p0296 A81-29099
Rotor-tip leakage. II - Design optimization through viscous analysis and experiment
[ASME PAPER 81-GT-72] p0313 A81-29981
New interpretations in the theory of viscous incompressible fluid flow past airfoil profiles
p0349 A81-31044
Viscous-inviscid interaction on oscillating airfoils in subsonic flow
[AD-A093970] p0203 N81-16983
Three-dimensional internal flows in turbomachinery, volume 2
[AD-A093130] p0215 N81-17090
An interactive computational aerodynamics analysis program
[AD-A094765] p0263 N81-19033
Aerodynamics of advanced axial-flow turbomachinery
[NASA-CR-163995] p0335 N81-20079
Analysis of turbulent flow about an isolated airfoil using a time dependent Navier-Stokes procedure
p0385 N81-23053
Experimental studies of scale effects on oscillating airfoils at transonic speeds
p0386 N81-23054

VISIBILITY
NT LOW VISIBILITY
Remote sensing methods for the determination of slant range visibility
[ESA-TT-627] p0086 N81-12536
Statistical relationship between median visibility and conditions of worstcase manmade impact on visibility
[LA-UR-80-2485] p0135 N81-14550
Operational problems associated with head-up displays during instrument flight
[AD-A092992] p0210 N81-17056
A compendium of aircraft cockpit vision surveys, 1950 through 1980, volume 1
[AD-A101473] p0580 N81-30104
Emergency cabin lighting installations: An analysis of ceiling- versus lower cabin-mounted lighting during evacuation trials --- visibility
[AD-A103191] p0636 N81-33175

VISION
NT COLOR VISION
NT NIGHT VISION
NT PERIPHERAL VISION

VISUAL ACUITY
Visual cue augmentation in contact flight simulation
p0064 A81-15696
Low-visibility visual simulation with real fog
[AIAA 81-0982] p0415 A81-36569
BIOCONAID system (bionic control of acceleration induced dimming)
[AD-A102510] p0601 N81-31234

VISUAL AIDS
Visual systems at Lufthansa's simulator centre
p0122 A81-19499
Glideslope descent-rate cuing to aid carrier landings
[AD-A092193] p0192 N81-16033
Study of pilot visual information requirements for Navy vertical take-off and landing capability development
[AD-A096074] p0341 N81-21068

VISUAL CONTROL
Analysis of the function principle and operational assessment of an onboard glidepath guidance system for visual approaches (Visual Approach Monitor (VAM)
[DFVLR-FB-79-38] p0025 N81-10043
Visual confirmation of voice takeoff clearance (VICON) operational evaluation, volume 1
[AD-A097756] p0425 N81-24041
Visual confirmation of voice takeoff clearance (VICON) operational evaluation. Volume 2: Operations and maintenance manual
[AD-A098093] p0425 N81-24042

VISUAL DISPLAYS
U DISPLAY DEVICES

VISUAL FLIGHT
Visual cue requirements in contact flight simulators
p0064 A81-15695
Airport visual approach, guidance and landing systems - Airline pilots viewpoint
p0114 A81-18083
Midair and near midair collisions on two- and three-dimensional curvilinear flight paths
[DFVLR-FB-80-13] p0128 N81-1390
Optical Fiber Illumination System for visual flight simulation
[NASA-CR-3409] p0343 N81-21086
Methodological approaches to identifying relevant features for visual flight
[AD-A100199] p0541 N81-2810

VISUAL FLIGHT RULES
Visual confirmation (VICON) of voice take-off clearance of cost-and-deployment analyses and strategies
[AD-A091007] p0091 N81-1303

VISUAL OBSERVATION
Evaluation of the visual acquisition range of en-route air traffic from cockpit observations
[DFVLR-MITT-80-14] p0332 N81-2005

VISUAL PERCEPTION
NT SPACE PERCEPTION
A new system for the study of visual information presentation in aeronautics - GIBI
p0100 A81-1468
Critical research issues and visual system requirements for a V/STOL training research simulator

NT STRAIN GAGE BALANCES
In-flight measurement of aerodynamic loads on captive stores. Equipment and results
[NLR-MP-79013-U] p0022 N81-10012
A rotating, wind tunnel balance and associated experimental techniques
[AAAF-NT-80-13] p0218 N81-17108
First results obtained with a rotating construction --- used in measuring flying qualities of wind tunnel aircraft models
[AAAF-NT-80-14] p0218 N81-17109

WEIGHT MEASUREMENT
Design, fabrication, calibration, application, and testing of advanced aircraft weighing systems
[SAWE PAPER 1383] p0353 A81-31

WEIGHT REDUCTION
Weight optimization of wing structures according to the gradient method
p0012 A81-1165
A penalty function method for structural optimum design with aeroelastic constraints
p0223 A81-2372
An extremely lightweight fuselage-integrated phased array for airborne applications
p0348 A81-3077
The structural weight fraction - Revisited for fighter/attack type aircraft
[SAWE PAPER 1365] p0353 A81-31
PARAM - A new weight sizing routine --- cost-effective computerized design for aircraft
[SAWE PAPER 1367] p0353 A81-31
The use of power-adaptive and power-reversible flight control actuation systems to achieve hydraulic power and system weight savings
[SAE PAPER 801190] p0401 A81-3
Unistructure - A new concept for light weight integrally stiffened skin structures
[SAE PAPER 801231] p0405 A81-3
Manufacturing technology for aircraft structural components made of carbon-fiber reinforced plastics
p0449 A81-37
Components in hybrid- and fiber technology for commercial aircraft of the Airbus family /flap support, spoiler, and window frame/
p0450 A81-37
Reducing the cost impact of helicopter internal noise control
[AHS 80-59] p0478 A81-4
The optimum design of non-moment laminated composite plate - According to static failure strength condition
p0480 A81-4
Design and concepts of composite structures
p0481 A81-4
Improving the economy of subsonic transport aircraft by means of aerodynamic approaches
p0510 A81-4
Impact of advanced propeller technology on aircraft/mission characteristics of several general aviation aircraft
[SAE PAPER 810584] p0520 A81-4
Fibre reinforced composite applications at De Havilland
[SAE PAPER 810640] p0524 A81-4
Commercial composite component service experience --- in airplane structural design and manufacturing
p0530 A8

Advanced composite applications in McDonnell Douglas commercial transport aircraft
p0530 A81-43628
A synopsis of the Navy A-7 Aircraft Fuel Conservation program
[AIAA PAPER 81-1681] p0535 A81-43949
Composite applications on Boeing commercial aircraft
p0557 A81-44341
Development of composite material helicopter structures
p0576 A81-46641
Development of the carbon fiber-reinforced side rudder for the Airbus
[DGLR PAPER 81-055] p0607 A81-47551
Structural synthesis - Its genesis and development
p0622 A81-49076
Current and projected use of carbon composites in United States aircraft
p0198 N81-16145
Application of carbon fibre composites to military aircraft structures
p0199 N81-16147
Optimization of fiber reinforced structures to satisfy aeroelastic requirements
[NASA-CR-164536] p0499 N81-27200
Helicopter technologies of the future --- weight reduction
[MBB-UD-314/80-OE] p0583 N81-30125
WEIGHTING FUNCTIONS
Precision correlation tracking via optimal weighting functions
p0154 A81-20450
WELDED STRUCTURES
NT STEEL STRUCTURES
Sliding-seal electron beam slot welding of an aircraft wing closure beam
p0614 A81-48142
WELDING
NT BRAZING
NT DIFFUSION WELDING
NT ELECTRON BEAM WELDING
Application of weldbonding to A-10 production aircraft
p0013 A81-11652
WELDING MACHINES
Sliding-seal electron beam slot welding of an aircraft wing closure beam
p0614 A81-48142

of airplanes to positive wind shear
[NASA-TP-1765] p0335 N81-20082

Groundspeed/airspeed differences as a wind shear
indicator and flight evaluation of a DME-derived
system to determine groundspeed
[AD-A097566] p0393 N81-23768

Flight evaluation of a simple total energy-rate
system with potential wind-shear application
[NASA-TP-1854] p0427 N81-24058

Determination of wind stress from water level
fluctuations
N81-30774

Takeoff and missed approach under the influence of
wind shear --- flight safety considerations
[TUBS/SFB-58-80-05-01] p0628 N81-32131

Simulator evaluation of the effects of reduced
spoiler and thrust authority on a decoupled
longitudinal control system during landings in
wind shear
[NASA-TM-83168] p0639 N81-33211

WIND TUNNEL APPARATUS

NT WIND TUNNEL DRIVES

Add fluorescent minitufts to the aerodynamicist's
bag of tricks
p0005 A81-11245

Three years of operation of the ONERA pressurized
subsonic wind tunnel
[ONERA, TP NO. 1980-129] p0014 A81-11669

A system for model access in tunnels with an
unbreathable test medium
p0015 A81-11672

A vaporizing combustor with double combustion spaces
p0109 A81-17827

Some optimization problems of internal aerodynamics
p0237 A81-26120

Test stand for the study of flow systems in wind
tunnels
p0409 A81-35009

Digital simulation for energy conservation in a
large wind tunnel plant system
p0613 A81-48003

A rotating, wind tunnel balance and associated
experimental techniques
[AAAF-NT-80-13] p0218 N81-17108

First results obtained with a rotating construction
--- used in measuring flying qualities of wind
tunnel aircraft models
[AAAF-NT-80-14] p0218 N81-17109

Rotative balance of the I.M.F. Lille and
associated experimental techniques
[NASA-TM-75886] p0276 N81-19137

Comments on settling chamber design for quiet,
blowdown wind tunnels
[NASA-TM-81948] p0335 N81-20085

Application of superconducting coils to the NASA
prototype magnetic balance
[NASA-CR-165660] p0336 N81-20086

Description of 0.186-scale model of high-speed
duct of national transonic facility
[NASA-TM-81949] p0377 N81-22061

Evaluation of turbulence reduction devices for the
Langley 8-foot Transonic Pressure Tunnel
[NASA-TM-81792] p0434 N81-24114

A discussion document on the thermal design of
force balances for cryogenic wind tunnels
[OUEL-1321/80] p0435 N81-24119

Wind-tunnel measurement of aerodynamic derivatives
using flexible-sting rigs
p0591 N81-31110

Rotary and Magnus balances
p0591 N81-31111

Support interference

U WIND TUNNEL APPARATUS

WIND TUNNEL CALIBRATION

Calibration of the high speed wind tunnel TVM 150
in the supersonic range
p0016 A81-11778

A fan pressure ratio correlation in terms of Mach
number and Reynolds number for the Langley 0.3
meter transonic cryogenic tunnel
[NASA-TP-1752] p0021 N81-10005

A comparison of methods for calibration and use of
multi-component strain gauge wind tunnel balances
[AD-A090484] p0084 N81-12394

Evaluation of a subsonic cascade wind tunnel for
compressor blade testing
[AD-A093591] p0218 N81-17107

Validation of the Wright-Patterson vertical wind
tunnel
[AD-A094777] p0277 N81-19143

Preliminary calibration of the transonic test
section of the NIAST trisonic tunnel
[NIAST-80/19] p0435 N81-2411

Wall interference effects: Status review
p0592 N81-3114

Report of the wind tunnel/flight correlation panel
p0593 N81-311

Supplemental calibration of the AEDC-PWT 16 ft
transonic tunnel aerodynamic test section
[AD-A102384] p0630 N81-32155

WIND TUNNEL DRIVES

Development of wind tunnel fan blade made of
composite materials
[MBB-UD-277-79-0] p0018 A81-120

Estimation of fan pressure ratio requirements and
operating performance for the National Transonic
Facility
[NASA-TM-81802] p0435 N81-241

Analysis of the performance of the drive system
and diffuser of the Langley unitary plan wind
tunnel
[NASA-TM-83168] p0635 N81-331

WIND TUNNEL MODELS

High-lift investigations on some small aspect
ratio wings
p0011 A81-11

Adaptable wind tunnel walls for 2D and 3D model
tests
p0014 A81-116

A system for model access in tunnels with an
unbreathable test medium
p0015 A81-11

Towing tank tests on model wind turbine rotors
p0055 A81-1

Experimental investigations to fully map the flow
field around a wind tunnel model of a transport
airplane
[SAE PAPER 800630] p0063 A81-15

The practical application of the Wake Blocking
Corrections according to Maskell --- for large
wind tunnel models
[DGLR PAPER 80-112] p0121 A81-1

Model vibrations beyond low-speed stall
[ONERA, TP NO. 1980-154] p0123 A81-1

Laser measurement of angle of attack on
wind-tunnel models
p0154 A81-2

Wind tunnel model support, controlled by four
microprocessors
[ONERA, TP NO. 1980-149] p0174 A81-2

Some aerodynamic properties of cones in viscous
supersonic flow
p0237 A81-2

An experimental study of transmission, reflection
and scattering of sound in a free jet flight
simulation facility and comparison with theory
p0289 A81-2

Computation of wind tunnel model deflections ---
for transport type solid wing
[AIAA 81-0482] p0300 A81-2

Transonic flutter and gust-response tests and
analyses of a wind-tunnel model of a
torsion-free-wing fighter airplane
[AIAA 81-0650] p0307 A81-

Transonic flutter study of a wind-tunnel model of
an arrow-wing supersonic transport
[AIAA 81-0654] p0308 A81-29506
Comparison of calculated and measured helicopter
rotor lateral flapping angles
p0357 A81-32018
An opto-electronic method for wind tunnel model
alignment
p0361 A81-32849
An apparatus for the simulation of an air intake
at high angle of attack in a compressor test
facility
[ONERA, TP NO. 1981-35] p0460 A81-39238
Advanced nozzle integration for supersonic strike
fighter application
[AIAA PAPER 81-1441] p0504 A81-40875
The half-model technique in the wind tunnel and
its employment in the development of the Airbus
family
[DGLR PAPER 81-118] p0609 A81-47587
Model design and instrumentation experiences with
continuous-flow cryogenic tunnels
p0037 N81-11057
Model design and instrumentation for intermittent
cryogenic wind tunnels
p0037 N81-11058
The European Transonic Wind tunnel ETW
p0038 N81-11064
The prediction of the bursting of laminar
separation bubbles in the design of two
dimensional high-lift aerofoils
[RAE-TR-80060] p0073 N81-12038
Synthesis of test results obtained with Concorde
at high incidences
[AAAF-NT-80-26] p0077 N81-12079
Store separation simulation in subsonic wind tunnels
[MBB-FE-123/S/PUB/20] p0203 N81-16588
A rotating, wind tunnel balance and associated
experimental techniques
[AAAF-NT-80-13] p0218 N81-17108
Experimental investigations on the V/STOL tunnel
at NASA/Langley Research Center
[NASA-CR-165655] p0329 N81-20028
Support interference of wind tunnel models: A
selective annotated bibliography
[NASA-TM-81909] p0335 N81-20084
Static tests of the J97 powered, external
augmenter V/STOL wind tunnel model
[NASA-CR-152403] p0337 N81-21010
Model vibrations below low speed stall
p0447 N81-26017
Applications of half-model technique in dynamic
stability testing
p0591 N81-31114
Aeroelastic instability stoppers for wind-tunnel
models
[NASA-CASE-LAR-12720-1] p0601 N81-31229
Aeroelastic instability stoppers for wind-tunnel
models
[NASA-CASE-LAR-12458-1] p0601 N81-31230
WIND TUNNEL STABILITY TESTS
Curved-flow, rolling-flow, and oscillatory
pure-yawing wind-tunnel test methods for
determination of dynamic stability derivatives
p0241 A81-26933

An acquisition and analysis system for the dynamic
testing of air intakes
[ONERA, TP NO. 1981-37] p0460 A81-39240
Wind-tunnel tests of engine-equipped models -
Comparison of two jet wash simulation methods
[ONERA, TP NO. 1981-42] p0460 A81-39245
A half-model free-oscillation rig for
pitch-damping measurements in high speed wind
tunnels
p0461 A81-39263
Aerodynamic study of a hovering rotor
p0468 A81-40098
Aerodynamic design of the Aerospatiale SA 365 N
Dauphin 2 helicopter
p0468 A81-40099
Wind tunnel evaluation of aeroelastically
conformable rotors
[AHS 80-23] p0475 A81-40153
Active control of the helicopter rotor for
vibration reduction
[AHS 80-68] p0479 A81-40108
Advanced nozzle integration for supersonic strike
fighter application
[AIAA PAPER 81-1441] p0504 A81-40875
Effect of in-flight thrust reverser deployment on
tactical aircraft stability and control
[AIAA PAPER 81-1446] p0504 A81-40879
A perspective on developing new inlet distortion
measurement and predictive methods
[AIAA PAPER 81-1589] p0507 A81-40968
Zero-length inlets for subsonic V/STOL aircraft
[AIAA PAPER 81-1396] p0515 A81-42186
Experimental investigation of a high-aspect-ratio
supersonic inlet
[AIAA PAPER 81-1397] p0515 A81-42187
Wind tunnel tests of sailwings for Darrieus rotors
p0518 A81-4267
Airfoils for light transport aircraft
[SAE PAPER 810576] p0519 A81-42740
Noise and performance of general aviation aircraft
- A review of the MIT study
[SAE PAPER 810586] p0520 A81-42747
Low and high speed propellers for general aviation
- Performance potential and recent wind tunnel
test results
p0521 A81-4275
Investigation of a flight test method for the
measurement of propeller thrust
[SAE PAPER 810603] p0521 A81-42760
Wind tunnel experiments on the divergence of swept
wings with composite structures
[AIAA PAPER 81-1670] p0526 A81-4315
Experimental and analytical development of an
advanced supersonic fighter concept
[AIAA PAPER 81-1659] p0534 A81-439
Spin research on a twin-engine aircraft
[AIAA PAPER 81-1667] p0534 A81-439
Lift-enhancing surfaces on several advanced V/STOL
fighter/attack aircraft concepts
[AIAA PAPER 81-1675] p0534 A81-439
Prediction of dynamic stall and unsteady airloads
for rotor blades
p0571 A81-466
Full-scale wind-tunnel test of the aeroelastic
stability of a bearingless main rotor
p0573 A81-466
New designs for improved aerodynamic stability on
recent Aerospatiale helicopters
p0574 A81-466
European transonic wind tunnel ETW - Status of the
project at the end of the predesign phase
[DGLR PAPER 81-027] p0609 A81-47
The influence of the airspeed on jet turbulence
and the consequences for the jet noise
[DGLR PAPER 81-021] p0609 A81-47
Contribution to the determination of the drag
coefficient for air breathing flight vehicles
the basis of wind tunnel measurements
[DGLR PAPER 81-036] p0610 A81-47
Digital simulation for energy conservation in a
large wind tunnel plant system
p0613 A81-4
Effects of blade-vane ratio and rotor-stator
spacing on fan noise with forward velocity
[AIAA PAPER 81-2032] p0620 A81-4
Comparative acoustic wind-tunnel measurements and
theoretical correlations on subsonic aircraft
propellers at full-scale and model-scale
[AIAA PAPER 81-2004] p0620 A81-4
Comparison of computational and experimental je
effects
[AIAA PAPER 81-1492] p0626 A81-4
An introduction to dynamic derivatives (3) methods
of oscillating models in pitch and yaw in a 836
by 810 millimetre transonic wind tunnel
[ARL/AERO-NOTE-390] p0021 N81-10
Holographic investigation of slender body vortex
wakes
[AD-A089496] p0021 N81-10
An investigation of scale effects on the transonic
flow over swept wings. Part 2: Measurements
a model of a variable-sweep strike-fighter
configuration
[ARC-R/M-3842-PT-2] p0021 N81-10

Boundary layer measurements on a two-dimensional wing with flap
[NLR-TR-79009-U] p0022 N81-10014
Flow measurements in the wake of a wing fitted with a leading-edge root extension (strake)
[RAE-TR-79120] p0022 N81-10015
Full scale wind tunnel investigation of a bearingless main helicopter rotor --- Ames 40 by 80 foot wind tunnel test using the BO-105 helicopter
[NASA-CR-152373] p0033 N81-11014
Wind tunnel investigation of the aerodynamic hysteresis phenomenon on the F-4 aircraft and its effects on aircraft motion
[AD-A089851] p0033 N81-11016
Low-speed aerodynamic performance of 50.8-centimeter-diameter noise-suppressing inlets for the Quiet, Clean, Short-haul Experimental Engine (QCSEE) --- Lewis 9- by 15-foot low speed wind tunnel tests
[NASA-TP-1178] p0035 N81-11037
Calibration of a blowdown-to-atmosphere cryogenic wind tunnel
p0038 N81-11060
Low-speed aerodynamic characteristics of a 13 percent thick medium speed airfoil designed for general aviation applications
[NASA-TP-1498] p0071 N81-12015
Influence of light aircraft architecture on its spin characteristics
[AAAF-NT-80-11] p0081 N81-12111
Wind tunnel test of a fighter aircraft wing/store flutter suppression system: An international effort
p0082 N81-12116
Wind tunnel tests on a fighter aircraft wing/store flutter suppression system: The B.Ae control law
p0083 N81-12119
Dynamic response of a forward-swept-wing model at angles of attack up to 15 deg at a Mach number of 0.8 --- Langley transonic dynamics tunnel tests
[NASA-TM-81863] p0085 N81-12448
Results of oscillatory pitch and ramp tests on the NACA 0012 blade section
[ARA-MEMO-220] p0090 N81-13024
Model aerodynamic test results for two variable cycle engine coannular exhaust systems at simulated takeoff and cruise conditions --- Lewis 8 by 6-foot supersonic wind tunnel tests
[NASA-CR-159818] p0093 N81-13057
Wind-tunnel test of an articulated helicopter rotor model with several tip shapes
[NASA-TM-80080] p0125 N81-13918
Passive control of wing/store flutter
[NASA-TM-81865] p0125 N81-13922
Rotary balance data for a single-engine agricultural airplane configuration for an angle-of-attack range of 8 deg to 90 deg
[NASA-CR-3311] p0125 N81-13923
An evaluation of wind tunnel test techniques for aircraft nozzle afterbody testing at transonic Mach numbers
[AD-A091775] p0126 N81-13931
Evaluation of wind tunnel nozzle afterbody test techniques utilizing a modern twin engine fighter geometry at Mach numbers from 0.6 to 1.2 --- YF-17 aircraft
[AD-A091545] p0126 N81-13932
Advanced ejection seat for high dynamic pressure escape. Wind tunnel test
[AD-A091810] p0127 N81-13940
Active control of an explosive wing-store flutter case
[MBB-FE-17/S/PUB/25] p0131 N81-13973
Laser-Raman/Rayleigh flow diagnostic techniques applied to subsonic flow
[AD-A091695] p0133 N81-14275
Transonic wind tunnel tests on an oscillating wing with external store. Part 4: The wing with underwing: Store
[AD-A0[illegible]7370] p0139 N81-14969
Wind-tunnel measurements and comparison with flight of the boundary layer and heat transfer on a hollow cylinder at Mach 3
[NASA-TP-1789] p0140 N81-14975
Experimental aerodynamic characteristics of two V/STOL fighter/attack aircraft configurations at Mach numbers from 0.4 to 1.4
[NASA-TM-81234] p0140 N81-14981
An investigation of support-interference effects
[NAL-TR-622] p0141 N81-14984
Development of finite-volume methods for three-dimensional transonic flows
[AD-A090829] p0141 N81-14986
Finite element method study of wing-fuselage-nacelle interactions of a Falcon 20 type aircraft at Mach = 0.79
p0187 N81-15994
Design and experimental verification of a transonic wing for a transonic aircraft
p0188 N81-16003
Jet wing interference for an overwing engine configuration
p0188 N81-16008
Experimental study of the interaction between the wing of a subsonic aircraft and a nacelle of a high by-pass ratio engine
p0189 N81-16010
A wind tunnel investigation of the aerodynamic characteristics of forward swept wings --- supersonic cruise aircraft research
p0189 N81-16011
An investigation of a swept wing-body configuration with drooped leading edge at low and transonic speeds
p0189 N81-16012
Aerodynamic interaction between a close-coupled canard and a sweptback wing in transonic flow
p0189 N81-16013
P-3 Orion fuel-saving modification wind tunnel study
[AD-A091906] p0194 N81-16044
Gravimetric investigation of the particle number density distribution function in the high speed cascade wind tunnel for laser anemometry measurements
[ESA-TT-625] p0197 N81-16069
A theoretical method for the simulation of separation behavior of aircraft external stores --- applications to computerized wind tunnel tests
[MBB-FE-122/S/PUB/16] p0203 N81-16987
The effects of warhead-induced damage on the aeroelastic characteristics of lifting surfaces. Volume 2: Aerodynamic effects
[AD-A093063] p0209 N81-17048
Model aerodynamic test results for two variable cycle engine coannular exhaust systems at simulated takeoff and cruise conditions. Comprehensive data report. Volume 1: Design layouts
[NASA-CR-159819-VOL-1] p0214 N81-17081
Model aerodynamic test results for two variable cycle engine coannular exhaust systems at simulated takeoff and cruise conditions. Comprehensive data report. Volume 2: Tabulated aeroynamic data book 1
[NASA-CR-159819-VOL-2-BK-1] p0214 N81-17082
Model aerodynamic test results for two variable cycle engine coannular exhaust systems at simulated takeoff and cruise conditions. Comprehensive data report. Volume 2: Tabulated aerodynamic data book 2
[NASA-CR-159819-VOL-2-BK-2] p0214 N81-17083
Model aerodynamic test results for two variable cycle engine coannular exhaust systems at simulated takeoff and cruise conditions. Comprehensive data report. Volume 2: Tabulated aerodynamic data book 3
[NASA-CR-159819-VOL-2-BK-3] p0214 N81-17084
Model aerodynamic test results for two variable cycle engine coannular exhaust systems at simulated takeoff and cruise conditions. Comprehensive data report. Volume 3: Graphical data book 1
[NASA-CR-159819-VOL-3-BK-1] p0214 N81-17085
Model aerodynamic test results for two variable cycle engine coannular exhaust systems at simulated takeoff and cruise conditions. Comprehensive data report. Volume 3: Graphical data book 2
[NASA-CR-159819-VOL-3-BK-2] p0214 N81-17086
Laser scattering applications development test in AEDC tunnel B at Mach number 8
[AD-A093929] p0217 N81-17105
The prediction of pressure distributions on an arrow-wing configuration including the effect of camber, twist, and a wing fin
p0243 N81-17986

WIND TUNNEL TESTS CONTD

Analytic development of improved supersonic cruise aircraft based on wind tunnel data
p0244 N81-17989

Flight and tunnel test results of the MDC mechanical jet noise suppressor nozzle
p0245 N81-18000

Technology development status at McDonnell Douglas
p0248 N81-18019

Multicyclic controllable twist rotor data analysis
[NASA-CR-152251] p0249 N81-18028

Development and wind tunnel investigation of three supercritical airfoil profiles for transport aircraft
[NASA-TM-75840] p0249 N81-18030

Improvements in the determination of convective transfers from infrared thermography --- in wind tunnel tests
p0255 N81-18258

Forward velocity effects on fan noise and the suppression characteristics of advanced inlets as measured in the NASA Ames 40 by 80 foot wind tunnel: Acoustic data report
[NASA-CR-152329] p0258 N81-18798

The EET Horizontal Tails Investigation and the EET Lateral Controls Investigation --- Langley 8-Foot Transonic Pressure Tunnel
p0260 N81-19009

Natural laminar flow flight experiment --- Langley 8-Foot Transonic Pressure Tunnel
p0260 N81-19010

KC-135 winglet flight results
p0260 N81-19011

Overview of advanced wing design --- Ames 12-Foot Pressure Tunnel and 11-Foot Transonic Wind Tunnel
p0260 N81-19012

Aeropropulsive characteristics of twin nonaxisymmetric vectoring nozzles installed with forward-swept and aft-swept wings --- in the Langley 16 Foot Transonic Tunnel
[NASA-TP-1778] p0261 N81-19019

Pressure distributions for the GA(W)-2 airfoil with 20% aileron, 25% slotted flap and 30% Fowler flap
[NASA-CR-2948] p0262 N81-19023

Effect of wing-transition location and slotted and unslotted flaps on aerodynamic characteristics of a fighter model at high subsonic speeds --- conducted in langley 8-foot transonic pressure tunnel
[NASA-TM-X-1849] p0262 N81-19024

Wind-tunnel investigation at Mach numbers from 0.25 to 1.01 of a transport configuration designed to cruise at near-sonic speeds --- conducted in langley 8-foot transonic pressure tunnel
[NASA-TM-X-2622] p0262 N81-19025

Experimental and theoretical study of flow fields and store forces in close proximity to a triple ejection rack at transonic speeds
[AD-A094751] p0263 N81-19030

Survey of aircraft icing simulation test facilities in North America
[NASA-TM-81707] p0269 N81-19078

Preliminary wind-tunnel investigation of the effects of engine nacelles on a transport configuration with high lift drag ratios to a Mach number of 1.00
[NASA-TM-82312] p0272 N81-19099

Wind tunnel tests to determine the behavior during ejection of exterior stores at high and low speeds
[DLGR-79-096] p0272 N81-19102

Aerodynamic characteristics of a hypersonic cruise aircraft concept with wing-mounted propulsion systems at Mach numbers of 2.96, 3.96 and 4.63 --- Langley unitary plan wind tunnel tests
[NASA-TM-81937] p0329 N81-20025

The elaboration of a new family of helicopter blade profiles
[NASA-TM-75907] p0330 N81-20031

Recent progress in V/STOL aircraft technology
[NASA-TM-81281] p0333 N81-20066

Support interference of wind tunnel models: A selective annotated bibliography
[NASA-TM-81909] p0335 N81-20084

A study of a VTOL thrusting ejector in low speed flight, volume 2
[NASA-CR-166137-VOL-2] p0337 N81-21018

Low and high speed propellers for general aviation: Performance potential and recent wind tunnel test results
[NASA-TM-81745] p0338 N81-21028

Unsteady pressure measurements during stall and buffeting --- wind tunnel tests
[ESA-TT-641] p0339 N81-21041

Flight safety of Rogallo hang gliders. Theoretical and experimental study of the flight envelope --- wind tunnel tests for flight characteristics
[ESA-TT-634] p0339 N81-21046

Experimental and analytical study on the flutter and gust response characteristics of a torsion-free-wing airplane model --- in the Langley transonic dynamics tunnel
[NASA-CR-159283] p0340 N81-21059

High frequency drive mechanism for an active controls systems aircraft control surface
p0378 N81-22400

Two-dimensional aerodynamic characteristics of the NACA 0012 airfoil in the Langley 8 foot transonic pressure tunnel
[NASA-TM-81927] p0385 N81-23036

Full-scale aerodynamic characteristics of a propellar installed on a small twin-engine aircraft wing panel
[NASA-TM-81285] p0385 N81-23039

Oscillatory flows from shock induced separations on biconvex aerofoils of varying thickness in ventilated wind tunnels
p0386 N81-23056

Preliminary design study of advanced composite blade and hub and nonmechanical control system for the tilt-rotor aircraft. Volume 2: Project planning data
[NASA-CR-152336-2] p0387 N81-23065

Comparison of theoretical predictions of orbiter airloads with wind tunnel and flight test results for a Mach number of 0.52
[NASA-TM-81358] p0387 N81-23066

Transonic flutter study of a wind-tunnel model of an arrow-wing supersonic transport --- SCAT-15F model test in the Langley Transonic Dynamics Tunnel
[NASA-TM-81962] p0388 N81-23071

Aerodynamics, aeroelasticity, and stability of hang gliders. Experimental results --- Ames 7- by 10-ft wind tunnel tests
[NASA-TM-81269] p0423 N81-24025

Comparison of selected lift and sideslip characteristics of the Ayres Thrush S2R-800, winglets off and winglets on, to full-scale wind-tunnel data
[NASA-CR-165710] p0423 N81-24026

A Jet-diffuser ejector for a V/STOL fighter
[NASA-CR-166161] p0428 N81-24064

Canadian studies of wind tunnel corrections for high angle of attack models
p0435 N81-24121

A review of the wall pressure signature and other tunnel constraint correction methods for high angle-of-attack tests
p0435 N81-24122

Expected improvements on high angle of attack model testing
p0436 N81-24123

German activities on wind tunnel corrections
p0436 N81-24124

Icing tunnel tests of a glycol-exuding porous leading edge ice protection system on a general aviation airfoil
[NASA-CR-164377] p0439 N81-25001

Wind tunnel tests of large- and small-scale rotor hubs and pylons
[AD-A098510] p0439 N81-25003

Energy efficient engine, low-pressure turbine boundary layer program
[NASA-CR-165338] p0442 N81-25077

Wind loads on flat plate photovoltaic array fields
[NASA-CR-164454] p0445 N81-25081

Phase 2 and 3 wind tunnel tests of the J-97 powered, external augmentor V/STOL model --- conducted in Ames 40- by 80-foot wind tunnel
[NASA-CR-152380] p0483 N81-260

Subsonic tests of an all-flush-pressure-orifice air data system
[NASA-TP-1671] p0489 N81-261

Qualitative comparison of calculated turbulence responses with wind-tunnel measurements for a DC-10 derivative wing with an active control

system
[NASA-TM-83144] p0491 N81-26496
Design and wind tunnel tests of winglets on a DC-10 wing
[NASA-CR-3119] p0492 N81-27046
Aerodynamic investigation of C-141 leading edge modifications for cruise drag reduction, test 2
[AD-A099662] p0492 N81-27051
Wind-tunnel evaluation of NASA developed control laws for flutter suppression on a DC-10 derivative wing
[NASA-TM-83143] p0499 N81-27548
Unpowered aerodynamic characteristics of a 15-percent scale model of a twin-engine commuter aircraft
[NASA-TM-81284] p0537 N81-28055
From the civil component program 'IFAS': Fundamentals of engine simulation, using turbopowered simulator (TPS) technology in wind tunnel tests
[BMFT-FB-W-80-030] p0541 N81-28111
Experimental aerodynamic characteristics of two V/STOL fighter/attack aircraft configurations at Mach numbers from 1.6 to 2.0 --- Ames 9 by 7 foot supersonic wind tunnel
[NASA-TM-81286] p0579 N81-30083
Analysis of Mach number 0.8 turboprop slipstream wing/nacelle interactions
[NASA-CR-166214] p0579 N81-30085
Rotor wake characteristics relevant to rotor-stator interaction noise generation
[NASA-TM-82703] p0583 N81-30130
Subsonic pitch-up alleviation on a 74 deg delta wing
[NASA-CR-165749] p0584 N81-30137
Some experiences with active control of aeroelastic response
[NASA-TM-83179] p0587 N81-30469
Determination of aircraft dynamic stability and control parameters from flight testing
p0591 N81-31115
Aircraft design using the National Transonic Facility
p0593 N81-31143
Proposed aeroelastic and flutter tests for the National Transonic Facility
p0593 N81-31144
Preliminary user planning for the NASA National Transonic Facility
p0593 N81-31145
Report of the panel on fluid dynamics
p0593 N81-31146
High lift technology
p0593 N81-31147
Configuration aerodynamics
p0593 N81-31148
High Reynolds number research requirements for space vehicle design
p0593 N81-31151
Report of the panel on theoretical aerodynamics
p0593 N81-31152
Unsteady airloads on oscillating wings in post-stall condition
[DFVLR-FB-81-16] p0594 N81-31158
Wind-tunnel studies of advanced cargo aircraft concepts --- leading edge vortex flaps for drag reduction
[NASA-CR-164833] p0627 N81-32117
On the spanwise uniformity of wind tunnel test data of transonic airfoils
[NAL-TR-665] p0627 N81-32118
Effect of sweep and aspect ratio on the longitudinal aerodynamics of a spanloader wing in and out of ground effect --- wind tunnel tests
[NASA-TM-80199] p0627 N81-32119
Sting interference effects on the static dynamic and base pressure measurements of the standard dynamics model aircraft at Mach numbers 0.3 through 1.3
[AD-A102612] p0627 N81-32124
Recent progress in V/STOL aircraft technology
p0633 N81-33144
Experimental and theoretical study of three interacting, closely-spaced, sharp-edged 60 deg delta wings at low speeds
[NASA-CR-3460] p0635 N81-33160
Wind tunnel testing of a windshield material or supersonic aircraft
[AD-A103383] p0635 N81-33163

WIND TUNNEL WALLS
Adaptable wind tunnel walls for 2D and 3D model tests
p0014 A81-11671
Wind tunnel wall interference in a test section with ventilated walls
p0015 A81-11673
Lift effect on transonic wind-tunnel blockage
p0066 A81-15883
A wall interference analysis --- in wind tunnels
p0104 A81-17472
The practical application of the Wake Blocking Corrections according to Maskell --- for large wind tunnel models
[DGLR PAPER 80-112] p0121 A81-19398
Numerical simulations of a segmented-plenum, perforated, adaptive-wall wind tunnel
[AIAA PAPER 81-0160] p0162 A81-20640
Studies on Thwaites' method for wind tunnel contraction
p0282 A81-27884
Low-speed wind tunnels with deformable walls
p0299 A81-29304
Adaptive-wall wind-tunnel development for transonic testing
p0352 A81-31367
Further investigations of adaptive-wall wind tunnels
[AD-A091774] p0131 N81-13977
The resonance frequencies of ventilated wind tunnels
[ARC-R/M-3841] p0144 N81-15009
Wind tunnel wall interference
[AD-A093301] p0217 N81-17104
Evaluation of the acoustic and aerodynamic characteristics of several slot-baffle configurations for transonic wind tunnel walls
[AD-A093957] p0217 N81-17106
Model and boundary aerodynamic data from high blockage two-dimensional airfoil tests in a shallow unstreamlined transonic flexible walled test section --- transonic self-streamlining wind tunnel
[NASA-CR-165685] p0343 N81-21087
Wind tunnel corrections for high angle of attack models
[AGARD-R-692] p0435 N81-24120
A review of research at NLR on wind-tunnel corrections for high angle of attack models
p0436 N81-24125
A review of some investigations on wind tunnel wall interference carried out in Sweden in recent years
p0436 N81-24126
Wind tunnel corrections for high angles of attack: A brief review of recent UK work
p0436 N81-24127
Wall interference effects: Status review

Description of 0.186-scale model of high-speed
duct of national transonic facility
[NASA-TM-81949] p0377 N81-22061
Measurements of temperature and pressure
fluctuations in the T prime 2 cryogenic wind
tunnel
[NASA-TM-75408] p0490 N81-26158
Computer analysis of flow perturbations generated
by placement of choke bumps in a wind tunnel
[NASA-TP-1692] p0579 N81-30088
Wind Tunnels of NASA
[NASA-SP-440] p0629 N81-32153

WIND VARIATIONS
Analysis of wind vector components in the lower
troposphere Applications to aircraft operations
at terminals
[AIAA PAPER 81-0387] p0167 A81-20799

WIND VELOCITY
Catalog of sea state and wind speed in the South
Atlantic Bight
[NASA-CR-156872] p0137 N81-14601

WIND VELOCITY MEASUREMENT
Wind speed measurement for wind turbine testing
p0055 A81-13873

Analysis of wind vector components in the lower
troposphere Applications to aircraft operations
at terminals
[AIAA PAPER 81-0387] p0167 A81-20799
Wind shear systems implementation plan,
benefit/cost study
[AD-A094168] p0253 N81-18055

WINDING
NT FILAMENT WINDING

WINDMILLING
U AUTOROTATION

WINDMILLS (WINDPOWERED MACHINES)
Application of a method for aerodynamic analysis
and design of horizontal axis wind turbines,
part 1
[FFA-TN-AU-1499-PT-1] p0086 N81-12633
Optimized pitch controller for load alleviation on
wind turbines
[FFA-TN-HU-2189-PT-1] p0087 N81-12634
Rotor model for verification of computation methods
[ISD-262] p0145 N81-15467
Static deflection and eigenfrequency analysis of
the Nibe wind turbine rotors. Theoretical
background --- structural vibration
[RISOE-M-2199] p0279 N81-19497
Development and design of a large wind-turbine blade
--- fiber reinforced composites
[MBB-UD-301/80-OE] p0586 N81-30198

WINDOWS (APERTURES)
Superhard transparent coating optimization program
[AD-A091083] p0092 N81-13048
Effects of window configuration on model pressure
distribution in wind tunnels with perforated walls
[AD-A094213] p0277 N81-19142
Development of a CFC window frame, using short
fiber pressing technology --- jet aircraft cabin
windows
[BMFT-FB-W-80-032] p0499 N81-27208

WINDPOWER UTILIZATION
Wind speed measurement for wind turbine testing
p0055 A81-13873

Stability of large horizontal-axis axisymmetric
wind turbines
[NASA-TM-81623] p0085 N81-12446
Rotor model for verification of computation methods
[ISD-262] p0145 N81-15467

WINDPOWERED GENERATORS
Towing tank tests on model wind turbine rotors
p0055 A81-13860

Stability of large horizontal-axis axisymmetric
wind turbines
p0178 A81-22526

Wind tunnel tests of sailwings for Darrieus rotors
p0578 A81-42678

Performance of a steel spar wind turbine blade on
the Mod-0 100 kW experimental wind turbine
[NASA-TM-81508] p0043 N81-11448
Definitive generic study for the effect of high
lift airfoils on wind turbine effectiveness,
executive summary
[SERI/TR-98003-2] p0043 N81-11492
Recent darrieus Vertical-Axis Wind Turbine
aerodynamical experiments at Sandia National
Laboratories
[SAND-81-1108C] p0588 N81-30615

WINDPOWERED PUMPS
Improving the mechanical load matching of wind
energy converters
p0055 A81-13870

WINDS ALOFT
NT JET STREAMS (METEOROLOGY)

WINDSCREENS
U WINDSHIELDS

WINDSHIELDS
Use of similitude in analyzing aircraft windshield
anti-icing performance
[AIAA PAPER 79-1822] p0051 A81-13218
Computer analysis of bird-resistant aircraft
transparencies
p0175 A81-22087

Techniques for evaluation of aircraft windscreen
optical distortion
p0358 A81-32507

Evaluation of the impact computer program as a
linear design tool for bird resistant aircraft
transparencies
[AD-A091051] p0091 N81-13039
Superhard transparent coating optimization program
[AD-A091083] p0092 N81-13048
F-111 windscreen machining
[Y-2232] p0142 N81-14995
Evaluation of bird load models for dynamic
analysis of aircraft transparencies
[AD-A092909] p0204 N81-16995
Potential of optical Fourier analysis for
measuring windscreen distortion
[AD-A094127] p0259 N81-18853
Aircraft transparency optical quality: New
methods of measurement
[AD-A096183] p0341 N81-21070
Validation of a bird substitute for development
and qualification of aircraft transparencies
[AD-A097736] p0424 N81-24036
Study and evaluation of existing techniques for
measuring aircraft windscreen optical quality:
Development of new techniques for measuring
aircraft windscreen optical distortion
[AD-A097731] p0426 N81-24049
Wind tunnel testing of a windshield material or
supersonic aircraft
[AD-A103383] p0635 N81-33183

WING CAMBER
Mission Adaptive Wing research programme
p0227 A81-24057

Unsteady aerodynamic propulsion
[AIAA 81-0645] p0307 A81-29498
Analysis and application of compliant rotor
technology
p0467 A81-40086

A study of wing body blending for an advanced
supersonic transport
p0244 N81-17987

WING FLAPS
NT LEADING EDGE FLAPS
NT LEADING EDGE SLATS
NT TRAILING-EDGE FLAPS
NT VORTEX FLAPS
Leading-edge 'Vortex Flaps' for enhanced subsonic
aerodynamics of slender wings
p0012 A81-11640

The aerodynamics of inverted leading edge flaps on
delta wings
[AIAA PAPER 81-0356] p0165 A81-20775
Evaluation of the influence of local disturbances
of flow past trailing and leading flaps from
wind tunnel data on a rectangular wing section
p0299 A81-29307

Prediction method for aeroacoustic loads on under
the wing blown flaps
[AIAA PAPER 81-2038] p0621 A81-48600
A design of multi-element aerofoils for high lift
[NAL-TR-631] p0337 N81-21013

WING FLOW METHOD TESTS
Add fluorescent minitufts to the aerodynamicist's bag of tricks
p0005 A81-11245
High-lift investigations on some small aspect ratio wings
p0011 A81-11643
Winglets development at Israel Aircraft Industries
p0012 A81-11645
Adaptable wind tunnel walls for 2D and 3D model tests
p0014 A81-11671
Transonic flow past a wing profile in channels with permeable walls
p0054 A81-13533
Wing-alone aerodynamic characteristics at high angles of attack
[AIAA PAPER 81-0008] p0157 A81-20532
Calculation of the flow pattern behind an aircraft wing
p0349 A81-31041
Philosophy and results of steady and unsteady test techniques on a large scale transport aircraft model in the ONERA transonic tunnel S1 MA. Part 1: Philosophy and results of steady tests. Part 2: Interest of large models in unsteady aerodynamics
p0190 N81-16019
WING LOADING
Weight optimization of wing structures according to the gradient method
p0012 A81-11650
Circulation Control Wing /CCW/ flight tests
p0122 A81-19469
Effect of transport aircraft wing loads spectrum variation on crack growth
p0172 A81-21738
Research on vortex bursting in compressible flow --- Thesis
p0230 A81-24477
Concerning the motion of a piloted aircraft
p0299 A81-29312
Fatigue sensitivity of composite structure for fighter aircraft
[AIAA 81-0495] p0300 A81-29383
Concepts for improving the damage tolerance of composite compression panels
p0360 A81-32825
Effects of truncation of a predominantly compression load spectrum on the life of a notched graphite/epoxy laminate
p0418 A81-37137
Aerodynamic characteristics of wings of arbitrary planform
p0461 A81-39267
Design, analyses, and model tests of an aeroelastically tailored lifting surface
[AIAA PAPER 81-1673] p0566 A81-45974
Active gust- and maneuver load control concepts, taking into account, as example, the Airbus A300. I - Design of a controller in the temporal domain for the alleviation of gust loads and the control of the effectiveness for stochastic gusts
[DGLR PAPER 81-065A] p0608 A81-47552
Active gust- and maneuver load reduction concepts, taking into account, as an example, the Airbus A300. II - Design of a controller for gust and maneuver load reduction in the frequency range
[DGLR PAPER 81-065B] p0608 A81-47553
Estimation of wing nonlinear aerodynamic characteristics at supersonic speeds
[NASA-TP-1718] p0021 N81-10004
An analytical technique for approximating unsteady aerodynamics in the time domain
[NASA-TP-1738] p0043 N81-11422
Assessment of variable camber for application to transport aircraft
[NASA-CR-158930] p0071 N81-12016
Effects of nonlinearities on wing store flutter
[MBB-FE-17/S/PUB/27] p0131 N81-13974
Transonic wind tunnel tests on an oscillating wing with external store. Part 4: The wing with underwing: Store
[AD-A077370] p0139 N81-14969
Feasibility study for C-141B reduction of wing loads by uprigging the ailerons
[AD-A094634] p0272 N81-19105
Unsteady airloads on a harmonically pitching wing with external store
[NLR-MP-80004-U] p0330 N81-20038
Experimental and analytical study on the flutter and gust response characteristics of a torsion-free-wing airplane model --- in the Langley transonic dynamics tunnel
[NASA-CR-159283] p0340 N81-21059
Additional information about Fighter Aircraft Loading Standard for Fatigue Evaluation (FALSTAFF)
[NLR-TR-79056-U] p0348 N81-21391
Comparison of theoretical predictions of orbiter airloads with wind tunnel and flight test results for a Mach number of 0.52
[NASA-TM-81358] p0387 N81-23066
Application of vortex lattice methods to calculate Lv (rolling moment due to sideslip)
[PB81-166167] p0487 N81-26123
A structural load alleviation control system for a large transport aircraft
[TT-8002] p0541 N81-28106
Fatigue crack growth in 7475-T7651 material under flight simulation loading. Information from a Douglas report --- effect of transport/bomber loads spectrum on crack growth
[VTH-M-392] p0542 N81-28493
WING NACELLE CONFIGURATIONS
Calculation of the flow field around engine-wing-configurations
p0007 A81-11613
Finite element method study of wing-fuselage-nacelle interactions of a Falcon 20 type aircraft at Mach = 0.79
p0107 N81-15994
Experimental study of the interaction between the wing of a subsonic aircraft and a nacelle of a high by-pass ratio engine
p0189 N81-16010
Theoretical and Experimental studies of aerodynamic interference effects --- aerodynamic forces on winglets and on wing nacelle configurations for the YC-14 and KC-135 aircraft
p0190 N81-16017
Aerodynamic characteristics of a hypersonic cruise aircraft concept with wing-mounted propulsion systems at Mach numbers of 2.96, 3.96 and 4.63 --- Langley unitary plan wind tunnel tests
[NASA-TM-81937] p0329 N81-20025
Analysis of Mach number 0.8 turboprop slipstream wing/nacelle interactions
[NASA-CR-166214] p0579 N81-30085
WING OSCILLATIONS
Active flutter suppression design and test - A joint U.S.-F.R.G. program
p0009 A81-11621
A nonlinear, discrete-vortex-perturbation method for unsteady lifting-surface problems with edge separations
p0058 A81-14394
A simplified theory of oscillating aerofoils in transonic flow - Review and extension
p0060 A81-14945
The method of superelements in the dynamics of complex structures
p0101 A81-16969
Experimental study of the snap-through oscillations of an empennage
p0299 A81-29313
Active control of forward swept wings with divergence and flutter aeroelastic instabilities
[AIAA 81-0637] p0306 A81-29491
Wind-tunnel evaluation of NASA developed control laws for flutter suppression on a DC-10 derivative wing
[AIAA 81-0639] p0306 A81-29493
Qualitative comparison of calculated turbulence responses with wind-tunnel measurements for a DC-10 derivative wing with an active control system
[AIAA 81-0567] p0306 A81-29494
Aerodynamic modeling of an oscillating wing with external stores
[AIAA 81-0648] p0307 A81-29501
Transonic flutter and gust-response tests and analyses of a wind-tunnel model of a torsion-free-wing fighter airplane
[AIAA 81-0650] p0307 A81-29503
A wind-tunnel study of the flutter characteristics of a supercritical wing
p0308 A81-29504

Transonic flutter study of a wind-tunnel model of
an arrow-wing supersonic transport
[AIAA 81-0654] p0308 A81-29506
Flight test results of an active flutter
suppression system installed on a remotely
piloted research vehicle
[AIAA 81-0655] p0308 A81-29507
Application of a flight test and data analysis
technique to flutter of a drone aircraft
[AIAA 81-0652] p0308 A81-29511
Influence of hinge line gap on aerodynamic forces
acting on a harmonically oscillating thin
profile in an incompressible flow. I, II
p0348 A81-30956
Measurement of the aerodynamic forces acting on a
harmonically oscillating wing at high subsonic
speeds
p0349 A81-31042
Comparison of computed and measured unsteady
pressure fields on a supercritical wing
[ONERA, TP NO. 1981-12] p0359 A81-32541
A new method of airfoil flutter control
p0367 A81-33844
Three-dimensional oscillatory piecewise
continuous-kernel function method. I - Basic
problems. II - Geometrically continuous wings.
III - Wings with geometrical discontinuities
p0411 A81-35631
Measurement of derivatives for an oscillating
airfoil with flap
p0411 A81-35635
Concerning one self-similarity property in flutter
analysis
p0413 A81-36464
A vortex-lattice method for calculating
longitudinal dynamic stability derivatives of
oscillating delta wings
[AIAA PAPER 81-1876] p0561 A81-44570
Evaluation of two-dimensional subsonic oscillatory
airforce coefficients and loading distributions
p0617 A81-48480
Results of oscillatory pitch and ramp tests on the
NACA 0012 blade section
[ARA-MEMO-220] p0090 N81-13024
Unsteady wakes downstream from a profile
oscillating in incidence --- aerodynamic flow
tests on helicopter rotor blade profiles
[AAAF-NT-80-10] p0204 N81-16989
An asymptotic unsteady lifting-line theory with
energetics and optimum motion of
thrust-producing lifting surfaces
[NASA-CR-165679] p0385 N81-23035
Experimental studies of scale effects on
oscillating airfoils at transonic speeds
p0386 N81-23054
Some remarks on the unsteady airloads on
oscillating control surfaces in subsonic flow
p0386 N81-23055
Airplane wing vibrations due to atmospheric
turbulence
[NASA-CR-3431] p0438 N81-24679
Unsteady airloads on oscillating wings in
post-stall condition
[DFVLR-FB-81-16] p0594 N81-31158

p0182 A81-22676

Solar powered aircraft
[NASA-CASE-LAR-12615-1] p0628 N81-32138

WING SLATS

U LEADING EDGE SLATS

WING SLOTS

The performance of slotted blades in cascade
p0002 A81-10632

Determination of the effect of transverse cutouts
on the hydrodynamic characteristics of a
finite-span wing in the case of steady and
unsteady motion near a wall
p0119 A81-19335

On the unsteady wake-induced lift on a slotted
airfoil. II - The influence of displacement
thickness fluctuations
p0229 A81-24237

Effect of wing-transition location and slotted and
unslotted flaps on aerodynamic characteristics
of a fighter model at high subsonic speeds ---
conducted in langley 8-foot transonic pressure
tunnel
[NASA-TM-X-1849] p0262 N81-19024

WING SPAN

A finite-span wing in transonic flow
p0054 A81-13741

Steady flow past a rectangular wing with
circulation that is variable along the span
p0099 A81-16551

Spanwise distribution of control points in the
method of finite elementary solutions
[AIAA PAPER 79-1879] p0169 A81-21011

Vibrations of multispan stiffened plates via
modified Bolotin method
p0281 A81-26954

Wing with finite span in a transonic flow
p0420 A81-37480

WING TANKS
Report on a cooperative programme on Active Flutter Suppression
[AGARD-R-689] p0082 N81-12115
Wind tunnel test of a fighter aircraft wing/store flutter suppression system: An international effort
p0082 N81-12116
Active control of an explosive wing-store flutter case --- Langley Research Center
p0082 N81-12117
Wind tunnel tests on a fighter aircraft wing/store flutter suppression system: The B.Ae control law
p0083 N81-12119
A study of the effects of store aerodynamic on wing/store flutter
p0490 N81-26153

WING TIP VORTICES
Method for reducing the tangential velocities in aircraft trailing vortices
p0066 A81-15880
The static pressure in a vortex core
p0228 A81-24072
On a generalization of Kaden's problem --- of initially planar semi-infinite vortex sheet rollup
p0288 A81-28676
Co-axial rotor aerodynamics in hover
p0465 A81-39899
Vortex drag reduction by diffusing vanes - Design for the 'Thrush' agricultural aircraft
[SAE PAPER 810605] p0521 A81-42762
Investigations of vortex formation on wings with cropped leading edges
[DGLR PAPER 81-046] p0610 A81-47601

WING TIPS
Application of a tip-fin controller to the Shuttle Orbiter for improved yaw control
[AIAA PAPER 81-0074] p0159 A81-20582
Effects of wingtip modifications on handling qualities of agricultural aircraft
[SAE PAPER 810606] p0522 A81-42763
Full scale visualization of the wing tip vortices generated by a typical agricultural aircraft
[NASA-CR-159382] p0071 N81-12019
Wingtip vortex turbine
[NASA-CASE-LAR-12544-1] p0496 N81-27096

WING-FUSELAGE STORES
A study of the effect of store aerodynamics of wing/store flutter
[AIAA 81-0604] p0304 A81-29467
Evaluation of methods for prediction and prevention of wing/store flutter
[AIAA 81-0606] p0304 A81-29469
Flow phenomena along fuselages and wing-fuselage systems of gliders
[NASA-TM-75401] p0186 N81-15983
Demonstration of a method for determining critical store configurations for wing store flutter
[AD-A092257] p0197 N81-16068
A theoretical method for the simulation of separation behavior of aircraft external stores --- applications to computerized wind tunnel tests
[MBB-FE-122/S/PUB/16] p0203 N81-16987
A study of the effects of store aerodynamic on wing/store flutter
p0490 N81-26153

WINGLETS
Winglets development at Israel Aircraft Industries
p0012 A81-11645
Aeroelastic tailoring of a composite winglet for KC-135
[AIAA 81-0607] p0304 A81-29470
The calculation of lift and drag characteristics of subsonic wings with winglets
p0480 A81-40442
Flight evaluation of the effect of winglets on performance and handling qualities of a single-engine general aviation airplane
[NASA-TM-81892] p0071 N81-12012
Induced drag ideal efficiency factor of arbitrary lateral-vertical wing forms
[NASA-CR-3357] p0072 N81-12022
Theoretical and Experimental studies of aerodynamic interference effects --- aerodynamic forces on winglets and on wing nacelle configurations for the YC-14 and KC-135 aircraft
p0190 N81-16017
Advanced aerodynamics and active controls. Selected NASA research
[NASA-CP-2172] p0259 N81-19001
KC-135 winglet flight results
p0260 N81-19011
Design and wind tunnel tests of winglets on a DC-10 wing
[NASA-CR-3119] p0492 N81-2704

Numerical optimization - An assessment of its role in transport aircraft aerodynamic design through a case study
p0006 A81-116
Advanced combat aircraft wing design
p0007 A81-116
Linear vortex theories of a profile and wing with air intake
p0019 A81-1270
Application of fracture mechanics in designing lower wing skin of transport aircraft
p0102 A81-170
Adaptive airfoils and wings for efficient transonic flight
p0153 A81-203
An analysis of gap effects on wing-elevon aerodynamic characteristics
[AIAA PAPER 81-0364] p0166 A81-207
Damping of aircraft wing vibrations by automatically controlled internal forces
p0170 A81-21
On the use of complex form of the Strouhal number in the study of nonlinear aeroelasticity
p0231 A81-247
The Coronel Transverse Wing Flight system
p0231 A81-247
Numerical study of stream surface structure near highly loaded wings
p0235 A81-25
Wing flapping with minimum energy
p0283 A81-27
The effect of jet non-uniformity on the lift of an augmentor wing
p0298 A81-29
Aerodynamic efficiency of the wing of new technology, a comparison of design expectation and flight test result
p0450 A81-37
Application of BFRP Crack Patching to Mirage III aircraft
p0481 A81-40
Effect of engine noise on aircraft wing laminar boundary-layer stability
p0510 A81-41
Evolution of transport wings - From C-130, C-141, and C-5 to C-XX
p0510 A81-41
Composite Wing/Fuselage Program
p0530 A81-43
Automatic damping of vibrations of an airplane wing by internal control forces
p0577 A81-46
Model design and instrumentation for intermittent cryogenic wind tunnels
p0037 N81-1

Low drag airfoil design utilizing passive laminar flow and coupled diffusion control techniques
[AD-A090778] p0072 N81-12024
Aircraft accident report: Allegheny Airlines, Inc., Nord 262, Mohawk/Frakes 298, N29824, Benedum Airport, Clarksburg, West Virginia, February 12, 1979
[NTSB-AAR-79-12] p0073 N81-12044
Optimal design studies on composite wings with static and dynamic constraints
[AAAF-NT-79-29] p0077 N81-12077
Aeroelastic optimization with multiple constraints
[AD-A090775] p0085 N81-12451
Jet wing interference for an overwing engine configuration
p0188 N81-16008
A method for the prediction of wing response to nonstationary buffet loads
[AD-A093037] p0208 N81-17043
Comparison of flight load measurements obtained from calibrated strain gages and pressure transducers
[AD-A093758] p0208 N81-17044
Continued development and correlation of analytically based weight estimation codes for wings and fuselages
[NASA-CR-152331] p0251 N81-18044
Description of the HiMAT Tailored composite structure and laboratory measured vehicle shape under load
[NASA-TM-81354] p0251 N81-18047
Investigation of EMAT base system for the detection of bolt hole type cracks. Part 2: Reliability evaluation and system definition for detection of cracks under fasteners by EMATs
[AD-A094350] p0258 N81-18420
Overview of advanced wing design --- Ames 12-Foot Pressure Tunnel and 11-Foot Transonic Wind Tunnel
p0260 N81-19012
Application of a structural optimization procedure for advanced wings
[AGARD-R-691] p0333 N81-20064
A study of high-altitude manned research aircraft employing strut-braced wings of high-aspect-ratio
[NASA-CR-159262] p0333 N81-20067
The prediction of normal force and rolling moment coefficients for a spinning wing
[NASA-CR-165680] p0333 N81-20068
A study of a VTOL thrusting ejector in low speed flight, volume 1
[NASA-CR-166137-VOL-1] p0337 N81-21017
A study of a VTOL thrusting ejector in low speed flight, volume 2
[NASA-CR-166137-VOL-2] p0337 N81-21018
Structural flight loads simulation capability, volume 1
[AD-A096572] p0374 N81-22044
Structural flight loads simulation capability. Volume 2: Structural analysis computer program user's manual
[AD-A096594] p0375 N81-22045
The development of a theoretical and experimental model for the study of active suppression of wing flutter
p0376 N81-22058
An asymptotic unsteady lifting-line theory with energetics and optimum motion of thrust-producing lifting surfaces
[NASA-CR-165679] p0385 N81-23035
Aircraft wing weight build-up methodology with modification for materials and construction techniques
[NASA-CR-166173] p0387 N81-23068
Evaluation of a pneumatic boot deicing system on a general aviation wing model
[NASA-TM-82363] p0441 N81-25065
Aerodynamic analysis of a fighter aircraft with a higher order paneling method
[AD-A099404] p0483 N81-26082
Qualitative comparison of calculated turbulence responses with wind-tunnel measurements for a DC-10 derivative wing with an active control system
[NASA-TM-83144] p0491 N81-26496
Design and wind tunnel tests of winglets on a DC-10 wing
[NASA-CR-3119] p0492 N81-27086
The supercritical profile of the supercritical wing
[NASA-TM-76605] p0494 N81-27075
Protection against wing icing for Airbus A300 and A310
[NASA-TM-76584] p0494 N81-27079
Wing-alone aerodynamic characteristics for high angles of attack at supersonic speeds
[NASA-TP-1889] p0579 N81-30087
An aerodynamic analysis of deformed wings in subsonic and supersonic flow
[AD-A101675] p0580 N81-30091
Investigation of unsteady airloads on wings with oscillating control for active control purposes
[AGARD-R-699] p0635 N81-33161
Evaluation of pressure and thermal data from a wind tunnel test of a large-scale, powered, STOL fighter model
[NASA-CR-166170] p0635 N81-33162
A flight test evaluation of the Ball-Bartoe jetwing propulsive lift concept
[AD-A103579] p0637 N81-33195
WIRE
Civil helicopter wire strike assessment study. Volume 2: Accident analysis briefs
[NASA-CR-152390] p0023 N81-10019
Practical aspects of instrumentation installation in support of subsystem testing
p0546 N81-29090
WIRING
Electric installation work on aircraft --- Russian book
p0577 A81-46794
WIRING SYSTEMS
U WIRING
WORK CAPACITY
Maximizing the capacity of a single-runway airport
p0177 A81-22193
WORK HARDENING
NT STRAIN HARDENING
Increasing the strength properties of sheet parts by explosive forming of them with optimization of the production parameters
p0365 A81-33174
WORKING FLUIDS
Efficiency prediction for axial-flow turbines operating with nonconventional fluids
[ASME PAPER 81-GT-15] p0310 A81-29937
WORKLOADS (PSYCHOPHYSIOLOGY)
An information-processing interpretation of air traffic control stress
p0053 A81-13416
RNAV benefits today - Today and future requirements
p0111 A81-18056
Investigation of control, display, and crew-loading requirements for helicopter instrument approach
[AIAA 81-1820] p0555 A81-44110
Investigation of the physical working environment for cabin attendants within Scandinavian Airlines System /SAS/ --- noise conditions and aircraft vibration
p0568 A81-46357
WRAPAROUND CONTACT SOLAR CELLS

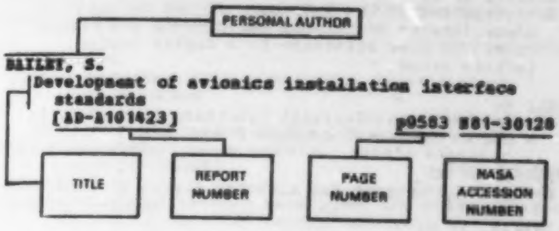
JANUARY 1982

Typical Personal Author Index Listing



Listings in this index are arranged alphabetically by personal author. The title of the document provides the user with a brief description of the subject matter. The report number helps to indicate the type of document listed (e.g. NASA report, translation, NASA contractor report). The page and accession numbers are located beneath and to the right of the title, e.g. p0261 N78-19125. Under any one author's name the accession numbers are arranged in sequence with the *IAA* accession numbers appearing first.

A

AARON, J. E., JR.
Development and evaluation of a prototype in-flight instrument flight rules (IFR) procedures trainer
[NASA-TM-73292] p0490 N81-26156

ABBEY, H. J.
Design options study. Volume 1: Executive summary
[AD-A089536] p0027 N81-10056
Design options study. Volume 2: Approach and summary results
[AD-A089537] p0027 N81-10057
Design options study. Volume 3: Qualitative assessment
[AD-A089538] p0027 N81-10058
Design options study. Volume 4: Detailed analyses supporting appendices
[AD-A089539] p0027 N81-10059

ABBINK, F. J.
Navaids calibration evaluation with a computer-controlled avionics data acquisition system
p0383 N81-23020

ABBOTT, J. L.
Computer generated radar images for navigation
p0049 A81-12793

ABBOTT, J. M.
Low-speed aerodynamic performance of 50.8-centimeter-diameter noise-suppressing inlets for the Quiet, Clean, Short-haul Experimental Engine (QCSEE)
[NASA-TP-1178] p0035 N81-11037

ABBOTT, T. S.
Effect of display size on utilization of traffic situation display for self-spacing task
[NASA-TP-1885] p0546 N81-29109

ABDEL AZIM, A. F.
Particulate flow in centrifugal compressors used in helicopters
p0297 A81-29109

ABEL, I.
Wind-tunnel evaluation of NASA developed control laws for flutter suppression on a DC-10 derivative wing
[AIAA 81-0639] p0306 A81-29893
Application of a flight test and data analysis technique to flutter of a drone aircraft
[AIAA 81-0652] p0308 A81-29511
Langley Research Center contributions in advancing active control technology
p0259 N81-19002
Wind-tunnel evaluation of NASA developed control laws for flutter suppression on a DC-10 derivative wing
[NASA-TM-83143] p0499 N81-27548
Some experiences with active control of aeroelastic response
[NASA-TM-83179] p0587 N81-30469
A method for obtaining reduced-order control laws for high-order systems using optimization techniques
[NASA-TP-1876] p0589 N81-30851

ABELKIS, P. R.
Effect of transport aircraft wing loads spectrum variation on crack growth
p0172 A81-21738

ABELL, R. R.
Prediction of future test needs, test facilities and procedures
p0433 N81-24104

ABELSON, L. C.
Mobilization of trauma teams for aircraft disasters
p0053 A81-13514
Passenger survival in wide-bodied jet aircraft accidents vs. other aircraft - A comparison
p0054 A81-13515

ABERNATHY, J. M.
An analysis of gap effects on wing-elevon aerodynamic characteristics
[AIAA PAPER 81-0364] p0166 A81-20783
An aerodynamic analysis of deformed wings in subsonic and supersonic flow
[AD-A101675] p0580 N81-30091

ABRAHAM, M.
Analysis, design and simulation of line scan aerial surveillance systems
p0357 A81-32092

ABRAIMOV, N. V.
Mechanical properties of aluminum coatings on heat-resistant steels
p0355 A81-31668

ABRAMS, C. R.
New Navy programs for development of integrated inertial sensors
p0485 N81-26108

ABRAMS, R.
Supersonic aircraft test experience - Test techniques and data analysis methods
p0419 A81-37299

ABRAMSON, J.
Optimization theory applied to higher harmonic control of circulation controlled rotors
p0571 A81-46606

ABSHAEV, M. T.
Operational radar display of the structure of thunderstorm hail clouds
p0069 A81-16474

ACE, R. E.
Candidate CDTI procedures study
[NASA-CR-165673] p0373 N81-22032

ACKERMANN, J.
Robust control system design
p0042 N81-11275

ACKERMANS, P. E.
High-level languages in affordable aircraft simulators
p0154 A81-20418

ADACHI, T.
The effect of sound on the vortex-shedding from a circular cylinder - Acoustical vibrations directed along axis of cylinder
p0233 A81-25312
Study of the secondary flow in the downstream of a moving blade row in an axial flow fan
p0355 A81-31767

On the numerical analysis of stall flutter in turbine cascade
p0613 A81-47963

ADAM, C. F.
Preliminary Airworthiness Evaluation (PAE 1) of the YCH-47D helicopter
[AD-A092633] p0194 N81-16046

ADAM, N. C.
F/A-18 Hornet Crew Station
p0327 A81-30355

ADAM, P.
Pilot installations for deposition techniques in the case of components exposed to heat and for diffusion joining of power plant components
p0449 A81-37634

ADAMCZYK, J.
Full potential solution of transonic quasi-3-D flow through a cascade using artificial compressability
[NASA-TM-81637] p0140 N81-14980

ADAMCZYK, J. J.
Inlet flow distortion in turbomachinery
[ASME PAPER 80-GT-20] p0109 A81-17952
Supersonic stall flutter of high-speed fans
[ASME PAPER 81-GT-184] p0317 A81-30078
Supersonic stall flutter of high speed fans
[NASA-TM-81613] p0140 N81-14978

ADAMS, J. J.
Simulator study of conventional general aviation instrument displays in path-following tasks with emphasis on pilot-induced oscillations
[NASA-TP-1776] p0142 N81-14997
Simulator evaluation of separation of display parameters in path-following tasks
[NASA-TP-1915] p0638 N81-33203

ADAMS, J. W., JR.
Application of scheduling heuristics on the aircraft maintenance depot
[AD-A094815] p0261 N81-19015

ADAMS, N. L.
Nonlinear rotor dynamics analysis

KREIM, W. J.
Comparison of NASA and contractor results from aeroacoustic tests of QCSEE OTW engine
[NASA-TM-81761] p0443 N81-25079

KREIN, S. E.
Joint-laboratory qualification testing of oils for gas turbine engines
p0103 A81-17375

KREINDLER, E.
Minimum fuel horizontal flightpaths in the terminal area
[NASA-TM-81313] p0549 N81-29133

KREISSELMEIER, G.
A stability augmentation system which covers the complete flight envelope for a F-4c aircraft without gain scheduling
p0009 A81-11622
Application of vector performance optimization to a robust control loop design for a fighter aircraft
[DFVLR-FB-80-14] p0130 N81-12970

KRENZ, G.
Application of advanced technology for improving the integration of engine and airframe for future transport aircraft
p0058 A81-14389
Transonic wing technology for transport aircraft
p0108 N81-16082

KRETSCHMER, D.
Considerations of the use of vitiated preheat
p0150 A81-20023

KRETZ, M.
Active elimination of stall conditions
p0571 A81-46605

KRIDER, E. P.
A case for submicrosecond rise-time lightning current pulses for use in aircraft induced-coupling studies
p0057 A81-14367

KRIEGESMANN, J.
Development and fabrication of refractory silicon carbide bodies, especially for gas turbine engines
[BMFT-FB-T-79-137] p0275 N81-19126

KRIJN, R.
Navaids calibration evaluation with a computer-controlled avionics data acquisition system
p0383 N81-23020

KRISHNAN, R. V.
Challenges in alloy design - Titanium for the aerospace industry
p0533 A81-43598

KRISHNAN, S.
Performance analysis of primary and secondary systems of a rocket ramjet engine burning

fuel-rich metallized propellants
p0292 A81-29066

KRISHNAN, V.
Stochastic modeling of an aircraft traversing a runway using time series analysis
p0183 A81-23368

KRISTIANSEN, U. R.
Experiments on effective source locations and velocity dependence of the broad band noise from a rotating rod
p0016 A81-11724

KRIUTCHENKO, V. N.
Damping in the problem of natural vibrations of an elastic system with internal resonance
p0236 A81-25696

KRONS, H.-D.
Device for lubricant flow measurement and conservation
p0208 A81-28743

KROO, I. M.
Aerodynamics, aeroelasticity, and stability of hang gliders. Experimental results
[NASA-TM-81269] p0423 N81-24025

KROSEL, S. M.
An automated procedure for developing hybrid computer simulations of turbofan engines
[NASA-TM-81605] p0044 N81-11686

KROTHAPALLI, A.
Partially confined multiple jet mixing
p0234 A81-25513

KRUECKER, K.
Improvement of effective minor lobe behavior of radar antennas through signal processing
p0152 A81-20091

KRUTKO, P. D.
Inverse problems of controlled flight dynamics - Longitudinal motion
p0101 A81-16968

Inverse problems of the dynamics of controlled flight - Lateral motion
p0236 A81-25903

Inverse problems of guided-flight dynamics - Longitudinal motion
p0577 A81-46749

KRYSIN, V. N.
Bonded laminated structures in aircraft manufacture
p0366 A81-33700

KRYZHANOVSKII, G. A.
Automation of air traffic control processes
p0623 A81-49462

KSENOFONTOVA, N. N.
Evaluation of the influence of local disturbances of flow past trailing and leading flaps from wind tunnel data on a rectangular wing section
p0299 A81-29307

KUBASCO, A. J.
Development of a low NO/x/ lean premixed annular combustor
[ASME PAPER 81-GT-40] p0312 A81-29954

KUBRESKII, A. A.
Choice of optimal parameters of a gyrovertical on the basis of a standard program
p0622 A81-48744

KUBINA, S. J.
Analyst/IAP interface and interactive graphics
p0057 A81-14270

KUBO, S.
On a linear theory of a supersonic flow past a delta wing with subsonic leading edges
p0149 A81-19872

KUBOTA, H.
An experimental investigation of the interaction between a glancing shock wave and a turbulent boundary layer
p0012 A81-11649

KUEBLER, W.
The role of the earth's shape in navigation - An example
p0614 A81-48120

KUEHN, H.
Active control of an explosive wing-store flutter case
[MBB-FE-17/S/PUB/25] p0131 N81-13973

KUEHNERLE, W.
Rotor model for verification of computation methods
[ISD-262] p0145 N81-15467

KUENZLER, H.
On the influence of steady state temperature and pressure distortion on the flow characteristics in an installed multistage jet engine compressor
[PNR-90022] p0275 N81-191

KUHLMAN, G.
Application of ion implantation for the improvement of localized corrosion resistance of M50 steel bearings
[AD-A097230] p0393 N81-2

KUHN, G. D.
Data base for the prediction of airframe/propulsion system interference effects
[NASA-CR-152316] p0251 N81-1

KUHN, J. P.
Detection performance evaluation of the ASDE-3 using fixed frequency and frequencyagile operation
[AD-A099513] p0499 N81-27

KUHN, H.
Active control of an explosive wing-store flutter case
p0082 N81-12

KUHN, P. M.
Design and preliminary tests of an IR-airborne LLWS remote sensing system
[AIAA PAPER 81-0239] p0163 A81-2

Clear air turbulence - An airborne alert system
p0562 A81-4

The 1979 clear air turbulence flight test program
p0266 N81-19

Flight tests of a clear-air turbulence alerting system
p0266 N81-19

KUHN, R. E.
V/STOL capability by modifying CTOL aircraft
[SAE PAPER 801179] p0400 A81-34

Design concepts for minimizing hot-gas ingestion in V/STOL aircraft
[AIAA PAPER 81-1624] p0525 A81-43

An engineering method for estimating the lateral/directional characteristics of V/STOL configurations in transition
[AD-A100386] p0540 N81-3

KUHN, T. E.
Small turbine engine augmentor. Phase 1: Preliminary design studies of afterburner and duct-burner configurations
[AD-A101595] p0583 N81-30

KUIPERS, J. B.
SPASYN - An electromagnetic relative position and orientation tracking system
p0173 A81-21

KUKACKA, L. E.
Water-compatible polymer concrete materials for use in rapid repair systems for airport runways
[AD-A102873] p0630 N81-32

KULESH, V. P.
Laser-optic method for investigating the trajectories and bending-torsional deformations of lifting propeller blade models
p0418 A81-3

KULESHOV, V. V.
Computer-aided investigation of turbomachine aerodynamics and aeroelasticity
p0613 A81-47

KULFAN, R. M.
The prediction of pressure distributions on an arrow-wing configuration including the effect of camber, twist, and a wing fin
p0243 N81-17

Prediction of nacelle aerodynamic interference effects at low supersonic Mach numbers
p0244 N81-17

KULIAEV, O. P.
Substantiation of oil change periods for ship and aircraft turbine engines
p0065 A81-15

KULKARNI, K. M.
Investigation of shot peening as a forming process for aircraft wing skins
p0458 A81-3

KULKARNI, S. V.
Coupled bending-torsion vibrations of rotating blades of asymmetric aerofoil cross section with allowance for shear deflection and rotary inertia by use of the Reissner method
p0289 A81-2

KUNAY, E. J.
Avionics Availability Study
[AIAA PAPER 81-1619] p0525 A8

KUNZ, D. L.
Stability of nonuniform rotor blades in hover

using a mixed formulation
[AD-A090756] p0076 N81-12071
KUNG, R.-M.
Stability of nonuniform rotor blades in hover using a mixed formulation
p0467 A81-40088
